Daily Intelligence.
BELLEVILLE, TUESDAY, DEC. 3.
FROM PORT COLBORNE.

(By Special Telegraph to the Daily Intelligence.)

PORT COLBORNE, Dec. 3.

The schooner *New Dominion* has filled with water. The cargo is a total loss. The *Daisy* broke her back last night, and is now full of water. She will be a total loss.

THE PRESIDENT'S MESSAGE.—A synopsis of the President's message, which came by telegraph to-day, will be found in other columns. It is chiefly devoted to the consideration of a conflict between himself and Congress—a conflict which promises to last so long as he occupies his present position.

ST. ANDREW'S SOCIETY.—The members of the St. Andrew's Society, headed by two pipers of the 78th Highlanders, and accompanied by St. George's Society, formed in procession at 2 o'clock this afternoon, and proceeded through the principal streets to St. Andrew's Church, where a suitable discourse was preached by the Rev. A. Walker, one of the Chaplains of the Society. The procession was one of the largest the Society ever had, and, with the St. George's Society, presented an imposing appearance.

The Commercial Bank.

The affairs of the Commercial Bank begin to look more promising, and there is evidently a strong belief that it will be able to effect an amalgamation with some other Bank. The favorite institution with the Directors of the Commercial is the Merchants' Bank of Montreal, reported to be one of the best managed institutions in the country. Its stock is held in 1081 premium, which is among the highest of any in Canada. Heretofore it has had no agencies, the head office in Montreal having been engaged principally in an exchange business. A contemporary speaking of this Bank says: "The very best men in Montreal control the management, so that the Commercial Bank incorporated with such an institution, with its valuable connections throughout the country, would render the corporation one of the very best and safest in the country. If this amalgamation be consummated, shareholders will not lose much over a quarter—if that—of the original amount invested, if the stock was purchased at par. The meeting on the 17th of December will decide all that, and it would be well for all those interested to attend."

The best evidence of a better feeling is the fact that Commercial Bank stock, which a few weeks ago was down to 4 and 7 cents, is now firmly held at 25, buyers offering 28.

The following statement, showing the liabilities of the Commercial Bank of Canada on the 19th day of October, 1897; also the liabilities and assets on the 23rd day of November, 1897, was submitted to the Committee on Banking by Mr. Cartwright, when the Commercial Bank Bill came before it for examination:

LIABILITIES.	
Oct. 19—Circulation.....	\$1,329,218
Deposits of all kinds.....	2,901,035
Due Local Banks.....	42,759
Due London Agents.....	224,382
	\$4,597,394
Nov. 23—Circulation.....	\$ 789,468

Reduction.....	\$1,972,623
Balance in favor of Bank, 23rd Nov., 1897:	
Assets.....	\$5,021,018
Liabilities.....	2,634,771
	\$2,406,247

In the face of such a statement, how cruel does the conduct of Mr. King appear.

Will any one say with such an exhibit before him, that Mr. King was justified in giving the Commercial Bank its death blow? Public confidence is the backbone of any Banking institution, and no matter how healthy its affairs may be, no matter how solvent its condition, take away from it the confidence of the public and you break its backbone—it is perfectly worthless. The stoppage of the Commercial Bank was a public calamity, the like of which Canada has not witnessed for many years. It is clear as noon-day that its affairs were in such a condition as to warrant any Bank coming to its assistance. Because the Montreal Bank refused, because it withdrew its confidence, and thus destroyed public confidence in the institution, it went to the wall, and the ruin was complete. The exhibit above shows that this calamity might have been averted.

Gold News.

A blast yesterday in the Richardson mine developed one of the richest sources of gold yet made even in that rich location. Some of it is now on exhibition at the store of James Glass, Esq., who by the way, was at the mine when the blast was made. The rock thrown out by this blast is a conglomerate composed of bluish spar, lignite, quartz and iron pyrites in all of which the gold is very richly diffused.

Maritime Provinces.

A Halifax paper regrets to learn that owing to the failure of the fisheries during the past season, great destitution prevails among the inhabitants of St. Margaret's Bay and vicinity. Numbers of them are dying.

It is rumored in St. John, N. B., that the Hon. Mr. Hazen has been appointed Inspector of the Postal Departments of New Brunswick and Nova Scotia.

A Halifax paper says that over twenty-five miles of the Windsor and Annapolis Railway are now graded and ready to receive the rails.

We see it stated in a Halifax paper that the receipts on the Nova Scotia Railways in October amounted to \$26,549.89, being an increase of \$4,934.02 over the corresponding month in last year. This year 145 miles of railway were in operation, while only 92½ miles were open in 1896.

It is said that there will be about sixty square rigged vessels leave Charlottetown, P. E. Island, this fall, loaded with oats for different parts of Europe.

P. E. Island papers contain the report of Hon. Mr. Hensley's mission to England to raise money by loan under an Act of the Island Legislature, past last session. It is a lengthy document, and enters in detail into the consideration of matters in connection with the mission. Without, however, wasting words over the affair, it may be as well at once to say that Mr. Hensley returned to the Island without effecting the loan, and that there is little probability of being secured at all except at a figure considerably above ordinary anticipations.

FROM OUR OTTAWA CORRESPONDENT.

OTTAWA, Dec. 24, 1897.

On the opening of the House the Speaker reported a copy of revised Rules for the guidance of the House, which were ordered to be printed.

A debate arose upon the second reading of "An Act to incorporate the St. Lawrence and Ottawa Railway Company." Mr. Crawford in moving the second reading, informed the House that the Bill proposed to legalize the sale of the old road to the new Company, to increase the capital of said Company, and within three years to commence work on the extension of the Road from the City of Ottawa "to a point on the River Ottawa, or Lake Duchesne, in the County of Ottawa, in the Province of Quebec; and for such purposes shall have full power to erect and construct a bridge or bridges across the River Ottawa at such place, at or near the Chaudières Falls as may seem most expedient," and argued from this point, that it was a work which fairly comes within the meaning of the Confederation Act, particularly as it is declared in the preamble that the work "is conducive to the general advantages of Canada."

Mr. Smith, of New Brunswick, Mr. McKenzie, and Mr. Blake, argued that the Bill was purely local, and should not be brought before this House. Mr. Jones, of Leeds, argued that it was a public Act. Sir John A. Macdonald agreed with those who opposed the Bill, that they should be careful how they infringed upon the rights of the Local Legislatures, but he had no doubt that the House of Commons had the power to say what local works should be declared of general interest, and if this Bill were to be adopted with the declaration in the preamble which I have quoted above, it would make it a Dominion work.

Mr. Shanly pointed out that provisions in the Act already empowered them to carry on business between Canada and the United States, and therefore it must come within the jurisdiction of the Dominion Parliament.

The inevitable Mackenzie, from London, had his second say, which was against the Bill; but as the leader of the Government had given his opinion that it was a question for the House of Commons to decide, whether proper provisions were made to compel the Company to carry out its provisions, he would not divide the House in reply to those who such a motion as Mr. Walsh, in reference to a Charter for the Southern Railway, Sir John A. Macdonald said that a Charter could be granted to build that road, if it were necessary to build ferries between Canada and the United States, then it would be necessary to come to the Dominion Parliament for power to do so.

An Act was then passed, legalizing certain appointments by the London Board of Trade.

In reply to Mr. Bolton, as to whether any Fishery Bounties had been paid, or are intended to be paid, from the general revenues of the Dominion, since the 1st of July last, and if not, such bounties conferred to vessels or claimants of any particular portion of the Dominion, Mr. Rose said no bounties had been paid, but that if any were due they would have to be paid; but it was not yet decided by the Dominion or Local Governments.

The Hon. Mr. McDougall, in reply to Mr. Mills, as to whether any correspondence had taken place between the Government and the Governments of the West Indies, or with any of the Governments of South America, with a view to the promotion of direct trade, by a mutual reduction of the tariffs, by promoting free trade in certain articles, or by encouraging direct steam communication, said there had been no correspondence between the Dominion Government and the Governments referred to by Mr. Mills, but there had been between the Government of the old Province of Canada and these Governments, which had resulted in the opening up of more direct communication, and more frequent mails, which had done much to facilitate trade.

Mr. Harrison, of Toronto, asked whether the Government House in the city of Toronto was insured, and whether the Confederate Government intended to take any, and if any, what steps towards its restoration? Mr. McDougall replied that in such cases, the Government were their own insurers, and that it was not the intention of the Dominion Government to restore them, that it was the business of the Province of Ontario.

No little amusement was created by Mr. Harrison, of Toronto, asking "whether it was the intention of the Government, in the contemplated alterations in the tariff, to increase the duties on spirits." Had such a question came from any person but an eminent lawyer, it would have become a by-word in connection with his name, and he would never have heard the last of it, but as it came from a man of his position, it will likely pass over.

Mr. St. John A. Macdonald said that it was a highly important question to put. In moving an address for copies and dates of all Orders in Council relating to the excise duty or service; of all changes in the form of returns or books of the Collector of the Excise, and a return of all appointments of Excise officers or temporary employees in the Excise service, and the salaries, and of continuance of such appointments or employments, between the first of June, 1896, and the first of September, 1897, Mr. St. John A. Macdonald said that he did so because he believed the duties of the Excise officers had been negligently looked after, and that many officers had been appointed, whose appointment had never been sanctioned by the Government, and that there had been high officers appointed at a certain time, when it was supposed they would be wanted, and that they had not yet been dismissed, but were still drawing pay. He also complained that an order had been issued on the 20th of June last, compelling distillers and brewers to procure certain apparatus, which were not so much for the good of the Government as to enable them to show what spirits were manufactured, when they had to renew their licenses on the 1st of July, the distillers, etc., represented to the Government that they were under contract to all certain orders and to feed certain cattle, and that to compel them to stop at once, would be a great disadvantage and loss, and that if compelled to do so, they could not procure mechanics enough in the Province to do the work in the time required, still the Government persisted.

Mr. Howland said he had no objection to bringing down the papers. He could not speak positively as to the order referred to, but what was done was for the good of the Province; that certain persons were appointed, but before these appointments could take place it was necessary for the applicants to pass, not only the Board of Examiners, but a special Board appointed for that purpose. The question of dispensing with the services of the officers referred to was now under his consideration.

An address was ordered on a motion made by Mr. Anglin, for a return showing the entire amount paid to the several delegates sent to England, in the year 1896, by the Government of the old Province of Canada, and by the Governments of Nova Scotia and New Brunswick, to promote the passage of the Act of Confederation, and the amounts paid on their accounts to any parties; distinguishing the amount paid to each delegate, or on his account; and also the amounts paid to the several temporary services, and the amounts paid as expenses to each, and also the amounts (if any) yet due to any of the delegates, or on their account.

Mr. Harrison asked for the Reports of General Napier and General Langens, relative to the campaign at Fort Erie, in June, 1895, and for the report of Col. Woolsey relative to the military camp at Thorold. Mr. Cartier replied that the Government was

not in possession of reports from the first despatch that they were available to the Imperial Authorities, but if the latter were asked for separately it might be given.

An Act respecting the Statutes of Canada, and the suspension of the *Albion Corps* Act, were read a third time, and the House adjourned until Tuesday at 6 o'clock, when the question of the Intercolonial Railway will be taken up.

Telegraphic News.

BY ATLANTIC CABLE.

CONK, Dec. 1.—A great demonstration of sympathy for the Fenians executed at Manchester was made here to-day. The ceremonies were similar to those which took place on Sunday last in London. The funeral procession was very long and imposing. It was headed by a lofty catafalque, trimmed with green and black, and drawn by six horses. This was followed by nearly twenty thousand persons, most of whom were green emblems shrouded in crape. Over 1,500 women took part in the procession, and several priests were observed marching in the ranks. Good order prevailed throughout the day.

PARIS, Dec. 2.—A small body of French cavalry will occupy Rome, and will probably remain there permanently. All other French troops have evacuated the territory.

ROME, Dec. 2.—The Pope will materially strengthen the Papal army. LIVERPOOL, Dec. 2.—The weather has been very severe, and many ships, with loss of life, have occurred. The barque "Guardian Angel," bound for New York, is lost, and only seven of the crew saved.

LONDON, Dec. 3, noon.—Consols and Bonds declined ½.

LIVERPOOL, Dec. 3, noon.—Cotton dull and unchanged. Broadstuffs quiet.

LIVERPOOL, December 3, 2 p. m.—Wheat firmer; Corn 47½; Peas 43½. Lard Oil 42.

SOUTHAMPTON, Dec. 3, noon.—The steamer "Deutschland," from New York, has arrived.

QUEENSTOWN, Dec. 3, noon.—The steamship "Chicago," from New York, has arrived.

American Despatches.

The President's Message.

NEW YORK, Dec. 2.—The following is a summary of the President's message: The President opens by saying that the continued disorganization of the Union, to which the President has so often called the attention of Congress, is yet a subject of profound and patriotic consideration. He says: "It is, therefore, with profound regret and with a sense of the obligation imposed upon the President by the Constitution, to give Congress from time to time information of the state of the Union, I am unable to communicate any definite adjustment, satisfactory to the bulk of the people, of the questions which since the close of the revolution, have agitated the public mind. On the contrary, I am forced to declare that at the present time there is no union, as our fathers understood the term, and as they meant it to be understood by us. The union which they established can only exist when all the States are represented in these Houses of Congress. To the President the process of restoration requires a plan, and a plan implies duty. It consists merely in a faithful application of the Constitution and laws. The execution of the laws is not now observed by physical force. There is no military or other means, real or pretended, which can prevent obedience to the Constitution, either North or South. All the rights and all the obligations of the States and individuals can be protected and enforced by means perfectly consistent with the fundamental law. It is clear to this apprehension that the States lately in rebellion are still members of the national union. When did they cease to be so? The ordinance of secession, adopted by a party in most of them a very small portion of their citizens, were nullified. If we know now that they are valid and effectual for the purpose for which they were intended, we sweep from under our feet the whole ground upon which we justified the war. The President elaborates these views at great length, and then says: Being perfectly convinced that these views are correct, I would be unfaithful to my duty if I did not recommend the repeal of the acts of Congress which place ten of the Southern States under the dominion of military masters. If calm reflection shall satisfy a majority of your honorable bodies that the acts referred to are in direct conflict with the Constitution, I dare not permit myself to doubt that you would immediately strike them from the statute book. The President proceeds to say that as a mode of punishment the measures under consideration are the most unreasonable that could be invented. Many of these people are perfectly innocent, and of those who are guilty, with their own consent, the degrees of guilt are as various as the shade of character and temper. But these acts of Congress do indiscriminately vengeance on classes, sects, parties, or upon whole communities, for offences committed by a portion of them against the Government. But Christianity and civilization have made such progress that recourse to punishment so cruel and unjust would meet the condemnation of all unprejudiced and right-minded men. The primitive justice of this system, especially in this country, does not consist in stripping whole States of their liberty, and reducing all of their people, without distinction, to the condition of slaves. He says he is aware that it is assumed that this system of government for the South is not to be perpetual. If the guarantee of the Constitution can be broken provisionally, to serve a temporary purpose, and in a part only of the country, it would do for them everywhere and for all time. Arbitrary measures often change, but they gen-

erally change for the worse. It is the course of despotism that tends to no halting place. The President then says it is manifestly and avowedly the object of these laws to confer the privilege of voting on the negro, and to disfranchise such number of whites as to give the former a clear majority in all the States in the Southern States. We are not permitted to do well that good may come, but in this case the end is evil. The subjugation of those States to negro domination would be worse than the military despotism under which they are now suffering. The blacks in the South are entitled to have the protection of just laws for their rights of person and property, and if it were practicable at this time to give them a government of their own, it is questionable to do so, but now they are permitted to elect legislators, organize States and elect Presidents. The message goes on to argue the dangers of the extension of the elective franchise, and says that four millions of degraded slaves yesterday cannot be made intelligent freemen to-day. The President then calls to join in any plan to better the condition of the negroes in all their rights, save transferring to them our political influence. The President alludes to the uncounted millions that the Congressional plan has cost, and says it will increase the burden of taxation and may bankrupt us. It will require a strong standing army, and probably more than \$2,000,000,000, to maintain the supremacy of negro governments, when they are established. The money thus thrown away if put into a sinking fund, would pay the national debt in fifteen years. It is vain to hope that the negroes will maintain their own ascendancy. He disclaims any intent to oppress the President may go towards protecting the Constitution and opposing the unconstitutional acts of Congress, and says it has caused him much solicitude, and he believes that executive resistance to unconstitutional acts might in high times of party excitement lead to civil war. The executive would conclude much to preserve the peace, but there may be times when he would have to take a stand, regardless of the consequences. The people are not wholly disarmed of the means of self-defence. In all the Northern States they still hold in their own hands the right of protection, and the late result of the ballot shows, he says, that his faith in the people was not misplaced. The Civil War Bill is next discussed and denounced as unconstitutional and extra-judicial. The President then elaborately discusses the financial question. In comparing the currency circulation of seven years ago with the present, he says: "The striking fact made it the special duty of the government to take such measures as will enable the holders of its coupons, and those of the national banks, to convert them into specie, or its equivalent, without loss. A return of our circulating paper medium need not necessarily follow. This would depend on the law of demand and supply. The various issues of one kind or another of paper currency of the same is issued to some extent. The President declares that equal and exact justice requires that all of the creditors of the government should pay in a currency of equal value, not gold for one and paper for another. He favors the measures of retreating our paper currency, the return of gold and silver may cease to be articles of traffic and so much to our revenues of trade. The attention of Congress is earnestly invited to the necessity of a thorough revision of our revenue system, and the prudent reduction in the number of articles taxed. The President says that peace has been secured with the Indians, and that the great and noble warriors of the Interior, Navy, War, and Post Office Departments are ready to assist. Regarding foreign affairs, the President says Mexico is relieved from foreign intervention, and peace reigns in Central and South America. The United States were creditably represented at the Paris Exposition.

[Signed.] ANDREW JOHNSON.
NEW YORK, Dec. 2.—The *Herald's* Kingston, Jamaica, special says: "Earthquakes have occurred at St. Thomas, St. Croix, Tortola, Peter Island, and Little St. John. Many lives and vessels have been lost. There was also a volcanic eruption, the sea was raised fifty feet over the land, and its retrocession swept off the populace with immense losses of life and merchandise.
Havana advices state that the body of Maximilian has arrived there. Moquegua's trial has been concluded—his sentence was commuted to a fine of \$12 and two years exile.
—An extra of the Windsor *Dominion* informs us that a disastrous fire occurred in that town on Sunday night, by which \$30,000 worth of property was destroyed. The names of the losers are Thos. Clatter, Mr. Rolfe, Sol. White, F. T. Rice, Hagerty and H. Wilcox.
A "BONE OF CONTENTION."—The other evening, as a worthy divine and a broad thinking doctor were discussing about the "Essays in Reviews," some doubts were raised whether Eve was formed from "a bone," when an Irish gentleman remarked: "Well, if Eve was so formed, it must have been from the Bone of Contention."

SPECIAL NOTICES.

TYPHOID FEVER.
This disease is not only cured by Dr. Radway's Relief and Pills, but prevented. If exposed to it, put one spoonful of Relief in a tumbler of water. Drink this before going out in the morning and several times during the day. Take one of Radway's Pills one hour before dinner, and one on going to bed.
If infected with Fever, take 4 or 5 of the Pills every six hours, until copious discharges from the bowels take place; also drink the Relief diluted with water, and bathe the entire surface of the body with Relief. Soon a powerful perspiration will take place, and you will feel a pleasant heat throughout the system. Keep on taking Relief immediately, every four hours, also the PILLS. A cure will be sure to follow. The Relief is strengthening, stimulating, soothing and quieting; it is sure to break up the Fever and neutralize the poison. Let this treatment be followed, and thousands will be saved. The same treatment in Fever and Ague, Yellow Fever, Ship Fever, Bilious Fever, will effect a cure in 24 hours. When the patient feels the Relief irritating or burning the skin, a cure will be positive. In all cases where pain is felt, the Relief should be used.
Relief 50 cts.; Pills 25 cts. Sold by all Druggists.
See Dr. Radway's Almanac for 1888. 1792-4-4-2w

Read what Dr. Scoville says of ALLAN'S LUNG BALM:
Messrs. J. N. HARRIS & CO:
Gentlemen—I make the following statement from a perfect conviction, and knowledge of the benefits of ALLAN'S LUNG BALM in curing the most deep-seated Consumption and Croup. I have witnessed its effects on the young and the old, and I can truly say that it is by far the best expectorant I have ever used. I am acquainted with Coughs, and all the various stages of Lung complaint. I believe it to be a certain cure, and if every family would keep it by them, ready to administer upon the first appearance of disease about the lungs, there would be very few cases of Lung Consumption. It gives strength in the system, stops the night-sweats, and changes all the morbid secretions into a healthy state. Yours respectfully,
A. L. SGOVILL.

Deposit on Subscription Twenty-five per cent.

GEO. D. WYCKOFF, A. L. MCLELLAN, JAS. CARR RITCHIE, F. E. KILVERT, ASA A. BURNHAM, JR., J. E. O'REILLY, E. H. HALE, and HUGH FAIRGRIEVE, are the owners of the property hereinafter mentioned, and are desirous of forming a Stock Company, with the capital of \$25,000, and are to receive and take in payment for the said property \$1,250 in cash, and 2,250 shares of paid up Stock of the said company. The said parties are now taking proceedings for its incorporation, under cap. 23, 27, 28 Vic., and have much pleasure in calling the attention of the public to the following Prospectus:

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 19 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which give this company peculiar advantages over many others, there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out; and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, crosscutting the different veins, and giving eighty feet of backs to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.
Another great advantage in this property is, that immediately the work is commenced ore can be taken out in quantities more than sufficient to pay the working expenses and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.
GEO. D. WYCKOFF, ASA A. BURNHAM, JR., F. E. KILVERT, A. L. MCLELLAN, JAS. CARR RITCHIE, JAS. EDWIN O'REILLY, E. H. HALE.
PROV. PRESIDENT—GEO. D. WYCKOFF.
SOLICITORS—THOMSON & KILVERT.

PROSPECTUS OF THE

EL DORADO MINING COMPANY OF MADOC.

CAPITAL STOCK - - - \$72,000.
Divided into 2,400 Shares of \$30 Each.
Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its incorporation, under Chapter 23, 27, and 28 Vic., for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 5th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 40 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by E. C. & Taylor's Mill, which returned \$53.80 in Gold, which specimen can be seen at J. E. Ellis, on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore.

The projectors have determined only to sell sufficient stock to repay the advances, and to carry on the work satisfactorily. They have thereupon decided to sell only 823 shares of the value of \$30 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1888. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be exceedingly remunerative.

The Provisional Directors are as follows:
A. F. WOOD, late Warden of the County of Hastings.
RICHARD SPARKING, Managing Director and Superintendent.
T. S. MCGILVER, of Madoc.
MARTIN BURNELL MCGREGOR, of Madoc.
T. A. MITCHELL, of Madoc.
ALDERMAN VICKERS, of Toronto.
J. E. ELLIS, of Toronto.

MCLELLAN & MCLELLAN, Solicitors. A. F. WOOD, President.

The Alabama Claims.
DECISIVE TONE OF PRESIDENT JOHNSON'S MESSAGE—MR. SEWARD TO CLOSE HIS ADMINISTRATION "IN A BLAZE OF GLORY" THE UNITED STATES TO SEIZE ON CANADA IF A SETTLEMENT IS NOT IMMEDIATELY COME TO.

The New York Herald says:
The most striking and interesting feature of the forthcoming message of the President to Congress, as we are informed, will be that portion of the document relating to that portion of the document relating to the "Alabama" claims and the position taken by the British Government in the important international controversy to which they have given rise. The allusion to these topics by President Johnson, while it will probably be clothed in language plain and emphatic enough to prevent any misconception of its import, and while it will be accepted as honest and abroad as significant of the future attitude of our Government, will, in fact, be only the precursor of a grand stroke of policy with which Secretary Seward contemplates closing his public career, and which may yet enable the administration of his chief to make an exit in a blaze of glory not equalled in brilliancy by the variegated fire and dazzling pyrotechnic display in the midst of which the dull green curtain falls upon so many of our modern spectacular dramas.

Following closely upon the heels of the Presidential message will come a peremptory demand upon Great Britain by the American Secretary of State, for a full and immediate settlement of the Alabama claims, on the basis of the account rendered by the United States, without any offer of reduction. The voluminous correspondence in which both sides have already indulged has exhausted all arguments that can be advanced by either government in support of its views upon the subject, and it is by no means improbable that Secretary Seward feels himself no match for the trained diplomats of England upon paper, and believes that he will find the musket and bayonet more effective weapons than the pen with which to enforce a recognition of his country's rights. If this demand, already too long evaded, shall fail to meet with a prompt and favorable response, Secretary Seward, by a sudden and masterly movement, may march in array into Lower Canada, seize upon Quebec and Montreal, and hold them as material security for the full indemnification of his government and its citizens for all losses and damages sustained by them through the aid extended by England, or by British subjects, to the insurrectionary South during the war of the rebellion.

In pursuing such a course we shall but follow closely the example of the British government, which, through a long career, has promptly laid its grasp upon the territory of nations against which it has had occasion to unhesitate the sword. Upon the first outbreak of hostilities with France, the fleets of England swept the seas and seized upon every French possession within their reach; nor were the occupied islands restored to the country to which they belonged until the policy of their captors was fully satisfied. The objection may be urged that this is no parallel case, since the United States are not now at war with Great Britain; but the Alabama claims have reached a point beyond which there lies no medium course between immediate payment, voluntary or enforced, and from the unmistakable indications of the Presidential message, we believe it will be evident that with England herself must rest the decision whether peace shall continue, or the crisis culminate in war. The masterstroke probably contemplated by Seward will be nothing more than a precautionary measure, like the great flank movement of Bismarck on Napoleon, when, adopting the latter's favorite doctrine of the consolidation of nationalities, the shrewd statesman of Berlin made Germany a unit, and left the French Emperor in a helpless condition, destitute alike of the power to prevent and the courage to resist.

It must not be supposed that in following such a line of policy our government or people have any desire to obtain permanent possession of the new dominion by forcible annexation. We do not want the provinces at the present time. The transfer of British Columbia to the United States may prove all that England will be called upon to yield as a full satisfaction of our just demands against her. It will be a cheap atonement for acts that might have cost her a bloody and devastating war for the forbearance of the aggrieved party. It will be a small recompense for the injuries we have suffered, directly and indirectly, through the hostile attitude of England and Canada toward us during our terrible struggle for national existence. But if our occupation of Canada shall be the means of establishing the independence of the new dominion and linking the chain of provinces together in a solid republic, England will only have her own Machiavellian policy to blame for the result. It would at least be a blessing to Canada, freed from her useless alliance with Great Britain; no longer the battle ground in any war between England and the United States; in friendly relations with her powerful neighbor, and liberal treaties

QUEEN
INSURANCE COMPANY
CAPITAL, - - - \$10,000,000.
FIRE and LIFE.

LIFE DEPARTMENT.
THE principles on which this Company is founded contain all the elements required to develop the benefits of Life Assurance, and afford every facility to intending assurers. One of the advantages secured by those who insure their lives with this Company is that the outside expenditure for Management is absolutely reduced to a small fraction of the net income. This most important restriction shows that the interests of participating policy holders are closely watched and carefully attended to by the Company. Attention is especially called to this point, as the proportion of premiums expended for Management Must Largely Influence Profits.

The next division of profits takes place in 1868, and all those who wish to participate in the profits should insure at once.

SPECIAL NOTICES.

TYPHOID FEVER.

This disease is not only cured by Dr. RADWAY'S RELIEF PILLS but prevented. Exposed to it, put one spoonful of Relief in a tumbler of water. Drink this before going out in the morning and several times during the day. Take one of RADWAY'S PILLS one hour before dinner and one on going to bed.
 Healed with Fever, take a 6 of the Pills every six hours, until copious discharges from the bowels take place; also drink the Relief diluted with water, and take the entire surface of the body with Relief. Soon a powerful perspiration will take place, and you will feel a pleasant heat throughout the system. Keep on taking Relief immediately, every four hours, also the Pills. A cure will be sure to follow. The Relief is strengthening, stimulating, soothing, and quietening. It is a sure break up of the fever, and neutralizes the poison. Let this treatment be followed, and thousands will be saved. The same treatment in Fever and Ague, Yellow Fever, Ship Fever, Bilious Fever, will effect a cure in 24 hours. When the patient feels the Relief irritating or heating the skin, stop the pills, and take the pills. In cases where pain is felt, the Relief should be used.
 Relief 50 cts.; Pills 25 cts. Sold by all Druggists.
 See Dr. RADWAY'S Almanac for 1868. 176-2-41-2w

Read what Dr. Scovill says of ALLEN'S LUNG BALSAM:
ALLEN'S LUNG BALSAM.
 Messrs. J. N. HARRIS & CO:
 GENT—I make the following statement from a perfect conviction and knowledge, that the benefits of ALLEN'S LUNG BALSAM in curing the most deep-seated PLEURISY, CONSUMPTION, and all other diseases of the lungs, is a fact which I can truly say that it is by far the best expectorant remedy with which I am acquainted. For Coughs, and all other diseases of the lungs, I believe it to be a certain cure, and if every family would keep it by them, ready to administer upon the first appearance of disease about the lungs, there would be very few cases of fatal consumption. It is a sure strength to the system, stops the cough, cures, and changes all the morbid secretions to a healthy state.
 Yours respectfully, A. L. SGOVILL.
 Sold by all Medicine Dealers.

PROSPECTUS OF THE ROSE MINING COMPANY OF MADOC.

Capital Stock, - - - \$25,000.
 Divided into - - - 5,000 Shares.
 5,000 Shares - - - \$5.00 Each.
 Deposit on Subscription Twenty-five per cent.

GEO. D. WYCKOFF, A. L. MCLELLAN, JAS. CARL RITCHIE, F. E. KILVERT, ASA A. BURNHAM, JR., J. E. O'REILLY, E. H. HALL, and HUGH FAIRBROTHER, are the owners of the property hereinafter mentioned, and are desirous of forming a Stock Company, with the capital of \$25,000, and are to receive and take in payment for the said property \$1,350 in cash, and 2,350 shares of paid up Stock of the said company. The said parties are now taking proceedings for its incorporation, under cap. 23, 27-28 Vic, and have much pleasure in calling the attention of the public to the following Prospectus:

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 3rd concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives this company peculiar advantages over many others, there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out; and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of back to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.
 Another great advantage in this property is, that immediately the work is commenced can be taken out in quantities more than sufficient to pay the working expenses and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.
 GEO. D. WYCKOFF, ASA A. BURNHAM, JR., F. E. KILVERT, A. L. MCLELLAN, JAS. CARL RITCHIE, JAS. EDWIN O'REILLY, E. H. HALL.

PROSPECTUS OF THE EL DORADO MINING COMPANY OF MADOC. (LIMITED).

CAPITAL STOCK - - - \$72,000.
 Divided into 2,400 Shares of \$30 Each.
 Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its incorporation, under Chapter 23, 27, and 28 Vic, for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 3rd Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 40 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$38.50 in Gold, which specimen can be seen at J. E. Ellis' on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore.
 The projectors have determined only to sell sufficient stock to repay the advances, and to carry on the work satisfactorily. They have thereupon decided to sell only 823 shares of the value of \$30 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1868. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings.
 RICHARD SPARLING, Managing Director and Superintendent.
 T. S. MCGILVER, of Madoc.
 MAHLON BIRWELL MCGREGOR, of Madoc.
 T. A. MITCHELL, of Madoc.
 ALDERMAN VICKERS, of Toronto.
 J. E. ELLIS, of Toronto.

MCLELLAN & MCLELLAN, Solicitors. A. F. WOOD, President.

Belleville, Nov. 1, 1867. 166-4f

Prince Rupert's Drops.

The properties of unannealed glass are beautifully shown in the scientific toy bearing the above title, made by dropping melted glass into water, when they take a long oval form tapering to a point at one end. While the body of these drops will bear a smart stroke from a hammer without fracturing, if a portion of the smaller end is snapped off, the whole mass will be broken into an almost impalpable powder with a violent shock. Prof. Faraday used to illustrate the incompressibility of water, the concussion from the disruption of the drop shattering the glass bottle. Another interesting experiment with the same toy is given by Rensch. In place of water he fills the vat with melted resin, and when this has solidified he nips off the end of the glass drop, the bottle is broken as before, and the mass of resin is deeply fissured throughout its length. The drop is found as a kernel, loosely aggregated together, but easily detached from the resin, entire. When broken to pieces the fragments will be seen to have the form of a cone on a hemispherical base, like some forms of hail.

Poetry and Insurance.

We have often spoken of the importance of life insurance, and pointed out the great benefits to be derived from it. In the year 1777 an English "poet" (whose name is unapparently lost to fame) wrote a poem on the subject, the opening verse of which became so popular with insurance agents that it was very frequently inserted over the entrance to their offices. It was as follows:

"Come all you jolly Britons who love your blooming wives
Insure large sums on your precarious lives,
So that your widows may be rich when you are gone,
And they may live in happiness when you are quite forgotten."

National Covenant of Scotland.

A correspondent informs us that a very interesting and valuable document happens to be in Liverpool at present, being one of the actual originals of the National Covenant of Scotland, signed in the year 1633. It is written on strong vellum, in a fine hand, and is subscribed by hundreds of names, prominent among which are those of Montrose, Rother, Drumlanrig, Elcho, Wemyss, Balcanquhall, Leslie, and others. This is one of the few sheets which were got up in 1633, the better to facilitate signing the great national protest in different parts of the country. There may be more, but we know of only of other two, the sheets being now in existence. One of these is in the Advocates' Library, Edinburgh, and the other was disposed of to Government by the trustees of the late Marquis of Breadalbane, in whose family it had remained since the time his ancestor appended his name to the document.—*London Scotsman.*

SCRAPING AND WASHING TREES.—We consider early winter to be the best time for scraping and washing the trunks of trees. It is well known to all observing fruit growers that the loose bark of trees is the winter quarters of myriads of insects, where they securely remain until the ensuing spring, when the warm genial weather invites them to their copy houses, and begin their destructive operations for the season. We have found a narrow saw, rather fine-toothed, to be an excellent tool in rasping off the superfluous bark. It accomplishes it more uniformly than a hoe, trowel or other scraper, a trowel or a short handled hoe, however, is very good, when the other may not be possessed. After the bark is removed, the trunks should be washed thoroughly with a preparation of white oil, soap and water, large in proportion of a pound of the soap to four gallons of water. It can be applied to large trees with a hickory broom or a stiff whitewash brush, and to small trees, especially dwarfs, with the hand scrub brush. Sticky trees, which at this season can be easily detected by being covered with a species of fungus, or perhaps more properly a peculiar insectivorous deposit—should be scrubbed so as to completely remove this. The mixture will eat off the bark, and the removal of the stem of all extraneous and injurious substances will injure to it new health and vigor the ensuing season—in some instances to a surprising extent. When white-oil soap is not obtainable, ley may be used, but it should not be very strong, or it might be injurious to the roots of the tree if applied plentifully and the tree small.—*Germantown Telegraph.*

A barge owned in Picton recently crossed from the Strait of Camo to Cardiff, in the British Channel, in the unprecedentedly short time of twelve days.

LOOK : THE DAILY LONDON ADVERTISER is published every evening, and sent by mail at \$4.00 per annum, payable in advance. It contains all the local and general news, the latest telegrams and market reports. As its daily circulation is the largest in Upper Canada, outside of the Toronto Press, advertisers who wish to reach the ear of the West should take advantage of its columns. The Globe says of the ADVERTISER:

"This excellent newspaper now appears in new type, and on the most improved paper in the country. The ADVERTISER is well conducted, and though not an old paper has for its daily and weekly editions a large circulation, larger than any other journal published in this neighborhood. It is, therefore, a first-rate advertising medium."

READ : THE WEEKLY ADVERTISER is the best and cheapest paper in Upper Canada. Terms, \$1.25 per annum, payable in advance. The present year's ADVERTISER is splendidly illustrated with get-up of clubs. Specimen copies and circulars sent on application. Send for specimen. All letters should be addressed to JOHN CAMERON, ADVERTISER Office, London, Ontario.

American Invoices—Discounts.

FINANCE DEPARTMENT, CUSTOMS, QUEBEC, 6th March, 1893.

IT is directed by the Hon. The Finance Minister, that hereafter Weekly Notices be published and furnished to Collectors of Customs, as to the rate of discount to be allowed on American Invoices, which is to be in accordance with the price of gold as represented by Exchange, at a rate equal thereto. Such notices to appear every Saturday in the *Canada Gazette*.

R. S. M. BOUCHETTE.

FINANCE DEPARTMENT, CUSTOMS, OTTAWA, June 8, 1897.

IN accordance with the above Order, Notice is hereby given that the authorized discount is now fixed at 25 per cent, which percentage of deduction is to be continued until next Weekly Notice, and to apply to all purchases made in the United States during that week.

THOMAS WORTHINGTON, 3D-1f Assistant Commissioner of Customs.

GODEY'S LADY'S BOOK For 1898.

THE CHEAPEST OF LADIES' MAGAZINES, BECAUSE IT IS THE BEST.

The friend of woman, the arbiter of fashion, the encourager and publisher of the best literature of the day, the pattern from which all others copy.

READING MATTER.

In this there will be an improvement. The volume for 1898 will be set up with new and choice type, and of a size that will enable us to give an additional quantity of reading matter without increasing the price to each number.

BEAUTIFUL, STYLISH PLATES.

Of these the Lady's Book contains *fourteen* each year, superior (we challenge comparison) to any published in the United States, and no periodical.

THE LITERATURE OF THE LADY'S BOOK.

MARION HARLAND, Author of "Aimee," "Hidden Path," "Miss Side," "Nemesis," and "Marian."

who contributes to no other monthly publication, will furnish a new novel for 1898, called "Pensive Revelations," that will run up to the end of the year. Her stories are anxiously sought after, and as they are copyrighted, can be found nowhere but in *Godey's*. Our former efficient corps of writers has also been retained.

OUR FASHION PLATES.

The original double fashion-plates will be continued. *MOORE'S COTTAGES*—The only magazine in this country that gives these designs in the Lady's Book.DRAWING LESSONS—In this we are also alone. ORIGINAL MUSIC—*Godey's* is the only magazine in which music prepared expressly for it appears.

We have also a children's, a horticultural, and a health department.

GODEY'S INVALUABLE RECEIPTS upon every subject, for the Boarder, Nursery, Kitchen, House, and Laundry.

TYPED ENGRAVINGS.—This is a series of engravings that no one has attempted to surpass.

LADIES' FANCY WORK DEPARTMENT.—Some of the designs in this department are printed in color in a style unequalled.

AD-

American Watches.

THE true value of Machinery applied to Watchmaking is not that by its use Watches are made rapidly, but that they are made correctly. Very few people know why a Waltham Watch should be superior to any other. In the first place, at Waltham the Watch is regarded as only a machine, to be constructed like any other machine, on mechanical principles. The factory is, indeed, little else than a machine shop, the principal work in which is not more upon watches than upon machinery to make watch parts. If the watches are good, it is because the machinery is good. Of course, there must be no defect in the principle of design, or in the movement, no mistake in the sizes or shapes of the pieces of which it is composed, nothing wanting in their properties, and no error in their positions. These points once thoroughly settled in regard to each part of every variety of watch, it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished pieces. The method established in every department is the reproduction of parts by mechanical means, and this is carried out on the system of the most thorough subdivision.

By means of multiplying gauges and microscopes, tests and inspection for the detection of wear in cutting tools, and from accuracy and flaws in steel or stone, are made to accompany the watch, every stage, from beginning to end. As a necessary result, the Watch goes together a finished machine. Every part is found to fit properly in its place. Every piece that leaves the mill is perfect, and every screw turned home—instead of sluggish and feeble action, the balance, even under the pressure of the slightest disturbing vibrations with a wide and free motion, and the beat has the clear ringing sound always characteristic of the Waltham Watch. The machine is a time keeper from the start.

This system of watchmaking is unknown in foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce Watches that cannot be equalled for every quality which makes a watch valuable. Simple in plan, and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform to the minutest details, not easily damaged, easily repaired, and when repaired always as good as new.

There are different grades of finish in the different varieties of Watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and means; but every Watch that bears the genuine trade mark of "WALTHAM" is guaranteed to be a good one, and nobody need be afraid to buy it.

EVERY WATCH FULLY WARRANTED.

For sale by all first class dealers in the United States and British Provinces.

ROBBINS & APPLETON

No 162, Broadway, N.Y.

ROBERT VILES,

TORONTO AND MONTREAL,

General Agents.

Toronto, Nov. 2, 1897. 106-3m 40-3m

The Daily Intelligencer

WILL appear about five o'clock every afternoon (Sunday excepted) at the rate of \$5 a year if paid in advance, \$6 otherwise. Mail subscribers \$5 a year. \$5 for 6 months; \$1.50 for 3 months.

It will contain the latest telegraphic news up to the hour of going to press, and the most reliable despatches and the New York and Montreal Markets.

Arrangements have been made with RELIABLE CORRESPONDENTS in Madoc, Bridgewater, Marston and other points, who will furnish us with early and full information respecting the Gold Regions, and of matters of general interest.

Special attention will be paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c., and in short, nothing pains nor expense will be spared to make the DAILY INTELLIGENCER worthy of public patronage.

RATES OF ADVERTISING.

A liberal scale of prices for advertisements has been arranged as follows:

Cards, not exceeding six lines, 6 months, - - - - - \$5.00

Half Square, 6 months, - - - - - \$10.00

One Square, 6 months, - - - - - \$20.00

Two Squares, 6 months, - - - - - \$40.00

Four Squares, 6 months, - - - - - \$80.00

Notices of Births, - - - - - 50

Do of Marriages, - - - - - 50

Do of Deaths, - - - - - 50

"BUSINESS NOTICES"—All matter under this heading, headed or solid, 10 cents per line, measured by a scale of solid minion.

Advertisers contracting for any space not less than half a square can have the privilege of changing their advertisements every two weeks.

Transient advertisements inserted at 7 cents per line for first insertion, and 2 cents for each additional insertion.

THE WEEKLY INTELLIGENCER

Is published every Friday Morning at \$3 per annum if called for at the Office, or sent by mail; and \$3.50 if delivered by the Carrier, payable in all cases in advance. Which not paid until the close of the year, 50 cents will be added to each year's subscription. No paper discontinued until arrears are paid up, except at the option of the Publisher.

Within the past three months its circulation has rapidly increased, and the number now on our Subscription Books is over 1,400.

With such a large and general circulation throughout the West and adjoining Canada, the WEEKLY INTELLIGENCER presents unsurpassed advantages to advertisers.

War is not the game of 'live and let live'.

There is a man in the moon, and a man and woman in the honeymoon.

What notes interest you most? Those where early falls the dew.

The barber was asked what he saw at "The king was ill-shaven," said he.

Disobeying wives—Prospects of getting married for ladies who are past thirty "aged."

Four hundred women, chosen among the most beautiful in the Kingdom of Siam.

Children are as artists—Baker—"Anno the penny, my dear; bread's up to-day."

Girl—"Yes, but mother wants yesterday's baker."

It is said that some mothers in New York have grown so affectionate that they give their children chloroform previous to whipping them.

"Boy," said a facetious farmer to his son, "I had a pretty hard day's work yesterday, now let's have a game of chopping wood."

Lord Bacon beautifully said, "If a man be gracious to strangers, it shows that he is a citizen of the world, and that he is not a citizen of his own country."

QUEEN
INSURANCE COMPANY
CAPITAL, - - - \$10,000,000
FIRE AND LIFE.

LIFE DEPARTMENT.

THE principles on which this Company is
founded contain all the elements required
to develop the benefits of Life Assurance, and
afford every facility to intending assureds—
One of the advantages secured by those who
insure their lives with this Company is that
the outside expenditure for Management is
absolutely restricted by the Deed of Settle-
ment to Ten per Cent. of the Net Life
Income. This most important restriction
shows that the interests of participating policy
holders are closely watched and carefully at-
tended to by the Company. Attention is es-
pecially called to this point, as the proportion
of premiums expended for Management
Most Largely Influence Profits
and Bonuses.

The next division of profits takes place in
1868, and all those who wish to participate in
the profits should insure at once.
M. BOWELL,

BILL HEADS,
AND all other kinds of JOB PRINTING, ex-
ecuted with neatness and despatch at the
INTELLIGENCER Office, Front Street, Belleville.

Land to Sleep.

We lay them to sleep where the yellow leaves
fall.
And the wild winds make music among the
dark yew.
We lay them to rest till the Master shall call,
And his shining-winged heralds shall come
with the dawn.
Which none may refuse.

They were young. They have dropped in the
morn of their day.
Their sun has gone down in the too early
night.
But we weep not: The Master has called them
away.
From the fold of the noon-day, the thick of
the fight,
To the City of Light.

We shall meet them again when the winter is
past.
And the new summer sun lights the way to
that land.
We shall find that the parting kiss was not the
last.
With a look full of welcome our loved ones
will stand
On the fair shining strand.

Why mourn we? Oh! we would have kept them
we say.
From the cold of the winter, the wind and the
rain!
To have looked in their faces each desolate day
To have brought back the sun to his
shining again,
And chased away pain.

But the Father knew best. And since some-
times must be first
In that tender home shelter beyond the blue
hills,
We are glad to be chosen to suffer the worst.
While as we are waiting, the Father's great
When the greatest joy thirills.

And where our footsteps, the sooner to be
at home by the side of them, sharing their
pains.
Look! into dear faces our welcome to see,
And holding loved hands which it hurts us to
miss.
God grant us all this.

And help us in patience and strength to remain
At the work which He gives us, nor weary for
rest.
Till he says (as to them), come away from the
field.
For the heavenly home is the brightest and
best.
And your heart shall have rest.

What makes a Man Rich.
Riches and poverty are dependent more
on internal dispositions than external cir-
cumstances. There is certainly no given
amount of gold or silver that can be laid
down as constituting wealth. Before the
war a man worth a hundred thousand dol-
lars would have been called rich by vari-
ously circumstanced people, while now it
takes five or ten times that sum with some
to make a respectable fortune. Every one
knows how much his own ideas on this
subject have altered within the last ten
years. In Prescott's Conquest of Peru, it
is related how the sudden possession of the
precious metals by the soldiers of Spain
produced such a disturbance of value in
Europe, and especially in America, that a
quire of letter paper was worth several
thousand dollars, and common soldiers
gambled away in a single night fortunes
that some grandees of Europe would have
esteemed quite respectable. It is said one
man possessed an image of the sun, made
of wrought gold, eight feet in diameter
across the face. It was taken from the
front of one of the tents of the natives;
but he gambled it away in a single night,
and the day dawned on him a beggar.
Hence came the Spanish proverb, "To play
away the sun before sunrise." There is
getting to be a reckless sort of gambling
and speculation with money, not indeed so
disturbing in degree, but as absurd and
mad in point of principle, as many of the
speculative transactions of that world-
renowned period. In the old regions a
whose wells were netting him three thou-
sand dollars a day, two or three years ago,
has been reduced to poverty.

That man is rich who possesses more
than he requires; and he is poor, no matter
what he possesses, who needs more than he
has the power to procure. The idea of
riches is that of plenty, of dominion, and
rule. He who has control of his own desires
and wants, and can supply them, is rich.
He who longs for what he cannot command
is poor, no matter what amount of money
or property he has. Hence riches and pov-
erty are always fluctuating, not only with
the supply of paper or of precious metals,
as many suppose, but still more with the
demand occasioned by the hopes and fears
of the men. When from any cause the de-
mand is in excess of the means of supply,
forthcoming, whether it be for one dollar
to purchase a dinner, or one hundred
millions to construct a railway across a
continent, there is poverty.

How a Revival Begins.
As churches are again filled with returned
worshippers, and the routine of religious
labor has begun, it may be well for all to
remember how an increased interest in the
cause of Christ manifested itself. Rev. L.
Cuyler says:

And as no church has no surer indication
of declining vitality than a prayer meeting
so nothing marks the approach of a revival
so unobtrusively as the place of prayer. A
revival begins there generally. The

deserted seats are filled, and so are the deserted hearts. Those who "could not leave their business" manage to close their shops or their warehouses and hasten to the attractive spot. About Thomas is on hand punctually. There is a magnet in the prayer room, and it draws. Those who come have something to say, both to each other and to the prayer-hearing God. The "gift of tongues" has descended. The timid grow bold to ask; the slow of speech become eloquent, the frozen souls melt into penitence; convulsed hea! up; and the pastor rejoices to see a latent power of faith and activity developed that he hardly dreamed of. The church is kindled to its farthest extremity, and all from the central penetrating heat of the prayer gathering.

Fenian Excitement at Manchester.

PARTICULARS OF THE AFFAIR.

Our cable despatches have already announced the execution of the Fenians at Manchester on the 23rd ultimo. The latest papers received by the China are of that date, and the only particulars given are the following from the Pall Mall Gazette:

"When the hour fixed for the execution had arrived, suddenly the words of military command were heard, and a company of the Seventy-second Highlanders marched round the courtyard and took up a position in line at the foot of the staircase. Simultaneously small detachments of the same regiment ascended to the platform, and crouched there with their loaded rifles slightly projecting over the parapet. At almost the same moment the heads of a line of soldiers arose above the parapet of the railway viaduct.

"A line of warders was formed in the jail court. The sentries on duty ceased their walk, magistrates and reporters stood aside, and a dead silence prevailed for a few moments as a signal was given from a corner of the Round House. At three minutes past eight o'clock the solemn voice of a priest repeated the Litany of the Roman Catholic Church was heard, and the head of the procession became visible through the thick fog, about thirty yards from the foot of the staircase. The Rev. C. Cantwell walked first, by the side of Allen. The convict was deadly pale; his eyes wandered alternately from the priest to the individuals standing around. He walked with a tolerably steady step, and uttered the response, 'Lord have mercy on us,' in a firm voice.

"Next to him came Larkin, in whose appearance, confidence and anxiety of mind had wrought a striking change. He walked with difficulty, and required the support of the wardens as he mounted the staircase. He seemed to join mechanically in the responses, and as he approached the head of the stairs he gave one hasty glance at the black benches overhead, and seemed about to faint. Gould was the last, and he met his fate more firmly, joining in the responses with a steady voice.

"About five minutes past eight o'clock the door leading from the jail yard to the scaffold was opened, and the same instant almost every head in the crowd was uncovered. Allen was the first to appear. He was deadly pale, and closely clasped a crucifix. Calverly came next, his white cap over his face and adjusted the rope. Meanwhile the convict continued engaged in prayer. Then followed Gould, who walked with a firm step. On coming to the drop he shook hands with Allen, and kissed his right cheek. He too was forthwith capped and placed in the noose.

"Larkin was the last to mount the scaffold, which he did with firmness, and indeed, with a smile upon his face, and, like the others, he submitted unresistingly to the preliminaries, and only joined loudly and earnestly in the responses, 'Jesus, have mercy upon me; Jesus receive my soul,' when the bolt was drawn and the three bodies dropped. Allen was dead in about a minute, but the death of his fellow-convicts was more painful, both Larkin and Gould appeared to struggle some little time. All the three men showed symptoms of fear; Gould the least. The bodies were cut down at nine o'clock."

"Shore, who had apparently become resigned to meet the capital sentence, received the intimation that a respite had been accorded him in a becoming spirit."

"The execution of Allen takes place at Kingston on Wednesday the 11th inst., instead of Tuesday, as noticed yesterday."

"The steamer Margaret Stevenson is blocked up with ice in the River near River du Loup, and abandoned by the crew."

"The Eastern Chisholm has had enough of Confederation, and wants the Nova Scotia members to go home again."

"An eastern sportsman has bought an island in the Ohio river, and stocked it with black cats, to raise the animals for the sake of their fur."

"The Bank of Montreal has denied a statement made by a contemporary that the specie held for the redemption of Provincial Notes is also held as part of the assets of the Bank."

"Ireland is exporting oats to France. Sixteen vessels, which have lately left Cork for French ports, carried 24,077 barrels of oats; 13 vessels from Waterford, 10,460 barrels; and in all probability 100,000 barrels will be taken."

"The negro who committed the outrage on Mrs. Baker, of Pierceton, Indiana, was caught the same night. He made a full confession of the crime, and was then seized by a mob, and stabbed, beaten and shot until he was dead. His body was then dragged through the streets."

"The low state of the Missouri River has turned to good account. The people there cut and dig the bottom of the river for valuable lost by the wreck of steamboats. In one locality large amounts of canned meats, fruits and oysters, as well as many bottles of wine, have been found."

BELLEVILLE, SATURDAY, DEC. 7.

TOWN COUNCIL.—A letter from Mr. R. Tanahill, respecting the proceedings of the Town Council, and the duty and privileges of reporters, is crowded out.

THE POSTAL BILL.—The country will learn with pleasure that Senator Campbell has graciously yielded to the wishes of the Press, and has so modified the Postal Bill as to make prepayment optional. It is understood that the rates will be on letters 3 cents if prepaid, 5 cents if not; on weekly newspapers 25 cents per annum, and a proportionate reduction on daily issue, prepayment optional.

SEVERE GALE.—The severe gale which commenced yesterday morning and continued until midnight, must have been disastrous to any shipping that was on the water. It was particularly severe late in the evening, almost amounting to a hurricane. There is little doubt that the schooner "Hastings," which was formerly owned in this town, with all her crew, has been lost on the lake. The propeller "Michigan" reports passing the wreck of a vessel, with only her topmast visible, about half way between the Galios and Oswego.

CANADIAN SECURITIES.—A gratifying advance has taken place since the 12th ult., in the value of Canadian Securities in the London Stock market. Sixes are quoted at 105 to 105, the highest point attained for three or four years. Referring to the advance, a London paper says: "The chief operations were in Colonial Government Securities, which have obtained great popularity among speculators as well as the investing public. Numerous dealings in these bonds are recorded in the Official List at an average rise of 1 per cent. For months past investors, tempted by the low price to which many of the more sound and promising of such stocks had been permitted to descend, have been gradually buying them up, and the consequence has been a steady advance and comparative scarcity now in the market."

WORK AT THE MARIONA ONE BEDS.—The Cobourg World says: "During the interval of transportation, the work at the mines is progressing in a very favorable manner. About one hundred and fifty men are constantly employed in getting out ore; and already, since the conveyance ceased, as much has been mined as was last week at the time of the excursion in the spring. Besides this, there is a large quantity of the Narrows, ready for conveyance to Cobourg, as soon as navigation re-opens. We are pleased, also, to learn that the quality of the ore is continually improving as the shaft descends. The prospects of the Company never appeared better than at present—a fact for which all our citizens must be exceedingly thankful, as whatever advances their prosperity affects our interest in a very important way."

U. S. BUDGET.—President Johnson's message contains the following reference to the United States Budget: "On the 30th of June, 1865, the public debt amounted to \$2,750,425,579; on the 30th of June last it was \$2,620,192,215, showing a reduction during the fiscal year of \$1,296,654. During the year ending June 30, 1867, the receipts were \$490,694,010, and expenditures \$490,729,120, leaving an available surplus of \$1,034,830. It is estimated that the receipts for the fiscal year ending June 30, 1868, will be \$417,151,928, and that the expenditures will reach the sum of \$303,269,230, leaving in the Treasury a surplus of \$23,892,702. For the fiscal year ending June 30, 1869, it is estimated that the receipts will amount to \$381,000,000, and that the expenditures will be \$377,000,000, showing an excess of \$9,000,000 in favor of the Government."

The Commercial Bank.

Commercial Bank Gazette has again advanced. The Montreal Gazette speaking of the extended privileges given to the Bank by the Bill now before Parliament, and the confidence in the Bank which has been greatly enhanced, says: "Not only the solvency, but the large surplus shown by the assets of this Bank, are now so apparent that it is needless to do more than state their existence. Now is the time for the Directors and Shareholders to bestir themselves in their own interest. We have to remind them that hostility to them is still rife, that the same desire to force them into liquidation still exists, and that it is against this course that they have to strive most energetically. From all we have learned, we earnestly warn the Shareholders of the Bank against the total ruin which an assignment for the purpose of liquidation would cause."

"This would necessitate a forced realization, endless law-suits, the creation of an army of Locusts, in the shape of Trustees, Solicitors et hoc genus omne, and judging by

the experience of all such arrangements, we can look upon liquidation in no other light than that of financial suicide, or, at least, of destruction of sound and available property—in greater part, the bread of the widow and orphan."

"In our columns of to-day, we point to either amalgamation or reorganization. Let both calmly and carefully considered, taking care that no sacrifice be made; if the first course be adopted, when assets are undoubtedly good for 60 per cent of the nominal capital, if the second course be followed, seeing the way clearly to a moderate issue of new stock, to the election of a competent board of Directors and an experienced staff of officers, and above all, to a removal of head quarters to Montreal. We consider these three essential to its success, and if they cannot be secured, with all our strong preference for a re-organization of the Bank, we would consider it only a risking, of what is left, if it be determined to adopt this course without them."

"We trust that before the general meeting to be held at Kingston, on the 17th inst., the shareholders may consult together for their mutual benefit, so that unity of action may be secured."

Western Extension.

The question of Western extension is one of vital importance to the Dominion of Canada. "Westward the star of empire takes its way," and westward do the thousands of emigrants who annually land at Quebec, take their way. Few, comparatively, remain in Canada, or in Quebec, or in New Brunswick, or in Nova Scotia. To the great West, with its fertile lands, its vast prairies, its boundless resources, the great tide of emigration sweeps on. What we have lacked has been breadth of territory, and without the acquisition of the North-West Territory we would still lack that great element to our growth and prosperity. Even with the Maritime Provinces, the Dominion is but a narrow tract of country. We want breadth with our other acquisitions, so that we may have something attractive to offer to the emigrant who seeks a home in the New World. The North-West Territory lies side by side with the most fertile portions of the Western States. The prairie land is as rich and fertile as in Wisconsin or Minnesota; it is equal in fertility and natural facility of cultivation to any in the Western States; it abounds in mineral wealth; the climate is salubrious, and in every other respect it affords advantages to settlers equal to any offered by the United States: beyond all this, there is the protection of British laws, which to the vast majority of emigrants would be an additional inducement to choose Canada as a home in preference to any one of the Western States. With respect to the character of the soil and climate of the North-West Territory, Hon. Mr. McDougall remarked: "There was an opinion, even in this section of the Dominion, where this question had been fully discussed, that the great territory of the North-West was not adapted to civilization or fit for the purposes of civilized life. That, in fact, it was chiefly valuable for the purposes for which it had been used since the establishment of the Hudson's Bay Company in its trade in that part of the world. After examining different authorities on the subject, especially the reports of explorers, he was satisfied that although this territory was situated very far north, yet from its peculiar conformation it was well adapted to the production of all those grains necessary for the support of human life, and that the climate was quite equal to that of Canada."

What we want now is to open communication with this vast western country, and in this respect nature, in its magnificent highway of rivers and lakes, has made the work comparatively easy. One difficulty with which our Government will have to contend, will be in settling the claims of the Hudson Bay Company. The resolution referring to this point admits the legality of certain claims and rights, to adjust which the resolution says, "the same shall be submitted to a judicial decision, or be determined by mutual agreement between the Government of Canada, and the parties interested." The manner in which the whole subject has been met by the House, points to a speedy and satisfactory settlement of the question.

"The shares of the Union Bank of P. E. Island, are at 35 per cent. premium."

"The New Brunswick press makes an unusual stand against newspaper postage."

"Nine French Canadians were burned to death recently by a prairie fire in Dakota."

"There was a heavy fall of snow in Lower Canada yesterday."

"A disastrous fire occurred at Searforth yesterday, which destroyed five stores in the best part of the town."

"A large number of vessels have gone to Port Colborne to lay up for the winter, so that harbor opens much earlier than that of Buffalo."

"Mr. F. H. McDowell, of Toronto, has accepted the office in the excise department, offered him a few weeks ago."

FROM OUR OTTAWA CORRESPONDENT.

OTTAWA, Dec. 6, 1867.

The House sat to-day for about an hour with closed doors, debating, it is understood, some complaint made by the Reporters that they had been forbidden the use of the Reading Room; and the question of the Refreshment Rooms in the Parliament Buildings. It has not yet transpired what took place, but like things of this kind it will, I suppose, leak out ere long.

On the opening of the doors, the Committee reported in favor of the introduction of your Bank Bill, when Mr. Read moved, seconded by Mr. Bowell, for leave to introduce an "Act to incorporate the Bank of Hastings," which was passed, and the second reading set down for Monday next. Whether it will then be pushed I do not know. It will depend a good deal upon the action of the Government, and what course they intend to pursue in reference to Banks and Banking, and as the Bill will have to be printed and distributed, it may not come up on Monday.

A motion by Mr. McFarlane for leave to introduce a Bill to grant patent rights to somebody, caused some discussion as to the policy of the Government upon this question, when Sir John A. Macdonald said the Government would not oppose the first reading of the Bill, though they intended to introduce a general policy. The motion being carried, the House went into Committee of the Whole on the Report's Land resolutions. Before giving you any of the proceedings of the Committee, I may mention that after the close of my report yesterday, the debate upon these resolutions was continued until half-past twelve, when the House went into Committee. Mr. Howe, fancying that this would prevent his again "elaborating" his views, protested vehemently against the action of the Government in thus forcing so important a question upon the people, and that if they persisted in the course he would recommend his friends to leave the House, thus showing a snarling disposition unworthy of such a man. Sir John A. Macdonald replied that the object of going into Committee was to enable the question to be more fully considered than they could if it discussed with the Speaker in the chair; and that they could not, if they would, push the resolutions through, as supposed by the member for Hants (Mr. Howe). After this little episode the House adjourned.

To-day the House has been entertained with two speeches from Mr. Blake, who has an itching for talking, and evidently delights in the sound of his own voice. The appreciation of the House of his harangues, was manifested in allowing him to take his seat without a single "hear" or manifestation of applause. How different was the reception of the speech by the Minister of Public Works, Mr. McDougall. He spoke for about an hour, and handled the chancery lawyer in a masterly manner, particularly when he accused him of arrogating to himself the championship of the great liberal party in opposing these resolutions, when it was well known that it was that party which had made it a strong point at every election for a number of years, and it was strange now to hear the pretended leaders of this party opposing Western extension. Mr. Jones, of Halifax, is now addressing the House.

The House will meet to-morrow to hear the Finance Minister's statement.

Stock Market.

The Montreal Gazette's commercial article of yesterday says the demand for investment has been more active since the payment of the dividends due on the 2nd inst., but there is still considerable pressure to sell nearly all Bank Stocks.

Bank of Montreal—Has been dealt in to a considerable extent at 125, 127, and 127, closing with buyers at 127, while sellers ask 125.

Bank of British North America—No stock in market would readily command 100.

City Bank—Is heavy with sellers at 97 to 98.

Merchants' Bank—Sales during the week at 108 and 107, at which it is still offering. A dividend of four per cent has been declared payable on the 2nd proximo.

Mechanics' Bank—Small sales reported at 97 to 98. There are still sellers at the latter rate.

La Banque du Peuple—There has been a good demand for this stock throughout the week, with limited sales at 104 to 107.

La Banque Nationale—In demand at 104 to 105.

Union Bank of Lower Canada—Large sales during the week at 104 to 104, for all paid, and 102 to 103 for 50 per cent. paid. A dividend of four per cent has been declared payable on the 2nd proximo.

Eastern Township's Bank—Buyers offer 98, while sellers ask 100. A dividend of four per cent is payable on the 2nd proximo.

Commercial Bank of Canada—Has again advanced. There being no sellers to take under 90, with buyers to a considerable extent at 97. The passage of the Bill by the Commons, together with the most satisfactory statements of the collection of arrears and payment of liabilities has caused a large speculative demand for the stock, and there have been considerable sales at 90 to 95.

Ontario Bank—Has been largely dealt in at 97, 97, and 97, closing rather firmer, with buyers at 97 and sellers at 97.

Bank of Toronto—Has declared a dividend of four per cent, payable on the 2nd proximo.

The stock continues to be offered at 115 with out the least demand, and the Bank of Commerce—No declaration of a dividend of three and half per cent, has caused a rally in the stock, there being buyers but no sellers at 80 to 82.

Royal Canadian Bank—Considerable sales at 97.

Canadian Bank of Commerce—Is offered at 102 to 103 without attracting buyers. A dividend of four per cent, has been declared payable on the 2nd proximo.

Montreal Telegraph Company—There have been only small sales during the week at 123.

Canadian Inland Steam Navigation Co.—A sale reported at 130, at which price it is still payable.

Richelieu Navigation Company—No transactions during the week; sellers ask 108, while buyers will not advance over 105.

Canada Debentures—There has been a large demand for currency bonds; both five and sixes at quotations. Sterling fives have been sold at 87, which would still be paid.

Police Items.

AGGRAVATED ASSAULT.

Robert Baine, accused of causing the death of his wife from brutal assault, and remanded from the 29th ult., was brought before the Police Magistrate yesterday, and after the evidence of the Chief of Police and Doctor Lister was recorded, and a re-examination of Doctors Canniff and Burdett, the prisoner was fully committed for trial.

VAQUANCY.

Andrew McDonald, not having fully recovered from the St. Andrew's celebration, and appearing before the Police Magistrate with his face all bruised and bloody from close proximity to the ice, was committed for 20 days. He pleaded hard with the Clerk to record on the commitment a grant of tobacco and one "wet stop" each day, but Mr. Roy was inexorable, denying the prisoner's nationality and disclaiming his Gleanery origin, which he rather attributed to the North of Ireland. He was warmly received by the worthy Governor of County Galway, who recognized him as an old acquaintance.

DRUNK.

Two men named Brown and McGregor were arrested for being drunk, and locked up for the night. They were discharged next morning, having promised the Police Magistrate not to indulge in "Tanglefoot" for some time.

Two old cyprians—though young in years—were committed for 30 days each.

Telegraphic News.

BY ATLANTIC CABLE.

LONDON, Dec. 6.—The London Times has no editorial on the transfer of the Island of St. Thomas to the United States. It is pleased with the transfer, and hopes that the sanitary measures of the Americans will extinguish the contagious fevers which are so prevalent in that city.

Wm. Hagan, supposed to be the one who furnished the arms to the Fenians who rescued Kelly and Deasey, was arrested yesterday in Birmingham.

FLORENCE, Dec. 7.—The Italian Government has granted universal amnesty to the adherents of Garibaldi.

LONDON, Dec. 7.—The present state of political affairs in Italy create anxiety and distrust in monetary circles.

LONDON, Dec. 6.—The Globe says that the present attitude of France renders the conference on the Roman question impossible.

QUEENSTOWN, Dec. 7.—The steamers Scotia and Denmark have arrived.

LONDON, Dec. 7, eve.—Consols closed at 92; Bonds 70½; Ill C 89½.

LIVERPOOL, Dec. 7, eve.—Cotton closed at an advance of 3d; Uplands 74d; Orleans 95; sales 12,000 bales; Manchester advices favorable. Market for goods and yarns improving. Provisions and Produce unchanged.

LIVERPOOL, Nov. 27, eve.—The ship "Thornton," from New York on November 2, for Liverpool, went ashore in the Mersey, and it is feared will be a total loss.

American Despatches.

OSWEGO, Dec. 6.—A portion of the Welland Canal fleet arrived yesterday afternoon and this morning.

UTICA, Dec. 6.—Canal matters are quiet; the weighlock is deserted. The ice remains unbroken.

OSWEGO, Dec. 7.—There was a great gale on Lake Ontario last night. The schooner "Baltic" sunk by striking the wharf. She had a cargo of wheat, and is nearly a total loss.

ALBANY, Dec. 7.—The canals are filled with ice, and it is said that many of the boat captains have discharged their hands and tied up their belts. Only three of all the boats on the Schenectady level, on Thursday, were got off to last night.

WASHINGTON, Dec. 7.—The House of Representatives came to a vote this afternoon on the resolution providing for the impeachment of the President of the United States, and it was rejected by 108 to 87. The House also passed the bill to suspend further reductions of the Constitution.

The Montreal Gazette says:—It is rumored, and we believe correctly, that the Alliance Insurance Company of London, has bought out the Western of England, which company will consequently close its business in Canada. The Western has a deposit in the hands of the Finance Department, which will be towards meeting the losses now due by that Company.

Song for the Times.

From the Free Lance.
Sing a song of Banking,
E. H. King so sly,
Many hundred shareholders
Baked in a pie.
When the pie was opened,
How the air did ring,
With the moan of ruin,
Caused by E. H. King.
King was in his counting house
Thinking on his loss,
(Sighing) dire grief,
And that monstrous tissue.
Tissue of mendacity,
"Statement of facts," he called it,
Credited until of late,
When Workman overhauled it.
Sing a song of Banking,
E. H. King so sly,
Would you keep your seat?
Better mind your eye.

PROSPECTUS

ROSE MINING COMPANY
OF MADOC.

Capital Stock, - - - \$25,000.
Divided into - - 5,000 Shares.
5,000 Shares - - \$5.00 Each.

Deposit on Subscription Twenty-five per cent

GEO. D. WYCKOFF, A. L. McLELLAN, JAS. A. BURNHAM, JR., P. E. KELVET, E. H. HALE, and HUGH FAIRGRIEVE, are the owners of the property hereinafter mentioned, and are desirous of forming a Stock Company, with the capital of \$25,000, and are to receive and take in payment for the said property \$1000 in cash, and 2500 shares of paid up stock of the said company. The said parties are now taking proceedings for its incorporation, under cap. 23, 27-28 Vic. and have much pleasure in calling the attention of the public to the following Prospects.

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives the company the greatest advantages over many others, there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out, and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of rock to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mineral from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.

Another great advantage in this property is, that immediately the work is commenced, ore can be taken out in quantities more than sufficient to pay the working expenses and in that respect alone will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.
GEO. D. WYCKOFF, JAS. A. BURNHAM, JR., P. E. KELVET, A. L. McLELLAN, JAS. CARL RITCHIE, JAS. EDWIN O'REILLY, E. H. HALE.
PROV. SECY. GEO. D. WYCKOFF.
PROV. TREAS. JAS. C. RITCHIE.
SOLICITORS—THOMSON & KILVERT.
Stock Book opened at J. W. Murton's Exchange Office, Hamilton, Application for Stock and other Communications may be addressed to any of the Directors, or to JAMES C. RITCHIE, Prov. Secy., Hamilton, D184-47.

December 23, 1897.

LOOK - THE DAILY LONDON is published every evening and sent by mail at \$4.00 per annum, payable in advance. It contains all the local and general news, the latest telegrams and market reports, and is the daily circulation is the largest in Upper Canada, outside of the Toronto Press, advertisers who wish to reach the ear of the Lord should take advantage of its columns. The Globe says of the Advertiser:

"This excellent newspaper now appears in new type, and is one of the neatest papers in the country. The Advertiser is well conducted, and though not an old paper has for its daily and weekly editions a very large circulation—larger than any other journal published in this neighborhood. It is, therefore, a first-rate advertising medium."

READ: THE WEEKLY ADVERTISER is the best and cheapest paper in Upper Canada. Terms, \$1.25 per annum, in advance. The balance of the present year and old paper has for its daily and weekly editions a very large circulation—larger than any other journal published in this neighborhood. It is, therefore, a first-rate advertising medium. All letters should be addressed to JOHN CAMERON, ADVERTISING OFFICE, London, Ontario.

PROVINCIAL INSURANCE CO.
OF CANADA.

FIRE AND MARINE INSURANCE.
INCORPORATED 1849.

HEAD OFFICE, DIRECTORS: TORONTO.

HON. J. HILLIARD CAMERON, M.P., President, LEWIS MOFFATT, Esq., Vice-President.

QUEEN

INSURANCE COMPANY

CAPITAL, - - - \$10,000,000

FIRE and LIFE.

LIFE DEPARTMENT.

THE principles on which this Company is

founded contain all the elements required

to develop the benefits of Life Assurance, and

afford every facility to intending assurers.—

One of the advantages secured by those who

insure their lives with this Company is that

the outside expenditure for Management is

absolutely restricted by the Deed of Settle-

ment to Ten per Cent of the Net Life In-

come. This most important restriction

shows that the interests of participating pol-
icyholders are closely watched and carefully at-

tended to by the Company. Attention is

peculiarly called to this point, as the proportion

of premiums expended for Management

Must Largely Influence Profits

and Bonuses.

The next division of profits takes place in

1868, and all those who wish to participate in

Montreal Business Directory.

Frothingham & Workman,

BARRISTERS,

the chief tax, the house tax of the year, is just falling due, and of course cannot be collected. It ever any calamity appealed to public sympathy, I am confident this will awaken it, and I trust your Grace will be able to point out some hope of relief, as we cannot levy any taxes from this impoverished community. I shall send down to St. Thomas as soon as I can get a boat to go; but all the sloops and canoes belonging to the place are either destroyed or very much damaged, and I do not know how soon I may be able to do so, and I trust from charity and other sources we may be able to obtain some flour and corn meal. Meanwhile, starvation, or very like it, appears to be impending for nearly all the small store of flour in the town was damaged by the tremendous sea which swept in and carried away houses and individuals. I forgot to add that the doctor's house is destroyed, the clergyman's very much damaged, and I and my family are compelled to take refuge in the public offices where the paupers and police are also sheltered. I have, &c.,

ARTHUR RUMFOLD.
P. S.—The deaths in Road Town amount to 23, one twentieth of the population.

Daily Intelligencer.

BELLEVILLE, MONDAY, DEC. 9.

THE NEW WALTZES.—We learn that Mr. Crozier has decided upon publishing his "LaCrosse Waltzes," which were played by the Ontario Philharmonic Society, at the St. Andrew's concert, on the 3rd inst., and received with much enthusiastic applause. The waltzes are really beautiful and doubtless will be very popular.

THE LATE GALE.—We are sorry to hear that during the extraordinary gale of Friday evening, the top of the western chimney of Christ Church was blown over, rebounding off from the roof into the adjoining lot. The damage, however, was trifling, and the Sunday services proceeded as usual. We have also been requested to state that the main building, concerning the safety of which some fears were felt before it was thoroughly strengthened by Mr. Northcott last spring, stood unshaken by the extreme violence of the gale, showing no signs of giving or straining in any part. During the same gale the chimney at Victoria Foundry and several other chimneys in the Town were blown down.

An Aggrieved Councillor.

In another column we give place to a somewhat remarkable letter from Mr. R. Tannahill, one of the Councillors for Samson Ward, who wants to see himself right with the public. Had Mr. Tannahill controlled his temper the other evening, he might have made himself distinctly heard, and rendered his language intelligible to the reporter and the Council, but as he talked "rapidly" and somewhat incoherently, his remarks were consequently unintelligible. With regard to his explanations, we have nothing to do. It will strike the reader, however, as rather singular that after a patient and protracted investigation, and after the Committee, by a majority of six to two, pronounced the charges not sustained, Mr. Tannahill should temerarily stick to his position. It seems to us to save a good deal of persecution. Mr. Grant has had the misfortune and annoyance to have charges hanging over his head for some two or three months. Those charges were at length investigated by a Committee of the Council comprising eight members, and of the eight members six found that the charges were not sustained. Should that decision not settle the question so far as those charges are concerned? We think so. To repeat them is a serious offence, for which Mr. Tannahill may be called upon to answer in a different manner.

It will also strike the reader, as it strikes us very forcibly, that the tone and style of the latter part of his communications are rather imperious and dictatorial, and his remarks upon the duties and privileges of reporters, as impertinent and altogether unwarrantable. As to the general correctness of the reports of corporate bodies furnished this paper, the communications of the fairness of those reports by political opponents as well as friends, is the best refutation to Mr. Tannahill's statement. We do not lay claim to perfection, nor do our vanity so inordinate as not to admit that sometimes errors may creep into reports, and if Mr. Tannahill had pointed out wherein the report was incorrect or if it did him an injustice, he

should certainly have the benefit of a correction. If a mistake was made. But Mr. Tannahill is like a great many other men, whom accident and lucky circumstances have placed in public position. They may do well for a time if there be a smooth sea and pleasant sailing, but when thoroughly tested, they are found to be as sounding brass and a tinkling cymbal. They are a special terror to reporters, for generally speaking they talk little else than twaddle, and it is difficult for reporters, however anxious they may be to render their remarks presentable, to reduce twaddle into common sense. We do not intend to argue the question of the duties and privileges of reporters with Mr. Tannahill, for the simple reason that we do not accept him as proper authority in such questions. It might be the privilege of a reporter to report one of Mr. Tannahill's evenings at the Council, *verbatim et literatim*, but we do not think Mr. Tannahill would consider it our duty to do so, or if he did, we venture to say he would not desire repetition after obtaining a bird's-eye view of the picture. Probably the best plan to convince such men of their indebtedness to reporters, would be to report just what they do say.

Municipal Elections.

In Towns and Cities the nominations of candidates to fill the vacancies caused by the retirement of one of the three members of each Ward at the Council Board, takes place on Monday the 23d inst., and the election on Monday the 30th January. The following members retire the present year:

KETCHESON WARD.—J. Sutherland, Esq.
BALDWIN WARD.—Thomas Holden, Esq.
SAMSON WARD.—Geo. E. Henderson, Esq.
CALEMAN WARD.—A. Walters, Esq.

The members who will be elected this year will hold their seats for three years, and it is therefore important that good men and true should be selected. We believe all the retiring members will be candidates for re-election. In Ketcheson Ward, we do not anticipate there will be any opposition to Mr. Sutherland, who has so creditably filled the position of Councillor during the past year. It is not likely the other members will all be allowed to walk the course without a contest, and from what we can learn, lively times in some of the Wards may be expected.

In connection with Baldwin Ward, the name of R. P. Juliet, Esq., has been mentioned. Mr. Juliet was in the Council before, and made an excellent member. If he should consent to run there is little doubt of his election. The question of his candidature will be settled in a day or two.

Election returns are paid before the 10th of December, under the new municipal Act, they will have no right to vote. They must pay their taxes sometime, and if they want to exercise the right of franchise, they must comply with the law. The nomination for the Mayorality takes place on the same day as that of the Councillors at 10 o'clock a.m.; and that of the Councillors at noon.

FROM OUR OTTAWA CORRESPONDENT.

OTTAWA, Dec. 7th, 1867.

The debate upon the North-West territory resolutions, lasted until after two o'clock this morning. The principal speakers were the Hon. Joseph Howe and the Hon. T. W. Anglin, both of whom spoke for hours against the resolutions, in terms and in language not at all palatable to the vast majority of the House, no matter what position they occupy. The former forgot his antecedents and that gentlemanly courtesy which has hitherto distinguished his speeches. He began by such declarations as "what is it to me what is now done, you have done it and I will do it" and then for two hours inflicted upon the House a tirade against every man who had preceded him on the other side. It was painful to witness a man with the reputation of Mr. Howe bringing himself down to the level of the tap-room politician. One thing he did prove, and that was that the statesman and bluff can be combined in one man. His whole speech was a mixture of comicisms and well rounded points, and hard lines at his opponents, many of which were exceedingly vulgar and irrelevant. He ridiculed Mr. Morris for being an elder in the Church, and denounced Mr. Johnson, of New Brunswick, as a boor. In short, he scarcely ever speaks without, in some way, bringing in the name of the Deputy in some objectionable way or other, which, coming from a man of his age, disgraces many of his friends. One thing is certain, the oftener he speaks the less influence he has with the members, and unless he changes his tactics, he will soon sink very low in the estimation of the members of the Commons. The next that followed in the wake was Mr. Anglin, who argued that it was absurd to attempt to hold the Western Territory against a Fox. Suppose, said he, "my countrymen, and I think I know them, should, in their mad career, send 5,000 or 10,000 men into that territory, seize hold of the Indians and scalp them," interrupted Mr. McKenzie, of Lambton, well, and an admirable retort, which, in theatrical parlance, brought down the house. These suggestions to the Indians, did not

raise that gentleman in the estimation of those who heard him, and all he said fell flat upon the ears of his audience, and those inflammatory remarks, which are peculiarly characteristic of their kind, did not do him any good. They were heard in different parts of the House, accompanied by paper balls, which every now and then whizzed over his head, and he was obliged to leave his seat, and before the gentleman had finished his speech there were several of them in the House. The resolutions were then carried, and the concurrence of the House set down for Monday; not, however, until Mr. Holton administered a well-merited rebuke to the great Nova Scotia gun, who, when Mr. Holton stated that on the concurrence of the resolutions, he would speak, and he thought the concurrence should be taken without debate. Mr. Holton retorted sharply, and told him it was all very well for him to make such a proposition after having spoken three times on the question; he could tell him others had rights as well as he had, and they intended to use them. The debate then closed.

On Saturday the House was occupied until six o'clock with the financial statement of Mr. Rose, who spoke for two and a half hours in explaining the financial position of the country. His speech was characterized by frankness and honesty, which drew forth the admiration of Messrs. Holton, Howe, Dorion and J. S. Macdonald, each of whom rose in their turn and complimented him upon the manner in which he had mastered his subject and the frankness with which he had laid his statement before the House. It was elaborate, and at the same time so plain and simple that every man could understand him. I shall not attempt even a synopsis of it at the present moment. There was one point, however, which attracted the general attention of the House, and that was his avowed determination not to go into the English market.

When the Finance Minister to-day summed up the receipts and expenditure for the current year, the inference was drawn that there was no material change contemplated. Still, it is impossible to say, as his intentions are kept very close.

You will be glad to hear that the Postmaster General has abandoned the prepayment of newspaper postage, and proposes to make the postage 5 cents per quarter on a weekly newspaper, payable either by the sender or receiver. This I think will meet the views of newspaper men, which they can't get free postage.

The House will adjourn, it is thought, at the end of next week.

To the Editor of the Daily Intelligencer.

Sir,—In your report of the proceedings of the Town Council yesterday's issue, you state that my remarks were not understood by you. I admit that I spoke rapidly, as I felt keenly the remarks of the Mayor, who stated that I was trying to misrepresent the matter, when, in my opinion; he and that portion of the Council opposing me were misrepresenting the matter in their endeavors to cloak over the misdeeds and neglect of the Mayor, and also by the statement of the Worshipful Council, who could not be sustained. After his Worship said, I stated that the motion for not sustaining the charges should not be put to the Council, as it bore a flagrant untruth on the face of it, I defended any member of the Council, or any man in the Province, to say that the charges were not sustained, and speak the truth. The evidence was in black and white, and now lay on the table. It was for the Mayor to say that Mr. Grant had given satisfactory explanations, but if his statement, merely saying it was a mistake, was to mislead the Council, I could not think so, as the so-called mistake were so frequent in such a short period, I felt certain the public would not be satisfied with an easy manner with such explanations. As to the statement of His Worship that Mr. Grant had not left the town for fifteen or sixteen days, that applied only to pay list No. 8, explanations of which, in the same satisfactory manner, had been previously given. But I now speak of list No. 2 and 3, showing No. 2 from 4th May to 20th, and No. 3 from 15th May to 1st June, in which the Mayor could not give any satisfactory explanation for fifteen or sixteen days' work, when there were only twelve working days. For general mismanagement of my report, I am sorry to say, I am abundant proof, if they merely looked for it as I have done.

As to the vacant ground ordered to be cleared by the Council, at the instance of the Board of Health, the debris had been put on the opposite side, which was in natural turf, but surely the necessity of keeping the debris off the lot free from deleterious matter was equally urgent with the other. So far as Capt James' evidence on this matter, I am sorry to say, I am abundant proof, if they merely looked for it as I have done. I regret being obliged to state that your report of the Mayor's speech was generally a fair report, but it is nevertheless a full report, but it is neither more nor less than a report of the Mayor's proceedings in such a manner as to bias your report of said proceedings in presenting them to the public. I hope not to be compelled to refer to this matter again. Your insertion of the foregoing will oblige Your obedient servant,
ROBT. TANNAHILL.

—The "Vanda," a wooden ship of 1,145 tons register, built at St. John, N. B., by Messrs. Radcliff, has been accepted by the Indian Government for the Assiniboia expedition.

—Captain Coomb, of the 36th Regiment, shot himself in Montreal on Friday. He had been greatly depressed in spirits since his arrival in Montreal, a few days ago. Captain Coomb was recently married to a daughter of Gen. Murray; his wife is in England.

—A New York reporter thus describes the meteor: "From Murray Hill, an impression presented an auric-like form in its lucid blue dome, frescoed with fleecy fantastic clouds and studded with the countless starry sentinels of a still more countless host."

—The Royal Canadian, Ontario, Merchants', City, and Quebec Banks, as well as the Banks of Commerce and Toronto, give notice that they will make application to the present session of Parliament for an extension of their charters.

—An accident occurred on the Oswego and Rome Railway on Friday night. An extra freight train with empty cars ran into a passenger train which had been stopped at track near Palaski. The engine was thrown from the track turned bottom up. Five of the freight cars took fire and were destroyed. The engineer, Jesse Trumbull, and the fireman, John Mather, were killed.

Telegraphic News.

BY ATLANTIC CABLE.

LONDON, Dec. 6.—The Times, in an editorial on the correspondence in the Alabama controversy, says: Lord Stanley is right in refusing to permit the foreign policy of England to be reviewed on any foreign power whatever. On all other points England will meet the United States half way, as she is tired of discussion.

FLORENCE, Dec. 6.—The session of the Italian Parliament was opened yesterday. Prime Minister Ricasoli, in a speech on the occasion, justified the action of the Government in arresting Garibaldi, and suppressing his illegal attempt at invasion, but declared that it was inconsistent for the temporal power to exist in Rome as it would be for a foreign power to hold possession of the city of Paris.

PARIS, Dec. 6.—In the Corps Legislatif yesterday, Minister Rouher made an able speech in defence of the policy of the Emperor's Government on the Roman question. He admitted that the unity of Italy was desirable, but in accomplishing it, Italy should never go to the extreme of taking possession of Rome by force. At the conclusion of the debate, Mr. Favre's motion for the interpellation of the Government in regard to Italian affairs, was rejected by the Chambers.

FLORENCE, Dec. 7.—In the Italian Parliament, which assembled yesterday, Count Lesca, of Pisa, was chosen President of the Chamber of Deputies over Baron Rattazzi by four of a majority.

PARIS, Dec. 7.—The Times, of this city, says this morning that the Conference will not meet at Munich, as at first proposed, but in this city, at the time originally appointed. The Evoye of the various powers resident in this city, will represent these powers in the Conference.

LONDON, Dec. 7.—Her Majesty's theatre, one of the largest in this city, took fire last night after the audience had retired, and was totally destroyed. No lives were lost.

Second Despatch.

LONDON, Dec. 7, midnight.—In the House of Peers this evening Earl Mayo made a short speech, in which he deplored the bad taste and evil effect of the public function for the Fenians executed at Manchester, but in this city, at the time originally appointed. The Evoye of the various powers resident in this city, will represent these powers in the Conference.

In the House of Commons this evening Lord Stanley, alluding to the European Congress on the Roman question proposed by France, said he could not see that any good would result from the meeting of the representatives of the European powers in a general conference without a previous agreement as to the basis upon which their deliberations should be conducted.

In the course of the evening the new mail contract with the Cunard Steamship Line was unfavorably criticised, when Mr. Hunt, Secretary for the Treasury, defended the action of the Government, declaring that the contract was the best one which could be made at the present time.

At a late hour last night, the House of Parliament adjourned, to meet on the 13th February, 1868.

PARIS, Dec. 8.—Fears are entertained here of a Ministerial crisis in consequence of the last speech of M. Rouher on the Roman question.

FLORENCE, Dec. 8.—It is reported that Garibaldi has again disappeared from the island of Capri, and it is feared another attempt will be made against Rome by the party of action.

The speech of the French Minister, M. Rouher, in which he said that Italy should not take forcible possession of Rome, gave rise to an angry debate in the Italian Chamber of Deputies yesterday evening. Prime Minister Ricasoli informed the House that he had asked the Government for an explanation of the speech, and expected to receive a reply to-morrow.

PARIS, Dec. 8.—The steamer "Hibernia," from New York, has arrived.

QUEENSTOWN, Dec. 9, noon.—The steamer "Nebraska," from New York, has arrived.

LONDON, Dec. 9, noon.—Despatches from China report tea harvest; exports to November 15 reached 87,000 lbs. Consols 92½; Bonds 70½.

LIVERPOOL, Dec. 9, noon.—Cotton quiet; prices unchanged. Breadstuffs dull. Corn 46s 6d. Others unchanged.

LONDON, Dec. 9, 2 p.m.—Consols 92½; for money; American securities very quiet; 111 C declined to 85½; Erie advanced to 47½.

LIVERPOOL, December 9, 2 p.m.—Cotton quiet and steady; sales to arrive at 7½d.

American Despatches.

SCENECTADY, Dec. 7.—On the nine mile level west of and adjoining the sixteen locks, considerable progress has been made in passing down from the level above. It is reported that twenty-five boats will be moored preparatory to entering the sixteen locks, during the night. The water on the level is up to the average height, and everything is being done by the night, and it is feared another attempt will be made against Rome by the party of action. An ice break was started with some alps, but has not returned, and we have no reports of operations. The boats at Scenectady have not moved during the day, from the fact that it was not politic to start them until an outlet was made on the lower end of the

section. Things look precarious as it is now showing, and the thermometer indicates 10°.

BUFFALO, Dec. 6.—The thermometer was 8° above zero.

NEW YORK, Dec. 8.—A large meeting was held in Forest Hill, Boston, last evening, to express indignation at the course of the British Government in executing the Manchester Address. Addresses were delivered by ex-Mayor Whitman, John Savage, and others; and a letter of hearty approval was read from George Francis Train. Resolutions were adopted, demanding that the government instigate the return of all naturalized American citizens in England, and demand reparation for the injury sustained by such citizens. A similar mass meeting was also held in St. Louis.

SCENECTADY, Dec. 8.—Boats were passing through lock 10, eleven miles east of this city, this morning, and were being locked through the 15 locks at the rate of four in an hour. The thermometer at half past four this afternoon was 16 degrees, and rapidly falling. The prospect of boats reaching tide water is doubtful.

Canal Commissioner Dorn has just arrived from Troy by the tow path, and reports that under existing circumstances boats are being passed at the above named lock with unusual rapidity, and demand reparation for the injury sustained by such citizens. A similar mass meeting was also held in St. Louis.

There are probably 125 boats between lock 20 and Troy.

Boats are flying along this city which have not moved for several days.

UTICA, Dec. 8.—The canal is slightly frozen, with no prospect of a thaw at present.

PORT KENNEDY, Dec. 8.—Wind blowing a gale all night, and not abated. Weather very cold, and cold increasing. Reports from up the river tell of large quantities of floating ice, reaching down as far as Albany.

The steamer "C. Vanderbilt" is hard aground in the ice at Castillon, with a heavy beam on each side of her, trying to pull her off.

The river is closed at Albany and down to Castillon.

At Hudson the river is crowded with floating ice, and there is a heavy lee-gauge at Catskill. Wind blowing a gale from the west, and weather intensely cold.

NEW YORK, Dec. 9.—The steamer "Rising Star," from Appleton, with California mails to 19th ult., has arrived.

Miscellaneous Items.

The last lineal descendant of Robespierre died lately in Vienna. He had papers to prove his claim; and strange to say was proud of it.

One of Admiral Farragut's engines who accompanied him to Russia, has married a daughter of a Russian nobleman.

It is stated that a party of Italian brigands recently cut a captive into small pieces and hung the pieces up along the road. No money in his purse, was his crime.

The delicacy of the sculptor in so carefully avoiding any likeness to Mr. Everett in the piece of a Russian nobleman, is a fine example of the artist's skill. The piece of a Russian nobleman, is a fine example of the artist's skill.

Yet another disgraceful scandal had come to light in Liverpool. A solicitor of high standing named William Stockley had disappeared with a defalcation estimated at four £10,000 to £20,000 sterling—mostly trust money belonging to clients.

The motto of Austria, in Hanover, having received from the landrost or perfect a prohibition to celebrate their Divine service, applied to the government council of the province of Hanover. In consequence of the speech of Mr. Rouher on the Roman question, and in execution of Art. 12 of the Prussian constitution, the prohibition has been withdrawn.

An editor in Illinois having engaged a new reporter, received the following as his first effort: "We are informed that the gentleman who stood on his head under a apple-tree for the purpose of having a tight rope in his pants drove on shortly after found himself in China, perfectly naked and without a cent in his pocket. He writes that it is his intention of returning home by way of the Paris expedition."

SPECIAL NOTICES.

Dr. P. Meredith, Dentist, office No. 132 West Sixth Street, states as follows:
 (CINCINNATI, October 1, 1888.)
 Messrs J. N. Harris & Co.—Gentlemen:—About one year ago I took a cold which settled on my lungs. A violent cough was the consequence, which increased with severity. I resorted to various remedies, but without success. I was then confined to my bed. The disease was attended with cold chills and night sweats. A diarrhea set in. My friends thought I was in the last stages of Consumption, and could not possibly get well. I was recommended to try
ALLEN'S LUNG BALM.
 The formula was shown to me, which induced me to give it a trial, and I will only add that my cough is entirely cured, and I am now able to attend to my business as usual. Yours respectfully,
 P. MEREDITH.
 Sold by all Family Medicine Dealers.
 J. N. Harris & Co., Agents for the Dominion of Canada.

TYPHOID FEVER.

This disease is not only cured by Dr. Haden's Relief and Pills, but prevented. It is exposed to put on the epidemic of Relief in a milder form of water. Drink the before going out in the morning and several times during the day. Take one of Haden's Pills one hour before dinner, and one on going to bed.
 I suffered with Fever, like that of the Pills every six hours, until copious discharges from the bowels took place; also drink the Relief diluted with water, and take the entire surface of the body with Relief. Soon a powerful perspiration will take place, and you will feel a pleasant heat throughout the system. Keep on taking Relief immediately, every four hours, also the Pills. A cure will be sure to follow. The Relief is a strengthening, stimulating, soothing and quieting; it is sure to break up the Fever and neutralize the poison. Let this treatment be followed, and thousands will be saved. The same treatment in Fever and Ague, Yellow Fever, Ship Fever, Bilious Fever, will effect a cure in 24 hours. When the patient feels the Relief forming or leaving the skin, a cure is positive. In all cases where pain is felt, the Relief should be used.
 Relief 50 cts.; Pills 25 cts. Sold by all Druggists.
 See Dr. Haden's Claims for 1868. 179-20-41-30

WESLEYAN

FEMALE COLLEGE,
 HAMILTON, ONT.

THIS Institute opens after Christmas Holidays, on FRIDAY, 3rd January, 1889, at 10 o'clock A. M.

NOTICE.

APPLICATION will be made to the Legislature of the Dominion of Canada, at its next sitting, for an Act to incorporate a company under the name of the Bank of Hastings, for the purpose of carrying on the business of Banking and Exchange in Belleville, etc., and for other purposes.

Belleville, Nov. 1, 1887 180 tr

PROSPECTUS OF THE EL DORADO MINING COMPANY OF MADOC.

CAPITAL STOCK

Divided into 2,400 Shares of \$20 Each.

Deposited on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its Incorporation, under Chapter 23, 27, and 28 Vic. for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 5th Concession of Madoc. It is situated about forty rods from the celebrated Rich-ardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 40 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$33.80 in gold, which specimen can be seen at J. E. Ellis, on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore.

The projectors have determined only to sell sufficient stock to repay the advances, and to carry on the work satisfactorily. They have thereupon decided to sell only 323 shares of the value of \$30 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1888. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings.
 RICHARD SPARKLING, Managing Director and Superintendent.
 T. S. MCGLEASHAN, of Madoc.
 MAHLON BURNELL MCGREGOR, of Madoc.
 T. A. MITCHELL, of Madoc.
 ALDERMAN VICKERS, of Toronto.
 J. E. ELLIS, of Toronto.

McCLELLAN & McCLELLAN, Solicitors. A. F. WOOD, President.
 BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

Applications for Shares received by Alderman Vicker, Yonge Street, Toronto; J. E. Ellis, King Street, Toronto, and at the office of

JOHN CAMERON, July 22, 1867. 368

Avoid hypocrisy, in all its moods and tones. If you think a man is a fool, tell him so unless he is bigger than yourself.

Christian perfection in outward conduct consists, not in doing extraordinary things, but in doing things extraordinary well.

It is little troubles that wear the heart out. It is easier to throw a bombshell a mile than a feather—even with artillery.

SHUTTING UP ACCOUNT.—Aunt Betty was trying to persuade little Jack to retire at sunset, using an argument that all the little chickens went to roost at that time. "Yes," said little Johnny, "but the old hen always goes with them." Aunt tried no more arguments with him.

DEATH BY CONSUMPTION.—It is estimated that 100,000 die yearly in the United States with Consumption, who have a remedy, but will not avail themselves of it. When Consumption first appears there is pain in the chest and oppression. Attend with difficulty of breathing. Soon there will be a cough, if this irritation is not healed, and the only effort to raise will still add fuel to the fire. All this Balm will at once allay the pain and irritated parts, stop the cough, and prevent what would be Consumption. It is making cures of diseased Lungs which were considered incurable in the city. For sale by all druggists.

ED. D. WYCKOFF, A. L. MCLELLAN, JAS. A. BURMAN, JR., F. E. KILVERT, ASA H. FAIRBANKS, are the owners of the property hereinafter mentioned, and are desirous of forming a Stock Company, with the capital of \$25,000, and are to receive and take in payment for the said property \$1,250 in cash, and 2,350 shares of paid up Stock of the said company. The said parties are now taking proceedings for its incorporation, under cap. 23, 27-38 Vic., and have much pleasure in calling the attention of the public to the following Prospectus:

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives this company peculiar advantages over many others there, being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out, and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving right feet of backs to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intend, as soon as a charter is granted to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.

Another great advantage in this property is, that immediately the charter is commenced can be taken out in quantities more than sufficient to pay the working expenses and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of them, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO. TEM.

ED. D. WYCKOFF, ASA A. BURMAN, JR., F. E. KILVERT, JAS. A. BURMAN, JR., ASH. EDWIN O'REILLY, E. H. HALE.

PROV. PRESIDENT—ED. D. WYCKOFF.

PROV. SECY & TREAS.—JAS. C. MITCHELL.

SOLICITORS—THOMSON & KILVERT.

Stock Book opened at J. W. Murton's Exchange Office, Hamilton. Application for Stock and other Communications may be addressed to any of the Directors, or to JAMES C. MITCHELL, Prov. Secy & Treas., Hamilton. d183-H

December 3d, 1867.

LOOK: THE DAILY LONDON

ADVERTISER is published every evening, and sent by mail at \$4.00 per annum, payable in advance. It contains all the local and general news, the latest telegrams and market reports, and is the largest in Upper Canada, outside of the Toronto Press, advertisers who wish to reach the ear of the West will take advantage of its columns. The Globe says of the ADVERTISER:

"This excellent newspaper now appears in new type, and is one of the neatest papers in the country. The ADVERTISER is well conducted, and though not so old as the Toronto Press, and weekly editions a very large circulation—larger than any other journal published in this neighbourhood. It is, therefore, a first-rate advertising medium."

READ: THE WEEKLY ADVERTISER

is the cheapest paper in Upper Canada. Terms, \$1.25 per annum, in advance. The balance of the present year's subscription, and all arrears, must be paid in advance. Specimen copies and circulars sent on application. Send for specimens! All letters should be addressed to JOHN CAMERON, ADVERTISER OFFICE, LONDON, Ontario.

 present Speaker of Commons, Cockburn,
 succeed C. J. Draper, and Gray to be Speak

papers received concede that the person who actually killed policeman Brett, it was at large, and that Maguire, who was one of the five convicted and condemned to hang, but was afterwards pardoned, was

not a Fenian, and had nothing whatever to do with them.

—Emma Wilson, of London, committed suicide by partaking of Morphine. The London Druggists sell that cheerful drug to their customers in large quantities.

SPECIAL NOTICES.

Dr. P. Meredith, Dentist, office No. 132 West Sixth Street, states as follows:

CONCERNING, October 1, 1887.
Messrs. J. N. Harris & Co.—Gents.—About one year ago I took a cold which settled on my lungs. A violent cough was the consequence, which increased with severity. I expected large quantities of Phlegm and mucus. During the last winter I became so much reduced that I was confined to my bed. The disease was attended with cold chills and night sweats. A thorough rest in my friends' house in the last stages of Consumption, and could not possibly get well. I was recommended to try

ALLEN'S LUNG BALSAM.
The formula was shown to me, which induced me to give it a trial, and I will only add that it cures me entirely cured, and I am now able to attend to my business as usual. Yours respectfully,
P. MEREDITH.

Sold by all Family Medicine Dealers.
Perry Davis & Son, Agents for the Dominion of Canada, 42-44 W. 4th St.

TYPHOID FEVER.

This disease is not only cured by Dr. Radway's Relief and Pain, but prevented. It is expected to be put one tea spoonful of Relief in a tumbler of water. Drink this before going out in the morning and several times during the day. Take one of Radway's Pills one hour before dinner, and one on going to bed.
Fevered with Fever, take 4 to 6 of the Pills every six hours, until copious discharges from the bowels take place, also drink the Relief diluted with water, and bathe the entire surface of the body with Relief. Soon a powerful perspiration will take place, and you will feel a pleasant heat throughout the system. Keep on taking Relief immediately, until four hours have passed. A cure will be sure to follow. The Relief is strengthening, stimulating, soothing and quelling. It is sure to break up the Fever and neutralize the poison. Let this treatment be followed, and thousands will be saved. The name of the Relief is Fever and Ague, Yellow Fever, Ship Fever, Bilious Fever, will effect a cure in 24 hours. When the patient feels the Relief, it is certain of healing the skin, a cure is positive. In all cases where pain is felt, the Relief should be used.
Relief 50 cts., Pills 25 cts. Sold by all Druggists.
See Dr. Radway's Almanac for 1887. 179-20-41-2w

PROSPECTUS OF THE
EL DORADO MINING COMPANY
OF MADOC.
(LIMITED.)

CAPITAL STOCK ————— \$72,000.

Divided into 2,400 shares of \$30 Each.

Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its incorporation, under Chapter 23, 27, and 28 Vic. for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 6th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 45 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$50.80 in gold, which specimen can be seen at J. E. Ellis, on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore.

The projectors have determined only to sell sufficient stock to repay the advances, and to carry on the work satisfactorily. They have thereupon decided to sell only 823 shares of the value of \$20 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1888. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings.
RICHARD SPARLING, Managing Director and Superintendent.
T. S. McGLASHAN, of Madoc.
MAYOR BURWELL, of Madoc.
T. A. MITCHELL, of Madoc.
ALDERMAN VICKERS, of Toronto.
J. E. ELLIS, of Toronto.

McCLELLAN & McCLELLAN, Solicitors. A. F. WOOD, President.
BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

THE BRICK HOUSE in West Belleville, formerly occupied by FRANCES PAPER, Esq., Rent \$100 a year. For further particulars apply to Charles Pagnier, or of Rose, Bell & Holden, Belleville.
Nov. 29, 1887. 174-1f

Childhood is like a mirror, catching and reflecting images from all around. Remember that an innocent or profane thought uttered by a parent's lips may operate on the young heart like a careless spray of water thrown upon polished steel, staining it with rust which no accounting can efface.

Give a man the necessities of life and he wants the conveniences; give him the conveniences and he craves for the luxuries; grant him the luxuries and he sighs for the elegances; let him have the elegances and he yearns for the follies; give him altogether and he complains that he has been cheated both in the price and quality of the articles.

The Evanville (Ind.) *Courier* tells a story of a darkey, "almost white, very handsome and of pleasant address," who wooed and nearly won a young and respectable German girl. He lusted upon taking her to the house of his father, in Southern Illinois, to have the ceremony performed, and the assembled parents-in-law were full-blooded negroes who incontinently ran away and claimed protection of the nearest white neighbor.

A Good Junco on a mosey.—There is no doubt that Dr. Mason was a good judge. A brother minister intending to purchase a horse, stopped the doctor to ask his opinion. After taking a good look at him, Dr. Mason pointed to the knees of the horse, which were worn, indicating that he was in the habit of stumbling. "That," said he, "is a good sign for a minister, but a very bad sign for a minister's horse."

PROSPECTUS OF THE ROSE MINING COMPANY OF MADOC.

Capital Stock, - - - \$25,000.
Divided into - - - 5,000 Shares.
5,000 Shares - - - \$5.00 Each.

Deposit on Subscription Twenty-five per cent.

GEO. D. WYCKOFF, A. L. MCKELLEN, JAS. A. BURNHAM, JR., J. E. O'BRIEN, E. H. HALE, and HENRY RITCHIE are the owners of the property hereinafter mentioned, and are desirous of forming a Stock Company, with the capital of \$25,000, and are to receive and take in payment for the said property \$1,250 in cash, and 2,250 shares of paid up Stock of the said company. The said parties are now taking proceedings for its incorporation, under cap. 23, 27-28 Vic.

There is much pleasure in calling the attention of the public to the following Prospects:—

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the Town of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this property not only rich in minerals, but possessing facilities for mining which gives this company peculiar advantages over many others, there being on the property a large body of water, and a rock, in which numerous veins of gold-bearing quartz crop out, and instead of sinking shafts, (a most expensive and tedious operation), drifts can be taken out of the side of the ridge, crosscutting the different veins, and giving eighty feet of backs to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company is, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.

Another great advantage in this property is, that immediately the work is commenced ore can be taken out in quantities more than sufficient to pay the working expenses, and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM,

LOOK: THE DAILY LONDON
Advertiser is published every evening, and sent by mail at \$4.00 per annum, payable in advance. It contains all the local and general news, the latest telegrams and market reports. As its daily circulation is the largest in Upper Canada, outside of the Toronto Press, advertisers who wish to reach the eye of the West should take advantage of its columns. The *Globe* says of the Advertiser:—

"This excellent newspaper now appears in new type, and is one of the neatest papers in the country. The Advertiser is well conducted, and though not an old paper has for its daily and weekly editions a very large circulation—larger than any other journal published in the neighborhood. It is, therefore, a first-rate advertising medium."

READ: THE WEEKLY ADVERTISER is the best and cheapest paper in Upper Canada. Terms, \$1.25 per annum. The balance of the present year (1867). Splendid prizes to get up of clubs. Specimen copies and circulars sent on application. Send for Specimens! All letters should be addressed to JOHN CAMERON, ADVERTISER'S Office, London, Ontario.

American Watches.

THE true value of Machinery applied to Watchmaking is not that by its use Watches are made rapidly, but that they are made correctly. Very few people know why a Waltham Watch should be superior to any other. In the first place, at Waltham the Watch is regarded as only a machine, to be constructed, like any other machine, on mechanical principles. The factory is, indeed, little else than a machine shop, the principal work in which is not more upon watches than upon machinery to make watches with. If the watches are good, it is because the machinery is good. Of course, there must be no defect in the principle of plan or the movement, no mistake in the sizes or shapes of the pieces of which it is composed, nothing wanting in their properties, and no error in their positions. These points once thoroughly settled in regard to each part of every variety of watch, it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished piece. The method established in every department is the reduction of parts by mechanical means, and this is carried out on the system of the most thorough subdivision.

By means of multiplying gauges and microscopes, tests and inspection for the detection of wear in cutting tools, and for faults and flaws in steel or stone, are made to accompany the work in every stage from beginning to end. As a necessary result, the Watch goes together a finished machine. Every part is found to its property in its place. Every pin may be pushed till it pinches, and every screw turned home—without slugging and heeling action, the balance, even under the pressure of the lightest mainspring, vibrates with a wide and free motion, and the beat has the clear ringing sound always characteristic of the Waltham Watch. The machine is a time keeper from the start.

This system of watchmaking is unknown in foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce Watches that cannot be equalled for every quality which makes a watch valuable. Simple in plan, and correct in principle, the movement is set only beautifully finished, substantial, accurate and cheap, but is uniform to the minutest detail, not easily damaged, easily repaired, and when repaired always as good as new.

There are different grades of finish in the different varieties of Watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and tastes; but every Watch that bears the genuine trade mark of "WALTHAM" is guaranteed to be a good one, and nobody need be afraid to buy it.

EVERY WATCH FULLY WARRANTED.
For sale by all first-class dealers in the United States and British Provinces.

TORONTO and MONTREAL.

Toronto, Nov. 2, 1867. 168-3m 40-3m

The Daily Intelligencer

WILL appear about five o'clock every afternoon (Sundays excepted) and will be furnished by Carriers at the rate of \$5 a year if paid in advance, \$6 otherwise. Mail subscribers \$5 a year. \$2.50 for 6 months; \$1.50 for 3 months.

It will contain the latest telegraphic news up to the hour of going to press, including Cable despatches and the New York and Montreal Markets.

Arrangements have been made with RELIABLE CORRESPONDENTS in Madoc, Bridgewater, and other points, who will furnish us with early and full information respecting the Gold Regions, and of matters of general interest.

Special attention will be paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c., and in short, neither pain nor expense will be spared to make the DAILY INTELLIGENCER worthy of public patronage.

RATES OF ADVERTISING.

A liberal scale of prices for advertisements has been arranged as follows:

Cards, not exceeding six lines, 6 months, \$5.00
Half Square, 6 months, \$10.00
One Square, 6 months, \$20.00
Two Squares, 6 months, \$30.00
Four Squares, 6 months, \$40.00
Notices of Births, \$5.00
Do of Marriages, \$5.00
Do of Deaths, \$5.00

"BUSINESS NOTICES"—All matter under this heading, loaded or solid, 10 cents per line, measured by a square column.

Advertisers contracting for any space not less than half a square can have the privilege of changing their advertisements every two weeks.

Transient advertisements inserted at 7 cents per line for first insertion, and 3 cents for each additional insertion.

The Weekly Intelligencer

Is published every Friday Morning at \$2 per annum if called for at the Office, or sent by mail; and \$2.50 if delivered by the Carrier, payable in all cases in advance. When not paid until the close of the year, 50 cents will be added to each year's subscription. No paper discontinued until arrears are paid up, except at the option of the Publisher.

Within the past three months its circulation has rapidly increased, and the number now on our Subscription Books is over 1,400.

With such a large and general circulation throughout this and adjoining Counties, the WEEKLY INTELLIGENCER presents unsurpassed advantages to advertisers.

RATES OF ADVERTISING.

Six lines and under, first insertion, .00 34
Each subsequent insertion, .00 07
Above six lines (per line) first insertion, .00 07
Each subsequent insertion, .00 02

"BUSINESS NOTICES"—10 cents per line each insertion, measured as solid matter.

A liberal discount made to those who advertise for long periods.

Advertisements for insertion must be delivered before 12 o'clock, noon, on Thursday to insure their appearance.

All advertisements without written directions inserted until forbid, and charged accordingly.

The Intelligencer Job Office

Is supplied with Power Presses, Hand Presses, and possesses every facility for the rapid and neat execution of every description of plain and fancy printing, at prices as low as any other establishment in the county.

The DAILY and WEEKLY INTELLIGENCER can be had at the Book Stores in Belleville, and at Wilson's Drug Store, Madoc, and at 21 Dundas Street, Toronto. Sent to order.
All orders by mail promptly attended to.

QUEEN

INSURANCE COMPANY

CAPITAL, \$10,000,000

FIRE AND LIFE

LIFE DEPARTMENT.

THE principles on which this Company is

founded contain all the elements required

to develop the benefits of Life Assurance, and

afford every facility to intending assurers.

One of the advantages secured by those who

insure their lives with this Company is that

the outside expenditure for Management is

absolutely restricted by the Deed of Settlement

to Ten per Cent. of the Net Life

Income. This most important restriction

shows that the interests of participating policy

holders are closely watched and carefully

tended by the Company. Attention is es-

pecially called to this point, as the propriety

of premiums expended for Management

Must Largely Influence Profit

and Bonuses.

The next division of profits takes place in

1868, and all those who wish to participate in

the profits should insure at once.

OCEAN STEAMSHIP COMPANY,

UNDER Contract with the Government of Canada for

the Conveyance of the

Canadian & United States Mails.

Ingersoll has shipped \$300,000 worth of cheese to Europe.

An Elora jeweller has been fined \$25 for selling off jewelry by lottery.

A machine to extract the bones from slat is the latest invention.

About twenty-five miles of the Windsor and Annapolis Railway, in Nova Scotia, are now ready to receive the rails.

It is stated that the Rev. Mr. Cuyler and the Rev. Newman Hall, disguised in alcohols, recently made a tour of the haunts of vice and misery in New York.

Special correspondents for Abyssinia from four of the London daily papers were in Bombay at latest advices, awaiting the dispatch of the main body of the force.

About 600,000 saw logs were taken out of the Ottawa River last winter, and the preparations for manufacturing indicate that during this season the production of saw logs will not be less than one million.

"Ven you are a married man, Sandy, you'll understand a great many things you don't understand now; but yetter it's worth vye going through so much to learn a little, as the charity boy said ven he got to the end of the alphabet, it's a matter of taste."

TASTES.—We chew tobacco, the Hindoo lime, and the Patagonians guano, or sea fowls dung. Our children delight in candy, the African's in rock salt, while the Esquimaux leaps for a bite of fatty candle. To us, turtles are a savory dish; the Frenchmen revel on frogs and snails; other savages, on snakes.

A HARD HEAD.—A negro passing under a scaffolding where some repairs were going on, a brick fell from above on his head, and was broken by the fall. Sumbo, the coolly raised his head and exclaimed, "Hallo, you white man up dar, if you don't want your bricks broke, just keep 'em off my head."

EARLY TRAINING.—Accustom a child, as soon as he can speak, to narrate his little experiences, his chapter of accidents, his griefs, his fears, his hopes; to communicate what he has noticed in the world without, and what he feels struggling in the world within. Anxious to have something to narrate, he will be induced to give attention to objects around him, and what is passing in the sphere of his instruction; and to observe and note events will become one of his first pleasures; and this is the groundwork of a thoughtful character.

PROSPECTUS OF THE ROSE MINING COMPANY OF MADOC.

Capital Stock, - - - \$25,000.

Divided into - - - 5,000 Shares.

5,000 Shares - - - \$5.00 Each.

Deposit on Subscription Twenty-five per cent.

Geo. D. Wyckoff, A. L. McLELLAN, JAS. CARL RITCHIE, F. E. KILVERTY, ASA A. BURNHAM, JR., J. O'REILLY, E. H. HALL, and H. H. HARRIS, are the promoters of this company, and are desirous of forming a Stock Company, with the capital of \$25,000, and are to receive and take in payment for the same, property \$1,250 in cash, and 2,250 shares of paid up stock of the said company. The said parties are now taking proceedings for its incorporation, under act 23, 27-28 Vic., and have much pleasure in calling the attention of the public to the following Prospects:

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives this company peculiar advantages over many others, there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out; and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of backs to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.

Another great advantage in this property is, that immediately the work is commenced ore can be taken out in quantities more than sufficient to pay the working expenses and in that respect will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM,
Geo. D. Wyckoff, ASA A. BURNHAM, JR.,
F. E. KILVERTY, A. L. McLELLAN,
JAS. CARL RITCHIE, JAS. EDWIN O'REILLY,
E. H. HARRIS.

PROVIA. SECY & TREAS.—JAS. C. RITCHIE.
SOLICITORS—THOMSON & KILVERT.
Stock Book opened at J. W. Murray's Exchange Office, Hamilton, Application for Stock and other Communications may be addressed to any of the Directors, or to
JAMES C. RITCHIE,
Prov. Sec. & Treas., Hamilton,
December 23d, 1897. D198-1

PROSPECTUS OF THE EL DORADO MINING COMPANY OF MADOC.

(LIMITED.)

CAPITAL STOCK \$72,000.

Divided into 2,400 Shares of \$30 Each.

Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its incorporation, under Chapter 33, 27, and 28 Vic., for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 5th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 46 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$32.80 in gold, which specimen can be seen at J. E. Ellis's, on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore.

The projectors have determined only to sell sufficient stock to repay the advances, and to carry on the work satisfactorily. They have thereupon decided, to sell only 823 shares of the value of \$20 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1898. Out of the above sales, \$10,000 to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings.
RICHARD SPARLING, Managing Director and Superintendent.
T. S. McGLASHAN, of Madoc.
MARION BURWELL McGREGOR, of Madoc.
T. A. MITCHELL, of Madoc.
ALDERMAN VICKERS, of Toronto.
J. E. ELLIS, of Toronto.

McLELLAN & McLELLAN, Solicitors. A. F. WOOD, President.
BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

Applications for Shares received by Alderman Vicker, Yonge Street, Toronto; J. E. Ellis, King Street, Toronto, and at the office of

WILLIAM KERSTEMAN, 93 Church Street, Toronto.

THE DAILY INTELLIGENCER

BOOK AND JOB

PRINTING OFFICE.

THE public are informed that in connection with THE DAILY and WEEKLY INTELLIGENCER NEWSPAPER, we have one of the best appointed

By means of multiplying gauges and microscopes, tests and inspection for the detection of wear in cutting tools, and for faults and flaws in steel or stone are made to accompany the work in every stage from beginning to end. As a necessary result, the Watch goes together a finished machine. Every part is brought to fit properly in its place. Every pin may be pushed till it pinches, and every screw turned home—instead of sluggish and feeble action, the balance, even under the pressure of the lightest mainspring, vibrates with a wide and free motion, and the beat has the clear ringing sound always characteristic of the Waltham Watch. The machine is a time keeper from the start.

This system of watchmaking is unknown in foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce Watches that cannot be equalled for every quality which a watch should possess. Simple in plan, and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform to the minutest details, and easily damaged, easily repaired, and when repaired always as good as new.

There are different grades of finish in the different varieties of Watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and means, but every Watch that bears the genuine trade mark of "WALTHAM" is guaranteed to be a good one, and nobody need be afraid to buy it.

For sale by all first-class dealers in the United States and British Provinces.

ROBERTS & CO., No 182, BROADWAY, N.Y.

ROBERT WILKES, Toronto and Montreal.

Toronto, Nov. 2, 1897. 168-3m 40-3m

THE DAILY INTELLIGENCER

Will appear about five o'clock every afternoon (Sundays excepted) and will be furnished by Carriers at the rate of \$5 a year, if paid in advance, \$6 otherwise. Mail subscribers \$5 a year. \$2.50 for 6 months; \$1.50 for 3 months.

It will contain the latest telegraphic news up to the hour of going to press, including Cable despatches and the New York and Montreal Markets.

Arrangements have been made with RELIABLE CORRESPONDENTS in Madoc, who will furnish us with early and full information respecting the Gold Regions, and of matters of general interest.

Special attention will be paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c., and, in short, neither pains nor expense will be spared to make the DAILY INTELLIGENCER worthy of public patronage.

RATES OF ADVERTISING.

A liberal scale of prices for advertisements has been arranged as follows:

Cards, not exceeding six lines, 6 months, \$5.00

Half Square, 6 months, \$10.00

One Square, 6 months, \$20.00

Two Squares, 6 months, \$30.00

Four Squares, 6 months, \$50.00

Notices of Births, 50

Do of Marriages, 50

Do of Deaths, 50

"BUSINESS NOTICES"—All matter under this heading, headed or solid, 10 cents per line, measured by a scale of solid matter.

Advertisements for any space not less than half a column can have the privilege of changing their advertisement every two weeks, changing their advertisement inserted at 7 cents per line for first insertion, and 2 cents for each additional insertion.

THE WEEKLY INTELLIGENCER

Is published every Friday Morning at \$2 per annum if called for at the Office, or sent by mail; and \$2.50 if delivered by the Carrier, payable in all cases in advance. When not paid until the close of the year, 50 cents will be added to each year's subscription. No paper discontinued until arrears are paid up, except at the option of the Publisher.

Within the past three months its circulation has rapidly increased, and the number now on our Subscription Books is over 1,400.

With such large and general circulation throughout this and adjoining Counties, the WEEKLY INTELLIGENCER presents unsurpassed advantages to advertisers.

RATES OF ADVERTISING:

Six lines and under, first insertion, 0.50

Each subsequent insertion, 0.125

Above six lines (per line) first insertion 0.75

Each subsequent insertion per line, 0.07

"BUSINESS NOTICES"—10 cents per line each insertion, measured as solid matter.

A liberal discount made to those who advertise by the year.

Advertisements for insertion must be delivered before 12 o'clock, noon, on Thursday to insure their appearance.

All advertisements without written directions inserted until forbid, and charged accordingly.

The Intelligence Job Office

Is supplied with Power Presses, Hand Presses, and possesses every facility for the rapid and neat execution of every description of plain and fancy printing, at prices as low as any other establishment in the County.

The DAILY and WEEKLY INTELLIGENCER can be had at the Book Store, Belleville, and at Wilson's Drug Store, Madoc, and at El Dorado.

All orders by mail promptly attended to.

INTELLIGENCE BUILDING, 100-1st Street, Belleville.

FRANK BERRY, BELLEVILLE.

168-3m 40-3m

consider himself a Canadian in discussing this great question. But he had forgot he was a Nova Scotian, had forgot he was a Canadian, in going against his twenty-five years of public life in the advocacy of an Intercolonial Railway. He who had urged upon the Colonies, and upon the people of England, the importance of the commercial and political union of these Provinces, now occupied a position antagonistic to his former professions, and therefore had forgot his obligations, both to Canada and to Nova Scotia. He (Dr. T.) was prepared heartily to support the Government of the Dominion in taking possession of the Northwest territory, but he held that it was not creditable that a body of English gentlemen, such as composed the Hudson's Bay Company, should be denounced in this House as they had been. Then his son, friend had represented that Nova Scotia's credit had been ruined by Confederation, when as a matter of fact, it had been shown by the statement of the Minister of Finance that the Province had drawn from the Dominion Government a very large amount in excess of what it had paid. The other night the member for Hants had described the Hudson's Bay territory as a place lying God knows where, and bounded by God knows what, but he (Dr. T.) would quote an authority which the hon. member for Hants should at all events respect. No one had described the Hudson's Bay territory in more gloomy terms than he, and he would simply refer to his own testimony as to its character. He had also said that we should walk into that territory and take possession, and he (Dr. T.) would agree that nothing would prevent us from doing so after the passing of these resolutions. When these were passed and acted upon it would be for Canada to walk in and take possession. An attempt had also been made to alarm the prejudices of the French Canadians to induce them to keep this Confederation "cabin, cribbed, confined" within its limits, as a means of defence for their own institutions. But we do not know that the rights and institutions of the French Canadians, whose loyalty had so often saved the rights of the crown on this continent, were protected and guaranteed by the Imperial Parliament. In conclusion he (Dr. T.) felt that he would be false to himself as a British American, false to his duty in this Parliament, and false to the children who would come after him, if he threw any obstacle in the way of carrying out the policy now submitted to the House. (Cheers.)

Daily Intelligencer.

BELLEVEILLE, THURSDAY, DEC. 12.

MR. TAYLOR'S LETTER.—Another letter has been received from this gentleman, and as "Items" are not "scarce," it has been consigned to the waste basket.

ALBERT COLLEGE.—It will be seen by advertisement that the Winter Examinations and Exhibition will take place next week. They will be of the usual academic interest, and we have no doubt will be largely attended.

PERSONAL.—We are requested by Mr. St. George B. Crozier, to convey his warmest thanks to the Committee of the St. Andrew's Society for their very handsome acknowledgment of his services at their Concert on the 2nd inst.

LARCENY.—A young lad named Jas. Scallion, aged about 16 years, when employed some short time since at the Rev. Father Brennan's residence, stole therefrom a box containing about \$40, the property of Mr. Pat. O'Brien. The boy was arrested, and conclusive proof of his guilt having been obtained, he was committed for trial to the present sessions by the Police Magistrate.

SOURCE OF THE JOHN STREET PRESBYTERIAN CHURCH.—The annual Source in connection with the John Street Presbyterian Church, was held on Ontario Hall last evening. About 500 persons were present. After a blessing by the Rev. Septimus Jones, and ample justice done by way of supplying the inner man, the Rev. Mr. McLaren was called to the chair. The audience was treated to the better part of the entertainment by well-timed speeches from the Revs. Messrs. Preston and Jones, of the Town, and Revs. Messrs. Hay, of Scotland, and McMechan, of Picton. In addition to music by the choir, under the leadership of Mr. J. C. Holden, Miss Mendall sang one of her favorite selections, which called forth a most hearty encore. Mr. and Mrs. Price sang several pieces, which were well received, which, in connection with the performance of Messrs. Dean and Roach on the flute and violin, added much to the interest of the occasion. A restoration and reading were given by Mr. Muir, which received much applause. After a vote of thanks to Mr. Muir, who had given the use of the Hall without fee or reward, the meeting broke up. Every one seemed well pleased with the first soiree of the season. The amount realized was handsome.

THE BILLIARD MATCH.—Contrary to general expectation McDewitt won the match last night. The game was one of 1,500 points, (arrows) on a full sized table, American game, for the championship of America and a purse of \$1000. The first telegram received here of the game gave Dion, 55; McDewitt, 155. At 9:15 the figures stood, Dion, 329; McDewitt, 188. Dion having made a run of 280. At half-past ten the score stood, Dion, 743; McDewitt, 456. At eleven McDewitt had picked up wonderfully, the figures standing, Dion, 758; McDewitt, 744. At 12:30 Dion was 16 ahead, and at 1:30 this morning the game closed with McDewitt the victor by 13 points.

Gold News.

We have received an interesting letter from our Madoc correspondent, giving an account of the progress at the mines for the past month, but too late for to-day's issue. It will appear to-morrow.

We are requested to state that the report in a contemporary that Turley & Gilbert's Crusher had stopped work, is not correct. The mill has been steadily at work, and the results are highly satisfactory. From all the rock crushed gold has been obtained, averaging from \$1 to \$30, and as high as \$60 a ton. Some improvements are being made in the mill, which will lessen the amount of manual labor, and render it more efficient.

Crown Lands Report.

Through the Commissioner of Crown Lands of Canada, for the year ending December, 1866, which has just been published, contains a large amount of information, from which we gather some interesting facts. In Upper Canada, at the commencement of 1866, there were 3,218,510 acres of surveyed Crown Lands on hand, in addition thereto, 245,869 acres were surveyed during the year, making a total of 3,464,379 acres, of which 170,827 acres were sold, and 7,200 acres located as free grants in the colonization roads, leaving a balance of 3,286,551 acres disposable at the end of the year. The amount obtained from lands sold was \$120,777; amount collected \$196,836.

In Lower Canada the sales of Crown Lands during the year amounted to 161,428 acres; the purchase money to \$65,369; the receipts to \$69,726. On the colonization roads 10,850 acres were located as free grants to actual settlers. To the 6,142,669 acres disposable at the commencement of the year, 305,826 acres were added by surveys, making a total of 6,448,495 acres, from which, deducting the sales and free grants, 173,278 acres, a balance of 6,275,215 acres remain for future disposal.

Of Clergy Lands in Upper Canada, there were 63,670 acres sold during the year, the purchase money of which amounted to \$78,933. The gross amount of collections was \$198,292; the disbursements were \$897.

In Lower Canada there were sold in 1866, 12,597 acres of Clergy Lands, which deducted from the quantity remaining unsold at the commencement of the year, 270,305 acres, leaves a balance of 357,708 acres still disposable. The purchase money of the lands sold was \$6,785; collections, \$35,655.

In Upper Canada, of Grammar School Lands, there were sold only 890 acres, leaving a balance of 45,993 acres still disposable. These lands sold realized \$1,548; collections, \$8,667. The sales during the year of Common School Lands, set apart for creating a Common School Fund, amounted to \$2,948 acres, chiefly lots which had formerly been sold, but resumed for the non-performance of the conditions of sale. Amount of sales \$3,366; collections, \$128,070; disbursements, \$490. The total amount realized from Common School Lands up to the 31st December, 1866, was \$1,380,833.

Of mineral lands in Upper Canada, 12,777 on the North shores of Lakes Huron and Superior, were patented for mining purposes during the year. The revenue from these lands was \$9,645.

In Lower Canada there were 10,504 acres of mineral lands sold during the year at \$1 an acre—4,951 in the township of Watford, and the balance on the North shore of the St. Lawrence, in the County of Saguenay.

For ordnance lands in all Canada, the revenue for 1866 being the growing result of the operations of preceding years, amounted to the sum of \$39,061, exceeding the income of 1865 by a sum of \$9,797. The expenses of this branch were \$7,169.

In the Indian Department, the returns of which embrace the whole of Canada, the receipts for lands and timber for the year 1866 were \$29,455; interest on investment for the same period \$14,628; annuities and grants, \$35,420, making a total of \$349,503. The payments made, comprising annuity and interest money to Indians, and salaries surveys and incidental expenses, amounted for the same period to \$140,469. On the

1st of January, 1866, the total sum at the credit of the various Indian bands was \$1,630,833. At the termination of the year, from payments of instalments on lands, from new sales, timber, etc., the amount, after defraying salaries and all other charges was \$1,739,867, showing an increase of \$109,033.

In the Woods and Forests Department we find that the amount collected during 1866 for timber dues and ground rents was \$338,302, and from slide dues \$63,483, making the total \$401,786; in addition to which the sum of \$903 was collected for other services, viz.: Clergy, School and Indian, and \$7,995 value of settlers' timber; total, \$410,685. The charges of management for collecting timber dues, ground rents and slide dues were \$31,767. These charges do not include the salaries of Woods and Forests Branch at headquarters, nor \$6,861 refunds, etc.

We have not space to continue our summary from this report to-day, but in a future issue will give a further digest of the interesting document.

FROM OUR OTTAWA CORRESPONDENT.

OTTAWA, Dec. 11th 1867.
The House was occupied until about two o'clock this morning, discussing the motion of want of confidence, for such it was declared to be by Mr. Blake, for it not only condemned the Ministry in general terms, but the Financial Minister in particular, though he had occupied a seat in the Cabinet for a few days only. It was evident as soon as the motion was proposed that there was a row in the Grit camp, which was intensified when Mr. Cartier pointed out the position of parties who attempted to lead the opposition in the House, Mr. McKenzie who deserved better things, had been entirely ignored in this strategic move of Mr. Dorian, you could see the brow knit, and the fire flash from the small grey eye of the member for Lambton, as the little Frenchman informed the House, that he had, though of long experience and undoubted talent, been set aside, and the member for West Durham installed in his shoes. The slight was more than the blood of a McKenzie could brook, and he might have been seen "sloping" from the House, and soon after the Grit seats were empty. A caucus was held out of the room, where the member for Lambton poured out his grief in pathetic terms, at the treatment he had received by the assumption of leadership on the part of Mr. Blake, and told his followers that no vote was made without his knowledge or consent, and it was extremely unfair to place the party in such a position without their consent. Setting aside all feeling of men, every one must come to the conclusion that Mr. McKenzie had good ground of complaint. Here was a leading man of the party for a number of years, completely set aside by a man who had just entered Parliament, with an assumption not often equalled, even in political maneuvering. In establishing, or rather, in endeavoring to establish his position, Mr. Blake told his thrice told tale over again. He denounced the Government in unmeasured terms, and went over in detail, his first speech on the Address, with a good deal more fire and language. The result was that four Upper Canadians, in addition to himself, voted for the amendment. Mr. McKenzie did not vote, having left the House and did not return until the vote was taken, or what is termed in Parliamentary parlance, "shirked the vote." So much for the first attempt of the great Chancery lawyer.

The House went into Committee of Supply, and after some discussion the House adjourned.

To-day the House has been occupied with preliminary business, and which the supply was passed up to the 30th of March next, when the Ministry proposes to bring down a detailed statement of the expenditure. One important fact was brought out by Mr. Anglin, at least as far as I could catch the remarks, that the Bank of Montreal had been deceiving the country out of about 13 per cent, upon its transactions with the country, and the sooner the scheme is changed, the better—at least such was the impression left upon those who were in the gallery.

The House is again discussing the Nor' West question, which may end to-night or it may not.

Town Council.

At a special meeting of the Town Council held last evening, a By-Law was introduced by Mr. Sutherland for the appointment of Returning Officers, to provide for holding the ensuing Municipal Elections, &c. The By-Law was read respectively a first, second, and third time, and passed.

The By-Law enacts that the new Engine House shall be the Town Hall, and selects the place for holding the elections, and appointing Returning Officers as follows:

RETURNING OFFICERS.—At the Town Hall, J. T. Bell, Returning Officer.
JAMISON WARD.—In the room adjoining the Police Office, R. M. Roy, Returning Officer.

CORRAN WARD.—At the same building where last held, John Thomas, Returning Officer.
BALDWIN WARD.—At G. J. Brown's sale rooms, John Wonnacott, Returning Officer.

On motion of Mr. Sutherland, seconded by Mr. Henson, returning the Collectors' Rolls, was extended to the 1st of January, 1868.

The Clerk was directed to advertise that all claims against the Town must be sent to the Chairman of the Finance Committee on or before the 18th inst.

County Court and Quarter Sessions.

SECOND DAY.
(CONTINUED.)

The following case was tried after the Court opened at 3 o'clock yesterday afternoon:

QUEEN VS. SAMUEL WINTERS.—Assault upon one Joseph Whiteman. Both parties live in Lonsdale, in Tyendinaga. Meeting at a tavern they commenced "cracking too" a liquor. A quarrel ensued, prosecutor left the tavern. Defendant followed him up, and dared him out to fight. Whiteman came out of his house. Defendant, after threatening some time, seized hold of him, and in the struggle his coat was torn, and he thought the injury was sufficient to warrant him bringing the case to Court. Verdict, guilty. Fined \$6 and costs, in all about \$30. C. L. Coleman for Crown; S. B. Burdett for defendant.

THIRD DAY.
DEC. 12.

The Court opened at the usual hour, Hon. Judge Sherwood presiding.

STEVENSON et al. vs. T. H. CASE.—Action against defendant as signer of a promissory note made by one Schuyler Case. Defence: Did not endorse, and want of notice of dishonor. ELIAS SILLIS, sworn in as a juror; defendant admitted to me that plaintiff had notice with his name on, and wished he could get it up; that it might not be against him as evidence to prove the signature on other paper; at defendant's request I wrote to plaintiff that he was willing to turn out their customers' paper in payment of the note due on. Defendant a lot of notes that defendant showed me for the purpose of selecting enough to pay this note; I could not satisfy myself from them, and upon examination of his ledger to select several accounts and requested him to reduce them into notes, and I would take them; he said he would do so; repeatedly, before and after the note came due, the promised to pay it; about a month after the note matured he refused to pay it, as he had advised he was not liable; do not remember defendant refusing in presence of any one sent to go aside with me as he had been advised not to have any conversation with me alone; do not recollect defendant telling me in presence of Wood that he would not speak to me, except in the presence of Wood. Defendant called several witnesses and endeavored to impeach the evidence of Sillis, which failed. Verdict for plaintiff, \$399. N. B. Falkner and R. P. Jellett for plaintiff; L. Wallbridge, Q. C. for defendant.

To the Editor of the Daily Intelligencer.

DEAR SIR,—The "rowdyism" of the Chronicle, to use its own expression, is again "rampant," and in this case, as in the former, the paragraph contains a most unmitigated falsehood, to use no lighter expression. Every respectable person in the room on last Thursday night can testify to the fact that during the first and third readings, which were short and pleasing, not a particle of interruption occurred, except that of approbation at the close. But the large crowd were very properly annoyed at the second reading, which first consisted of Aytoun's long poem of "Charles Edward," and then nine closely printed pages of "The Battle of Culloden." For a long hour and a half the people were listening quietly to an uninteresting subject, but "the force of patience could no further go," and they stamped it down, well knowing that the treat they expected from Mr. Tilley was worth all the battle accounts that ever were written for uninterested ears.

None of the Police were there, except the Chief, and he was not hushed, though he endeavored to induce—not the rowdies, for there were none present—but the respectable persons in the lower end of the Hall, to bear with the monotonous chant a few minutes longer, but to no purpose, and as neither the editor nor subscribers of the Chronicle were present, statements void of truth ought not to be received and given to the public per fas et nefas.

If the ladies of the choir of the "Temple" refuse to sing at the Penny Readings, it is because they really have not time, from the improper and verbose selections made by readers who, in a great majority of instances during the present season, seem to wish for no better amusement than inflicting long and prosy articles unsuited to a mixed audience, and on seeking to disgust a large number of townspeople, which, under other management, might be a source of amusement and literary recreation to the public.

Does not not strike the most unimpassioned reader that it is a very ludicrous and nonsensical affair to talk of a few public officials in the manner indulged in by idle fellows at the close of tavern and club houses? If a half dozen or more of the rowdies were present, a drunken loiterer knocks his head against a lamp post, he cries out "where are the Police?" If a sailor staggers to his vessel and reels against a roasting youngster late at night, "rowdyism" is rampant, and now, if a number of talented and respectable people cry out, "hold, enough!" to an insipid reader, the war whoop of "where are our two Policemen," is heard resounding through the columns of the Press.

"Be gorra, there's a power of the army about," said an old woman in Ireland in 1848, when she saw two soldiers late at night. The two Peolers of Belleville would have caused an equal sensation if they could be present at every thing that occurred in their midst during the twenty-four hours. Yours faithfully,

Some predict an unusually mild winter from the thinness of the corn sheaves. On the other hand, the record books show that we are to have an exceedingly cold and dry December, January, and February, but a very wet March.

Telegraphic News.

BY ATLANTIC CABLE.

LIVERPOOL, Dec. 11.—The demonstration proposed by the Fenians on Sunday next, in this city, has been peremptorily forbidden by the authorities, who are fearful of the consequences of so violent an ill-feeling towards the government.

LONDON, Dec. 11.—Late despatches from Shanghai, make mention of new and more serious outbreaks in the Province of Chih, near Pekin. At the last accounts the rebels were marching on the capital.

LONDON, Dec. 11, noon.—The Times of this morning has another editorial on American matters, and particularly on the recent message of President Johnson. So far as the Times is able to understand the President from the message report received by the cable, it has no hesitancy in counselling the acceptance by the American people of Mr. Johnson's views on the question of citizenship.

It is now said that the French Government has no objection to negotiate a loan as was some time since reported.

It is reported that Prince Gortschakoff has resigned the Chancellery of the Russian Empire.

FLORENCE, Dec. 11.—The sittings of the Italian Parliament are quite stormy. The debates recently have been very violent, and the Liberal members have assailed the Ministers mercilessly.

LONDON, Dec. 12.—Some British soldiers are to be tried by court-martial for participating in the Fenian funeral ceremonies at Dublin. These ceremonies and like demonstrations are taking place throughout Ireland.

SOUTHAMPTON, Dec. 12, noon.—The steamers "Saxonia" and "City of Washington" have arrived.

LONDON, Dec. 12, noon.—Consols 92.

LIVERPOOL, Dec. 12, noon.—Cotton quiet, and price unchanged.

LONDON, Dec. 12, 2 p. m.—Consols declined to 92½; American securities steady and unchanged.

PARIS, Dec. 12, 1:30 p. m.—Bourse strong; Rentes advanced.

LIVERPOOL, Dec. 12, 3 p. m.—Cotton more active, but dull. Breadstuffs quiet. Last advanced to 59½; Tallow declined to 44s. Lined Oil declined to 42s. Sugar quiet.

American Despatches.

MONTPELIER, Vermont, Dec. 11.—One of the most fearful accidents known in the annals of Vermont transpired to-day at what is known as Vernon Bridge, near Northfield, on the Vermont Central Railway. The bridge was burned on Sunday last, and about 100 men have been engaged in repairing the wreck for temporary use. Most of the employees were returning to work in a passenger car, which was being backed up to the works. By some forgetfulness the engineer proceeded with them at a rapid rate, and did not check the speed until too late, and the whole car, with from 70 to 100 men, was backed into the river below, a distance of 60 feet. Fifteen men were killed instantly, and three or four others have since died. Many others were seriously injured. Deceased were among the most useful men in Vermont. It is believed that when the engineer wished to stop the train the engine was beyond his control.

NEW YORK, Dec. 12.—The Herald's Havana special says: News from the capital of Mexico, by steamer "Georgia," to the effect that the people are satisfied with the losses registered in the United States by Minister Romero. All loans of the Emperor are repudiated. Congress is annulling the election of certain members of that body who served under the late Emperor. The revolution at Durango turns out to be a canard. Holders of bonds who were forced to flee from the city of Mexico are now returning with security during the war against the intervention, shall allow the Treasury four per cent for the cash payment of such advances.

NEW YORK, Dec. 12.—A furious snow storm has prevailed here since 3 o'clock this morning.

Dr. Livingstone.

The cable report of the discovery of Dr. Livingstone alive and well seemed based on rather slight foundation—in point of fact, neither more nor less than the following letter to the London Times from Sir R. Marchmont:

"To the Editor of the Times:—
"Sir,—I have this day received a letter from Dr. Kirk of Kanbar, dated the 28th of September, stating that he had seen a native trader who had just returned from the western side of Lake Tanganyika, and who gave him a detailed account of having seen a white man travelling in that very remote region.

"The letter is long and will not bear abridgment, and as I wish to have the subject thoroughly discussed by those most competent to judge of the value of the information given by Dr. Kirk, I have given merely to announce that the letter will be read on Monday next at the meeting of the Royal Geographical Society.

"I remain, sir, your obedient servant,
"ROBERT J. MARCHMONT."
The sanguine nature of Sir J. Roderick has never allowed him to believe in the report of Dr. Livingstone's death, and it is probable that the news dimly shadowed in his letter will give very small reason for hope of the traveller's safety.

It is reported that the Hon. George Brown will return to Canada on or about the 15th of next month.

Manufacturers of chewing tobacco use large quantities of glycerine to keep the tobacco soft, and to give it a sweet taste.

Sad Case.

A LADY IN "HIGH LIFE" A VICTIM OF INTOXICATION.

A lady, handsome in form and face, the young wife of a once happy husband, a former leader of society in "high life," and still wealthy, entered the drug store on the corner of Eight and Vine streets recently, stood by the counter and called for a piece of writing paper and pen and ink. The clerk brought the desired articles to her, and she commenced to write a note. As she did so the clerk noticed that she was dressed elegantly, and that hundreds of dollars glistened through diamonds on her fingers. He noticed also that her face was handsome; but there was an expression upon it that rendered it repulsive, despite its beauty. The cheeks were flushed as if with strong fever, the lips worked uneasily, and the eyes rolled like those of a maniac. While he was studying the strange expressions of her face he noticed that the pen wandered irregularly over the paper, and very soon he saw it drop from her nerveless fingers as the face paled suddenly, and the form, with its robes of velvets and silks, dropped to the floor in a lump, shapeless heap. Several physicians were on hand immediately, and they in their efforts to restore the woman to her senses, discovered that she was simply dead drunk. On this occasion she was taken by kind hands to a safe place, where she was gradually sobered. Her absence, however, greatly alarmed her relatives.—*Cincinnati Commercial.*

"Johnny" said to another to a son nine years old, "Go and wash your face. I am ashamed to see you coming to dinner with so dirty a mouth." "I did wash it, mama; and I think it must be a moustache coming."

Sheridan, inquiring of his son what side of politics he should espouse on his getting into "the House," the son replied that he intended to vote for those who offered best, and that in consequence he should wear on his forehead a label, "to let" to which the wit rejoined—"Oh I see, unfurnished."

A Chicago paper says the latest thing in matches is a sneaking match for five hundred dollars a side, to take place at the Opera House in that city at a time not yet specified, but, probably, within the next thirty days. The match is for the championship of America.

PROSPECTUS OF THE ROSE MINING COMPANY OF MADOC.

Capital Stock, - - - \$25,000.

Divided into - - - 5,000 Shares.

5,000 Shares - - - \$5.00 Each.

Deposit on Subscription Twenty-five per cent.

C. RO. D. WYCKOFF, A. L. MCLELLAN, JAS. CARR RITCHIE, P. E. ELVERT, ASA A. BURNHAM, JR., J. E. O'REILLY, E. H. HALE, and HUGH FAIRBROTHER, are the owners of the property hereinafter mentioned, and are desirous of forming a Stock Company, with the capital of \$25,000, and are now taking proceedings for its incorporation, under cap. 33, 27-28 Vic., and have much pleasure in calling the attention of the public to the following Prospectus:

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives this company peculiar advantages over many others, there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out, and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of back to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes. Another great advantage in this property is, that immediately the work is commenced ore can be taken out in quantities more than sufficient to pay the working expenses and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.
Geo. D. Wyckoff, ASA A. BURNHAM, JR., P. E. ELVERT, A. L. MCLELLAN, JAS. CARR RITCHIE, JAS. EDWIN O'REILLY, E. H. HALE.

PROV. PRESIDENT—Geo. D. WYCKOFF.
PROV. SECY & TREAS.—JAS. C. RITCHIE.
SOLICITORS—THOMSON & KILPATRICK.
Stock Book opened at J. W. MURTON'S Exchange Office, Hamilton. Application for Stock and other Communications may be addressed to any of the Directors, or to
JAMES C. RITCHIE,
Prov. Sec. & Treas., Hamilton.
December 3d, 1897. D183-4f

PROSPECTUS OF THE EL DORADO MINING COMPANY OF MADOC. (LIMITED).

CAPITAL STOCK \$72,000.

Divided into 2,400 Shares of \$30 Each.

Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its Incorporation, under Chapter 33, 27, and 28 Vic., for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 5th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 40 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$53.80 in Gold, which specimen can be seen at J. E. Ellis', on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore. The projectors have determined only to sell sufficient stock to repay the advances, and to carry on the work, satisfactorily. They have thereupon decided to sell only 825 shares of the value of \$30 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1898. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:
A. F. WOOD, late Warden of the County of Hastings.
RICHARD SPARKLING, Managing Director and Superintendent.
T. S. MCLELLAN, of Madoc.
MAHLON BURWELL, MCGREGOR, of Madoc.
T. A. MITCHELL, of Madoc.
ALDERMAN VICKERS, of Toronto.
J. E. ELLIS, of Toronto.

MCLELLAN & MCLELLAN, Solicitors. A. F. WOOD, President.
BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

Applications for Shares received by Alderman Vicker, Yonge Street, Toronto; J. E. Ellis, King Street, Toronto, and at the office of

WILLIAM KERSTEMAN,

82 Church Street, Toronto.

American Watches.

THE true value of Machinery applied to Watchmaking is that by its use Watches are made rapidly, but that they are made correctly. Very few people know why a Waltham Watch should be superior to any other. In the first place, at Waltham the Watch is regarded as only a machine, to be constructed, like any other machine, on mechanical principles. The factory is, indeed, little else than a machine shop, the principal work in which is not more upon watches than upon machinery to make watches with. If the watches are good, it is because the machinery is good. Of course, there must be no defect in the principle of plan or the movement, no mistake in the sizes or shape of the pieces of which it is composed, nothing wanting in their properties, and no error in their positions. These points once thoroughly settled in regard to each part of every variety of watch, it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished piece. The method established in every department is the reduplication of parts by mechanical means, and this is carried out on the system of the most thorough subdivision.

By means of multiplying gauges and microscopes, tests and inspection for the detection of error in cutting tools, and for faults and flaws in steel or stone, are made to accompany the work in every stage from beginning to end. As a necessary result, the Watch goes together a finished machine. Every part is found to fit properly in its place. Every pin may be pushed till it is loose, and every screw turned home—instead of sluggish and feeble action, the balance, even under the pressure of the slightest mainspring, vibrates with a wide and free motion, and the least has the clear ringing sound always a characteristic of the Waltham Watch. The machine is a time keeper from the start.

This system of watchmaking is unknown in foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce Watches that cannot be equalled for every quality, which makes a watch valuable. Simple in plan, and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform to the minutest details, not easily damaged, easily repaired, and when repaired always as good as new.

There are different grades of finish in the different varieties of Watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and means; but every Watch that bears the genuine trade mark of "WALTHAM" is guaranteed to be a good one, and nobody need be afraid to buy it.

EVERY WATCH FULLY WARRANTED.

For sale by all first-class dealers in the United States and British Provinces.

The Daily Intelligencer

WILL appear about five o'clock every afternoon (Sundays excepted) and will be furnished by Carriers at the rate of \$5 a year if paid in advance, \$6 otherwise. Mail subscribers \$5 a year. \$3.50 for 6 months; \$1.50 for 3 months.

It will contain the latest telegraphic news up to the hour of going to press, including Cable despatches and the New York and Montreal Markets.

Arrangements have been made with RELIABLE CORRESPONDENTS in Madoc, Bridgewater, Marston and other points, who will furnish us with early and full information respecting the Gold Regions, and of matters of general interest.

Special attention will be paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c. (free), and in short, neither pains nor expense will be spared to make the DAILY INTELLIGENCER worthy of public patronage.

RATES OF ADVERTISING.

A liberal scale of prices for advertisements has been arranged as follows:
Cards, not exceeding six lines, 6 months, \$5 00
Half Square, 6 months, \$10 00
One Square, 6 months, \$20 00
Two Squares, 6 months, \$30 00
Four Squares, 6 months, \$50 00
Notices of Births, 6 months, 50
Do of Marriages, 6 months, 50
Do of Deaths, 6 months, 50

"BUSINESS NOTICES"—All matter under this heading, loaded or solid, 10 cents per line, measured by a scale of solid minims.

Advertisers contracting for any space not less than half a square can have the privilege of changing their advertisements every two weeks.

Transient advertisements inserted at 7 cents per line for first insertion, and 2 cents for each additional insertion.

The Weekly Intelligencer

Is published every Friday Morning at \$2 per annum if called for at the Office, or sent by mail; and \$2½ if delivered by the Carrier, payable in all cases in advance. When not paid until the close of the year, 50 cents will be added to each year's subscription. No paper discontinued until arrears are paid up, except at the option of the Publisher.

Within the past three months its circulation has rapidly increased, and the number now on our Subscription Books is over 1,400. With such a large and general circulation throughout this and adjoining Counties, the WEEKLY INTELLIGENCER presents unsurpassed advantages to advertisers.

RATES OF ADVERTISING.

Six lines and under, first insertion, 50 cts. Each subsequent insertion, 10 cts. Above six lines (per line) first insertion 60 cts. Each subsequent insertion per line, 20 cts. "BUSINESS NOTICES"—10 cents per line, measured by a scale of solid minims.

A liberal discount made to those who advertise by the year.

Advertisements for insertion must be delivered before 12 o'clock, noon, on Thursday to insure their appearance.

All advertisements without written directions inserted until forfeited, and charged accordingly.

The Intelligencer Job Office

Is supplied with Power Presses, Hand Presses, and possesses every facility for the rapid and neat execution of every description of Book and Job printing, at prices as low as any other establishment in the county.

The DAILY and WEEKLY INTELLIGENCER can be had at the Book Stores in Belleville, and at El Dorado, Wilson's Drug Store, Madoc, and at El Dorado.

All orders by mail promptly attended to.

QUEEN

INSURANCE COMPANY

CAPITAL \$10,000,000

FIRE AND LIFE.

LIFE DEPARTMENT.

THE principles on which this Company is

founded contain all the elements required

to develop the benefits of Life Assurance, and

afford every facility to intending assureds.

One of the advantages secured by those who

insure their lives with this Company is that

the outside expenditure for Management is

absolutely restricted by the Deed of Settle-

ment. This most important restriction

shows that the interests of participating policy

holders are closely watched and carefully at-

tended to by the Company. Attention is es-

pecially called to this point, as the proportion

of premiums expended for Management

Must Largely Influence Profits

and Bonuses.

The next division of profits takes place in

1868, and all those who wish to participate in

the profits should insure at once.

(Sailing from LIVERPOOL EVERY THURSDAY,

never to be forgotten. The deep and fervent prayers for the dead were in great contrast to the bustling, shouting and excited crowd outside. Before the walk to the scaffold began, Allen shook hands with all those around him whom he knew. To the turnkey he remarked that he was about to die as he said he would, with a smile on his face. His manner was very affecting. At eleven o'clock precisely, he walked firmly up to the scaffold, accompanied by the Sheriff, Father Dollard, the hangman, gas fitter and turnkey, and members of the County Council. His appearance on the scaffold raised a commotion in the crowd, and a few of those on the elevated parts waved their hands. When he stood on the drop at the time, took his handkerchief from his pocket and waved it in reply, replacing it. When he approached the drop, he tested it with his feet, and stepped on it firmly. He wore a gown, appearing in a black suit, and a white shirt. He also refused to allow the cap to be put on him. After the hangman had adjusted the noose about his neck, he folded his arms across his body as well as his pious arms would admit, and stood stiffly without a single sign of trembling. He uttered the responses at first loudly, but had ceased when the drop fell, and the unfortunate man was launched into eternity. His death was instantaneous, as he never moved a muscle, or showed the least possible sign of pain or struggle. His hands remained the same position, save that the forefinger was straightened. Half an hour later the body was cut down, enclosed in a handsome coffin and handed over to the Lady Superior of the Convent, who claimed it. After the execution the crowd began slowly to disperse, many refusing to believe that the execution had taken place, not having seen it. When the hangman appeared to close the iron doors he was hooded.

Allen replied to an enquiry of the Sheriff at the last hour, that his name was Allen, and he had never been known by any other. It was thought previously that he had concealed his real name, to keep his only sister who lives in Canada, as he said, in ignorance of his crime and fate. By the name of "Satie" Allen he was known years ago in Kingston, and in other places also. Mr. Reynolds, of the Police Department at Buffalo, visited him here a couple of days ago in gaol, seeking to find through him a clue to the guilty party in a murder at Buffalo, but Allen knew nothing regarding it. He recognized Mr. Reynolds immediately after he saw him. Mr. Reynolds says he was wild when in Buffalo, but not desperate. Allen has left no record of his life, and what is known of his character is from mere report. He admitted he was addicted to gambling, but is believed to have spent his money occasionally in useful ways—though always regardless of his own downward career. He attributed his own fate to the indications of his youth, and warns young men against crowding on the path that leads to ruin like his. His first and last offence were, he says, committed in Kingston.

Allen was 36 years of age. Before the execution he asked the Sheriff if he had procured a hangman who was an adept, and was answered in the affirmative. When the knot was being adjusted he told the hangman to do it properly, so that he would not suffer pain. The last execution in Kingston, that of Fralick, for the York murder, occurred in Kingston on December 7th, 1863.

In his case the law has been satisfied, but not to the minds of the public, who feel that adequate justice has not been meted out to the remaining actors of the great tragedy, the last scene of which closed yesterday.

BELLEVILLE, FRIDAY, DEC. 12.

ONTARIO SKATING RINK.—The prices of tickets have been reduced since the first advertisement, as will be seen by the advertising column. We are sure no skating rink in Canada, has anything like so low a tariff of prices as the Ontario, and consequently deserves to be patronized. A splendid sheet of ice has been obtained, and we understand it will be opened for the season on Monday evening next, without fail.

SOMETHING NEW.—We beg to call attention to the advertisement of "Something New," to be found at Holden's Drug Store. Having had the pleasure of seeing and admiring Messrs. Holden's large stock of beautiful Parian Vase Lamps, we can say with safety that they surpass anything that have ever been brought to Belleville. They are not only a most complete Lamp, but can be changed in a moment to the most perfect flower vase imaginable. Now that the holidays are approaching, and every one is thinking about the description of present they intend giving to their friends, we would advise them to inspect this stock of Lamps before making their selection. No more suitable or elegant Christmas present to a lady friend could be furnished. The design of the lamp is novel and beautiful, the workman-

ship and painting are equal in artistic finish to the most handsome vase ever imported, and altogether it is a cheap, elegant, and useful article for the household. As the demand for this article is very great, those who wish to obtain one of these beautiful Lamps should make immediate application. Messrs. Holden have, in addition, one of the latest styles of Lamps and trimmings ever brought to Belleville, comprising the latest styles and improvements.

Crown Lands Report.

We continue our summary of Statistics from the Crown Lands Report for 1866.—We find in the Fishery Department that the expenses in Lower Canada in 1866, were \$24,777. In Upper Canada the expenses were \$4,190. The collections made up to the close of the year, which consisted chiefly of rents collected at the Department as payments in advance. The number of United States vessels licensed in Canadian waters, under special arrangement last season, between the British and American Governments, was ten, from which a fee of \$296 was received. To show the importance and value of the Fisheries to the Dominion, we condense some statistics from the tabular statements. The Fisheries are divided into three divisions, the first by which is called the Magdalen Islands, and comprises 104 miles of sea coasts. In this division the products of the Fisheries were not so valuable as the year previous, owing to storms, loss of nets, and want of men.—There were 22 schooners and 230 men engaged in seal hunting on the ice. Owing to bad weather and the impossibility of many vessels to penetrate among the field of ice, the expeditions did not prove so successful as the year previous. The number of seals caught was 2434 seals, valued at \$15,831. The spring herring fishery was abundant, yielding 10,893 barrels of fish, 7,577 barrels were taken by foreign fishermen. The spring mackerel fishery was better than the year previous, the product being 1234 barrels, of which 274 were taken by foreign fishermen. The products of the summer and fall cod fishery amounted to 12,960 quintals, and of summer Mackerel fishery, 1760 barrels. Of Haddock there were 370 quintals; Halibut 78 barrels; Eel—15 barrels; Stickleback, 400 barrels, which was employed as manure. There was produced 6028 gallons of Cod Liver Oil, and of Whale Oil 840 gallons. The total value of the products by the different Fisheries of this division was \$105,067.

The second division comprises the counties of Bonaventure, Gaspé, and part of the county of Rimouski, the extent of the sea coast being 354 marine miles. The herring fishery, which was not quite so good as the year previous, yielded 19,216 barrels. In addition to this, 2,800 boxes of smoked herring were prepared in the county of Bonaventure. The cod fishery, the most important of our shores was no so successful as the year previous. The number of boats engaged in this fishery was 2,354, and the product of the summer and fall fishery was 97,468 quintals, the value of which was \$391,872. The Haddock fishery yielded 1,728 quintals; Hake, 213 quintals; Halibut, 489 barrels; Mackerel, 181 barrels; Tunney, 10 barrels; Eel, 98 barrels; Trout, 57 barrels; Tongues and Sounds, 200 barrels. In the Whale fishery there were six schooners engaged, but owing to the scarcity of whales in the Gulf the yield was only 12,390 gallons of oil. The catch of Sardines was larger than for a long time previous, it being estimated at 2,552 barrels. The Salmon Fishery has yielded handsomely, being an increase of one-fourth over the year previous. The number of barrels in 1865 was 533; in 1866 it was 717. A large quantity of fish is every year used as manure, and in this division not less than 1,500 barrels of Capelin, Herring, Plaice, Smelt, and Sardines were used for that purpose. The product of Cod Liver Oil was 62,284 gallons, valued at \$49,827. The total value of the fishery products in this division was \$549,836.

The Third Division comprises the north shore of the St. Lawrence, the north coast of the Gulf of St. Lawrence, from Bismarck to the Eastern frontier of Canada, at l'Anse aux Blancs Sablons, and the Island of Anticosti; extent of coasts 570 marine miles. The Seal fishery in this division is more extensive than in the others, and is divided into spring Seal fishery, which yielded 2,782 seals, and the fall seal fishery, which produced 178 seals. In addition to this there were 300 seals taken in shoal nets during the summer; 1,200 killed with guns by the Indians; 400 killed by the inhabitants; and 246 killed at Anticosti Island. The Cod fishery was not so good as the year previous, the yield was 23,410 quintals. The cause of the comparative failure was bad weather, and the small number of fishermen engaged. Of Herring the yield was 2,233 barrels; Halibut, 218 barrels; Salmon 270 barrels; Trout, 75 barrels; Cod Liver Oil, 14,075

gallons; Whale Oil, 920 gallons; Porpoise Oil, 400 gallons. The total value of the products of the third division was \$180,169.

The total value of the products of the Fisheries on all the coasts of Canada, in the Gulf and Lower part of the River St. Lawrence, was \$835,013. The value of the Deep Sea or Great Fisheries on the coasts of the Gulf and Lower St. Lawrence, was \$500,096. The value of the produce of the River or Small Fisheries, was \$34,057.—Number of fishing boats engaged in the Canadian fisheries, 3,395; flat bottomed boats, 2,999; number of fishermen, 6,919; shoremen, 4,467; sailors, 547; number of nets, 54,890; number of seines, 751.

The Weather.

The Indians predicted that we were to have a very severe winter, and judging from the cold snaps we have had already, their predictions are likely to prove correct. Yesterday and Wednesday were bitter cold days, as will be seen by the following statement, which Mr. Burdon has kindly handed in:

The lowest temperature during Wednesday night, 11th December, was—14.4 (below zero), and on Thursday night, 12th, —14.5.

The temperature at 7 a. m. on Thursday, 12th, was—13.4; at 1 p. m., —6.8; and at 6 p. m., —9.3.

The temperature at 7 a. m. on Friday, 13th, was—11.0; and at 1 p. m., 3.1.

FROM MADOC.

From our own Correspondent.

MADOC, DEC. 11th, 1867.

I did not intend when I wrote you last to have so long a space of time elapse before I wrote again, but "times and tides" effect "granite" rock as well as quartz rock. However, in the meantime, I have kept an eye and an ear open, to see and hear what has been passing around me, and must say that within the last few weeks much greater changes have taken place in the gold regions than in as many months before; not that miners had not been pushing on the shafts and tunnels, and were in hot pursuit of leads and lodes, that by the way, in some instances, seemed to be getting out of their way as fast as they could, dodging here and there as though to escape the relentless miners powder and steel; but that mining matters were just in that state in which something more effective had to be done in order to satisfy the cool calculating capitalists that there was something in it. Shows, colors, and assays, to use a Yankee expression, were "played out," and miners, mine owners, and gold speculators were looking at each other and asking what is to be done next? and the almost unanimous answer was "wait and see the result of the crushers." Well, we have had the crushers, and the general result has become known to the public, and any man with half an eye can see the general effect; but it is only the careful observer and the close enquirer that has the matter in its true light, and can tell the important results that have followed as the effects of the results from the crushing mills. And before I begin to note down these effects, great extent, confidence has been restored with reference to assays of rock as made by reliable men. A short time since a party with a certificate of assay—no matter how good, or rather, the larger the yield, the better the assay—was doing his work here; but now, that so many assays have been confirmed by the results of the crushers, value is being attached to them.

In noting down the progress of mining matters in this section for the last month, I may be said to be a bit of a kind, in the meantime, a ton of the rock has been crushed and yields between \$30 and \$40. The proprietors, among whom are the Messrs. Jones, Pierce, Croude, and Smith, are shipping ten tons to the crusher, for the purpose of obtaining the result. The proprietorship of this mine is confined to a few persons, and there is no intention of going beyond them by the sale of stock.

Just across Division Street and along the same ridge about fifty rods distant from the Empire is the "Champion" mine, owned by Messrs. McKay & Holland, layers of this place. They have commenced tunnelling the hill something after the manner of the "Empire," and are now in about fifteen feet of the surface above several veins of quartz running lengthwise of the ridge, and the tunnel is intended to cross these at right angles. Their prospects appear to be good. Crossing the south-east side of the village, within sight of Durham street, is the "Honolulu" mine, owned by Messrs. McCullough & Fuller. This mine is down thirty feet. The character of the quartz is somewhat different from the Empire and Champion, but has assayed, as reported by Mr. Smith, assayer, \$43 of gold to the ton. The owners have commenced a new shaft on the same property intending to work them both this winter, with three shifts of men in each. I consider this a very promising property, and its arrangements have been made by the necessary funds are on hand, I expect to hear of more than ordinary results from this mine before long.

North from the "Honolulu" and almost within a stone's throw of the Episcopal Methodist church, is the "Caledonia" mine, owned by Messrs. Wood & Ross. The shaft of this mine is down about twenty-eight feet. Here the character of the quartz is again different, being described by Mr. Smith as a "pinkish grey" quartz. The lode here is about fifteen feet wide, a narrow vein of white quartz running down with it. At four feet from the surface the result of an assay was $\frac{1}{16}$ of twelve feet the grey quartz yielded $\frac{1}{16}$ of gold, and the white quartz $\frac{1}{16}$ of silver; at twenty-six feet the assay yielded \$34.36 per ton from the grey quartz, the white has not been tested at this depth. Mr. Smith speaks in very high terms of this mine.

At the "Empire" the quartz resembles the "Richardson" or the "Champion" has white quartz and grey; the "Honolulu" has a pinkish grey and white quartz; the "Caledonia" distinct grey and white quartz. All these mines are being worked and the intention of the proprietors is to continue through the winter. At the "Empire" arrangements have been made to erect a crusher at an early date, and all are anxious to get opportunities to have rock crushed at the mill. From appearance of things, these mines are but a commencement of what will be done. There is mining country enough within a radius of two miles of this village for a hundred mines, and I would not be surprised if half that number were commenced within a year.

At the "Empire" the quartz resembles the "Richardson" or the "Champion" has white quartz and grey; the "Honolulu" has a pinkish grey and white quartz; the "Caledonia" distinct grey and white quartz. All these mines are being worked and the intention of the proprietors is to continue through the winter. At the "Empire" arrangements have been made to erect a crusher at an early date, and all are anxious to get opportunities to have rock crushed at the mill. From appearance of things, these mines are but a commencement of what will be done. There is mining country enough within a radius of two miles of this village for a hundred mines, and I would not be surprised if half that number were commenced within a year.

COSGRAVE & CO.'S

CELEBRATED

East India Pale Ale.

JUST RECEIVED,

one course in the Haram Wall, near the bottom, is quite smooth all over, the stone being finely dressed, all other courses being only well dressed round the drafts; one also sees two stout bars, the men retire the Haram Wall, and prepare to show the stone whenever an accidental shower of stones renders their position dangerous. One is now at a depth of seventy-nine feet from the surface, and from here we commence the exploration of the "bottomless pit." After dropping a rope down, we found that it was only sixty-five feet deep, though it looked black enough for anything. Climbing down, we found ourselves in a passage running south from the Haram Area, four feet high by two feet wide, and the masonry, with flat stones at the top, similar to the aqueduct from Triple Gate, but not so carefully constructed. The floor and sides are very muddy, as if water gathers there, during the rainy season.

It was at this stratum that it was one of the overlow aqueducts from the Temple of Solomon, and that there might be a water conduit underneath; we scrambled along spines coming in unslippery contact with the passage roof; after about 200 feet, we found that the mud reached higher up, and we had to crawl by means of elbows and toes; gradually the mud got more and more filled up, and our bodies could barely squeeze through, and there did not appear sufficient air to support us for any length of time, so that having advanced 400 feet we commenced a difficult retrograde movement, having to get back half way before we could turn our heads round. On arriving at the mouth of the passage underneath the shaft, we spent some time examining the slides, but there is no appearance of its having come under the Haram Wall. It seems to start suddenly, and I can only suppose it to have been the examining passage over an aqueduct coming from the temple, and I am having the floor taken up to settle the question. The passage is on a level with the foundations of the Haram Wall, which are rough hewn stones, perhaps rock—I cannot tell. The bottom is the enormous distance of 85 feet below the surface of the ground, and as far as I can see as yet, the wall at the south-west angle must be buried for 95 feet under ground, so that it must at one time have risen to the height of 180 feet above the Tyropean Gully. I consider it very unsafe sinking these shafts without sheathing them, but I have been obliged to do so for want of wood. In this shaft in particular there is about 60 feet unheated, and a loose stone from any part might stove a man's head in before he is aware of it.

Virgin's Fount, or Ain Um-el-Deraj.—This was an excavation under the lowest step leading to the pool, in order to examine the communication by which the water enters. As the pool is usually occupied by water carriers during the daylight, we went down about an hour after sunset on Friday, the 4th inst., and with three fellows of Silvan commenced removing the pebbly deposit from under the steps. The Silvan people, however, got wind of our proceedings, and came trooping down in a very excited state and requested us to begone. By dint of chaffing they eventually changed their tone and sent us off. After three hours' work I found that there would be more difficulty in opening the passage under the steps than I had anticipated, and leaving that during this month there are few persons taking water from the pool, I ordered the work to be resumed in the morning.

It appears the village was divided on our account, one obstinate Sheikh taking it into his head that we had no business out of our own country, and in the morning our men found that he had effectually stopped our resuming the work by sending a bevy of damsels there to wash. His scanty wardrobe, however, did not take long to beat up, and sending down the men again the afternoon, the pool was found untenanted, and we resumed the work and continued it on Saturday, the village taking our working anywhere was a matter of course, the Sheikh vowing vengeance on the men and threatening to get them placed on "the road," which is just being commenced from here to Jaffa by forced labor. After removing the deposit under the steps for four feet, a dark substance was reached, either masonry or rock, and, without the assistance of divers or letting the water off, it would be very difficult to continue the search in this position any further. The other point of entrance of the water is a deep hole in the middle of the pool, at which nothing can be done. Finding our attempts thus abortive, I had the rock-cut passage to the Pool of Silvan examined, and Sergeant Britles found two passages leading into it from the north-west, the further one being the largest, and being about fifty feet from the entrance to the pool. At this we commenced to open. It was difficult, work full of hard mud, which had to be carried for fifty feet through the water of the passage, and then taken up the steps leading to the pool. The men seldom have much more than their heads above water when removing the soil, and sometimes the water suddenly rises and there is danger of their being choked. The passage was cleared out seventeen feet to day, and a small cave was arrived at, being the bottom of a deep shaft cut in the solid rock. It is difficult at present to form an opinion on the subject. We must erect a scaffolding to get to the top of the shaft, which appears at least forty feet in height. The magnesian wire has come at a very opportune time.

I find that just where Thrupp places the ancient pool of the Jews, near the Fountain Gate up in the town, there is a hole of enormous dimensions, which I have not yet been able to visit, and the aqueduct from Solomon's Pools runs within a few feet of it and could fill it. The place is

called Burg al Kilbry on the ordinance Survey plan 1:3500.

Virgin's Fount.—You may have been supplied last week when I described the finding of the passage leading north as a discovery, after what Dr. Barclay, of the United States, says in his book about it. I am now prepared to show that it is but an instance he has misrepresented the facts of the case, and mistaking the main drain outside for a water conduit, has led his readers to which ends in a shaft over 40 feet high, the passage to which was for over 17 feet closed with what appears to be the deposit of centuries. Next week I will send you a fuller account of this passage, as to-morrow I hope to be able to get the scaffolding up; it will be a tough job. Another small passage has been found about 40 feet from entrance to front; it goes in for 8 feet and suddenly terminates.

SINGLE GATE.—In a former letter I stated that I believed there was another system of vaults under the present vaults at south-east angle, and in a sketch at the same time I showed a point where I expected the entrance would be under the Single Gate. I have been foiled once or twice in getting to this point; first the shaft failed, and when we reached a second one, we found that we could not get together some gallery frames; finally we drove the gallery to the point I had indicated under the Single Gate, and on Wednesday to our great delight, the hoped for entrance was found, but as one ton per day was the best that could be done, the process was so slow that many made arrangements with the Gilbert & Turley mill. But, on trial, the amalgamating arrangements of this mill have been found very imperfect, and results so unsatisfactory that many have determined to wait until an improvement is made in the separating department. For a week back Scott & Taylor have been doing nothing, owing to some break in the machinery, and so have been at a standstill, with not less than a hundred different persons ready to have our tested, if they could only be satisfied that the process would yield correct results.

Scott & Taylor's mill is very slight in construction, and is consequently getting out of repair, but it is generally conceded that the amalgamating process is first-class. The difficulty is that so small a quantity can be put through per day. Gilbert & Turley have a splendid stamp arrangement, but the separating process being bad, it is almost useless. I understand it is the intention of Messrs. Turley & Gilbert to import a new separating part, which it is to be hoped will be done soon, and which will soon be developed. In the meantime the people are doing all that can possibly be expected. Shafts are being sunk in every direction, and capitalists and assayers made. Give us crushing mills, and outsiders will open their eyes with astonishment at the result.

Yours truly,
A. RESIDENT.

[With regard to the foregoing remarks respecting Gilbert & Turley's crusher, we have it from one of the proprietors that they believe the amalgamating part will compare favorably with any other mill in the country. The only improvement they think necessary is now being made, and that is to lessen manual labor. But the proprietors are desirous, if any one can suggest any additional improvement, to have such suggestions, promising to give them that attention they deserve. They have spent a large amount of money in erecting a crushing mill, and deserve a great deal of credit for their enterprising spirit, and are determined to spare neither pains nor expense to make the mill in every respect effective. Give them, as well as others who are investing their capital in developing the resources of the country, a fair chance.]

To the Editor of the Intelligencer.

Sir,—In your issue of Thursday I find a letter from "Civis," to which, with your permission, I will, as the reader of the obnoxious second piece at the last Penny Readings, make some reply. In the first place, Aytoun's poem, "Charles Edward," is not a long poem; it takes precisely ten minutes to read it. If each of the three readers had read pieces occupying only ten minutes each, it would hardly be worth while to bring together such a large audience for so short a reading. In the second place the "Battle of Culloden" does not cover "nine closely printed pages," but only four and a-half, and I omitted half a page of matter which treated of side issues. It takes precisely thirty minutes to read it; and I was consequently forty minutes with both pieces. If "Civis" doubts this, I am willing to be proved wrong. It is more than probable that when it will be found that "Civis" is in error, I say "error"—"Civis" would have said a "most unimpeachable falsehood." I am thankful that manner and language, have been trained in a different school.

"Civis" is also in error when he states that the people stamped it down, for the stamping was confined to a few thoughtless and noisy persons, and not to the large audience; and besides, they did not succeed in their stamping. It is an insult to a Belleville audience to say that they will only listen to lengthened comic pieces; they are as well able to appreciate matter pieces from the "well" of English unadorned, as even "Civis" himself. Yours truly,
THOMAS NICHOL, M.D.
Belleville, Dec. 13th, 1867.

The military authorities have given permission for private sleighs to drive across the Esplanade at Quebec during the winter season. The night express, near Windsor, on Monday night, ran into a wagon, in which were a farmer, his wife, and son. All three were instantly killed.

The House Yesterday.

Mr. Morris introduced a Bill providing for the carrying out of executions in private, but he did not intend to press its passage until next session. The excise resolutions were next considered, and occupied the remainder of the sitting. The discussion was chiefly confined to members from the Maritime Provinces. The resolutions were concurred in and the Customs resolutions taken up. Two or three of the resolutions were carried, and the House adjourned at 2:45 A. M. until to-day.

Grand Trunk Railway.

The affairs of this company, which have recently been ventilated in Parliament, are in a much better condition now to what they were in 1861, previous to the passage of "The Grand Trunk Arrangements Act" of 1862. The following statement shows the gross traffic and net profits for the years ending June 30, 1861, and June 30, 1867.

Gross Traffic.	Net Profits.
1867.....\$1,328,491	\$264,069
1861.....714,996	138,206

Increase.....\$613,535 £195,763

This is an increase of about 85 per cent. in the traffic, and 90 per cent. in net profits, a rate of progression which, if continued, would be very many years, make Grand Trunk securities worth much more than their present market value.

A very large amount of money has been expended in repairs, renewals of rails, sleepers, &c., all out of earnings.

The rates on through freight are not greater, but in some instances less per mile than on local, and according to Mr. Brydges, Canada gets her produce and her people carried more cheaply by rail than is the case in any other country of the world.

FROM OUR OTTAWA CORRESPONDENT.

OTTAWA, Dec. 12, 1867.

Mr. Galt made a long statement to-night, in explanation of his conduct in connection with the Commercial Bank, which will be found to be a full exculpation of his conduct, while it equally convicts Mr. King of secret attempts to ruin other Banks.

The following are the Excise duties proposed by the Government:

1. That it is expedient to repeal the several Acts in force in the Provinces composing the Dominion of Canada imposing or providing for the collection of duties of excise, on Spirits, Beer, Tobacco and on goods manufactured in bond out of dutiable articles, or otherwise subject to the duties of excise in the said Provinces, and to substitute other duties and provisions common to the whole Dominion.
2. That it is expedient to impose on Spirits manufactured in Canada a duty of excise of sixty cents per every gallon, and on spirits of the strength of proof, and so in proportion for any greater or less strength than the strength of proof, or for any greater or less quantity than a gallon.
3. That it is expedient to impose on Malt Manufactured or made in Canada, a duty of excise of one cent for every pound weight.
4. That it is expedient to impose on fermented beverages made in imitation of beer or of malt liquor, and brewed in whole or in part from any other substance than malt manufactured or made in Canada, a duty of excise of three cents and a quarter for every five gallons.
5. That it is expedient to impose on Tobacco Manufactured or made in Canada the following duties of excise, viz:—

- On Cavendish Tobacco, Snuff, and on manufactured Tobacco of all kinds, except Cigars and common Canada Twist, for every pound weight, or less quantity than a pound weight, ten cents;

On common Canada Twist, otherwise known as *Tobac bac en torquette*, being the unpressed leaf rolled or twisted, and made from raw Tobacco the growth of Canada, for every pound weight, or less quantity than a pound weight, five cents;

- On Cigars per thousand according to the value thereof as hereunder, viz:—\$1.00 Value not over \$10 per 1000.....\$1.00
- "over \$10 but not over \$15 per 1000.....2.00
- "over \$15 but not over \$20 per 1000.....3.00
- "over \$20 but not over \$40 per 1000.....4.00
- "over \$40 per 1000.....5.00

6. That it is expedient to empower the Governor General in Council to authorize the manufacture in bond of goods manufactured wholly or in part out of articles subject to duties of Customs or Excise, and to impose on goods so manufactured duties of Excise equal to the duties of Customs to which they would be subject if imported from Great Britain, and entered for consumption in Canada, and to enter for consumption any article not the manufacture of Canada, upon which a duty of excise was levied if manufactured in Canada, and taken into a Bonded Manufactory, the difference between the duty of excise to which it would be liable if manufactured in Canada, and the Customs duty on such article if imported and entered for consumption shall be paid when it is taken into the Bonded Manufactory.

7. That it is expedient to provide that the duties of excise mentioned in the preceding resolutions shall be imposed and payable (instead of the present duties of excise) on all goods manufactured or made or taken out of warehouses for consumption in or after the day of January 1st, 1868, and on all malt manufactured or made before the said day; and that the duty of excise shall be payable on beer made on or after the said day wholly from malt on which a duty of excise has been paid or is payable, a duty of excise of three cents and a quarter per gallon being payable on beer brewed or in process of brewing on the said day from malt on which no duty of excise has been paid.

8. That it is expedient to provide, that no person shall carry on the business of distiller, brewer, malter, tobacco manufacturer, or bonded manufacturer, unless he has obtained a license for that purpose, and that the following sums shall be payable for such licenses, viz:—

- For a license for distilling and rectifying, or for any process, two hundred and fifty dollars;
- For a license for malting, two hundred dollars;
- For a license for brewing, or for manufacturing tobacco, or for manufacturing in bond, fifty dollars.

Through these duties come into force to-night, they will be subject to any modification that the House may make when they come up for concurrence.

To the Editor of the Daily Intelligencer.

The Crushing Mills.

MARCO, Dec. 12, 1867.

Sir,—Believing it but justice to the owners of mining property in this section that the public should know that more reports with reference to the value of the different quartz veins are not before them, as demonstrated by the crushing mills, I beg leave to make the following facts public through your columns:

Having been satisfied by the returns of Scott & Taylor's mill that they could separate the gold from the rock, there has been a great rush made by the miners in this district to have the rock of their mines crushed, but as one ton per day was the best that Scott & Taylor could do, the process was so slow that many made arrangements with the Gilbert & Turley mill. But, on trial, the amalgamating arrangements of this mill have been found very imperfect, and results so unsatisfactory that many have determined to wait until an improvement is made in the separating department. For a week back Scott & Taylor have been doing nothing, owing to some break in the machinery, and so have been at a standstill, with not less than a hundred different persons ready to have our tested, if they could only be satisfied that the process would yield correct results.

Scott & Taylor's mill is very slight in construction, and is consequently getting out of repair, but it is generally conceded that the amalgamating process is first-class. The difficulty is that so small a quantity can be put through per day.

Gilbert & Turley have a splendid stamp arrangement, but the separating process being bad, it is almost useless. I understand it is the intention of Messrs. Turley & Gilbert to import a new separating part, which it is to be hoped will be done soon, and which will soon be developed. In the meantime the people are doing all that can possibly be expected. Shafts are being sunk in every direction, and capitalists and assayers made. Give us crushing mills, and outsiders will open their eyes with astonishment at the result.

Yours truly,
A. RESIDENT.

Telegraphic News.

BY ATLANTIC CABLE.

BERKELEY, Dec. 12.—Extensive preparations had been made by the friends of Allen, Gould and Larkin to hold a public festival, and to interfere with the Government authorities, and under the authority of the Lord Lieutenant a proclamation put a stop to the demonstration.

LONDON, Dec. 12, etc.—A daring attempt was made to-day to release the recently arrested Fenian, Col. Burke, who is confined in Clerkenwell prison. Powder was placed beneath one of the prison walls, and was exploded; it is supposed by Burke's confederates. The whole side of the wall was blown into the air. Three adjoining buildings were destroyed, many persons injured, and it is feared some lives were lost. Much confusion prevails in the vicinity, and it is difficult to ascertain details.

The Times says the holding of a European conference for the settlement of the Home question would be a mockery after the recent speech of the French Secretary of State, M. Rouvier, in the legislative body.

Advices from Shanghai say it was believed that the American Minister, Mr. Burlingame, would soon leave for the United States by way of Europe, on a special mission for the Chinese Government.

GLASGOW, Dec. 12.—An attempt was made in this city to get up a funeral to-day for the Manchester Fenian, but it was checked by the authorities.

PARIS, Dec. 12.—It is said that the Minister of Foreign Affairs has sent to Florence a despatch in regard to the claims of Italy on Rome, based upon and in sense identical with the speech of M. Ronger.

It is reported that the Corps Legislatif, now in session, will soon be dissolved by the Emperor and new elections will be held in January next.

FLORENCE, Dec. 12.—Serious apprehensions are entertained of an insurrection in Naples, in which the demonstrations against the Government have been unusually violent.

NEW YORK, Dec. 13.—The London special has the following particulars of the explosion at Clerkenwell prison. None of the prisoners escaped. The street opposite is narrow and built with houses three stories high. Twenty houses were almost entirely demolished and were rendered uninhabitable. The city firemen were immediately summoned and are now employed in digging in the ruins for dead bodies. Forty persons were wounded and four have already died. The house opposite to where the wall has been blown in, has been used, sometimes as a Fenian headquarters, and sometimes as a place where the Fenians were removed to hospitals, and the ruins are guarded by a strong force of police. The street highway has been ripped up to a considerable distance by the explosion. The walls of the jail have fallen, to some extent, into the breach, and reveals the interior of the prison yard. No damage has been done to the prison buildings. The whole city is terribly excited; everybody feels alarmed, for the serious reason that no one can foresee where the next blow may fall.

The government is becoming exceedingly active. All the Fenian funeral processions projected in Ireland have been strictly prohibited and measures still more stringent are looked for. It is feared, or at least deemed very probable, that some trouble will arise from the Fenian movements in Liverpool. The police force in Liverpool, or perhaps, even in London, is utterly inadequate to deal with such a crisis. Colonel Burke, confined in the Clerkenwell prison, is not the man lately sentenced to death in Ireland and transferred to England after the committal of his case. It is more than suspected of being a very active Fenian, and is at present charged with having taken a prominent part, both in organizing and directing the Manchester riot, at which policeman Brett was shot. It is alleged that Burke had charge of the arms stored out to Allen, Larkin, and Gould, and others, just before the tumult commenced.

AMERICAN DESPATCHES.

CHICAGO, Dec. 13.—The incorporators of the Chicago Age have perfected their organization. It is intended to publish a Democratic paper in opposition to the Chicago Times.

The Washburn Avenue rink was destroyed by fire to-day. Loss \$14,000.

NEW YORK, Dec. 14.—Sam Sharpley was yesterday discharged on his own recognizances. Kelly refusing to appear against him, and Leo was discharged, Sharpley making affidavit that he had no charge to prefer against him.

The late storm raged with great fury all along the Atlantic coast, and the results are told in the stories of shipwrecks that are reaching us. The steamship "Atlantic," from Southampton, had a fearful voyage, nearly all her upper decks being crushed in and her main saloon flooded by heavy seas. The ship was wrecked on the coast of Maine, in Long Island Sound, and one man lost.

SCHENECTADY, Dec. 14.—The hope of the resumption of navigation no longer exists, and at least 500 boats are ice-bound between Syracuse and Troy. Peter & Co., of Buffalo, have lost 17 cargoes of grain among the boats laid up. All apples on decks are frozen. Fifteen hundred barrels not so much injured by Niles & Co., of Buffalo, will of necessity be thrown away. The boat "Geo. Davis," cut through her sides. The boat "Geo. Schenectady," of Schenectady, has sprung a leak. On many of the levels the water is leaking out, thus endangering both vessels and cargoes. Unless the levels are kept supplied to the required height, great loss to forwarders will follow.

NEW YORK, Dec. 14.—The steamship "Virginius," from Liverpool, has arrived.

OSWEGO, Dec. 14.—The schooner "J. C. J. Al-

Daily Intelligencer.

BELLEVILLE, SATURDAY, DEC. 15.

The Montreal and Belleville markets will be found on the fourth page.

PARLIAMENT.—We learn by telegram from Ottawa, that the House will probably adjourn on Wednesday next.

TRAINS LATE.—The Eastern mail due here yesterday morning at 8 o'clock, did not arrive until last evening at 5 o'clock. The Western mail was also two hours late.

WRECK AND LOSS OF LIFE.—Despatches from Gaspe, dated 8th, says a timber-laden ship, name unknown, went ashore near the Magdalen River last week. The captain, the two mates, steward and nine seamen were drowned; ten men were saved but were badly frozen.

THE "WATERTOWN".—The steamer "Watertown," plying between Wolf and Garden Islands on Wednesday, struck on a bar near the Big Rock. The crew, in connection with assistance from Garden Island, worked all night with the thermometer below zero in trying to get her off, but could not effect it, in consequence of the low water caused by a heavy north-east wind. The passengers for Cape Vincent left via Wolfe Island on Thursday, except the ladies and Express, which left the same way early next morning. Yesterday afternoon the steamer succeeded in getting off.

word" went ashore on Burlington Beach, at the head of Lake Ontario. She was laden with wheat.

Miscellaneous Items.

Scottish papers announce the reappearance of the cattle plague. Already numbers of sheep and other animals have died.

Glycerine is very extensively used for the hands, face, and ears, on account of the intense cold. It will not freeze at any temperature.

Mr. E. C. Woolson drove across a part of the falls of Niagara, low water and a high wind assisting, last week. The trip was from Goat Island to one of the Three Sisters.

Waltham, an Englishman, wrote an arithmetic about 1750 which ran through nearly 200 editions, but it is now so rare that even the twentieth edition is a curiosity.

In the Louisiana Convention the spirit of discord is so rampant that it is quiet only in the arena where the prize is a crocodile. The crocodile is not so tame as the crocodile. The crocodile is not so tame as the crocodile.

The Oswego Times is out in favor of the Huron and Ontario Ship Canal. It advances that the canal when completed, would place Oswego, by water communication, some four or five hundred miles nearer Chicago than Buffalo now is.

Not liking the play of the "Lady of Lyons," as performed at Salt Lake, an aged Mormon woman, and went out with his twenty-five wives, angrily stating that he would not see a play where a man made such a cussed fuss over one woman.

Mr. John Quill makes the following offer: I will walk with any good looking girl who has a fortune in her own right, upon any given moonlight night, both parties to go as slow as they please, and neither to hurry back to the starting point until all the words, walk in to her affections, and walk off with her fortune.

THE ATLANTIC CABLE.—NEW TARIFF OF CHARGES.—INCREASED FACILITIES.—The New York Herald says: "On Sunday next, the 1st of December, the new tariff of the Atlantic Cable Company goes into effect. The new cable, via the island of St. Pierre and along the coast of Newfoundland, is now in operation, as well as the new line connecting the cable at Heart's Content with the telegraph system of the United States. As a consequence of these improvements, we shall probably have greater promptness and less interruptions in cable business than heretofore. Telegrams sent from London on the 29th inst. were received in this city at twenty-eight minutes past eleven o'clock on the night of the 28th, thus arriving apparently in advance of their own dates."

PROSPECTUS

ROSE MINING COMPANY OF MADOC.

Geo. D. Wyckoff, A. L. McLELLAN, JAS. CARR RITCHIE, F. E. KILVERT, ASA A. BURMAN, JR., J. E. O'REILLY, E. H. HALL, and HUGH RITCHIE, all of whom are owners of the property hereinafter mentioned, and are desirous of forming a Stock Company with the capital of \$25,000, and are to receive and take in payment for the said property \$1,200 in cash, and 2,350 shares of paid up Stock of the said company. The said parties are now taking proceedings for its incorporation, under act 22, 27-28 Vic, and have much pleasure in calling the attention of the public to the following Prospectus: This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected, with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives this company peculiar advantages over many others, there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out; and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of backs to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intends as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Another great advantage in this property is, that immediately the work is commenced ore can be taken out in quantities more than sufficient to pay the working expenses and in that respect mine's will equal if not surpass any of the mines in that district. Into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.
Geo. D. Wyckoff, ASA A. BURMAN, JR., F. E. KILVERT, A. L. McLELLAN, JAS. CARR RITCHIE, JAS. EDWIN O'REILLY, E. H. HALL.
PROV. PRESIDENT—Geo. D. Wyckoff.
PROV. SEC. & TREAS.—JAS. C. RITCHIE.
SECRETARIES—McLELLAN & KILVERT.
The Stock Book opened at J. W. Munton's Exchange Office, Hamilton. Application for Stock and other Communications may be addressed to any of the Directors, or to
JAMES C. RITCHIE,
Provis. Sec. & Treas., Hamilton,
December 24, 1897. d183-1f

PROSPECTUS OF THE EL DORADO MINING COMPANY OF MADOC. (LIMITED.)

CAPITAL STOCK \$72,000.
Divided into 2,400 Shares of \$30 Each.
Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its Incorporation, under Chapter 23, 27, and 28 Vic, for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 6th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 46 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$53.50 in gold, which specimen can be seen at J. E. Ellis', on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore.

The projectors have determined only to sell sufficient stock to repay the advances, and to carry on the work satisfactorily. They have therefore decided to sell only \$23 shares of the value of \$30 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1898. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings.
RICHARD SPARKLING, Managing Director and Superintendent.
T. S. McGLASHAN, of Madoc.
MAHLON BURWELL MCGREGOR, of Madoc.
T. A. MITCHELL, of Madoc.
ALDERMAN VICKERS, of Toronto.
J. E. ELLIS, of Toronto.

McLELLAN & McLELLAN, Solicitors. A. F. WOOD, President.
BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

Applications for Shares received by Alderman Vicker, Yonge Street, Toronto; J. E. Ellis, King Street, Toronto, and at the office of
WILLIAM KERSTEMAN,
63 Church Street, Toronto. 1734

Toronto, November 20th, 1897.

BUY YOUR TEA DIRECT FROM THE IMPORTERS!
Tea, Tea, Tea!
THE MONTREAL TEA COMPANY, 6 Hospital Street, Montreal, having just imported a large quantity of Green and Black Teas, beg to call the attention of the Trade, Retailers, and large establishments generally to their list of prices. Buyers of Chests and Boxes of Tea will save money by getting it direct through the Importers.
All orders for 25 lb. boxes and upwards carriage free to any Railway Station in Canada. Buyers living beyond Railway Stations, will please send Post Office order, or enclose notes. The carriage will be paid to the nearest station, where there are express offices. Tea will be forwarded immediately on receipt of the order by mail containing money, or the money can be collected on delivery by express man. Cash collected in Montreal free of charge, and Tea forwarded to the order. Send us 25 lb. boxes sold. Original packages Black Tea weigh 35 chests about 50 lbs. Chests do 100 to 100 lb. Green Tea from 40 to 50 lbs. Tea not mentioned in advertisement can be had equally cheap. The Company are determined to take a stand in the Montreal market, every article may therefore be depended on as to quality and weight.

American Invoices--Discounts.

FINANCE DEPARTMENT, CUSTOMS, QUEBEC, 6th March, 1898.
It is directed by the Hon. The Finance Minister, that hereafter Weekly Notices be published and furnished to Collectors of Customs, as to the rate of discount to be allowed on American Invoices, which is to be in accordance with the price of gold as represented by Exchange, at a rate equal thereto. Such notices to appear every Saturday in the Canada Gazette.
R. S. M. BOUCHETTE.

FINANCE DEPARTMENT, CUSTOMS, OTTAWA, June 8, 1897.
In accordance with the above Order, Notice is hereby given that the authorized discount is declared to be the day 27 per cent, which percentage of deduction is to be continued until next Weekly Notice, and to apply to all purchases made in the United States during that week.
THOMAS WORTHINGTON, 3D11-1f Assistant Commissioner of Customs.

Important to Miners and Mining Men.
JOHN'S Patent Water Proof Safety Fuse for Wet Ground and Submarine Blasting, is much cheaper than any other, and pronounced by Mining men, much better than any imported.

FRONT STREET, BELLEVILLE.

American Watches.

THE true value of Machinery applied in Watchmaking is not that they are made rapidly, but that they are made correctly. Very few people know why a Waltham Watch should be superior to any other. In the first place, at Waltham the Watch is made as only a machine, to be constructed, like any other machine, on mechanical principles. The factory is, indeed, little else than a machine shop, the principal work in which is not more upon watches than upon machinery to make watches with. If the watches are good, it is because the machinery is good. Of course, there must be no defect in the principle of plan or the movement, no mistake in the sizes or shapes of the pieces which it is composed, nothing wanting in their proportions, and no error in their positions. These points once thoroughly settled in regard to each part of every variety of watch, it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished pieces. The method established in every department is the replication of parts by mechanical means, and this is carried out on the system of the most thorough subdivision.

By means of multiplying gauges and microscopes, tests and inspection for the detection of wear in cutting tools, and for faults and flaws in stock, care is made to accompany the work in every stage from beginning to end. As a necessary result, the Watch goes together a finished machine. Every part is found to fit properly in its place. Every pin may be pushed into its pinches, and every screw turned home—instead of sluggish and feeble action, the balance, even under the pressure of the lightest mainspring, vibrates with a wide and free motion, and the beat has the clear ringing sound always characteristic of the Waltham Watch. The machine is a time keeper from the start.

This system of watchmaking is unknown in foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce Watches that cannot be equalled for every quality which makes a watch valuable. Simple in plan, and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform to the minutest details, not easily damaged, easily repaired, and when repaired always as good as new.

There are different grades of finish in the different varieties of Watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and means; but every Watch that bears the genuine trade mark of "WALTHAM" is guaranteed to be a good one, and nobody need be afraid to buy it.

EVERY WATCH FULLY WARRANTED.

For sale by all first-class dealers in the United States and British Provinces.

The Daily Intelligencer

WILL appear about five o'clock every afternoon (Sundays excepted) and will be furnished by Carriers at the rate of \$5 a year if paid in advance, \$6 otherwise. Mail subscribers \$5 a year. \$2.50 for 6 months; \$1.50 for 3 months.

It will contain the latest telegraphic news up to the hour of going to press, including Cable dispatches and the New York and Montreal Markets.

Arrangements have been made with RELIABLE CORRESPONDENTS in Madoc, Bridgewater, Madoc and other points who will furnish early and full information respecting the Gold Regions, and of matters of general interest.

Special attention is paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c., &c., and in short, neither pains nor expense will be spared to make the DAILY INTELLIGENCER a worthy of public patronage.

RATES OF ADVERTISING.

A liberal scale of rates for advertisements has been arranged as follows:

Cards, not exceeding six lines, 6 months..... \$ 5 00

Half Square, 6 months..... \$10 00

One Square, 6 months..... \$20 00

Two Squares, 6 months..... \$30 00

Four Squares, 6 months..... \$60 00

Notices of Births..... 50

Do of Marriages..... 50

Do of Deaths..... 50

"BUSINESS NOTICES"—All matter under this heading, headed or solid, 10 cents per line, measured by a scale of solid minims.

Advertisements contracted for any space not less than half a square can have the privilege of changing their advertisements every two weeks.

Transient advertisements inserted at 7 cents per line for first insertion, and 5 cents for each additional insertion.

The Weekly Intelligencer

Is published every Friday Morning at \$3 per annum if called for at the Office, or sent by mail, and \$3.50 if delivered by the Carrier, payable in all cases in advance. When not paid until the close of the year, 50 cents will be added to each year's subscription. No paper discontinued until arrears are paid up, except at the option of the Publisher.

Within the past three months its circulation has rapidly increased, and the number now on our Subscription Books is over 1,400.

With such a large and general circulation throughout the County, the DAILY INTELLIGENCER presents unsurpassed advantages to advertisers.

TERMS OF ADVERTISING:

Six lines and under, first insertion..... 50

Each subsequent insertion..... 07

Above six lines (per line) first insertion..... 07

Each subsequent insertion per line..... 07

"BUSINESS NOTICES"—10 cents per line each insertion, measured as solid minims.

A liberal discount made to those who advertise by the year.

Advertisements for insertion must be delivered before 12 o'clock, noon, on Thursday to insure their appearance.

All advertisements without written directions inserted until forbid, and charged accordingly.

The Intelligencer Job Office

Is supplied with Power Presses and Hand Presses, and possesses every facility for the rapid and economical execution of every description of book and fancy printing, at prices as low as any other establishment in the county.

The DAILY and WEEKLY INTELLIGENCER, and all had at the Book Store, Madoc, and at El Dorado. Wilson's Drug Store, Madoc, and at El Dorado.

All orders by mail promptly attended to.

LET THERE BE HARMONY IN THINGS ESSENTIAL—LIBERALITY IN THINGS NOT ESSENTIAL—CHARITY IN ALL.

No. 195

cent for his money, and as money was not like any other commodity, the Legislature should interfere to protect poor people.

Hon. Mr. DORRIS said that we had been left altogether in the dark in this matter, and were now asked to accept the Government's intentions on foot. The proposal was a novelty without precedent. We were in need of circulating facilities, and the effect of this measure might be to leave the question had been introduced in this manner, and had not formed the subject of special legislation.

Mr. ROSS (Prince Edward) was glad that the Government had taken up the matter. At present farmers and traders were made to suffer for the benefit of brokers, and he knew mercantile houses in Upper Canada which were in this way losing \$5,000 yearly. He had known banks which refused discount unless a part of it was taken in silver. He would accord his cheerful support to the measure—the best introduced this session.

Mr. WALSH referred to a previous proposal made by himself for a legal value of 80 cents for the dollar which he explained would not occasion loss for the holders, who could always opt to New York for par value. A similar arrangement had been proposed by New Brunswick.

Mr. MERRILL looked upon the proposal as the most extraordinary that had ever been heard of. It would certainly be a nuisance and an injustice to be compelled to take any article for a value greater than its due, but such transactions were altogether voluntary and optional, and if it were true that any bankers constrained their customers to take a portion of their discounts in silver, it could only have reference to the conduct of the managers of the great shavings establishment of Montreal.

Mr. MCCORMYK had desired to see the matter postponed until the Banks and Boards of Trade were able to express an opinion, and thought that the government should fix some determinate legal tender value. He also thought it would prevent Americans from coming into the country and buying our surplus articles.

Mr. GIBBS regarded eight per cent. as a rate more advisable than fifteen, and thought the quarter dollar might with advantage be made worth twenty-five cents. The effect of this discussion going abroad would be to prepare the country for the change which was to come. It was nonsense to talk of silver being forced upon the community—in its neighborhood at least, where the farmers possessed sufficient intelligence to understand perfectly what they were about.

Mr. BOWELL was pleased to hear the remarks of the Hon. Minister of Militia in reference to the injustice of the law affecting the mass of money towards the poor borrower, it being the best possible argument which could be advanced in favor of a restricted rate of interest in all transactions, whether of Banks or private individuals, and trusted when the Ontario twenty-five cent Bill for that purpose, which he said he intended to do during the session, that he would have the powerful influence of that House. He could not agree with the hon. member for North York, Mr. McCormyck, that Americans would not come into the country and buy our surplus cattle, horses, &c., if this law was passed. He believed that the people from the United States came into this country to obtain this trade, but one thing they might depend on, that if the Americans required anything we had to sell they would furnish anything we could be brought in to pay for them. He thought the proposition to reduce the value of an American twenty-five cent piece to twenty-three cents, would cause great loss to those who had, when the Bank crisis took place in Ontario, changed their Bank Bills into silver. This was the case, to a great extent, among the farmers, and any scheme which would raise the value of silver would be the most beneficial to the country, and create the least disturbance in trade. He asked whether the action of the Government had been hastened by recent losses from municipal receipts of silver in Lower Canada, and wanted to know from the Finance Minister, whether silver was taken at par from all municipalities in payment of their municipal indebtedness. He could not understand why municipalities of Ontario should not also be permitted to make their payments in silver if such a power had, as the public accounts led him to believe, been extended to Quebec.

Mr. DORRIS—What is the amount lost on the discount of silver received from Lower Canada?

Mr. BOWELL—True, the amount is not large, \$34; but it did not matter whether it was one cent or one thousand dollars; it was the principle involved. If the municipalities in the Province of Quebec were permitted to pay in silver, and the Government the discount, the same rights and Ontario. (Hear, hear.) Under the question of more fully dealt with, he believed, on the proposition of the Ministry was the best that could be proposed, as it would raise the value of silver, and bring gold into the country, instead of silver, to pay for their purchases.

Mr. CUTHBERT was amazed at the proposal, not being able to see why, upon the same principle, an eight per cent duty should not be placed upon gold.

Mr. ROSS (Dundas) said that it was impossible to settle the question by any such imposition of duty, as silver could be brought in, in any quantity, over the frontier in defiance of the Government prohibition.

He hoped that if Ministers were determined to press the measure they would amend it by a reduction of the rate four or five per cent, by which the intrinsic value of the coin would be reached.

Hon. Mr. DORRIS could not understand how it mattered what rate of duty was imposed, the object being not revenue, but exclusion.

Mr. PARKER thought the subject should be postponed, believing that the best way of dealing with it was to make such silver a legal tender at fixed value. The present proposal of exclusion would, if carried, be magnified across the border into an attempt at annoyance to the people of the United States. He could not agree with the remarks of the member for North Hastings, that the silver coins were all on the side of the purchaser.

Mr. BOWELL said the hon. member for Centre Wellington had misunderstood him; he said that while he admitted the advantages arising from trade were mutually advantageous to both buyer and seller, he had said that unless buyers wanted what we had to sell, they would not for our advantage come to buy. He would also take this opportunity to express the opinion that the sooner we cease to express legislation for our own advantage the better. (Hear, hear.) We had heard so much of this sort of talk lately, that the Americans might be inclined to imagine that we could not get on without them, and the sooner such an idea was dissipated the better. (Hear, hear.)

Hon. Mr. AINSWORTH thought that no legislation was called for. The example of New Brunswick had shown that the establishment of a commercial agreement to take the half dollar only for forty cents would completely meet the requirements of the country.

Mr. OLIVER having briefly supported the measure.

Hon. J. ROSE said that the information given by the gentleman who had spoken conveyed many valuable hints to the Government for their consideration during the recess. He repeated that there were insuperable difficulties arising from the varying intrinsic values of the different coins in the way of imposing a specific duty which would establish a par value, and thought that the Government might be trusted to take proper means for the effectual prevention of smuggling this article as well as watches, diamonds, or other jewellery.

Hon. J. H. CAMERON having spoken in favor of the measure, the remaining resolutions were put and concurred in, with the exception of the eleventh, imposing an export duty on lumber from the Western Provinces, which was struck out by the consent of the Government.

HON. Mr. BOWELL called the attention of the Government to the article of Hops which he saw classed in the free list. He could not see why a duty of ten cents should be placed upon corn, and hops allowed to come into the country free, particularly as the United States imposed a duty of five cents a pound upon hops which we sent into that country. It was an exceedingly precarious crop, and our farmers should be protected. He asked the Minister of Customs whether this was one of the articles which were to be considered during the recess, if not he would move to have it struck out of the free list.

Mr. TILLEY replied that it was one of the subjects under the consideration of the Ministry, and would be taken up at the next part of the session.

The resolutions were carried.

The Vermont Disaster.

We have further particulars of the railway disaster in Vermont, by the New York Tribune. From an account in that paper we learn that about seventy workmen, mostly educated mechanics, after dinner, proceeded by a train composed of an engine and one passenger car to Harmon Bridge, up a heavy grade, the train moving backwards. As they approached the bridge, the engineer could not shut off the steam readily, and only succeeded in checking the speed of the train in time to save the engine from going over the embankment. As the centre of the car struck the trunk of the precipice it broke into three pieces, the roof sliding forward, and half of the body falling 70 feet to the river bed. About 25 men were spilled out in a pile on a shelving rock, 25 feet below the track, the rear half of the car falling upon them, and the tender on top of that. It was there that most of the fatalities occurred. The tender remained on the shelf. About ten persons saved themselves by jumping from the car before reaching the brink; fifteen were instantly killed; and four more died soon after, and there are others that cannot survive. Scarcely any escaped serious injury. Those falling in the half of the car that first went over the entire 70 feet are mostly all living. The deceased were among the most useful men in Vermont, and will be sadly missed by the State at large.

A Milwaukee tobacco firm offers a \$20 box of cigars for the best piece of advertising poetry.

The Newfoundland Legislature is summoned to meet on the 30th of January.

A severe winter is predicted in England because woodcocks are very plentiful.

The ice-berg has formed at Quebec, from the Island of Orleans to the North shore.

The Ottawa Times says Mr. McGee's health is so feeble that he will shortly be able to take his place in the Commons.

A fire broke out in a house occupied by a family named Coulson, living near Lowellville, Nelson Township, Hiram County, on Saturday night, by which his wife and babe were burned to death, and himself barely escaped, and was very much burned.

Daily Intelligencer.

BELLEVILLE, TUESDAY, DEC. 17.

BANK OF HASTINGS.—The Bill to incorporate the Bank of Hastings was read a second time yesterday and referred to the Committee on Banking and Commerce.

OTTAWA CITIZEN ALMANAC.—The Ottawa Citizen Almanac, for 1898, has been received. It is neatly got up and is a credit to its enterprising publisher.

IN AID OF THE POOR.—We are requested to state that there will be a meeting of Ladies tomorrow afternoon, at the Marble Hall, to devise means for the relief of the poor. We hope there will be a large attendance.

CANTER'S ZODIAC TROUPE.—This troupe performed last night to a full house in Ontario Hall. The performance, as a whole, was very good. They will appear again to-night at the last time, with an entire change of programme. Go and see them.

BALDWIN WARD.—A resolution was presented at this afternoon to THOMAS KELSO, Esq., soliciting him to come forward as a candidate for Baldwin Ward at the approaching municipal election, which he accepted. Mr. Kelso is a practical, thorough business man, and will be a great acquisition to the Council.

REVENUE AND EXPENDITURE.—The following statement of the revenue and expenditure of the Dominion of Canada for the month ending the 30th of November, 1897, is published:—Revenue Customs, \$904,419 52; Excise, \$275,353 74; Bill Stamps duty, \$12,918 11; Post-office, \$51,223 37; Public Works, including Railways, \$82,191 77; miscellaneous, \$93,957 59; total, \$1,430,473 74. Expenditure, \$617,678 77.

PROVINCIAL NOTES.—The following is a statement of Provincial notes in circulation on Wednesday, the 4th December, and of specie held against them at Montreal and Toronto:—Provincial notes in circulation, payable at Montreal, \$3,292,703; at Toronto, \$1,947,511. Total, \$4,040,212. Specie held at Montreal, \$420,000; at Toronto, \$400,000. Total, \$820,000. Debtors held by the Receiver General under the Provincial note act \$300,000.

CURLING.—At a meeting held at the Ontario Skating Rink on the 16th inst., a Curling Club was organized under the name of the "Belleville Curling Club." The following officers were appointed for the ensuing season: President, James Brown, Esq., M. P.; Vice-Presidents, Q. Macdonald, Esq., Geo. Neilson, Esq.; Secretary and Treasurer, Walter J. Hayward, Esq.; Managing Committee, Andrew Thompson, Esq., James Blacklock, Esq., D. B. Robertson, Esq., Thomas Macdonald, Esq., Alex. Robertson, Esq.; Chaplains, Rev. Dr. Fox, Rev. A. Walker. Gentlemen desirous of becoming members will please attend a meeting to be held at the office of Alex. Robertson, Esq., on Thursday next at 8 o'clock p.m.

American Silver.

By reference to a debate in the House of Commons, which will be found in another column, it will be seen that the question of American Silver has been before the House, and that the Ministry propose to impose a duty of 15 per cent. upon all silver imported into Canada, and that they propose dealing with the subject still further at the meeting of the adjourned Parliament.

How has not been indicated by the Finance Minister, but from what we can learn, it will be by Exchequer bills, bearing a certain interest, but what the Government will do with it is not known. It is hoped that it will be sent to the mint to be re-coined into Canadian coin, thus creating for ourselves a currency sufficient to meet the wants of trade. The proposed duty is the best scheme that could be adopted at the present time, as it will stop the bringing of large quantities into the country, and thus increase the value of that already in the country. The reduction of a 25 per cent piece to the value of 23 cents would, as pointed out by Mr. Bowell, cause much loss to those who have their hard earnings laid away in silver.

An editor in Elora was assaulted by a rowdy last week. The rowdy threw the editor's leaves into the air. The editor threw the rowdy after it. Tabern.

The N. Y. Tribune of Thursday reports two murders on the street the day previous. One of the victims was Tom Sharpley, leader of the Sharpley minstrels.

A sheep-shearing machine is on exhibition in New York. The sheep furnishes the motive power and shears himself in one minute. We presume a spinning wheel and a frying-pan attachment will be added.

Gold News.

From a friend who recently paid a visit to Madoc and El Dorado, we gather some interesting items of gold news. The favorable results from the crushing mills have induced a large number of persons to visit the Gold District within the last few weeks, and mining property has consequently been more actively enquired for. The stream of travel is going east from Madoc into Elzevir, in the direction of the Barry Mine, where rumor has it that something very valuable has lately been discovered, and the general opinion of practical men points to Elzevir as a very rich gold district.

In the Richardson Mine on Monday, a blast threw out rich specimens of gold in quartz that had been previously obtained from this mine, and on Tuesday evening another blast developed very rich ore. Gold was plainly visible to the naked eye, and found scattered abundantly through the rock.

The work of erecting the crushing mill is being proceeded with as rapidly as the weather and circumstances will admit, and it is confidently expected to be in operation by the first of the New Year.

In the El Dorado Mine a depth of 45 feet has been reached, and as they get lower the appearance of the rock looks more promising. A ton of quartz from this mine was crushed on Friday at the works of Messrs. Scott & Taylor, which yielded \$41 to the mine. The repeated tests made from this mine and the large yield of gold, show that the El Dorado is one of the richest mines in the gold region.

In the Bay State Mine they are down to a depth of 35 feet. A ton of the ore from this mine was crushed at the mill of Turley Gilbert on Tuesday last, which yielded \$19 to the mine. We understand an offer has been received by the Directors of this Company from responsible parties, to erect a crushing machine and take half their pay in stock at par, and that negotiations have been opened with a view to the immediate erection of a mill. The shaft at this place is well made, and is one of the few which have a good shed and a blacksmith's shop erected.

The proprietors of the crushing mills are rapidly gaining experience and making improvements, so that the quantity of gold obtained per ton from the quartz may be very materially increased in a few weeks by the mere improvement in the crushing machinery.

A few days ago a fine specimen of quartz with the gold plainly visible, was shown us by Mr. Daniel Povell, of Marmora, who obtained it from Lot 17, in the 11th Concession of that Township, from a lead of quartz very near the surface.

To-day we have been shown a certificate from Messrs. Turley & Gilbert, representing that they had crushed one ton of ore from the Kootany Mine, which yielded \$15 to the ton. During the operation, the certificate states, that "over half the quicksilver was lost, being flowered from the presence of sulphur in the rock, and had not the accident occurred, they consider that a much larger yield would have been given."

Mr. J. J. Shaver had on exhibition yesterday a bar of gold, the product of a ton of quartz from the Denbigh Mine. The certificate of Messrs. Daniels, Scott & Taylor shows that a ton of quartz was crushed on the 14th inst., and yielded 1 oz. 17 dwts. 19 grs. or \$37.38 in gold. The fact that this mine is some forty miles from Madoc shows that gold is widely distributed over the back country.

The Strike at Quebec.

The ship carpenters' strike at Quebec continues, and there is no prospect of its coming to an end. A telegram to the Montreal Gazette says: "The Ship Carpenters' Union, to the number of several hundred, congregated from the coves and other places this morning, and proceeded to stop work at the ship yards of the Hon. Elie Gingras, Messrs. Baldwin, Valin & Dugal, P. V. Valin, and McKay & Warner. It was understood that from ten men in some yards, to fifty men in others, not the offer of the Union, had accepted the offers of the builders, and were occupied in proceeding with those vessels already on the stocks. This conduct so enraged the Union Society that, emboldened by the impunity with which their recent illegal displays have so far been met, they drove the men from their work, brutally beating all who did not abandon their positions on being told to do so. The men marched in procession, preceded by a man bearing a calf's head on a pole. They carried axes, hammers and bludgeons to strike down the men who dared to oppose them. Happily, innumerable workmen threw down their tools and left off work without showing resistance. Several cases of violence are reported in attack upon the flour stores is talked of, as a means of support. The Mayor has summoned the Police Board, but they refused to take any steps in the matter."

—Discount on American invoices for this week is 25 per cent.

Telegraphic News.

BY ATLANTIC CABLE.

COPENHAGEN, Dec. 16.—The negotiations between the Cabinets of Copenhagen and Berlin in regard to Schleswig, which for some time past had been languishing, have been resumed with increased activity, and important notes have been exchanged, the tenor of which, however, is as yet unknown.

MUNICH, Dec. 16.—Prince Hohenlohe, the chief Minister of the King, strongly urges the re-organization of the military establishment of Bavaria.

LONDON, Dec. 16, evening.—Last night an apparently organized attempt was made to set fire to several warehouses in the city, but were not successful. The incendiaries are generally supposed to have been the work of Fenians, though none of the parties engaged in the plot were caught. These events cause much alarm throughout the metropolis. The magistrates are swearing in policemen by the hundreds.

A man has been arrested at St. Albans, on suspicion of having engaged the explosion at the Clerkenwell prison. It is said that he is the person who lit the fuse. His examination will take place to-morrow. Casey was again brought from his prison to-day, and examined, but no evidence in regard to the explosion was elicited, and he was remanded.

The excitement concerning the Fenians is unabated, and the press strongly denounce them.

Second Despatch.

DUBLIN, Dec. 16.—Legal proceedings have been commenced against John Martin, president of the Irish National League, Alexander Sullivan, editor of the Dublin News, and others who took part in the Fenian riots in the suburbs on Sunday, the 14th inst., and to-day the accused were brought before the Police Magistrate for examination. They did not deny their participation in the funeral service, and those who made speeches freely acknowledged the language charged against them.

FLORENCE, Dec. 15.—In the Italian Parliament the Liberal members have made a violent attack upon the Government. Prime Minister Mancini will reply to-morrow.

LONDON, Dec. 17, noon.—The steamer "Moravian" has arrived.

QUEENSTOWN, Dec. 17.—The steamer "City of Paris" has arrived.

LONDON, Dec. 17, noon.—Consols 92½; American securities inactive; Bonds 71½; 1 C 95½.

LIVERPOOL, Dec. 17, noon.—Cotton quiet and steady; sales 10,000 bales. Breadstuffs quiet. Wheat firm.

LONDON, Dec. 15, 2 p.m.—Consols 92½; Bonds firm at 71; 11 C 95½; Erie 50½.

LIVERPOOL, Dec. 17, 2 p.m.—Cotton, more quiet. Corn declined to 46s 3d.

American Despatches.

NEW YORK, Dec. 16.—The frigate "Susquehanna" has arrived. She lost three of her crew by yellow fever. Admiral Palmer died at St. Thomas on the 7th inst., of the same disease.

HANANA, Dec. 16.—The steamer "Cacique" has arrived at Santiago de Cuba, with news from Hayti to the 7th. She brings confirmation of the murder of Gen. Montez at Cape Haytien.

War has been declared against Hayti by the Republic of St. Domingo, on account of the aid and countenance lent by that Government to the partisans of Bea, who recently invaded Dominican territory at Monte Chéty.

Gen. Valverde, the Dominican Minister to Hayti, on his arrival home after his recall by President Cabral, made a report as to the complexity of Baez.

Gen. Cabral's forces were already on the march, and it was stated that the Haytiens had left the capital to meet the Dominicans.

A terrific fire had occurred at Demerara. The reports of earthquakes at Martinique and Guadaloupe are contradicted.

The steamer "Blasco," Geary, sailed from Havana to-day for the island of Porto Rico, with money and provisions to relieve the suffering inhabitants.

Violent shocks of earthquake were experienced on the island of St. Kitt's on the 13th and 30th of November, the sea rising several feet on each occasion.

An earthquake at Antigua on the 18th Nov., caused great loss of life and property.

Reports from St. Thomas are more cheerful. The revolution in Hayti was increasing. President Cabral was marching against Hayti with an army, to gain possession of the whole island.

The American wife of Senor Hernandez, and her child, were burned to death at Guanabaco.

The commercial feeling in Havana is very insecure, and failures may be expected.

NEW YORK, Dec. 16.—A Washington special says:—Severe distress among the whites and negroes of the South is anticipated during the winter. Freedmen are being discharged in large numbers, and as there is no instance is actually at the door of both whites and blacks.

The Times' special says:—Secretary Seward will soon furnish additional "Alabama" correspondence, and take no further step to the war until he has an expression from Congress on the subject.

It is expected the Senate will pass a Bill to repeal the tax on raw cotton, with but five or six dissenting votes.

—Miss Damon, a pretty Universalist preacher, has been called to occupy a pulpit in Cavendish, Vermont. All the young men are being converted.

SPECIAL NOTICES.

TYPHOID FEVER.

This disease is not only cured by Dr. Radway's Relief and Pills, but prevented by its use. In fact, our use of a spoonful of Relief in a tumbler of water, drink this before going out in the morning, and several times during the day. Take one of Radway's Pills one hour before dinner, and one on going to bed.
 If treated with Fever, take 4 to 6 of the Pills every six hours, until copious discharges from the bowels take place; also drink the Relief diluted with water, and soothe the entire surface of the body with Relief. Soon a powerful perspiration will take place, and you will see a pleasant heat throughout the system. Keep on taking Relief immediately, every four hours, also the Pills. A cure will be effected. The Relief is strengthening, stimulating, soothing, and quieting; it is sure to break up the Fever and neutralize the poison. Let this treatment be followed, and thousands will be saved. The same treatment in Fever and Ague, Yellow Fever, Ship Fever, Bilious Fever, will effect a cure in 24 hours. When the patient feels the Relief irritating or heating the skin, a cure is positive. In all cases where pain is felt, the Relief should be used.
 Relief 50 cts.; Pills 25 cts. Sold by all Druggists.
 See Dr. Radway's Almanac for 1868. 179-2nd-41-2nd

Dr. P. Meredith, Dentist, office No. 132 West Sixth Street, states as follows:

Mrs. J. N. Harris & Co., Gents.—About one year ago I took a cold which settled on my lungs. A violent cough was the consequence, which increased with severity. I experienced large quantities of phlegm and mucus. During the last winter I became so much reduced that I was confined to my bed. The disease was attended with cold chills and night sweats. A doctor set me in my friends thought I was in the last stages of Consumption, and could not possibly get well. I was recommended to try

ALLEN'S LUNG BALSAM.
 The formula was shown to me, which induced me to give it a trial, and I will only add that my cough is entirely cured, and I am now able to attend to my business as usual. Yours respectfully,
 P. MEREDITH

FRENCH LAMAS & THIBETS.

"The French Government," the *Tribune* states, "has just ordered 60,000 sabre bayonets from the metal works of Eskilstuna in Sweden, and which are to be delivered by the end of March, 1887."

Hankow, China, has had an extraordinary flood. The Yangtze-kiang, having fallen 4 feet 6 inches, suddenly rose in 48 hours 5 feet 6 inches. The Chinese say that in the province of Shensi, a column of water suddenly spring from the earth, deluging the whole city and drowning the inhabitants.

The New York Journal of Commerce does not think much of Mr. Seward's purchase of the Danish Antilles, and hopes Congress will not furnish the money. The Journal says: "It was a very clever idea of Mr. Seward's—that *phobias* dodge, if we may be allowed the expression—quite after the manner of Napoleon the Third—and it is very pleasant to know that the St. Thomases gush toward us. But we do not gush toward them in return. It is painful to say it but their *not* reciprocate there. We pity their sufferings, we will send them corn, wine and oil, we would like reciprocity treaties with them to any extent, but we don't want to let them see their cottons, levers, or their earthquakes. Let us be friends—the more distant the better—but nothing more."

THE ABYSSINIAN EXPEDITION.—The *Pull Mail Gazette* publishes extracts from a letter dated Cairo, 15th Nov., referring to the all-absorbing Abyssinian expedition. It would appear that Colonel Kennedy, who was instructed to obtain 8,000 mules, had succeeded in doing so, and they were arriving from Gambia and Valencia, Brindisi and Syria, and some had been bought in Egypt. The losses were very severe, owing to the preposterous way in which the vessels were fitted up in Bagdad, and partly owing to the gale which blew at Alexandria from the 8th to the 11th inst. Many mules died outside the harbour, the vessels being unable to cross the bar; out of a hundred fine animals from Brindisi, more than half were lost. There are also a great many so wounded and chafed that they are unfit for use. The hospital for the reception of the sick and wounded of the expedition, which has been commenced at a standstill, the Home Government having in their wisdom sent out some essential part in a slow sailing vessel. With difference existing between the War and India offices, the prospects of this Abyssinian affair are not very cheering.

PROSPECTUS

ROSE MINING COMPANY OF MADOC

Capital Stock, - - - \$25,000.

Divided into - - - 5,000 Shares.

5,000 Shares - - - \$5.00 Each.

Deposit on Subscription Twenty-five per cent.

GEO. D. WYCKOFF, A. L. McLELLAN, JAS. CARR RITCHIE, F. E. KILVERT, ASA A. BURNHAM, JR., E. O. REILLY, E. H. HALE, and HUGH FAIRBANKS, are the owners of the property hereinafter mentioned and are desirous of forming a Stock Company, with the capital of \$25,000, and are to receive and take in payment for the said property \$1,350 in cash, and 2,350 shares of said Stock of the said Company. The said parties are now taking proceedings for its incorporation, under cap. 23, 27-28 Vic., and have much pleasure in calling the attention of the public to the following Prospectus:

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 5th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives this company peculiar advantages over many others, there being on the property a high ridge or mountain of rock in which numerous veins of gold-bearing quartz crop out; and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of back to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.

Another great advantage in this property is, that immediately the work is commenced ore can be taken out in quantities more than sufficient to pay the working expenses, and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.

GEO. D. WYCKOFF, ASA A. BURNHAM, JR., F. E. KILVERT, A. L. McLELLAN, JAS. CARR RITCHIE, JAS. EDWIN REILLY, E. H. HALE.

December 31, 1887. p183-4f

PROSPECTUS OF THE EL DORADO MINING COMPANY OF MADOC.

CAPITAL STOCK \$72,000.

Divided into 2,400 Shares of \$30 Each.

Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its incorporation, under Chapter 23, 27, and 28 Vic., for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 5th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 40 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$35.50 in gold, which specimen can be seen at J. E. Ellis, on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, as seen at Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore.

The projectors have determined only to sell sufficient stock to repay the advances, and to carry on the work satisfactorily. They have thereupon decided to sell only 825 shares of the value of \$240 each, payable on half, or \$12, as above, on subscription, and the remaining \$10 on the 1st of January, 1888. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings.

RICHARD SPARLING, Managing Director and Superintendent.

T. S. McGLASHAN, of Madoc.

MAHLON BURWELL McGREGOR, of Madoc.

T. A. MITCHELL, of Madoc.

ALDERMAN VICKERS, of Toronto.

J. E. ELLIS, of Toronto.

McLELLAN & McLELLAN, Solicitors. A. F. WOOD, President.

BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

Applications for Shares received by Alderman Vicker, Yonge Street, Toronto; J. E. Ellis, King Street, Toronto, and at the office of

BUY YOUR TEA

DIRECT FROM

THE IMPORTERS!

Tea, Tea, Tea!

THE MONTREAL TEA COMPANY, 6 Hospital Street, Montreal, having just imported a large quantity of Green and Black Teas, beg to call the attention of the Trade, Hotel Proprietors, and large establishments generally to their list of prices. Buyers of Chests and Boxes of Tea will save money by getting it direct through the Importers.

All orders for 25 lb. boxes and upwards carriage free to any Railway Station in Canada. Buyers lying beyond Railway Stations, will please send Post Office order, or enclose notes. The carriage will be paid to the nearest station, where there are express offices. Tea will be forwarded immediately on receipt of the order by mail containing money, or the money can be collected on delivery by express mail. Cash collected in Montreal free of charge, and Tea forwarded by express mail. Nothing less than 25 lb. boxes sold. Original packages Black Tea weigh 35 chests about 50 lbs. Chests do 50 to 100 lbs. Green Tea from 60 to 80 lbs. Tea not mentioned in advertisement can be had equally cheap. The Company are determined to take a stand in the Montreal market, every article may therefore be depended on as to quality and weight.

American Watches.

THE true value of Machinery applied Watchmaking is not that by its use Watches are made rapidly, but that they are made correctly. Very few people know why a Waltham Watch should be superior to any other. In the first place, at Waltham the Watch is made on a machine, and the machine is constructed like any other machine, on mechanical principles. The factory is, indeed, little else than a machine shop, the principal work in which is not done upon watches, but upon machinery to make watches with. If machinery is good, it is because the machinery is good. Of course, there must be no defect in the principle of plan or the movement, no mistake in the size or shape of the pieces of which it is composed, nothing wanting in their properties, and no error in their positions. These points once thoroughly settled in regard to each part of every variety of watch, it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished piece. The method established in every department is the reproduction of parts by mechanical means, and this is carried out on the system of the most thorough subdivision.

By means of multiplying gauges and microscopes, tests and inspection for the detection of wear in cutting tools, and for faults and flaws in the material, are made accompany the work in every stage from beginning to end. As a necessary result, the Watch goes together a finished machine. Every part is found to fit properly in its place. Every pin may be pushed till it pinches, and every screw turned home—instead of slugging and forcing. Simple in plan, and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform to the minutest details, not easily damaged, easily repaired, and when repaired always as good as new.

There are different grades of finish in the different varieties of Watches made by the Waltham Company, and these are in different sizes and shapes to suit all tastes and means; but every Watch that bears the genuine trade mark of "WALTHAM" is guaranteed to be a good one, and nobody need be afraid to buy it.

COMMERCIAL WORK.

MARRIED.

By the Rev. Joseph Wild, in the Episcopal Methodist Manse, Belleville, Dec. 17th, Mr. Joseph Porritt, of Hungerford, to Miss Sarah Jane Parks, of Treadings.

SPECIAL NOTICES.

TYPHOID FEVER.

This disease is not only cured by Dr. Radway's Relief and Pills, but prevented. If exposed to it, put one tea spoonful of Relief in a tumbler of water. Drink this before going out in the morning, and several times during the day. Take one of Radway's Pills one hour before dinner and one on going to bed.

Infected with Fever, take 4 to 6 of the Pills every six hours, until copious discharges from the bowels take place; also drink the Relief diluted with water, and lauge the entire surface of the body with Relief. Soon a powerful perspiration will take place, and you will feel a pleasant heat throughout the system. Keep on taking Relief immediately, every four hours, and you are sure to break the fever and neutralize the poison. Let this treatment be followed, and thousands will be saved. The same treatment in Fever and Ague, Yellow Fever, Ship Fever, Bilious Fever, will effect a cure in 24 hours. When the patient feels the Relief irritating or leaving the skin, a cure is positive. In all cases where pain is felt, the Relief should be used.

Relief 50 cts., Pills 25 cts. Sold by all Druggists.

See Dr. Radway's Almanac for 1868. 178-2w-41-2w

Dr. P. Meredith, Dentist, office No. 132 West Sixth Street, states as follows:

CINCINNATI, October 1, 1868.

Messrs. J. N. Harris & Co.—Gentlemen:—About one year ago I took a cold which settled on my lungs. A violent cough was the consequence, which increased with severity. I expected large quantities of Phlegm and mucus. During the last winter I became so much reduced that I was confined to my bed. The disease was attended with cold chills and night-sweats. A diarrhoea set in. My friends thought I was in the last stage of Consumption, and could not possibly get well. I was recommended to use Dr. Radway's Lung Balm.

The formula was shown to me, which induced me to give it a trial, and I will only say that my cough is entirely cured, and I am now able to attend to my business as usual. Yours respectfully,

F. MEREDITH.
Sold by all Family Medicine dealers.

Foreign Miscellany.

Dresden, which was once a famous place of resort for English families and travellers from other countries, is rapidly declining in prosperity.

Russia owes a funded debt of 1,219,442,934 roubles, or \$765,000,000, and has in circulation about 800,000,000 roubles in paper currency.

The telegraphic alphabet used on the Atlantic cable is the only one used in any part of Europe or Asia. It is suited to all known languages.

It is reported by a western paper that an agent of a famous club in England is negotiating for 10,000 acres of land in Illinois on which 200 European families will immediately settle, including many celebrated grape-growers from the Rhine.

There is a report that the Emperor of the French has discovered in the person of a surgeon of a regiment, a rival to Mr. Beck himself in knowledge of Abyssinia, and that he has placed the services of the French doctor at the disposal of the Government through the British Ambassador at Paris.

A letter from Trieste, in the *Wanderer* of Vienna, says: "The experiments made in December last at Pola with the new artillery has shown the superiority of the projectiles manufactured in the Austrian arsenals, as the English shells burst at the moment they touched the armour plating, while those made in Austria penetrated it intact. These results have recently received a striking confirmation. Experiments were being made on the practising ground with an Armstrong gun, when two of the English shells burst in the tube and damaged it. Such a thing has never occurred with an Austrian shell."

It is stated in an article by M. Bonneau in the *quotien National* that the Bay of Adoulis, or Annisley, in the Red Sea, which the English have selected as the place of disembarkation for the army sent against Abyssinia, was, with the adjacent territory, ceded in 1859 to France, and a captain of the National Navy, M. Russell, was sent to the Red Sea to regularize this important cession. By whom the cession was made M. Bonneau does not state, and he adds: "It is a fact that the French Government may since then have renounced the possession of the Bay of Adoulis, as it formerly abandoned all the rights of France to the great island of Madagascar."

PROSPECTUS OF THE ROSE MINING COMPANY OF MADOC.

Capital Stock, - - - \$25,000.

5,000 Shares - - - \$5.00 Each.

Deposit on Subscription Twenty-five per cent.

C. D. WYCKOFF, A. L. McLELLAN, JAS. CARR RITCHIE, E. L. KILVERT, ASA A. BURNHAM, JR., E. H. O'REILLY, E. H. HALE, and HUGH FAIRBRIER, are the owners of the property hereinafter mentioned, and are desirous of forming a Stock Company, with the capital of \$25,000, and are to receive and take in payment for the said property \$1,250 in cash, and \$2,250 shares of paid up stock of the said company. The said parties are now taking proceedings for its incorporation, under cap. 23, 27-28 Vic., and have much pleasure in calling the attention of the public to the following Prospectus:

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 5th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives it a peculiar advantage over many other localities there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out, instead of sinking shafts, (as in most expensive and tedious operations), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of backs to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metals, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.

Another great advantage in this property is, that immediately the work is commenced, it can be taken out in quantities more than sufficient to pay the working expenses and in that respect almost will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.
GEO. D. WYCKOFF, ASA A. BURNHAM, JR., F. E. KILVERT, A. L. McLELLAN, JAS. CARR RITCHIE, E. L. KILVERT, E. H. HALE, E. H. O'REILLY.
PROV. PRESIDENT—GEO. D. WYCKOFF.
PROV. SECY & TREAS—JAS. C. RITCHIE.
SUBSCRIBERS—TOMSON & KILVERT.
Stock Book opened at J. W. Norton's Exchange Office, Hamilton. Application for Stock and other communications may be addressed to any of the Directors or to
JAMES C. RITCHIE,
Provis. Sec. & Treas., Hamilton,
December 3d, 1867. D182-4

PROSPECTUS OF THE EL DORADO MINING COMPANY OF MADOC. (LIMITED.)

CAPITAL STOCK \$72,000.

Divided into 2,400 Shares of \$30 Each.

Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its incorporation, under Chapter 23, 27, and 28 Vic., for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 5th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 40 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$53.20 in gold, which specimen can be seen at J. E. Ellis, on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore. The projectors have determined only to sell sufficient stock to repay the advance, and to carry on the work satisfactorily. They have thereupon decided to sell only 233 shares of the value of \$30 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1868. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the return on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:
A. F. WOOD, late Warden of the County of Hastings.
RICHARD SPALLING, Managing Director and Superintendent.
T. S. McLELLAN, Esq., of Madoc.
MAHLON BURWELL, Esq., of Madoc.
T. A. MITCHELL, Esq., of Toronto.
ALDERMAN VICKERS, Esq., of Toronto.
J. E. ELLIS, Esq., of Toronto.

McLELLAN & McLELLAN, Solicitors. A. F. WOOD, President.
BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

American Invoices—Discounts.

FINANCE DEPARTMENT, CUSTOMS, QUEBEC, 6th March, 1863.

It is directed by the Hon. The Finance Minister, that hereafter Weekly Notices be published and furnished to Collectors of Customs, as to the rate of discount to be allowed on American Invoices, which is to be in accordance with the price of gold as represented by Exchange, at a rate equal thereto. Such notices to appear every Saturday in the *Canada Gazette*.

R. S. M. BOUCHETTE.

FINANCE DEPARTMENT, CUSTOMS, OTTAWA, 5th June, 1867.

It is hereby given that the authorized discount is declared to be this day 27 per cent, which percentage of deduction is to be continued until next Weekly Notice, and to apply to all purchases made in the United States during that week.

THOMAS WORTHINGTON, 3d Lt. Assistant Commissioner of Customs.

Important to Miners and MINING MEN.

JOHN'S Patent Water-Proof Safety Fuse for Wet Ground and SUBMARINE BLASTING, is much cheaper than any other, and pronounced by Mining men much better than any imported.

Testimonials received from men well known in the mining and quarrying business of Canada and the United States; from Messrs. Morrill & Colby, Bennett, Wilew Macfarland, Adams, Watson, Griffith, Wearn, and others.

All orders promptly attended to.

10.

American Watches.

THE true value of Machinery applied to Watchmaking is not that by its use Watches are made rapidly, but that they are made correctly. Very few people know why a Waltham Watch should be superior to any other. In the first place, at Waltham the Watch is regarded as only a machine, to be constructed like any other machine, on mechanical principles. The factory is, indeed, little else than a machine shop, the principal work in which is not more upon watches than upon machinery to make watches with. If the watches are good, it is because the machinery is good. Of course, there must be no defect in the principle of plan or the movement, no mistake in the sizes or shapes of the pieces of which it is composed, nothing wanting in their properties, and no error in their positions. These points once thoroughly settled in regard to each part of every variety of watch, it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished piece. The method established in every department is the reduction of parts by mechanical means, and this is carried out on the system of the most thorough subdivision.

By means of multiplying gauges and microscopes tests and inspection for the detection of wear in working tools and for faults and flaws in steel or stone, are made to accompany the work in every stage from beginning to end. As a necessary result, the Watch goes together as a finished machine. Every part is found to fit properly in its place. Every pin may be pushed till it plucks, and every screw turned home—without slugging and twisting the slightest balance, even under the pressure of the lightest mainspring, vibrates with a wide and free motion, and the beat has the clear ringing sound always characteristic of the Waltham Watch. The machine is a time keeper from the start.

This system of watchmaking is unknown in foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce Watches that cannot be equalled for every quality which makes a watch valuable. Simple in plan, and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform in its minutest details, not easily damaged, easily repaired, and when repaired always as good as new. There are different grades of finish in the different varieties of Watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and means; but every Watch that bears the genuine trade mark of "WALTHAM" is guaranteed to be a good one, and nobody need be afraid to buy it.

EVERY WATCH FULLY WARRANTED.

For sale by all first-class dealers in the United States and Canada.

ROBBINS & APPLETON,

No 182, Broadway, N.Y.

The Daily Intelligencer

WILL appear about five o'clock every afternoon (Sundays excepted) and will be furnished by Carriers at the rate of \$2 a year if paid in advance, \$6 otherwise. Mail subscribers \$3 a year. \$2 50 for 6 months; \$1 50 for 3 months.

It will contain the latest telegraphic news up to the hour of going to press, including Cable dispatches and the New York and Montreal Markets.

Arrangements have been made with RELIABLE Correspondents in the United States, Canada, and other points, who will furnish us with early and full information respecting the Gold Regions, and of matters of general interest.

Special attention will be paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c., &c., and in short, to better pains our expenses will be spared to make the DAILY INTELLIGENCER worthy of public patronage.

RATES OF ADVERTISING.

A liberal scale of prices for advertisements has been arranged as follows:

Cards, not exceeding six lines, 6 months, \$10 00

Half Square, 6 months, \$10 00

One Square, 6 months, \$20 00

Two Squares, 6 months, \$40 00

Four Squares, 6 months, \$80 00

Notices of Births, 50

Do of Marriages, 50

Do of Deaths, 50

"BUSINESS NOTICES"—All matter under this heading, loaded or solid, 10 cents per line, measured by a scale of solid minion.

Advertisers contracting for any space not less than half a square can have the privilege of changing their advertisements every two weeks.

Transient advertisements inserted at 7 cents per line for first insertion, and 2 cents for each additional insertion.

The Weekly Intelligencer

Is published every Friday Morning at \$2 per annum if called for at the Office, or sent by mail; and \$3, if delivered by the Carrier, payable in all cases in advance. When not paid until the close of the year, 50 cents will be added to each year's subscription. No paper discontinued until arrears are paid up, except at the option of the Publisher.

Within the past three months, its circulation has rapidly increased, and the number now on our Subscription books is over 1,400.

With such a large and general circulation throughout this and adjoining Counties, the WEEKLY INTELLIGENCER presents unsurpassed advantages to advertisers.

RATES OF ADVERTISING:

Six lines and under, first insertion, 10 cts

Each subsequent insertion, 5 cts

Above six lines (per line) first insertion 7 cts

Each subsequent insertion per line, 4 cts

A liberal discount will be made to those who advertise by the year.

Advertisements for insertion must be delivered before 12 o'clock, noon, on Thursday to insure their appearance.

All advertisements without written directions inserted until forbid, and charged accordingly.

The Intelligencer Job Office

Is supplied with Power Presses, Hand Presses, and possesses every facility for the rapid and neat execution of every description of plain and fancy printing, at prices as low as any other establishment in the county.

The DAILY and WEEKLY INTELLIGENCER can be had at the Book Store in Belleville, and at Wilson's Drug Store, Madoc, and at E. H. O'Reilly's.

All orders by mail promptly attended to.

M. BOWELL,

INTELLIGENCER BUILDING, FRONT STREET, BELLEVILLE.

LET THERE BE HARMONY IN THINGS ESSENTIAL—LIBERALITY IN THINGS NOT ESSENTIAL—CHARITY IN ALL.

No. 197

Commercial Bank of Canada

The special meeting of the Shareholders of the Commercial Bank of Canada, called for the 17th December, 1897, was held at the Bank Kingston, yesterday. In the absence of the President at Ottawa, C. F. Gildersleeve Esq., Vice President took the chair, and gave verbal explanations regarding the position of the Bank and its affairs. The following statement of the liabilities and assets of the Bank on the 14th December, together with the audited reports were submitted.

The Directors have to report that the Bill applied for under the resolution adopted at the special meeting of shareholders on 6th November last, passed the House of Commons, substantially in conformity with the application as published; and on 2nd inst., it was concurred in by the Senate without amendment. The Directors expect that the Bill will receive the assent of His Excellency the Governor General in a few days.

Until the Bill became law, the Directors could not inaugurate any new measure either for the resuscitation of the Bank, or for amalgamation. Thus, to-day, they were not prepared to submit plans for the future of the Bank, but they hope to be in a position to bring forward some definite proposals for the consideration of the shareholders in the course of a few weeks, and they would therefore recommend that the present meeting be adjourned to Tuesday, 7th March next.

Meantime they have further to inform the shareholders that the liabilities of Bank have been largely reduced. The general statement of the Liabilities Assets as at 14th December is hereby submitted, from which it will be seen that the reduction since 19th October amounts to \$2,491,775, nearly two and a half millions of dollars. This reduction has been effected, almost wholly by payment of the Dills discounted, and selling of the

Bills discounted, and other debts on the Bank, paid or reduced. Of the which have matured, only few in number and to a trifling per centage, have gone into default, even when renewals generally have been avoided, while those not paid at day of maturity, the greater part have been arranged subsequently. In dealing with the customers of the Bank, no undue pressure has been used, and it has not been necessary to put in suit twenty Bill

These remarks hold good of the discount at every office of the Bank, and the result shows conclusively the character of the business. The special advance of \$300,000 made by the Bank of Montreal in the month of September last, has been paid, and the intervention of the Bank, in respect of the Bills held as collateral, has only been required in two instances.

G. F. GILDERSELEY,

It was then moved by John Carruth Esq., seconded by John Paton, Esq., and Resolved—That the Report of the Directors and relative statement be printed for the formation of the shareholders, and this meeting be adjourned to Tuesday.

The last newest trick in New York elections, is to make the opposition candidate bribe, and then pay one's expenses with the cash he has thus

made to pay out. A monster meeting that city costs \$3,500, and a thorough campaign \$100,000.

(For the Intelligencer.)

Garibaldi.

Garibaldi, pattern patriot of the world.
See, Italy's brave conquering hero comes.
To free a nation from the tyrant's yoke.
He comes with loyal bands of conquerors true.
"Liberty! Liberty!" the gallant sons of Italy
Shout.
Yes, a nation long oppressed;
Her freedom she shall gain.
And bow to no tyrant's heel.
Shall not the world rejoice when
They of Italy shall be free?
Noble, brave Garibaldi, thou art true.
In thy glorious cause thou hast the sympathy
Of all.
All who the sweets of freedom know.
Then let thy willing soul and mind be strong.
For he who rules on high will bless thy
Love.
Though thy humble efforts by critics are dis-
counted,
As well who know not freedom's boon,
Yet by such efforts to the world thou hast shown
That within the walls of the ancient city Rome
There lives one whose power shall wane.
And those who his power shall uphold
Will learn that man is mortal.
And cannot rule like unto our God.
W. MEREDITH.

BELLEVILLE, THURSDAY, DEC. 19.

CHRISTMAS PRESENTS.—It will be seen by advertisement that Messrs. Geo. Ritchie & Co., have a lot of handsome Christmas Presents, which is worthy of inspection by intending purchasers.

IN AID OF THE POOR.—The meeting of ladies in aid of the poor, was held at the Marble Hall yesterday afternoon, and after taking some preliminary steps towards carrying out the object of the meeting, adjourned until to-morrow—Friday—afternoon, at three o'clock, at the same place. Ladies of all denominations are connected with the movement, and it is to be hoped that there will be a large attendance at the meeting to-morrow.

THE HASTINGS.—The Oswego Times says, "there seems now to be no question of the loss of the schooner Hastings, with all her crew." Mr. Henry Crozier, who has sailed on her, and whose father is among the lost, has been to the point where her boat was reported to be ashore, about 8 miles up the lake. He found the boat there, with her stern crushed out, and a piece of the Hastings' binnacle attached. Her foremast scuttled was found near the same place.

Maritime Provinces.

The newspapers of the Maritime Provinces are not satisfied with the postage law as amended. Having experienced the advantages of free circulation of newspapers, they don't fancy the idea of going back to the old system. The St. Johns News-Browser in speaking of the concession made to make payment of the concession optional with the publisher or subscriber says, "So far good. But this is not enough. Newspaper postage should have been wiped out altogether. The arguments for its abolishment cannot be successfully assailed. The only pretext that is offered for its retention at a low figure and free from compulsory prepayment, is that the system has been in vogue in old Canada, and this we hold to be valueless."

Some of the extreme Howe men are still unappeased. The Halifax Chronicle says: "The sooner we cry quits with this humbug Dominion the better. We want Responsible Government, our own revenue to dispose of, and let such Provinces as choose to knot their tails together, and be ridden over by John A. Macdonald and his friends, do so."

The Provincial Secretary for Nova Scotia has been returned by 400 majority over the Union candidate.

Thirteen thousand bushels of potatoes were exported on Friday and Saturday week from Prince Edward Island.

The Halifax Colonist, of the 7th says: "The nomination of candidates for the vacant seats in the Local Legislature, caused by the acceptance of the offices of Attorney General, Provincial Secretary, and Commissioner of Mines and Works, took place on Thursday last. The Hon. M. I. Wilkins, Attorney General, and the Hon. Robert Robertson, Commissioner of Mines, &c., were severally returned without opposition. The former for Pictou and the latter for Shelburne. The Hon. W. B. Vall, Provincial Secretary, is proposed in the County of Digby by J. C. Wade, Esq. The election will take place on Thursday the 19th.

The House Yesterday.

Yesterday the Bank of Upper Canada Bill was read a third time in the Senate.

The Inland Revenue Bill was somewhat amended and passed. A graduated licence scale is made for makers, first class, not exceeding \$300; second, not exceeding \$100; third, not exceeding \$100.

Mr. Cartier moved the second reading of a bill to prevent unlawful training in the use of arms, etc., which extends to all parts of the Dominion, in act already in force in Ontario and Quebec.

Mr. McKenzie objected to the powers which the bill gave to magistrates, but he did not press the objection upon Mr. Cartier, stating that the Government considered it necessary that the bill should pass.

Mr. Anglin, with more earnestness than, under the circumstances, became any member of the House, attacked the bill from every side.

Mr. John A. Macdonald clearly showed the illogical character of the speeches in opposition.

Mr. McGee followed, remarking that, in his opinion, the next six months would be a very critical time for Canada. The bill was then read.

The Public Works bill was read a third time.

The adjourned debate on the Intercolonial Railway Bill and the amendment of M. Dorion was resumed. Several speeches were made in favor of having the choice of route left to the House; which were replied to by members of the Government. Finally, the New Brunswick members manifesting a desire to fight out the battle of the routes at this stage, the House grew impatient, and a division being taken on M. Dorion's amendment it was lost by a vote of 35 to 83. A few Government bills were advanced a stage, and the House adjourned at 1:40.

Town Council.

WEDNESDAY, DEC. 18, 1867.

PRESENT.—His Worship the Mayor, and Messrs. Sutherland, Diamond, Foster, Holden, Tannahill, Watters, McIntosh, Kennedy, Jones, Henderson, and Robertson.

Several petitions asking for remission of taxes were referred to the Court of Revision.

A petition from Mr. Rankin, keeper of the Fire Engine, asking leave of absence for three days, was referred to the Fire and Water Committee.

A letter from N. G. Reynolds, Esq., respecting some property near the Railway Station, was referred to the Town Solicitor.

The Clerk read a certificate from the Police Magistrate and Henry Corby, Esq., Justices of the Peace, that George Stevens and John Fee had three sheep killed by dogs, and after diligent search they could not discover the owners of the dogs, and they had therefore adjudged that the Town, which was liable under a new law, should pay the value of the animals, amounting to twelve dollars. Some discussion took place afterwards respecting this matter, when it was laid over.

A petition from J. K. Grainger, butcher, representing that the space allotted to one stall in the market is not sufficiently large for his business, that if he was to be deprived of the use of the stall as it now is, his trade would be destroyed, and praying for permission to use both stalls as usual. Referred to the Market Committee.

The Committee on Ferry submitted the following report:

"To the Mayor and Town Council of the Town of Belleville, in Council assembled:—Your Committee on the Ferry beg leave to report that in accordance with the contract entered into between the Corporation and the Ameliasburgh Ferry, for the purpose of a landing at Belleville, for the use of the said Corporation of the Township of Ameliasburgh have made no reply."

"Your Committee have also had before them certain offers with reference to such landing from Mr. John Redner, herewith submitted, and feeling that they cannot take the responsibility of accepting either of Mr. Redner's propositions, they beg to submit the same to the Council for immediate action."

J. SUTHERLAND, Chairman.

December 18th, 1867.

"I hereby offer to the Town of Belleville the following property owned by me, on the Ameliasburgh shore, consisting of one half acre of land, with tavern stand, wood house, stable, and ferry landing, for the sum of \$1,500; or I will lease the tavern, wood house and stable at \$175 per annum; or I will lease the ferry landing and wood house, together with as much land as the lessee of the ferry may require, on which to pile a sufficient quantity of wood for ferry purposes at \$75 per annum."

"If this last offer should not meet the views of the Council, I am willing to leave the same to arbitration."

The above offer stands good for three weeks from date.

JOHN REDNER.

The Committee on Poor and Sanitary reported that they had examined the petition of persons applying for relief, and recommended an allowance of two dollars a month to certain parties during the winter season, and that Thomas Rutherford be allowed \$6 for taking care of a child.

The Committee on Finance reported, recommending the payment of a large number of accounts, monthly and quarterly salaries, also that the sum of \$200, being balance of appropriation of 1866 due the School Trustees, be paid; that collectors receive \$10 in silver

on taxes up to 1st January. The report stated that the collectors had been remarkably successful during the present year in collecting the taxes, that there was a large balance in the Treasury not required for immediate use, and recommending the payment of \$5000 to the Trust and Loan Company, being for a debenture past due. Council went into Committee subsequently. Mr. Holden in the chair, and passed the accounts, &c., and the report was adopted.

Mr. Holden gave notice that at the next meeting of the Council he would move that the office of Street Surveyor be abolished on and after the 1st of January, 1868, and that the Street Committee be empowered to report on the best method of providing the superintendence of works connected with streets and sidewalks.

Mr. Tannahill said as the chairman of Streets and Sidewalks was absent, it would be better to appoint another chairman, but he thought it better to leave the matter to the Mayor.

The Mayor said that Parliament would break up this week, and Mr. Brown would be taken.

Mr. Watters enquired if any steps had been taken to procure the lot adjoining the hospital lot.

The Mayor was not aware that any instructions had been given to the Solicitor.

Mr. Diamond—Perhaps Mr. Tannahill, chairman of the Harbour and Town Property Committee, can answer.

Mr. Tannahill thought indistinctly heard, was understood to say that he did not know.

Mr. Watters to Mr. Tannahill—(Jocularly) you don't pay attention to this business.

Mr. Tannahill said something else which was inaudible to the reporter.

Mr. Sutherland believed there were some maps of the town being prepared by Messrs. Haslett and Innes, and that these were accepted by the Council, and easily see every lot belonging to the Town.

Mr. Diamond—As it is, it is difficult to tell which property belonged to the Town. Under a new law we were obliged to have a map, and when this map was complete and registered the difficulty would be obviated.

Mr. Diamond called attention to the fact that the Small Pox was prevalent in the Town, and it was well known in one case, where a servant girl in attendance upon a person sick with that disease, went directly from the bedside into shops, into neighbor's houses, and took children up in her arms as she was going along the sidewalk. She may have done this thoughtlessly, but it was a serious matter as that was endangering the lives and health of others. The Board of Health was deficient in this respect, but he presumed if His Worship would call the attention of Capt. James to this fact, the evil might be remedied.

The Mayor said he would do so.

Mr. Holden—What would you do with a medical man who comes from houses where contagious diseases prevail?

Mr. Diamond—A medical man always takes proper precautions to prevent the spread of contagion.

Mr. Holden agreed with Mr. Diamond that some steps should be taken to prevent contagion, and he thought if the Mayor would call the attention of the officers of the Board of Health to the matter, the object desired would be attained.

The Report of the Ferry Committee was next considered.

Mr. Diamond said it was evident the Ameliasburgh Council was not disposed to take any action in relation to the Ferry. We had bound ourselves to Mr. Redner to find a landing for him, and if we had to purchase a landing and build a wharf, it would cost not less than \$500. If we take Redner's property, either by purchase or lease, we have a wharf and landing already made. It was a question whether the Council could acquire property outside the Corporation, but that difficulty could be got over by deeding it to a Trustee. He would prefer purchasing the property out and out.

Mr. Robertson—Would it not be well to obtain something definite from the Ameliasburgh Council before taking action?

Mr. Watters objected to acquiring tavern stands for speculative purposes. He saw no reason why it could not be left over for a week.

Mr. Henderson would prefer to get possession of the old cove, where a ferry had existed for thirty years. It was an ancient road and a public highway, and no one could prevent the occupation of it by us. It was the natural ferry, and as it would not cost anything to acquire, it would be preferable. The necessary pier and landing could be built for \$150. He was opposed to purchasing Redner's property or having anything to do with tavern stands. Is there any necessity for hurrying this matter through to-night?

Mr. Diamond—Yes, Mr. Redner wants to know because he can lease the property to other parties.

Mr. Henderson—Well, let Mr. Redner lease it. We can get other property which would be cheaper and suit our purposes better.

Mr. Diamond had no idea of the Council leasing the building for a Tavern. It might be used for any other purpose. If we leased the property for 17 years we would have paid the sum of \$1,325, and at the end of the 17 years not have foot of land. He understood that the Ameliasburgh Council intended purchasing Redner's Ferry, Boat and starting an opposition line to us.

Mr. Kennedy thought there would be no harm in leaving it over until next meeting, and probably better terms would be offered. Mr. McIntosh had spent a great deal of time in connection with this matter, and was not disposed to leave it over. He thought it was too bad to throw cold water on their efforts in this matter.

Mr. Diamond had spent all the time he intended to do respecting the question.

The Mayor would be very sorry to see the Town purchase the property. Suppose the Council lease for 5 years; during that time it probably better arranged for a ferry, and made for some other locality. If leased, he hoped the Committee would see that the landing was put in proper repair by Mr. Redner before accepting it.

Mr. Henderson had no objection to lease it for 3 or 5 years.

The Mayor knew a good deal about building piers, and he thought one could be built for \$100.

Mr. Sutherland said if we do anything with this property of Redner's, either by

purchase or lease, it was absolutely necessary something should be done at once.

Mr. Henderson—What can Mr. Redner do with it?

Mr. Sutherland—He says he can rent it for the same sum, to other parties. He was in favor of leasing it for a term of five years, and during that period we could look about us, and make other arrangements if we were not suited.

Mr. Henderson—Is the present landing wide enough for the new boat?

Mr. Sutherland thought it was.

The Mayor—The new boat is ten feet wider than the old one. However that matter could be left with the Committee.

Mr. Diamond moved, seconded by Mr. Sutherland, that the Committee on Ferry be instructed to close with Mr. Redner, and lease the ferry landing for five years, on the terms proposed by him at \$75 a year. Mr. Redner leaving the wharf in a good condition with a right of way to the public highway—Carried.

Mr. Sutherland said something must be done to provide a landing at this side. Capt. McIntosh, Mr. Bogart, and others, had spent a great deal of time in making examinations of leaving either side, and had a plan which he would submit to the Council, fixing the landing where it was now. The work required would cost from \$500 to \$750.

At the suggestion of some of the members, the further consideration of this question was left to the next meeting, and the Council adjourned.

Frightful Railway Accident.

FORTY-FIVE PERSONS KILLED AND THIRTY-FIVE WOUNDED.

The following particulars of a frightful railway accident on the Buffalo and Lake Shore Railroad came over the wires last evening:

BUFFALO, Dec. 18.—The New York express train from Cleveland, on the Lake Shore Railroad, due here at 12:45 p. m., being behind time, when two miles this side of Buffalo, was overtaken by a freight train, met with a serious accident about 3 p. m.; two rear passenger cars were thrown off the track and rolled over an embankment of 20 feet.

LATER.

The accident on the Lake Shore Railroad is more serious than at first reported. The rear car went over an embankment of fifty feet, and was set on fire by a stove, and out of fifty passengers only two escaped, the rest were burned to death. All that is left is a mass of blackened and charred remains, without any means of ascertaining their names.

The accident occurred near the Big Sister Bridge, a quarter of a mile east of Angola. One train has arrived with the unhurt passengers and a few of the wounded. The balance of the wounded will be here about midnight. Every preparation will be made to care for their wants by the citizens of Buffalo. A large number of physicians left Buffalo on the four o'clock special train to assist the wounded. Among the killed the name of Mrs. Hubbard, of St. Catharines, is reported.

THE LATEST.

BUFFALO, Dec. 19, 3 p. m.—In the railroad accident near Angola, as far as can now be ascertained, about 45 were killed and 35 wounded.

FURTHER PARTICULARS.

The following additional particulars of this frightful railway accident were received by telegram from Buffalo this afternoon:

BUFFALO, Dec. 19.—By the railroad accident at Angola over fifty persons were wounded and forty killed, among whom twenty-three were burned to death. On the remains of one of the passengers in the burned car were found some cards bearing the name of Chas. E. Fink, C. E. One man who was removed from the burned car after his feet had been burned off, was taken to the hotel of Mr. Montgomery, where he died in a short time. He did not seem conscious, but frequently mentioned St. Catharines. Among the burned the body of Mr. Stephen Stewart, President of the Oil Creek Railroad, was recognized.

To the Editor of the Daily Intelligencer.

I happened to be one of those who were fortunate enough to attend the lecture of John Macoun, Esq., at Albert College on Monday evening last. I am entitled to say fortunate, when we take into consideration the abilities of the lecturer, his intimate acquaintance with his favorite subject, "Canadian Geology," and the interest which naturally attaches itself to whatever promotes a knowledge of our home and its subterranean resources. In treating his subject the lecturer spoke first of the Laurentian system; 2nd of the Silurian system; and 3rd of the Drift, or Diluvium. His description of the gold fields at Madoc, of the iron mines in the vicinity of Belleville, of the coal oil basin of Canada, of the gradual transition of vegetable cells to petroleum, of the action of ice in scouring and depositing continents, were all given in his own peculiar, yet clear and forcible style. Some of his "theoretical facts" savored, perhaps, a little of the wild. The agency of vegetables in producing the metals, his pre-Adamite history of creation, his basin of sea weed in the eddy of the Gulf Stream, his scooping out of our lakes by means of ice, the rising of the waters of the Bay of Quinte, showed a philosophy whose superstructure was not altogether rest on the firm basis of the common sense of mankind. I am sorry that so few of the citizens of Belleville were present; they have missed an intellectual treat, and they have lost an opportunity to enjoy. We would congratulate Mr. Macoun on his success as a lecturer, and would hope that this may be but the preface to a whole volume of similar attention.

L. SUTHERLAND.

Belleville, Dec. 18, 1867.

Telegraphic News.

BY ATLANTIC CABLE.

PARIS, Dec. 18.—The *Moniteur* publishes a circular by the Prefect of Police, placing the press under a more rigorous censorship.

DUBLIN, Dec. 18.—The examination of John Martin and others connected with the funeral demonstration on the 8th inst., was concluded yesterday; decision reserved. This morning the accused were brought before the magistrate, and Martin and Labor were committed for trial on a charge of misdemeanor; they immediately furnished the requisite bail, and were discharged from custody.

FLORENCE, Dec. 17.—Prime Minister Menabrea replied yesterday to the attacks made upon the government by the Liberal party in parliament. In the course of his speech he said that Italy would sooner or later possess Rome; but that end would be accomplished not by arms but by moral force. Baron Rattazzi followed in a speech in opposition to the Chief Minister, saying that the popular vote in Naples and other cities of Italy showed that the nation demanded different policy.

LONDON, Dec. 18.—Arms and ammunition secreted by Fenians have been discovered and seized by the police at several places in England.

ST. PETERSBURG, Dec. 18.—The *Invalide Russe* says that the policy agreed upon between France and Austria on the Eastern Question if persisted in will imperil the tranquility of Europe.

LONDON, Dec. 18.—A despatch from Mas sova says a report from the interior had reached the British expedition that King Theodore had set fire to and destroyed Debra Tabor.

LONDON, Dec. 18.—An attempt was made today to blow up one of the walls of the Mill Bank Jail, in which a number of Fenians are confined. The preparations were all completed and the fuse had been lighted by the conspirators without attracting attention, but owing to some defect in the arrangement of materials the powder did not explode, and the plot was discovered before an attempt to carry it out could be renewed. No arrests have been made, and no clue has been obtained to the guilty parties.

QUINCY, Dec. 19.—The steamer "Pennsylvania" has arrived.

NEW YORK, Dec. 19, 11:15 a. m.—Consols 92½; Bonds 7½; Ill. C. & E. 60.

LIVERPOOL, Dec. 19, 11:15 a. m.—Cotton quiet, quotations unchanged. Breadstuffs dull. Other articles unchanged.

LONDON, Dec. 19, 1:30 p. m.—Bonds 72½; Ill. C. & E. 49½; American securities quiet.

LIVERPOOL, Dec. 19, 1:30 p. m.—More doing in cotton; sales 10,000 bales.

American Despatches.

BINGHAMPTON, N. Y., 18.—The safe of the County Treasurer was broken open last night and robbed of \$5,000 county bonds and other securities.

HAYANA, Dec. 18.—Dates from the city of Mexico to the 11th have been received.

The National Congress was opened on the 8th inst. The hall was crowded with members and spectators. President Juarez delivered the opening speech. He thanked the United States for the friendly feeling shown and moral support given to Mexico, and justified the executions at Queretaro as necessary acts of justice. He returned into the hands of Congress the extraordinary powers he had assumed, before they had expired, and promised protection to foreigners. The President of the Congress replied, thanking the people of Mexico for their conduct during the war, declaring the United States their only ally, denying that prisoners of war had been ill treated, pronounced the recognition of the Republic by foreign Governments unnecessary, and concluded with a declaration that Mexico was fully able to defend herself.

Mexican papers propose Señor Romero as Minister of Foreign Affairs.

An envoy from Peru was on the road for Mexico to effect an alliance between the two countries.

The Cabinet remained unchanged.

Neither Minister Plumb nor any other diplomat now in Mexico was present at the opening of Congress.

The British gunboat "Jason" arrived at Vera Cruz on the 7th, with orders from the British Government to bring home Mr. Robert T. C. Middleton, first secretary, now in charge of the British legation, with the consuls and archives. All the English residents were in a high state of excitement over this announcement.

Advices state that Mr. Middleton will sail for England on the 28th inst.

The proceedings in Congress were as yet unimportant.

It was rumored that Gen. Quiroga had been murdered on the frontier by his pursuers. For some time the national authorities had kept a body of scouts hunting him, but owing to his knowledge of the mountains he had managed to elude capture.

Earthquakes continued at St. Thomas, though not violent.

At the billiard match at Boston, yesterday, Danielis the former won by a majority of 380. The match was for \$500 a side, 1,000 points up.

Yesterday, an American, ignorant of the heavy duty on silver, was prevented from landing at Prescott with a large quantity of silver he was openly carrying in a satchel. It is said he returned to Ogdenburg.

QUAKERS AT HOME.—The Friends present a model of interior home-life. They cultivate the amenities, the consideration, the cheer and the abundance which make a home happy. They speak to one and another with surprising gentleness; they smile upon one and another with a sweet benignity; they welcome the visitor to an abounding hospitality. Their religion consists in creating happiness in the household. They are gentle, loving and attentive to the children. They seek to promote "rising generation." They are equally attentive to old age, with a chastened respectfulness of manner, which exalts the self-respect of the declining years. Whatever can be done to make a home comfortable and cheery, is first to be done. Other Christians deny to themselves home comforts for the sake of preaching the Gospel to the heathen; but the Society of Friends believe that charity begins at home. Their Gospel is one of home and peace. Their heaven on earth is to win some foretaste of the rest which remains for the people of God. They exemplify what the Christian teacher ought to be: warm without heat, cheerful without excitement, bright without dazzle. Long live the Quaker homes!—*New York Commercial.*

The last Fenian guard is to the effect that the Fenians intended to seize Victoria when visiting the Consort's tomb, and ship her to Abyssinia, where she was to be married to King Theodore by force. What next?

Dissolution of Partnership.

THE PARTNERSHIP heretofore existing between Messrs WALLACE & FORDYCE as Photographers, in the Town of Belleville, is this day dissolved by mutual consent.

(Signed.) D. J. WALLACE, ED. FORDYCE.
Belleville, December 4th, 1867.

THE undersigned having purchased Mr. Fordyce's interest in the Gallery, will hereafter conduct the business on his own account. His long experience and thorough knowledge of the business will enable him to satisfy all who give him a call.

ROOMS—Over Graham and Grainger's Store.

ENTRANCE—Two doors South of Holden's Drug Store.

GEORGE D. WYCKOFF, A. L. MCLELLAN, JAS. CAMP RITCHIE, F. E. KILVERT, ASA A. BURNHAM, JR., E. O'REILLY, E. H. HALE, and HUGH FAIRGRIEVE, are the owners of the property herein mentioned, and are desirous of forming a Stock Company with the capital of \$25,000, and of receiving and take in payment for the said property \$1,250 in cash, and 2,250 shares of paid up stock of the said company. The said parties are now taking proceedings for its incorporation, under cap. 23, 27-28 Vic., and have much pleasure in calling the attention of the public to the following Prospects:

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives this company a peculiar advantage over many others, there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out, and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of levels to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to treat the mine from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.

Another great advantage in this property is, that immediately the work is commenced, ore can be taken out in quantities more than sufficient to pay the working expenses and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.
Geo. D. WYCKOFF, ASA A. BURNHAM, JR., F. E. KILVERT, A. L. MCLELLAN, JAS. CAMP RITCHIE, JAS. EDWIN O'REILLY, E. H. HALE.
PROV. PRESIDENT—Geo. D. WYCKOFF.
PROV. SECY & TREAS.—F. E. KILVERT.
SOLICITORS—THOMSON & KILVERT.
Stock Book opened at J. W. Mutton's Exchange Office, Hamilton. Application for Stock and other communications may be addressed to any of the Directors or to JAMES C. RITCHIE, Prov. Sec. & Treas., Hamilton.
December 24, 1867. D183-1f

THIS COMPANY is formed, and proceedings taken for its incorporation, under Chapter 23, 27, and 28 Vic., for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 5th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 45 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$33.80 in gold, which specimen can be seen at J. E. Ellis' on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore.

The projectors have determined only to sell sufficient stock to repay the advances, and to carry on the work satisfactorily. They have thereupon decided to sell only 823 shares of the value of \$30 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1868. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings.
RICHARD SPARLING, Managing Director and Superintendent.
T. S. MCGLASHAN, of Madoc.
MAHLON BURWELL MCGREGOR, of Madoc.
T. A. MITCHELL, of Madoc.
ALDERMAN VICKERS, of Toronto.
J. E. ELLIS, of Toronto.

MCLELLAN & MCLELLAN, Solicitors. A. F. WOOD, President.
BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

Applications for Shares received by Alderman Vickery, Yonge Street, Toronto; J. E. Ellis, King Street, Toronto, and at the office of

WILLIAM KERSTEMAN, 62 Church Street, Toronto. 173-1f

American Watches.

THE true value of Machinery applied

Watchmaking is not that it is used

Watches are made rapidly, but that they are

made correctly. Very few people know why

a Waltham Watch should be superior to

any other. In the first place, the

Watch is regarded as only a machine, to

be constructed, like any other machine, on

mechanical principles. The factory is, indeed,

little else than a machine shop, the principal

work in which is not more upon watches than

upon machinery to make watches with. If

the watches are good, it is because the

machinery is good. Of course, there must be

no defect in the principle of plan or the

movement, no mistake in the sizes or shapes

of the pieces of which it is composed, nothing

wanting in their properties, and no error in

their positions. These points once thoroughly

settled in regard to each part of every variety

of watch, it rests wholly with the machinery

constructed with infinite diversity of form and

function, expressly for the purpose, to produce

the finished piece. The method established in

every department is the reduplication of

parts by mechanical means, and this is carried

out on the system of the most thorough

subdivision.

By means of multiplying gauges and

microscopes, tests and inspection for the

detection of wear in cutting tools, and for

faults and flaws in steel or stone, are made to

accompany the work in every stage from

beginning to end. As a necessary result, the

Watch goes together a finished machine.

Every part is found to fit properly in its

place. Every pin may be pushed till it

pinches, and every screw turned home.—

Instead of sluggish and feeble action, the

balance, even under the pressure of the

lightest mainspring, vibrates with a wide

and free motion, and the beat has the clear

ringing sound always characteristic of the

Waltham Watch. The machine is a time

keeper from the start.

This system of watchmaking is unknown

in foreign countries, and is entirely original

with the Waltham Company. The Company

claim that by it they produce Watches that

cannot be equalled for every quality which

makes a watch valuable. Simple in plan,

and correct in principle, the movement is not

only beautifully finished, substantial, accurate

and cheap, but is uniform to the minutest

details, not easily damaged, easily repaired,

and when repaired always as good as new.

There are different grades of finish in the

different varieties of Watches made by the

Waltham Company, as there are different

sizes and shapes to suit all tastes and means,

every Watch that bears the genuine

trade mark of "WALTHAM" is guaranteed

to be a good one, and nobody need be afraid

to buy it.

EVERY WATCH FULLY WARRANTED.

For sale by all first-class dealers in the

United States and British Provinces.

ROBERTS & APPELTON,

QUEEN
INSURANCE COMPANY
CAPITAL, - - - \$10,000,000
FIRE AND LIFE.

LIFE DEPARTMENT.
THE principles on which this Company is
founded contain all the elements required
to develop the benefits of Life Assurance, and
afford every facility to intending assureds.—
One of the advantages secured by those who
insure their lives with this Company is that
the outside expenditure for Management is
absolutely restricted by the Dead of Settlement
Income. This most important restriction
shows that the interests of participating policy
holders are closely watched and carefully at-
tended to by the Company. Attention is es-
pecially called to this point, as the proportion
of premiums expended for Management
Must Largely Influence Profits
and Bonuses.

The next division of profits takes place in
1868, and all those who wish to participate in
the profits should insure at once.

AND all other kinds of JOB PRINTING, ex-
ecuted with neatness and dispatch at the
INTELLIGENCER'S Office, Front Street, Belleville.

The Ocean Bottom.

Mr. Green, the famous diver, tells singu-
lar stories of his adventures, while making
search in the deep waters of the ocean—
He gives some new sketches of what he
saw at the "Silver Bank" near Hayti:

The bank is a coral on which my divers
were made are about thirty miles in length,
and from ten to twenty miles in breadth. On
this bank of coral is presented to the diver
the eye ever beheld before.

The water varies
from ten to one hundred feet in depth, and
so clear that the diver can see from two to
three hundred feet when submerged, with
but little obstruction to the sight.

The bottom of the ocean in many places,
is as smooth as a marble floor; in others it
is studded with coral columns, from ten to
one hundred feet in height, and from one
to eight feet in diameter. The tops of these
more lofty support a myriad of
pyramidal pendants, each forming a myriad
of more, giving reality to the imaginary abode
of some water-nymph. In the symmetrical
pendants form arch after arch, and as the
diver stands on the bottom of the ocean,
and gazes through the pale light of the
avenues, he finds that they fill him with a
sacred awe as if he were in some old
cathedral which had long been buried
beneath old ocean's wave. Here and there
the coral stands even to the surface of the
water, as if the former columns were towers
belonging to those stately temples that are
now in ruins.

There were countless varieties of diminutive
trees, shrubs, and plants in every
crevice of the corals, where water had
deposited the earth. They were all of a
faint hue, owing to the pale light they
received, although of every shade, and
entirely different from plants that I am
familiar with that vegetate upon dry land.

One in particular attracted my attention;
it resembled a sea-fan of immense size, of
variegated colors, and the most brilliant
hue. The fish which inhabit these "Silver
Banks" I found as different in kind as the
scenery was varied. They were all forms,
colors, and sizes—from the symmetrical
goby to the globe-like sun-fish, from the
dullest hue to the changeable dolphin; from
the spots of the leopard to the hues
of the sunbeam; from the harmless minnow
to the voracious shark.

Some had heads like squirrels, others
like cats and dogs; some of small size
resembled the bull terrier. Some darted
through the water like meteors, while
others could scarcely be seen to move.

To enumerate and explain all the
various kinds of fish I beheld while diving
on these banks would, were I contented
with a naturalist so to do, require more than
my lifetime allow, for I am convinced that most
of the kinds of fish which inhabit the
tropical seas can be found there. The
sun-fish, star-fish, and all black and blue
or shovel-nose shark, were often seen.

There were also fish which resembled
plants, and remained as fixed in their position
as a shrub; the only power they
possessed was to open and shut their mouths
when in danger. Some of them resembled
the rose when in full bloom, and were of
all hues. There were the ribbon fish, from
four to five inches to three feet in length;
their eyes are very large, and protrude like
those of a frog.

Another fish is spotted like a leopard, from
three to ten feet in length. They build
their houses like beavers, in which they
spawn, and the male or female watches the
eggs until it hatches. I saw many speci-
mens of the green turtle, some five feet long,
which I should think would weigh from
400 to 500 pounds.

Financial Position of Belleville.

A great many tax-payers are inclined to
grumble about the high taxes, and the bad
financial management of the town generally.
The only way to satisfy this feeling is to com-
pare ourselves with other towns in the im-
perial Province, and see whether we are
worse or better off than they. In the mu-
nicipal returns of 1866, published by the
Government, which we noticed last week,
we find the information necessary to make
this comparison. The following tabular
statement, which we have collected and
prepared, speaks for itself:

Town.	No. of In- habitants.	Rate per £100 of Val- ue.	Total Val- ue.	Total Rate.
St. Catharines	15,010	0.136	\$71,040	\$9,600
Galt	10,000	0.133	50,000	6,650
Goderich	3,867	0.078	112,031	8,740
Brantford	12,000	0.050	608,914	47,946
Port Hope	957	0.050	1,874,999	418,750
Peterborough	10,000	0.094	187,269	15,400
Georgetown	11,189	0.150	289,135	43,370
Brookville	1,350	0.086	109,600	9,426
Belleville	12,543	0.078	58,323	5,897

Here are nine of the principal Towns in
Canada, and the figures show that Belle-
ville is not only the least taxed town, but
that the rate levied on the £100 on the as-
sessed value of all the real and personal prop-
erty, is lower than any other Town,
except Goderich, which is the same, and
Brantford, which is a few places, it is ev-
ident that the rate would be much higher if
any provision were made for the reduction

of the debt and interest, which evidently are not provided for in these estimates.

The figures in the column of assets so far as the Town of Brantford, Port Hope, Peterborough and Belleville are concerned, consist chiefly of Railway Stock which is comparatively worthless in the market, and would be of little or no avail for conversion into cash. The assessed value of all real and personal property in Port Hope is put down at \$1,069,290, so that the debt is nearly double of all the property owned in the Town. If the debt of each of the above places be divided by the number of rate-payers, in order to show what amount each one would have to pay, in order to liquidate it, the following will be the result in round numbers:

St. Catharines, \$248 per capita; Galt, \$83; Goderich, \$130; Brantford, \$470; Port Hope, \$1,958; Peterborough, \$181; Cobourg, \$201; Brockville, \$205; Belleville, \$84. These figures are a conclusive answer to those grumblers who assert that the finances of the Town are going to the dogs. In addition it may be mentioned that the debt of the Town is reduced by the payment of the present year, by \$6,000, and that there is over \$20,000 of non-resident land tax over-due, a large portion of which is collectable, and will go to the further reduction of the indebtedness. It is, therefore plain that the finances of Belleville are in a sounder condition than any other town in Ontario.—*Chronicle*.

Montreal Times.

Daily Intelligencer.

BELEVILLE, FRIDAY, DEC. 20.

TAKING IT EASY.—The editor of the Alabama Argus shows himself fully under circumstances that other people might consider serious. He says: "We see that the Sheriff, during our absence, has advertised the Argus for sale. We hope the bidders will have a merry time of it. If the sheriff can sell it, he can do more than we could. Like a damp perspiration cap, we think it will fall to go off."

GODEY'S LADY'S BOOK for January is a rich number. The embellishments consist of the following: New Shoes, a fine steel engraving, steel plate title-page, containing three pictures of winter amusements—skating, sledding and snowballing. A Colored Fashion-plate, containing six figures. Winter Sports, a tinted picture. The Music, Receipt, Cottage, and Horticultural departments are still retained in the Book. The Literary department of the number is fully up to preceding numbers, and altogether it is one of the best Ladies Magazines in the world. Published by L. A. Godey, Philadelphia, at \$3 a year.

St. John's Day.—It will be observed by an advertisement that the Masonic fraternity of Belleville purpose having a grand celebration on St. John's Day, the 27th Dec. After the installation, the Brethren will proceed to the Episcopal Methodist Church, where a sermon will be preached by the Rev. Bro. Wild. In the evening there is to be a promenade concert, the proceeds to be devoted to public charities. From the arrangements that are being made we have no doubt it will be one of the best and most successful festivals ever held in Belleville. The object had in view should secure a large attendance.

THE EARTHQUAKE AT MONTREAL.—Dr. Smallwood writes to the Montreal Gazette as follows: "I had just retired (3 o'clock A. M., Dec. 18th) to bed from a professional case, and was perfectly awake, when I heard a low rumbling sound proceeding from the west, which I at once recognized as an earthquake. This was followed by a distinct and somewhat strong tremulous motion, which was succeeded in ten or twelve seconds by a second and fainter tremor than the first. Then followed the sound, which passed eastward, the whole lasting, I should say, nearly three minutes. At Point St. Charles the stores in the upper stories of some of the brick houses distinctly shook, and in Grey Nun Street some of the residents rose from their beds and left their houses in great terror. At St. Laurent, about six miles from the city, the shock and earth sound were distinct and strong. We learn that at Lachine it was not felt. I may mention that at St. Laurent the direction of the earth wave was distinctly heard to pass from west to east."

—The earthquake was felt generally throughout New York State.

—The brother of the Tycoon of Japan is about to visit England. He is about sixteen years of age, occupies a rank approaching to that of royalty, and the formal attending his reception will be of a suitable character.

—The New York Express calls attention to the fact that the ship builders of the States are quite unable to compete with the Canadian ship builders, and that a vessel which would not cost less than \$50 per ton in the States, can be built in Canada for \$50 per ton.

The House Yesterday.

In the Commons yesterday the question of whether Parliament should adjourn or be prorogued was discussed with closed doors. The Government resisted the proposition to prorogue, and the sum of \$6 a day will therefore be the allowance for members. The Intercolonial Railway Bill was read a third time and passed.—The Supply Bill and the Bill to impose duties on promissory notes and bills of exchange, were read a third time and passed. The foreign aggression act was also read a second and third time and passed. A Bank Bill to enable Banks in one province to carry on business as corporate institutions in any part of the Dominion, was read a second time and ordered to a third reading to-day. Sir John A. Macdonald expressed the opinion that all business would be finished so that members could leave on the 10 o'clock train on Saturday.

The Postal Bill.

Several amendments were made to the Postal Bill in the Senate, and as it is now brought before the House, it will likely be adopted without material amendment. The proposed rate and condition of postage for the Dominion under the new law, which comes into operation on the first of April, 1868, will be as follows:

On each letter, when paid at the time of posting, a rate of three cents per half ounce or fractional part thereof; and when not prepaid, a rate of five cents.

On each letter posted and delivered at the same Post Office, one cent.

On each letter delivered by a letter carrier, a rate not exceeding two cents in addition to the proper rate of postage.

On each "local" or "drop letter" delivered by a letter carrier in cities or towns where there is a free delivery, a rate of one cent in addition to the proper rate of postage.

On each Dead Letter, when returned to the writer, the rate of five cents in addition to the payment of the proper rate of postage.

On letters called Ship Letters, brought from beyond sea in vessels not being Post Office Packets, a rate not exceeding five cents for each such letter, and that such rate be payable by the receiver in addition to the proper rate of postage according to preceding rates.

On Newspapers printed and published in Canada, and sent to Regular Subscribers in Canada by mail as follows:

Upon each such newspaper, when issued once a week, the rate for each quarter of a year, commencing on the first of January, first of April, first of July, or first of Oct. of each year, shall be five cents; when issued twice a week, ten cents; when issued three times a week, fifteen cents; when issued six times a week, twenty cents. And in that proportion, adding one rate of five cents for each issue more frequent than once a week; and that such rate be prepaid in advance from the first day of the quarter from which the payment commences, for a term of not less than a quarter of a year, at either the office of mailing or delivery.

On each newspaper other than those specified in the preceding Resolution, and Exchange papers sent by post in Canada, a rate of two cents.

On periodical publications other than newspapers, a rate of one cent per four ounces, or of half a cent per number when weighing less than one ounce and posted singly.

On books, pamphlets, occasional publications, printed circulars, prices current, hand bills, book manuscripts, printed proof sheets, whether corrected or not, maps, prints, drawings, engravings, photographs, when not on glass or in cases containing glass, sheet music whether printed or written, packages of seeds, cuttings, bulbous roots, scions or grafts, patterns or samples of merchandise or goods, a rate of one cent per ounce.

On all letters, newspapers and other mailable matter passing by mail between any place in Canada and the United Kingdom, any British possession, the United States or any other Foreign Country, such charges and rates of postage on being posted in Canada, or on delivery therein, as may be agreed upon under any arrangement made by the Postmaster General for the transmission, despatch, receipt and delivery of the same, and contained in any Regulation made by the Postmaster Gen. in pursuance of such arrangement.

On and for the registration of Letters or other mailable matter passing by mail between places in Canada, a rate not exceeding six cents for each Letter or article of mailable matter, in addition to the proper rate of postage according to preceding rates.

On closed parcels, letters and letters not containing letters, and sent by parcel post, such rates for conveyances as the Postmaster General shall from time to time make.

On all mailable matter not being letters, newspapers or other things before mentioned, such rate of postage as the Postmaster General shall from time to time, by Regulation, approved by the Governor General in Council, establish and declare.

The Lake Railway Catastrophe.

FULL PARTICULARS.

The following particulars of the appalling Railway accident near Buffalo are taken from the Buffalo Courier. The accident is one of the most frightful in the long list of railroad disasters in the United States. The Courier says:

"The train to which the accident happened was the Lake Shore Road New York Express, from Cleveland, and was due in thirty at 1:30 p.m., but was two hours late, having been detained by a broken bridge on the Cleveland and Toledo Road. It was composed of three first-class carriages filled with passengers, a smoking car and two baggage cars, and was under the conductorship of Mr. Frank Sherman of this city. Silver Creek was the last station stopped at prior to the accident, and Angola was passed about three o'clock, the train going at the speed of about 30 miles an hour. From Angola to the bridge over the Big Sister Creek, however, the road is a down grade, and it is possible that the train was going at a greater rate than that mentioned above, as a casualty occurred. Be that as it may, everything was apparently all right when the bridge was reached, but when the train had crossed half way over, a fearful jerk was experienced by those on board, and the next moment the rear coach was detached and went plunging off the bridge and down the abyss to the ice, a distance of some thirty or forty feet. The brakes were at once applied, but before they could stop the coupling of the second coach had become broken, and it, too, got off the track and rolled down the embankment some twenty feet, landing on its side at the bottom. So suddenly had all this happened that not one of the inmates of either of the two coaches, had time to make his escape, and without a moment's warning some forty or fifty persons were hurled into the presence of their Maker.

"The scene which was presented to the eyes of the inmates of the rear coach when the train was stopped, which was done immediately, was a fearful one, and one which no tongue or pen can describe. The car which first went over the precipice took fire instantly, and before any person could get to it, the flames had taken complete way, and in a few moments it was all ablaze. Those persons on the spot proceeded to render all the assistance they could, but horrible to relate, only some four or five persons, so far as we could learn, were saved from the burning car, and the remainder, between forty and fifty human beings—men women and children—were consumed with the car.

"While a portion of the passengers who had escaped injury gave their attention to the burning car, the balance attended to the other, which had also taken fire. Fortunately the flames in the latter instance were extinguished before they had made much headway, and as speedily as possible the injured, dead and dying were taken from the burning coach, were conveyed to residences near by hand, Justice Southwick and Mr. Frank Griffith, who lived close at hand, with their families, were speedily on the spot, and did excellent service in assisting the unfortunate passengers. Some twenty of the persons who entered the store, and while selecting some diamonds, threw snuff into the eyes of the clerk and escaped with a tray containing ten thousand dollars worth of diamonds. He was captured, but fifteen or twenty valuable diamonds were lost in the street.

When the news arrived at Buffalo, there was, of course, very great excitement; but as soon as it was ascertained that the train was not on fire, and that the injured persons were on their way to the hospital, the excitement subsided. Several physicians were on it, and the scene when the train arrived is thus described by the Courier:

"It was about dark, and objects at a short distance were anything but distinct. The front car was a mass of ruins, but the odor of burning human flesh permeated the atmosphere, and gave convincing evidence that the catastrophe was a heart-rending and awful one. The second car which met with disaster was lying a perfect wreck, but all its late inmates had been removed, and everything that medical skill and kindness could suggest was being done for them. How many perished in the burning car it is impossible as yet to say, and it is very probable will not be known for some time.

"The place where the first car struck after being precipitated off the bridge was difficult of access, and after reaching the half dozen or so of persons before the flames had made much headway, no attempt was made last night to disturb the remains of those who perished in the burning car. That, however, will be attended to this morning.

"Soon after arriving at the scene of the accident, our reporter visited Judge Southwick's house, which presented the appearance of an army hospital.

The house was filled with objects of pity, in the shape of injured passengers. In one corner could be seen a woman, insensible, her face bruised and discolored with blood, and in another a man who had, a few hours previously, started from home, and was sure, from what we saw, that the injured ones were kindly and tenderly cared for.

"At this house were found eleven persons injured in various ways, but chiefly in a serious manner. At the house of a Mr. Griffith, were ten others, and at various houses in the neighborhood, some eight or ten more.

"Between seven and eight o'clock the dead were conveyed to the freight house at Angola, where they were laid out in thirteen bodies had been brought in and laid upon the floor."

"Shortly after eight o'clock the balance of the ill-fated train was joined to the

train due at Buffalo at 5:20 p. m., and started for its destination. On board it were twelve persons who were on the second car that went over the embankment and who were brought to Buffalo, all slightly injured. Only a few of those seriously injured arrived in Buffalo on Wednesday evening, they being, we presume, generally unable to travel."

As to the cause of the accident the Courier says:

"Examination of the track shows that the disaster could not have been occasioned from it, and it must be referred to a defective wheel or axle. The real cause will probably never be ascertained. It was one of those sad events which the most careful foresight cannot guard against."

Telegraphic News.

BY ATLANTIC CABLE.

LONDON, Dec. 19, noon.—The Right Hon. W. E. Gladstone made a speech to the miners and operatives of Wernth, in Chester County, yesterday, in the course of which he reviewed the Fenian question. He did not hesitate to ascribe the existence of Fenianism to England's wretched mismanagement and misgovernment of Ireland.

FLORENCE, Dec. 19.—The Government has issued orders calling into active service additional military reserves.

LONDON, Dec. 19.—The report of the revival of negotiations between Prussia and Denmark in regard to Schleswig is doubted, but it is now said that active negotiations will be resumed in January.

It is reported that a paper has been found in Wolverhampton, which shows that Fenians in England had organized a plot to plunder all the armories of the Militia Forces in England.

One of the persons who was injured at the recent explosion at Clerkenwell, died to-day.

The explosion of nitro-glycerine at Newcastle-on-Tyne, was more serious than at first reported. The Sheriff and Town Surveyor, who were badly injured, have since died of their wounds. Eight persons, all told, lost their lives by the explosion.

Mr. Campbell, the broker who recently failed and was arrested on a charge of fraud, was acquitted to-day.

LONDON, Dec. 20, 11:15 a. m.—Consols 92½; Bonds 72; Ill G 89½; Erie 49½.

LONDON, Dec. 20, 1:30 p. m.—Consols 92½; Ill G 89½; Erie 49½.

PARIS, Dec. 20.—The bullion in the Bank of France has increased 5,700,000 francs since last report.

LIVERPOOL, Dec. 20, 11:15 a. m.—Cotton quiet and unchanged; stock in port 400,000 bales, of which \$2,000 are American. Breadstuffs quiet.

LIVERPOOL, Dec. 20, 1:30 p. m.—Corn 46s; Tallow 44s 3d.

GLASGOW, Dec. 20.—The steamer "Europa," from New York, has arrived.

American Despatches.

CINCINNATI, Dec. 19.—An attempt to rob Dabbs & Co., jewellers, was made last night by a man, who entered the store, and while selecting some diamonds, threw snuff into the eyes of the clerk and escaped with a tray containing ten thousand dollars worth of diamonds. He was captured, but fifteen or twenty valuable diamonds were lost in the street.

CHICAGO, Dec. 19.—A locomotive exploded in the Kyle Park depot this morning. Only four persons were injured, none seriously. The entire loss not over \$5,000.

INDIANAPOLIS, Dec. 19.—McWhiney's Pork House, at Florence Station, Ind., was burned last night. Loss \$40,000.

SAN FRANCISCO, Dec. 19.—The steamship "Constitution" sailed to-day for Panama. She carried 1,038,000, of which \$930,000 were for New York.

NEW YORK, Dec. 20.—The Herald's Havana special says President Cabral is reported to be marching against Hayti at the head of a Dominican army. It was rumored he had captured and shot Gen. Suz. Advice is received from Jamaica to the 12th, and from Hayti to the 10th. Report confirms the horrible murder of Gen. Monte, in his dungeon at Cape Haytien. Though he had gone without food for days, the poison that was administered to him proved ineffectual. Salvane finally ordered Dehornne to smother him, but in this he could not succeed. Having failed in all other plans, he stabbed him in the skull with a chisel. This was done so roughly that Monte suffered the most atrocious torture. Drink was supplied freely to the people, who kept shouting that the President of the Cacao was dead. Salvane has been successful this far in putting down the revolution at the Cape. The brother of Gen. Monte had been captured and chained down to the bloody bed of the late murdered prisoner. The parents and friends of these men who are Dominicans are reported to have been driven to desperation by the fate of these men.

Later advices from Mexico state that a band of Asibues had forcibly deposed Gen. Eyagua governor of Yucatan.

There reigned at the capital great excitement over the total withdrawal of the British Legation and Consuls, and friends of these men were freely commented on by the press. According to instructions, the British Consul is to leave British subjects under the protection of Mexico herself. It was expected that all the European Legations would follow the example of Great Britain and leave the United States sole occupants of the diplomatic field in Mexico.

Rich mines had been discovered in the State of Vera Cruz and in Sonora.

An attempt was made to assassinate General Leterrerie, the late Minister, Governor of Vera Cruz, when leaving the theatre at Jalapa. The ringleader of this abortive scheme was Colonel Urrutia, an ex-Imperial officer.

Nearly all political prisoners have been released.

NEW YORK, Dec. 20.—Frances Farrington, alias Hattie Howard, committed suicide last evening.

A party of burglars entered the residence of Henry Rogers, in Williamsburg, on Wednesday last, and stole \$15,000 in bonds, stocks and promissory notes.

Crispino Cadena, a Cuban negro, who murdered his wife in St. Louis, was yesterday sentenced to imprisonment for life.

A portion of the paraffin oil works on Penman Creek, near Hudson, N. J., was destroyed by a fire yesterday occasioned by the explosion of a tank. Loss \$25,000.

A Washington special says: Colonel Parker explains his absence from his own wedding by saying he met one of his friends of Indiana, went to a room in a hotel, took a glass of wine with him and fell asleep. When he awoke the Indian was by his side and said he had been very sick and gave him some medicine a physician had left for him. He took the medicine and fell asleep again. When he awoke again the Indian was gone, and it was too late for the wedding. It is supposed the Six Nations Indians, of which Col. Parker is Chief, is opposed to his marriage with a white girl. Gen. Grant will investigate the matter.

—The gold production of Nova Scotia for the quarter ending Sep. 30, was 7,583 ozs., and for the year ending the same date 27,563 ozs., against 24,163 for the previous twelve months, the maximum yield per ton was twenty-six ounces, and the average under the same. The number of mines is about 70, men 762, quartz mills 94.

MARRIED.

At the residence of the bride's father, Thurlow, on Saturday, the 14th inst., Mr. John Walker, John Reider, Esq., to Miss Aveline Carver.

On the 12th inst., at the residence of the bride's father, by Mr. C. Parker, Esq., Mr. Edward William to Miss Ann Jewell, only daughter of Mr. Thomas Cline, of Colong.

SPECIAL NOTICES.**R. R. R. PILLS.**

Composed of vegetable extracts (prepared in vacuo),
they purify the blood, regulate the liver, and purge all
corrupt and serficious humors from the system.
One of Dr. Radway's Pills contains more of the active
principles of cure, and will act quicker on the Liver,
Bowel, Stomach, Kidney, Bladder, Blood, &c., than
four or six of the ordinary common Purgative or Cathar-
tic Pills sold under various names, or than ten grains
of Blue Mass.
True comfort for the aged and others afflicted with
Constipation and Paralysis of the Bowels.
One to Three of Radway's Pills—once in 24 hours,
will secure regular evacuations from the bowels. Per-
sons who for 30 years have not enjoyed a natural stool,
and have been compelled to use opium, have been
cured by a few doses of Radway's Pills.
DR. RADWAY'S PILLS CURE ALL DISEASES
of the Stomach, Liver, Bowels, Kidney, Bladder, Nerv-
ous Diseases, Headache, Constipation, Colic, Indigestion,
Dyspepsia, Biliousness, Bile Fever, In-
flammation of the Bowels, Piles, and all derangements
of the Internal Viscera. One to six boxes warranted to
afford a positive Cure. Purely vegetable, contains no
mercury, minerals, or deleterious drugs.
Dr. Radway's Pills sold by all Druggists and Country
Merchants. Price 25 cents.
See Dr. Radway's Almanac for 1868. 64-2w

Dr. P. Meredith, Dentist, office No. 122 West Sixth
Street, states as follows:—
CINCINNATI, October 1, 1868.
Messrs. J. N. Harris & Co.—Gentle—About one year
ago I took a cold which settled in my lungs. A violent
cough was the consequence, which increased with sever-
ity. I expectorated large quantities of Phlegm and mat-
ter. During the last winter I became so much reduced
that I was confined to my bed. The disease was attend-
ed with cold chills and night sweats. A diarrhea set in.
My friends thought I was in the last stages of Consump-
tion, and could not prevent my death. I was recom-
mended to try
ALLEN'S BALSAM.
The formula was shown to me, which induced me to
give it a trial, and I will only add that my cough is en-
tirely cured, and I am now able to attend to my business
as usual. Yours respectfully,
P. MEREDITH.
Sold by all Family Medicine Dealers.

GENTLEMEN,—Feeling that during the
time I have had the honor of represent-
ing you in the Council I have faithfully dis-
charged my duty as a Councillor, I beg leave
to announce that at the ensuing election I
shall offer myself for re-election.
Before the election I shall consider it my
duty to give to you an account of my past
term of office, to explain to you the position
of the Town affairs, and also to explain the
cause of the determination of certain Coun-
cillors and other individuals to leave me out
of the Council.
I am,
Your old servant,
THOMAS HOLDEN.

Disgraceful Scene in a Church.

On Sunday, November 4th, All Saints Church, Lambeth, London, was the scene of a great uproar. After the procession of clergy and chorists entered the church, a large number of those present hissed and booed them, and during the lesson, the day the same noise accompanied the groans, took place, but when the man appeared with a long taper to light the candles of the altar, the uproar became general, and there were cries of "no popery in our English churches." Mr. Machonochie commenced his sermon in the midst of a storm of hisses, and evidently with great nervousness, occupying only six minutes in the delivery. When the Eucharistic service commenced the riot became general, and three cheers were proposed and responded to by a portion of the audience. A rush was then made to the altar, and one of the crosses was broken and kicked about the aisle. The beautiful font within the communion rails was thrown down and broken, the water running down the steps. A general fight then ensued with some who desired to protect the church from injury. Soon after the people retired shouting, "Down with ritualism!" "Shame, shame!" "God curse!" "Traitors!" &c., &c.

Hays City, Kansas, has not a house within its limits that is four months old, but it has 4,000 inhabitants and a newspaper.

At Calcutta the cyclone lasted nearly eight hours. It is estimated that it has done more damage to the city than the great cyclone of October, 1864. In the city suburbs more than 1,000 lives have been ascertained to have been lost, and 30,000 native huts destroyed.

Shortly before his execution, Saxe Allen stated that he once robbed an emigrant at Port Huron of sixty-three sovereigns, and buried them in a bush near that town, with the intention of returning for them. He described the spot and drew a map of it, but though the place has been searched the money has not been found.

When Physicians and other Men of equally high standing recommend Allen's Lung Balsam, for the cure of Coughs, Colds, and all Diseases of the Lungs that tend to Consumption, why should the afflicted delay in using it?

PROSPECTUS OF THE ROSE MINING COMPANY OF MADOC.

Capital Stock, - - - \$25,000.
Divided into - - - 5,000 Shares.
5,000 Shares - - - \$5.00 Each.

Deposit on Subscription Twenty-five per cent.

ROSE MINING COMPANY, A. L. McLELLAN, JAS. C. RITCHIE, F. E. KILVERT, ASA A. BURNHAM, J. P. O'BRIEN, E. H. HALE, and HUGH FAIRBRIER, are the owners of the property hereinbefore mentioned, and are desirous of forming a Stock Company, with the capital of \$25,000, and are to receive and take in payment for the said property \$12,500 in cash, and 2,500 shares of paid up Stock of the said company. The said parties are now taking proceedings for the incorporation, under cap. 23, 27-28 Vic. and have much pleasure in calling the attention of the public to the following Prospects: This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives the company peculiar advantages over many others, there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out, and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of back to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.

Another great advantage in this property is, that immediately the work is commenced one can be taken out in quantities more than sufficient to pay the working expenses and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.
Geo. D. Wyckoff, ASA A. BURNHAM, Jr., F. E. KILVERT, A. L. McLELLAN, JAS. C. RITCHIE, EDWIN O'BRIEN, E. H. HALE.
PROV. SECY & TREAS.—Geo. D. Wyckoff.
SOLICITORS.—THOMSON & JAS. C. RITCHIE.
Stock Book opened at J. W. Morton's Exchange Office, Hamilton. Application for Stock and other Communications may be addressed to any of the Directors or to JAMES C. RITCHIE, Prov. Sec. & Treas., Hamilton, December 3d, 1897. D153-4f

PROSPECTUS OF THE EL DORADO MINING COMPANY OF MADOC. (LIMITED).

CAPITAL STOCK \$72,000.
Divided into 2,400 Shares of \$30 Each.
Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its incorporation, under Chapter 23, 27, and 28 Vic. for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 5th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 46 feet deep, and the other 33 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$53.80 in Gold, which specimen can be seen at J. E. Ellis, on King Street.

There is no question whatever that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore.

The projectors have determined to sell sufficient stock to repay the advances, and to carry on the work satisfactorily. They have thereupon decided to sell only 232 shares of the value of \$30 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1898. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings.
RICHARD SPAHRING, Managing Director and Superintendent.
T. S. McLELLAN, of Madoc.
MAHLON BURWELL, MCGREGOR, of Madoc.
T. A. MITCHELL, of Madoc.
ALDERMAN VICKERS, of Toronto.
J. E. ELLIS, of Toronto.

McCLELLAN & McCLELLAN, Solicitors. A. F. WOOD, President.
BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

Applications for Shares received by Alderman Vickers, Yonge Street, Toronto; J. E. Ellis, King Street, Toronto, and at the office of

American Watches.

THE true value of Machinery applied to Watchmaking is not that by its use Watches are made rapidly, but that they are made correctly. Very few people know why a Waltham Watch should be superior to any other. In the first place, at Waltham the Watch is regarded as only a machine, to be constructed like any other machine, on mechanical principles. The factory is, indeed, little else than a machine shop, the principal work in which is not more upon watches than upon machinery to make watches with. If the watches are good, it is because the machinery is good. Of course, there must be no defect in the principle of plan or the movement, no mistake in the size or shape of the pieces of which it is composed, nothing wanting in their properties, and no error in their positions. These points once thoroughly settled in regard to each part of every variety of watch, it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished pieces. The method established in every department is the duplication of parts by mechanical means, and this is carried out on the system of the most thorough subdivision.

By means of multiplying gauges and microscopes, tests and inspection for the detection of wear in cutting tools, and for faults and flaws in steel or stone, are made to accompany the work in every stage from beginning to end. As a necessary result, the Watch goes together a finished machine. Every part is found to fit properly in its place. Every pin may be pushed in and will fit snugly, and every screw will turn home. Instead of sluggish and feeble action, the balance, even under the pressure of the lightest misadventure, vibrates with a wide and free motion, and the beat has the clear ringing sound always characteristic of the Waltham Watch. The machine is a time keeper from the start.

This system of watchmaking is known in foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce Watches that cannot be equalled for every quality which makes a watch valuable. Simple in plan, and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform to the minutest details, not easily damaged, easily repaired, and when repaired always as good as new. There are different grades of finish in the different varieties of Watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and means; every variety of Watch is made, and the trade mark of "WALTHAM" is guaranteed to be a good one, and nobody need be afraid to buy it.

EVERY WATCH FULLY WARRANTED.

For sale by all first-class dealers in the United States and British Provinces.

The Daily Intelligencer

WILL appear about five o'clock every afternoon (Sundays excepted) and will be furnished by Carriers at the rate of \$5 a year if paid in advance, \$6 otherwise. Mail subscribers \$5 a year. \$2 50 for 6 months. \$1 50 for 3 months.

It will contain the latest telegraphic news up to the hour of going to press, including Cable despatches and the New York and Montreal Markets.

Arrangements have been made with RELIABLE CORRESPONDENTS in Madoc, Bridgewater, Wilmot and other points, who will furnish us with early and full information respecting the Gold Regions, and of matters of general interest.

Special attention will be paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c., &c., and in short, neither pains nor expense will be spared to make the DAILY INTELLIGENCER worthy of public patronage.

RATES OF ADVERTISING.

A liberal scale of prices for advertisements has been arranged as follows:

Copies not exceeding six lines, 6 months..... \$2.00
Half Square, 6 months..... \$3.00
One Square, 6 months..... \$3.00
Two Squares, 6 months..... \$4.00
Four Squares, 6 months..... \$5.00
Notices of Births..... 50
Do of Marriages..... 50
Do of Deaths..... 50

"BUSINESS NOTICES" are inserted under this heading, loaded or sold, 10 cents per line, measured by a scale of six lines.

Advertisers contracting for any space not less than half a column can have the privilege of changing their advertisements every two weeks.

Transient advertisements inserted at 7 cents per line for first insertion, and 2 cents for each additional insertion.

The Weekly Intelligencer

Is published every Friday Morning at \$3 per annum if called for at the Office, or sent by mail, and \$3.50 if delivered by the Carrier, payable in all cases in advance. (When not paid until the close of the year, 50 cents will be added to each year's subscription.) No paper discontinued until arrears are paid up, except at the option of the Publisher.

Within the past three months the circulation has rapidly increased, and the number now on our Subscription Books is over 1,400, throughout this and adjoining Counties; the WEEKLY INTELLIGENCER presents unsurpassed advantages to advertisers.

RATES OF ADVERTISING:

Six lines and under, first insertion..... \$0.125
Each subsequent insertion..... \$0.125
Above six lines, first insertion per line..... \$0.02
Each subsequent insertion per line..... \$0.02

"BUSINESS NOTICES" 10 cents per line each insertion, measured as above.

A liberal discount made to those who advertise by the year.

Advertisements for insertion must be delivered before 12 o'clock, noon, on Thursday to insure their appearance.

All advertisements without written directions inserted until forbid, and charged accordingly.

The Intelligencer Job Office

Is supplied with Power Presses, Hand Presses, and possesses every facility for the rapid and neat execution of every description of plain and fancy printing, at prices as low as any other establishment in the County.

THE DAILY and WEEKLY INTELLIGENCER can be had at the Book Store in Belleville, and at Wilson's Drug Store, Madoc, and at J. E. Ellis, King Street, Toronto.

All orders by mail promptly attended to.

SPECIAL NOTICES.

R. R. R. PILLS.

Composed of vegetable extracts (prepared in vacuo),
they purify the blood, regulate the liver, and purge all
acrid and pernicious humors from the system.
One of Dr. Kady's Pills contains more of the active
principles of cure, and will act quicker on the liver,
bowels, stomach, kidneys, bladder, blood, etc., than
four or six of the ordinary common Purgative, or Cathar-
tic Pills sold under various names, or than ten grains
of Blue Mass.

True comfort for the aged and others afflicted with
Constipation and Paralysis of the Bowels.
Only Three of Kady's Pills—taken in 24 hours,
will secure regular evacuations from the bowels. Per-
sons who for 30 years have not enjoyed a natural stool,
and have been compelled to use opium, have been
cured by a few doses of Kady's Pills.

Dr. KADY'S PILLS CURE ALL DYSPEPSIA,
of the Stomach, Liver, Bowels, Kidneys, Bladder, Nervous
disease, Headache, Constipation, Constipation,
Indigestion, Dyspepsia, Biliousness, Bilious Fever, In-
flammation of the Bowels, Piles, and all derangements
of the Internal System. Purely vegetable, contains no
mercury, mineral, or deleterious drugs.
Dr. Kady's Pills sold by all Druggists and Country
Merchants. Price 50 cents.
See Dr. Kady's Almanac for 1888. 44-2w

Dr. P. Meredith, Dentist, office No. 129 West Sixth
Street, states as follows:

Generalist, October 1, 1887.
Messrs. J. N. Harris & Co.—Gentle:—About one year
ago I took a cold which settled on my lungs. A violent
cough was the consequence, which increased with severe
cough. I expected large quantities of phlegm and mucus
to be expectorated. During the last winter the disease was attended
with cold chills and night sweats. A thorough set in
my friends thought I was in the last stages of Consumption,
and could not possibly get well. I was recommended
Allen's Lung Balm.

The formula was shown to me, which induced me to
give it a trial, and I will only add that my cough is en-
tirely cured, and I am now able to attend to my business
as usual. Yours respectfully,
P. MEREDITH.

Sold by all Family Medicine dealers.

**To the Electors of
BALDWIN WARD**

GENTLEMEN,—Feeling that during the
time I have had the honor of represent-
ing you in the Council I have faithfully dis-
charged my duty as a Councilor, I beg leave
to announce that at the ensuing election I
shall offer myself for re-election.

Before the election I shall consider it my
duty to give to you an account of my past
term of office, to explain to you the position
of the Town affairs, and also to explain the
cause of the determination of certain Coun-
cillors and other individuals to drive me out
of the Council.

I am,
Your old't servant,
THOMAS HOLDEN.

PROSPECTUS

OF THE

BAY STATE MINING CO.,

(LIMITED.)

Capital Stock \$120,000, divided into 1,200 Shares of \$100 each.

WORKING CAPITAL, - - - \$24,000.

THIS COMPANY is duly incorporated under Cap. 23 Cons. Statutes of Canada, and is
formed for the particular purpose of developing the mineral resources of part of Lot
12 in the eighth concession of the Township of Madoc, containing the Bay State Mine and
82 acres of land secured to the Company, and generally for carrying on such other mining
operations as may from time to time be deemed expedient upon.

A shaft has already been sunk to the depth of 37 feet, each successive foot
disclosing rich and new materials. The lode is fully five feet wide, and in the opinion of
Dr. Otway, one of the best defined lodes yet discovered in the district. Indeed, he believes
it to be a continuation of the same lode as that at the Richardson Mine, and that it may
probably equal it in ultimate results.

Various assays have been made from rocks taken from the mine at different depths. One
by Mr. Wyckoff, from 44 lbs. ore, taken from a depth of 30 feet, yielded:
Gold, 44 grains—value per ton. \$80 00
Silver. 4 17

Total value per ton. \$84 17
Another by Dr. Otway, with ore from a depth of 35 feet, yielded \$330 to the ton,
including \$20 of silver. Another still from a chemist in Boston employed by A. P. Davy of
that city, made with rock from a depth of 27 feet, gave a yield of \$327 to the ton.

The average result of three other assays at depths varying from 30 to 33 feet—two of
them by Dr. Otway and one by Mr. J. McFee—was \$514 to the ton.

An offer has been received from a highly respectable firm of machinists to erect a crushing
mill and take half their pay in the Company's stock, their agent having been to El Dorado
and satisfied himself of the character of the mine. Negotiations are now in progress for
the erection of a mill, which it is hoped will be in operation within three months; so that
dividends may be looked for at an early date.

There can be no doubt now of the probable success of most of our Mining Companies, if
managed with tolerable prudence. It is well known that in Australia immense profits
are realized from their mines, though their average yield of gold per ton of ore is only \$7, while
in Nova Scotia it is only \$8 to \$10, and in California nearly the same. The return of \$19 to the
ton from the Bay State quartz in Turley & Gilbert's mill is therefore a sound basis to work upon,
and will undoubtedly yield large returns; and yet, as it was taken from near the surface,
it may be regarded as a mere indication of the richer deposits below. As a sample of what
may be looked for, even with a moderate amount of gold to the ton, it may be stated that
the Port Philip Gold Mining Company, in Australia, obtained from their mine—which gives
an average of only 9 dwts. 6 grs. of gold per ton (equal to \$9.25)—the very large amount of
\$250,000 for the first half only of the present year. Again, the Empire Mine, in Nevada,
which has only a claim 30 ft. in length upon the Comstock lode, and whose quartz yielded
only \$24.50 to the ton, realized last year the enormous sum of \$486,000. Other examples
might be given from Nova Scotia and other gold countries; but every intelligent man can
make these inquiries for himself.

This Company propose to issue at present only a very limited amount of stock, just so
much as is needed to proceed vigorously in the development of the mine, as they feel
confident that the stock must speedily rise in value; and if more funds should afterwards
be needed, an advanced price can be obtained.

The following are the Directors for the first year:

JOHN MCFEE, Belleville.
R. E. LUND, Manager and Overseer of the Mine.
L. MCQUARRE, El Dorado.
J. B. LAZIER, El Dorado.
A. HURD, Port Perry.
DIAMOND & DICKSON, Solicitors.
BANK OF MONTREAL, Bankers.
E. W. HOLTON, President.
F. H. ROUS, Secretary and Treasurer.

Applications for shares may be made to the Secretary, to JOHN MCFEE, Front Street,
Belleville, or to WILLIAM KERSTEMAN, 63 Church Street, Toronto. 199-4f

INSURANCE COMPANY

CAPITAL, - - - \$10,000,000

FIRE AND LIFE.

LIFE DEPARTMENT.

THE principles on which this Company is
founded contain all the elements required
to develop the benefits of Life Assurance, and
afford every facility to intending assurers—
One of the advantages secured by those who
insure their lives with this Company is that
the outside expenditure for Management is
absolutely restricted by the Deed of Settlement
to **Ten per Cent.** of the Net Life
Income. This most important restriction
shows that the interests of participating policy
holders are closely watched and carefully at-
tended to by the Company. Attention is es-
pecially called to this point, as the proportion
of premiums expended for Management
Must Largely Influence Profits
and Bonuses.

The next division of profits takes place in
1868, and all those who wish to participate in
the profits should insure at once.

John Wilson,

BAKER and Confectioner, wholesale and
Retail, at the old stand, Front Street,
Belleville, and at the new stand, on and
under a few articles of clothing, suits the lid, and
chairs to O. K. But you must not fancy
yourself safe. Keep gray eyes are watching
you from a distance, and noting if there is
any expression of exultation. If one is
nervous or irritable, he goes through another
order. He is suspected. His trunk is
measured inside and out, the sides and
the top sounded, and a general manipula-
tion takes place. If anything dutiable or
new is found, it is immediately confiscated,
and becomes the property of Uncle Samuel.
In the meantime the Deputy Surveyor and
his aids are taking a general survey of the
scene of operations.

One of the aids has his eye on a large,
heavy looking man, who is wrapped up in
a great coat. He walks like an invalid,
and is attended by a friend who has met
him on the pier. The aid thinks his
garments fit him too much; he takes
the Inspector's stick and informs him that
after he (the officer) has examined his
baggage he will stumble over his valise or
bag. Of course the large man with so
much clothing on will stoop to pick up his
baggage, which is so suddenly and unex-
pectedly displaced, at which time the
Inspector must watch his back.

The ruse succeeds; the back of his coat
appears as if it covered a pan full of
biscuits. Trembling with fear the passen-
ger is taken inside the small office and from
under his coat is drawn a well padded vest
containing fifty gold watches. He is now
subject to a thorough examination; his
hose legs and heels do not escape their
scrutiny. The heel of one boot is found
to be hollowed-out; it goes and inside is
found snugly encased in cotton two
brilliant worth \$3,000. When entirely
stripped of his supposed garments he
appears like a second "Calvin Edson."

Another victim has been selected, and
he is called aside and corporal examina-
tion. He is very portly, and tries to be
laughing conversationally, and informs
the officer that he supposes he must do his
duty. Underneath his shirt are hundreds
of yards of costly lace delicately wound
around his waist. After the officers have denuded
him of his smugged garments he looks
more like a plucked fowl than a human
being. Another man has passed the
inspection, and his trunks are strapped
much as usual, and in a great hurry. On
his suit he carries a bag, of which he
seems to be very careful.

As he is about to step into the carriage,
the aid taps him on the shoulder and

A Cool Husband.

There is one sensible married man in this country. He is a soldier, and was reported as having been killed, but was only a prisoner. He returned home to find that his wife had turned over a new leaf in the marriage service, and that another man occupied his seat in the chimney corner. Did he go to work slaughtering the false wife and new husband? Not much. He walked in and said: "Well, old gal, how do things go? Pretty good, Bill," said the double married woman, not taken back greatly. "Which do you prefer, the old or the new love?" She hesitated for an instant, and said: "I don't like to hurt your feelings, but—'Oh, spit it right out. Don't mind my feelings or the other chap's! I won't be angry if you come down a little rough on my vanity. Count on my being unfaithful, I won't cut up rusty if you should go back on me.' 'I am glad you're so thoughtful, Bill; and I acknowledge that I do like my present husband best—but if anything should happen to him, I know nobody else I would soon join fortunes with again as you.' That's the way to talk. I'll now bid you a good bye, hoping that no accident will happen to the other fellow, and that he will live long to enjoy your delightful society. Good day." And the careless husband travelled off, with his knapsack on his back, whistling in a cheery clear tone. "The girl I left behind me."

Many astronomers will visit India next year to observe a total eclipse of the sun that will be "visible" there only.

Commodore Bissell has officially notified the Navy Department of the loss of the "Monongahela." She was lifted by the waves over the warehouses in the town of Frederickstadt, St. Croix, during the late terrible earthquake, and landed in the streets.

MORAL FORCE.—The iron of the iron, the fire of the ether, and the source of all elements, is more force. We delight to trace these powers. Method, patience, self-trust, perseverance, love, desire of knowledge, power of persistence, of enduring defeat, of gaining victory by defeat, these are forces which never lose their charm. Even in war—which is organized brute force—moral power is eminent. Good ammunition and good muskets we must have; but these do not gain the battle. You may have a mountain of iron, every pebble a sing—'It's all in vain without the brave hands to use, the cool head to command, the good cause which fires every brain in the service.'—Emerson.

PROSPECTUS OF THE ROSE MINING COMPANY OF MADOC.

Capital Stock, - - - \$25,000.
Divided into - - - 5,000 Shares.
5,000 Shares - - - \$5.00 Each.
Deposit on Subscription Twenty-five per cent.

GEO. D. WYCKOFF, A. L. MCLELLAN, JAS. CARP RITCHIE, F. E. KILBERT, A. BURKHAM, JR., J. E. O'REILLY, E. H. HALE, and JOHN FAIRGRIEVE, are the owners of the property hereinafter mentioned, and are desirous of forming a Rose Mining Company, with the capital of \$25,000, and are to receive and take in payment for the said property \$1,250 in cash, and 2,500 shares of paid up stock of the said company. The said parties are now taking proceedings for the incorporation, under cap. 23, 278 Vic. and have much pleasure in calling the attention of the public to the following Prospectus:

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 5th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which this company peculiar advantages over many others, there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out, and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of backs to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.

Another great advantage in this property is, that immediately the work is commenced ore can be taken out in quantities more than sufficient to pay the working expenses and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.

PROSPECTUS OF THE EL DORADO MINING COMPANY OF MADOC.

CAPITAL STOCK - - - \$72,000.
Divided into 2,400 Shares of \$30 Each.

Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its Incorporation, under Chapter 23, 27, and 28 Vic. for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 5th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 46 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$53.80 in Gold, which specimen can be seen at J. E. Ellis' on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but that Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore. The projectors have determined only to sell sufficient stock to repay the advances and to carry on the work satisfactorily. They have thereupon decided to sell only 825 shares of the value of \$30 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1868. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings.
RICHARD SPALING, Managing Director and Superintendent.
T. S. MCLELLAN, of Madoc.
MAHLON BURWELL, MC GREGOR, of Madoc.
T. A. MITCHELL, of Madoc.

American Watches.

THE true value of Machinery applied to Watchmaking is not that by its use Watches are made rapidly, but that they are made correctly. Very few people know why a Waltham Watch should be superior to the Watch in the first place, at Waltham the Watch is regarded as only a machine, to be constructed like any other machine, on mechanical principles. The factory is, indeed, little else than a machine shop, the principal work in which is not upon watches, but upon machinery to make watches with. If the watches are good, it is because the machinery is good. Of course, there must be no defect in the principle of plan or the movement, no mistake in the sizes or shapes of the pieces of which it is composed, nothing wanting in their properties, and no error in their positions. These points once thoroughly settled in regard to each part of every variety of watch, it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished piece. The method established in every department is the reduction of parts by mechanical means, and this is carried out in the system of the most thorough subdivision.

By means of multiplying gauges and microscopes, tests and inspection for the detection of wear in cutting tools, and for faults and flaws in steel or stone, are made to accompany the work in every stage from beginning to end. As a necessary result, the Watch goes together a finished machine. Every part is found to fit properly in its place. Every pin may be pushed till it plucks, and every screw turned home—without the slightest jar, and the slightest motion of sluggish and feeble action, the balance, even under the pressure of the lightest mainspring, vibrates with a wide and free motion, and the beat has the clear ringing sound always characteristic of the Waltham Watch. The machine is a time keeper from the start.

This system of watchmaking is unknown in foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce Watches that cannot be equalled for every quality which makes a watch valuable. Simple in plan, and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform to the minutest details, not easily damaged, easily repaired, and when repaired always as good as new.

There are different grades of finish in the different varieties of Watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and needs; but every Watch that bears the genuine trademark of Waltham is guaranteed to be a good one, and nobody need be afraid to buy it.

EVERY WATCH FULLY WARRANTED.

For sale by all first-class dealers in the United States and British Provinces.

The Daily Intelligencer

WILL appear about five o'clock every afternoon (Sundays excepted) and will be furnished by Carriers at the rate of \$5 a year if paid in advance, \$6 otherwise. Mail subscribers \$5 a year. \$2.50 for 6 months; \$1.50 for 3 months.

It will contain the latest telegraphic news up to the hour of going to press, including Cable despatches and the New York and Montreal Markets.

Arrangements have been made with REUBEN CORPSENGERS, in Madoc, to give water, Marbled and other points, and will furnish us with early and full information respecting the Gold Regions, and of matters of general interest.

Special attention will be paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c., and in short, nothing pains nor expense will be spared to make the DAILY INTELLIGENCER worthy of public patronage.

RATES OF ADVERTISING.

A liberal scale of prices for advertisements has been arranged as follows:

Cards, not exceeding six lines, 6 months, \$ 5 00
Half Square, 6 months, \$10 00
One Square, 6 months, \$20 00
Two Squares, 6 months, \$30 00
Four Squares, 6 months, \$50 00
Notice of Births, 50
Do of Marriages, 50
Do of Deaths, 50

"Business Notices"—All matter under this heading, headed, sold at 10 cents per line, measured by a scale of solid minion.

Advertisers contracting for any space not less than half a square can have the privilege of changing their advertisements every two weeks.

Transient advertisements inserted at 7 cents per line for first insertion, and 3 cents for each additional insertion.

The Weekly Intelligencer

Is published every Friday Morning at \$2 per annum if called for at the Office, or sent by mail; and \$2.50 if delivered by the Carrier, payable in all cases in advance. When not paid until the close of the year, 50 cents will be added to each year's subscription. No paper discontinued until arrears are paid up, except at the option of the Publisher.

Within the past three months its circulation has rapidly increased, and the number now on our Subscription Books is over 1,400. With such a large and general circulation throughout this and adjoining Counties, the Weekly Intelligencer presents unsurpassed advantages to advertisers.

RATES OF ADVERTISING:

Six lines and under, first insertion, 0 20
Each subsequent insertion, 0 10
Above six lines (per line) first insertion, 0 20
Each subsequent insertion per line, 0 10
"Business Notices"—All matter under this heading, headed, sold at 10 cents per line.

A liberal discount made to those who advertise by the year.

Advertisements for insertion must be delivered before 12 o'clock, noon, on Thursday to insure their appearance.

All advertisements (without written directions inserted until forbid, and charged accordingly.

The Intelligencer Job Office

Is supplied with Power Presses, Hand Presses, and possesses every facility for the rapid and exact execution of every description of plain and fancy printing at as low a price as any other establishment in the country.

The Daily and Weekly Intelligencer can be had at all the book stores, Madoc, and at El Dorado.

All orders by mail promptly attended to.

IMPORTS.—1 cars merchandise.
EXPORTS.—3 cars merchandise.

SPECIAL NOTICES.

R. R. R. PILLS.

Composed of vegetable extracts (prepared in vacuum, they purify the blood, and remove all impurities from the system.)
One of Dr. Radway's Pills contains more of the active principle of cure, and will act quicker on the Liver, Bowels, Stomach, Kidneys, Bladder, Blood, etc., than four or six of the common common Purgative or Cathartic Pills sold under various names, or than ten grains of Blue Mass.
True comfort for the aged and others afflicted with Constipation and various of the Bowels.
One to Three of Radway's Pills—once in 24 hours, will secure regular evacuations from the bowels. Persons who for 20 years have not enjoyed a natural stool, and have been compelled to use opium, have been cured by a few doses of Radway's Pills.
Dr. Radway's PILLS CURE ALL DISEASES OF THE Stomach, Liver, Bowels, Kidneys, Bladder, Nervous system, Headache, Constipation, Colic, Indigestion, Dyspepsia, Bilelessness, Bilious Fever, Irritation of the Bowels, Piles, and all derangements of the Internal Viscera. One to six boxes warranted to effect a positive cure. Purely vegetable, contains no mercury, minerals, or deleterious drugs.
Dr. Radway's Pills sold by all Druggists and Country Merchants. Price 25c each box.
See Dr. Radway's Almanac for 1868.

Dr. P. Meredith, Dentist, office No. 123 West Sixth Street, states as follows:
On October 1, 1867, Messrs. J. N. Harris & Co., Gentlemen—About one year ago I took a cold which settled on my lungs. A violent cough was the consequence, which increased with severity. I expectorated large quantities of Phlegm and mucus. During the last winter I became so much reduced that I was confined to my bed. The disease was attended with cold chills and night sweats. A disordered action of my friends thought I was in the last stages of Consumption, and could not possibly get well. I was recommended to try
ALLEN'S LUNG BALM.
The formula was shown to me, which induced me to give it a trial, and I will only add that my cough is entirely cured, and I am now able to attend to my business as usual. Yours respectfully,
P. MEREDITH.

To the Electors of
BALDWIN WARD
GENTLEMEN.—Feeling that during the time I have had the honor of representing you in the Council I have faithfully discharged my duty as a Councillor, I beg leave to announce that at the ensuing election I shall offer myself for re-election.
Before the election I shall consider it my duty to give to you an account of my past term of office, to explain to you the position of the Town affairs, and also to explain the cause of the determination of certain Councillors and other individuals to drive me out of the Council.
I am,
Your obedient servant,
THOMAS HOLDEN.

A little boy having asked his mother what 'blood relations' meant, and being told it meant near relations, said, after a moment's thought: 'Then, mother, you must be the bloodiest relation I've got.'

A sailor in the pit of a theatre, looking over his playbill, read, 'an interval of twenty-five years occurs between the first and second acts.' At the end of the first act he put on his old tarpania and left the house, saying, 'few of those folks will see the end on't.'

'Devil, indeed!' said a primitive country schoolmistress to one of her pupils, as she heard a little girl designate his Satan's Majesty 'devil.' 'Devil, indeed! set him up with such fine names—ca' him deal, issie; its good enough for him.'

Sir William Davenport, the poet, had no nose, and going along the Mews one day, a beggar woman followed him crying, 'Ah! God preserve your eyesight, sir, the Lord preserve your eyesight.' 'Why, good woman,' said he, 'do you pray so much for my eyesight?' 'Ah! dear sir,' answered the woman, 'if you should grow dim-sighted you have no place to hang your spectacles on.'

When Dr. Johnson asked the widow Porter to be his wife, he told her candidly that he was of mean extraction, that he had no money, and that he had an uncle hanging. The widow replied that she had no money herself, and she cared nothing for his parentage, and though she had no relative hanging, she had her ankles, was the reply. Then there is plenty of time,' said the other. 'No, there's not,' rejoined the first, 'for he's in head first!'

On the tombstone over the graves of a husband and wife are the following lines: Within this grave do lie Back to back, my love and I, When the last trump the air shall fill, If she gets up I'll just lie still.

The following quaint epitaph on husband and wife is to be seen in one of the Parisian cemeteries: "I am anxiously expecting you—A. D. 1867. "Here I am—A. D. 1867."

So the good woman was forty years making up her mind to follow her husband.

PROSPECTUS OF THE ROSE MINING COMPANY OF MADOC.

Capital Stock, - - - \$25,000.

Divided into - - - 5,000 Shares.

5,000 Shares - - - \$5.00 Each.

Deposit on Subscription Twenty-five per cent.

Geo. D. WYCKOFF, A. L. McLELLAN, JAS. C. CAMPBELL, F. E. KILVER, A. BURNHAM, JR., J. E. O'REILLY, E. H. HALE, and HUGH FAIRBANKS, are the owners of the property hereinafter mentioned, and are desirous of forming a Stock Company, with the capital of \$25,000, and are to receive and take in payment for the said property \$1,250 in cash, and 2,250 shares of paid up Stock of the said company. The said parties are now taking proceedings for its incorporation, under cap. 23, 27-28 Vic., and have much pleasure in calling the attention of the public to the following Prospectus:

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives the company peculiar advantages over many others, there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out, and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, commencing the different veins, and giving eighty feet back to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intends, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.

Another great advantage in this property is, that immediately the work is commenced ore can be taken out in quantities more than sufficient to pay the working expenses and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.
Geo. D. WYCKOFF, ASA A. BURNHAM, JR., F. E. KILVER, A. L. McLELLAN, JAS. C. CAMPBELL, JAS. EDWIN O'REILLY, E. H. HALE.

TO RENT,
THE BRICK HOUSE in West Belleville, formerly occupied by FRANCIS PARSONS, Esq. Rent \$100 a year. For further particulars apply to Charles Pagnieu, or of Ross, Bell & Holden, Belleville, Nov. 23, 1867. 174-4f

PROSPECTUS OF THE EL DORADO MINING COMPANY OF MADOC. (LIMITED).

CAPITAL STOCK - - - \$72,000.

Divided into 2,400 Shares of \$30 Each.

Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its incorporation, under Chapter 23, 27, and 28 Vic., for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the 8th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 46 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$53.80 in Gold, which specimen can be seen at J. E. Ellis, on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore. The projectors have determined only to sell sufficient stock to repay the advances, and to carry on the work satisfactorily. They have thereupon decided to sell only 823 shares of the value of \$30 each, payable one-half, or \$15, as above, on subscription, and the remaining \$10 on the 1st of January, 1868. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be exceedingly remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings,
RICHARD SPARLING, Managing Director and Superintendent,
T. S. McGLASHAN, of Madoc,
MAHON BURWELL McCREGOR, of Madoc,
T. A. MITCHELL, of Madoc,
ALDERMAN VICKERS, of Toronto,
J. E. ELLIS, of Toronto.

McLELLAN & McLELLAN, Solicitors. A. F. WOOD, President.
BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

Applications for Shares received by Alderman Vicker, Yonge Street, Toronto; J. E. Ellis, King Street, Toronto, and at the office of

WILLIAM KERSTEMAN,
63 Church Street, Toronto. 1734f

American Watches.

THE true value of Machinery applied to Watchmaking is not that by its use Watches are made, but that they are made correctly. Very few people know why a Waltham Watch should be superior to any other. In the first place, nothing is to be regarded as only a machine, to be constructed, like any other machine, on mechanical principles. The factory is, indeed, little else than a machine, the principal part in which is not more upon watches than upon machinery to make watches with. If the watches are good, it is because the machinery is good. Of course, there must be no defect in the principle of plan or the movement, no mistake in the sizes or shapes of the pieces of which it is composed, nothing wanting in their properties, and to error in their positions. These points once thoroughly settled in regard to each part of every variety of watch, it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished piece. The method established in every department is the replication of parts by mechanical means, and this is carried out on the system of the most thorough subdivision.

By means of multiplying gauges and microscopes, tests and inspection for the detection of wear in cutting tools, and for faults and flaws in steel or any other material to accompany the work, we are enabled from beginning to end. As a necessary result, the Watch goes together a finished machine. Every part is found to fit perfectly in its place. Every piece may be pushed into its places, and every screw turned home—instead of sluggish and feeble action, the balance, even under the pressure of the heaviest maladjusting vibrations, with a wide and free motion, and the beat has the clear ringing sound always characteristic of the Waltham Watch. The machine is a time keeper from the start.

This system of watchmaking is unknown in foreign countries, and is entirely original with the Waltham Company. It is a claim that by it they produce Watches that cannot be equaled for every quality which makes a watch valuable. Simple in plan, and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform to the minutest details, not easily damaged, easily repaired, and when repaired always as good as new.

There are different grades of finish in the different varieties of Watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and means; but every Watch that bears the genuine trade mark of "WALTHAM" is guaranteed to be a good one, and nobody need be afraid to buy it.

EVERY WATCH FULLY WARRANTED. For sale by all first-class dealers in the United States and British Provinces.

ROBBINS & APPLETON, No. 15 Broadway, N.Y. ROBERT WILKES, Toronto and Montreal, General Agents.

The Daily Intelligencer

Will appear about five o'clock every afternoon (Sundays excepted) and will be furnished by Carriers at the rate of \$5 a year if paid in advance, \$6 otherwise. Mail subscribers \$5 a year. \$2 50 for 6 months; \$1 50 for 3 months.

It contains the latest telegraphic news up to the hour of going to press, including Cable despatches and the New York and Montreal Markets.

Arrangements have been made with RELIABLE CORRESPONDENTS in Madoc, Bridgewater, Marston and other places, who have the means and capacity to furnish the most reliable and accurate information respecting the Gold Regions, and of matters of general interest.

Special attention will be paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c., &c., and in short, nothing but news or expense will be spared to make the DAILY INTELLIGENCER worthy of public patronage.

RATES OF ADVERTISING. A liberal scale of prices for advertisements has been arranged as follows:

Cards, not exceeding six lines, 6 months, 10 00
Half Square, 6 months, 20 00
Two Squares, 6 months, 40 00
Four Squares, 6 months, 80 00
Notices of Births, 50
Do of Marriages, 50
Do of Deaths, 50

"Readers of the Intelligencer" under the heading, headed or solid, 10 cents per line, measured by a scale of solid minims.

Advertisers contracting for any space not less than one week, and who have the privilege of changing their advertisements every two weeks. Transient advertisements inserted at 7 cents per line for first insertion, and 5 cents for each subsequent insertion.

The Weekly Intelligencer

Is published every Friday Morning at \$2 per annum if called for at the Office, or sent by mail; and \$2 50 if delivered by the Carrier, payable in advance. When not paid until the close of the year, 50 cents will be added to each year's subscription. No paper sent until arrears are paid up, except at the option of the Publisher.

Within the past three months its circulation has rapidly increased, and the number now on our Subscription Books is over 1,400. With such a large and general circulation throughout this and adjoining counties, the Weekly Intelligencer presents unsurpassed advantages to advertisers.

RATES OF ADVERTISING. Six lines and under, first insertion, 10 00
Each subsequent insertion, 5 00
Above six lines (per line) first insertion 0 07
Each subsequent insertion per line, 0 02
Large "Readers Notices"—10 cents per line, each insertion, measured as solid minims, over 10 lines by the year.

Advertisements for insertion must be delivered before 12 o'clock, noon, or Thursday to be inserted until further notice, and charged accordingly. All advertisements without written directions inserted until forbid, and charged accordingly.

The Intelligencer Job Office

Is supplied with Power Presses, Hand Presses, and possesses every facility for the rapid and neat execution of every kind of printing. All orders at prices as low as any other establishment in the country.

THE DAILY AND WEEKLY INTELLIGENCER can be had at the Book Store, in Belleville, and at Wilson's Drug Store, Madoc, and at El Dorado. All orders by mail promptly attended to. J. BOWELL, Publisher.

INTELLIGENCER BUILDING, Front Street, Belleville.

LET THERE BE HARMONY IN THINGS ESSENTIAL—LIBERALITY IN THINGS NOT ESSENTIAL—CHARITY IN ALL.

No. 202

The Abyssinian Expedition.

The following is an extract from a letter from Colonel Merewether, just received by Sir Stafford Northcote:

interesting and important reconnaissance up the pass from Koomoglee to within miles by road by Senafee, a distance of miles. There were some very bad places in one part; but the road has been made now by the Sappers easy for passage of cavalry, infantry, mules, and camels; and it will, I think, prove the chief line of route, as leading at once to a good position on the highlands of Abyssinia.

"To-morrow we start up the Haddes examine that, to as near as we can get Tekonde without actually getting it."

"Sir R. Napier's excellent proclamation was sent out on the 31st inst. 1841."

for the best results from it. Directly ruler of Tigre, now Prince Kassai, a re- against Theodorus, shows he intends act in a friendly manner towards us, there-

be no impropriety in visiting both Tekon and Sanafee; but until he does it we not be just to the people of those places make them run the risk of encounter

"I have been very vexed not to find a suitable plateau short of the Abyssinian

highlands, but I was misled by the richness of the Agametta plateau, west of Massow. I only now learnt, what no one seemed to have been able to tell me before, that

you go south of the latitude of Massena the lower hills become more purely volcanic, indeed, in some places entirely, so the vegetation diminishes *peripassu*.

"The troops that have landed are, happy to say, in excellent health and spirit. The 3rd Light Cavalry had been let off horses from fever, but to-day on my arrival they were all fit for duty."

here I was glad to find the disease disappearing. It was clearly owing to the effect of the sea voyage from India, and he was cooped up on board ship."

Exportation of Cattle.

The Secretary of the United States Treasury has addressed the following circular to the Collector of Customs on

"It being represented to the department that a difference in practice exists at some of the frontier ports bordering on Canada in relation to the assessment and collection of duties on goods imported from the United States, the department has been advised that the following is the substance of the representations made by the Canadian frontier authorities:

in relation to the assessment, and collection of or exemption from duty, on the importation of cattle, and other live animals from Canada, which had previously been excluded from the United States thereto, for

purpose of grazing or fattening, with intention of returning the same to United States, the following instructions are hereby issued on the subject, and

Such cattle or other animals, on being brought back to the United States, can be permitted to enter free of duty.

they are returned in the same condition as when exported, and when the product is of domestic origin, of exportation from any country of the United States, and the other products of the same kind.

required for the free entry of goods. The and merchandize of domestic origin production, are duly produced to the c for at the port of importation. The c

of cattle, or other animals, should
and file among the records of the
House a careful description of the
so that they can be readily identified

case of their being returned to the United States. When it is found, on the importation of such cattle, that their condition is changed by fattening, or other causes,

will be assessed and collected thereon
the manner prescribed for original im-
positions."

The saw-mills of St. Anthony, Minn. have stopped, and hundreds of men consequently thrown out of employ-
ment, and unsuccessfully offer to work in

pineries, at ten dollars a month. But lumbermen of that vicinity cut one hundred million feet of logs last winter, stocked the market, and consequently

The Cyclone at Calcutta.

FURTHER DETAILS OF THE DISASTER—GREAT DESTRUCTION OF PROPERTY.

(From the London Daily News, Dec. 7.)

The arrival of the Indian mail brings us advice from Calcutta to the 8th of Nov. being a week later than those which we published in our impression of yesterday. These accounts increase to a lamentable extent the seriousness of the disaster. In the city of Calcutta 109 deaths have been recorded, 101 brick-built houses destroyed, and 2,338 tiled and thatched huts levelled with the ground. In the suburbs the loss of life is estimated at 285; and 62 brick built houses, 1,745 tiled huts, and 25,148 thatched huts have been destroyed. On the river, 632 lives have been lost. In addition there have also been lost 270 ferry steamers, 67 cargo boats, 15 Madras sloops, 84 dhingies, 83 native boats, and 330 up-country boats. The greater portion of these lost in the canals were laden with rice and grain. The grand total of lives ascertained to have been lost is, therefore, 1,016; of brick-built houses destroyed, 101; and of tiled, and thatched huts 2,338. Of the larger shipping in the river only about 36 ships have escaped uninjured, and three have sustained serious damage, one of them being a complete wreck.

This cyclone has occurred at a time when the rice crops were in the ear, and the whole province was teeming with famine and plucked by high prices looked forward to an abundant harvest. Where the ear was formed it was torn off; where the stalk had reached mature height it was snapped. On a low estimate at least one half of the rice crop has been destroyed in the 10 miles to the south of the Hooghly over which the cyclone extended. From Nad-dea, still suffering from an inundation of the Ganges more severe than those of 1863 and 1876, we learn that the vegetation which survived that calamity has been almost entirely destroyed. Not only the rice crop yield but half its tale. Of the cattle which had been sent to the high lands from the inundated tracts, a Delah has perished, for they had to withstand storms for two days and a half without food or shelter. All the crops recently sown within the district blasted by the whirlwind have been destroyed. The condition of Jessore is worse. Not over 5 per cent of the brick houses in the country have withstood the blast.

A general system of relief was contemplated. The balance, amounting to about 19,000 rupees, of the previous cyclone relief fund, has been made over for the purpose of affording relief, and Government has promised to contribute by doubling the amount of subscriptions.

Daily Intelligencer.

BELLEVILLE, THURSDAY, DEC. 26.

REGISTRATION OF TORONTO.—Mr. Charles Lindsay, of the *Leader*, has been appointed Registrar of Toronto.

LEISURE HOUR for December has been received by Overall. It contains no less than twenty-one interesting papers, besides the usual "varieties," and is handsomely illustrated. It is one of the best of English monthlies.

STIRLING.—Dr. G. H. Boulter, M. L. A., was re-elected Mayor of Stirling by acclamation.—Messrs. John S. Black, Wm. Martin, E. D. Allen, James Miller, B. Stedman, and Peter Chard were nominated Councillors.

RAWDON.—Messrs. George Conly and John S. Hagerman were nominated for Reeve; Thomas Walker was re-elected Deputy Reeve by acclamation. For Councillors, Messrs. James Cook, John Stewart, Samuel Vandervoort, Joseph Hogle, and Allen McCabe, were nominated.

THURLOW.—J. J. Farley, Esq., was elected Reeve of Thurlow by acclamation. For Deputy Reeves, Messrs. P. R. Dill, Philip Clapp, Delany Ham, and Francis Brenton. For Councillors there were nominated Gilbert Thrasher, John N. Diamond, W. H. Sills, and James Hamilton.

THE LATE RAILWAY ACCIDENT.—Up to Monday, the number known to have been killed outright or since died from their wounds, by the late railway accident near Buffalo, was forty-two. A large number of others were seriously wounded, and the list of deaths will probably swell to sixty. The *Buffalo Express* speaking of the excellent existing in that city when the bodies were brought in, says:—"There are seven boxes of the remains, each box six feet long and two feet wide. On being opened at the 'Soldier's Rest,' a soul-crushing spectacle was revealed, the charred relics of mortality presenting themselves in every conceivable form of disgust and terror. Among this ghastly heap are plainly distinguishable twenty-three skulls not destroyed, but whether of men or women none but God knows. The sight is a horrible one and will doubtless never be effaced from the memories of the men who saw it." Amongst the names of the dead and wounded, we observe only the name of Mr. Hubbard, from Canada.

The New Postal Bill.

The new Postal Bill which passed the several branches of the Legislature at the session just closed, comes into force on the last day of April, 1868. This Bill is important in a few particulars, differing as it does from the old law, the most important of which we shall point out, in order that the public may understand it. In the old law a registration of two cents was charged upon letters. This regulation is continued, and additional power given to the officers "of the Post Office to register letters on" "questionably containing money or other valuable enclosures when posted without registration by the senders of the same," and to impose a registration charge upon "such letters of two cents." This "unquestionably" knowledge by a Postmaster may lead to some difficulty. It will puzzle many Postmasters to know "unquestionably" whether a letter contains money or other valuables; but as it is left optional with the Postmaster, not much difficulty will arise from it, particularly as the registration forms part of the general revenue and not a perquisite of the Postmaster.

The postage after the 1st day of April next is to be a "uniform rate of three cents" per half ounce in weight, any fraction of "an ounce being chargeable as a half ounce," such postage to be paid "by postage stamp or in current coin at the time of posting such letters;" when not so paid, five cents will be charged the person receiving such letter. On letters posted for delivery at the same office at which they are posted, one cent, no matter what the weight.

On newspapers the rate has been changed somewhat, and in one particular assimilated to the law of the United States. "The rate of postage upon newspapers printed and published in Canada, and issued not less frequently than once a week, from a known office of publication, and sent to regular subscribers in Canada by mail, shall be as follows: Upon each such newspaper, when issued once a week, the rate for each quarter of a year, commencing on the first of January, first of April, first of July, or first of October of each year, shall be five cents; when issued twice a week ten cents; when issued six times a week thirty cents; and in that proportion, adding one rate of five cents for each issue more than once a week; and such postage may be prepaid in advance from the first day of the quarter from which the payment commences, for a term of not less than a quarter of a year; and such prepayment may be made at either the office of delivery or postoffice, notwithstanding that *Exchange Papers*, addressed by one editor or publisher of a newspaper to another editor or publisher, may be sent by post free of charge."

By this clause it will be seen that the amount to be paid yearly by subscribers to weekly newspapers has been decreased from 26 cents to 20 cents per annum; but "on" "all newspapers sent by post in Canada," "except in the cases hereinbefore expressly provided for, there shall be payable a rate of not exceeding two cents each," to be prepaid by postage stamps. This charge of two cents is permissive, and it will rest with the Governor in Council, or Postmaster General, to say whether this charge or the present rate of one cent will be imposed. We incline to the opinion that the higher rate will be the one which will have to be paid, at least until the Postal service becomes self-sustaining. The rate of postage upon periodical publications, other than newspapers, will be one cent per four ounces, or half a cent per number, when such periodicals weigh less than one ounce and are posted singly; payment in all cases when posted in Canada in advance.

"On books, pamphlets, occasional publications, printed circulars, prices current, handbills, book and newspaper manuscripts, printer's proof sheets, whether corrected or not, maps, prints, drawings, engravings, photographs when not on glass, or in cases containing glass, sheet music whether printed or written, packages of seeds, cuttings, bulbous roots, sections of grafts, patterns or samples of merchandise or goods, the rate of postage shall be one cent per ounce; provided that no letter or other communication is intended to serve the purpose of a letter be sent or enclosed therein, and that the same be sent in covers open at the ends or sides or otherwise so put up as to admit of inspection by the Officers of the Post Office to ensure compliance with this provision—and this postage rate shall be prepaid by postage stamp in all cases when such articles are posted in Canada."

By this provision newspaper correspondents, it will be seen, can send their letters containing reports of councils, meetings, or any other public matters, at one cent per ounce, minding in all cases, to leave the ends open.

Power is given to the Post Master General to enter into arrangements with the United States and other countries, for the transmission of letters, etc., at such rates as may be agreed upon.

"If any letter or other mailable matter is refused, or if the party to whom it is addressed cannot be found, then any postage due thereon shall be recoverable by the Postmaster General from the sender of such letter or packet," such postage being recoverable, with costs, by civil action in any court having jurisdiction. Letters or other mailable matter posted for places

within the limits of Canada, on which stamps for pre-payment are affixed, of less value than the true rate of postage to which they are liable, the Postmaster General "may forward them, charged with postage as if no stamp had been thereon affixed." No Postmaster is bound to give change, "but the exact amount of the postage on any letter or other mailable matter shall be tendered or paid in current coin."

The Post Master General has power to employ letter carriers, for the delivery of letters, in any city or town, when he thinks the accommodation of the public require it, and to charge for such service two cents upon letters, and one cent upon newspapers, or to establish a system of free delivery.

Letters not called for or claimed may be sent to the dead letter office, opened, and sent back to the writer with a charge of five cents thereon, in addition to any postage that may be due thereon.

Among the penalties is one imposing a fine of not less than \$10 nor more than \$40, for enclosing any "writing," or "other thing," in a newspaper, other than accounts and receipts of newspaper publishers, which are permitted to pass folded within the newspapers sent by them to their subscribers. This includes hand-bills and circulars, which have been heretofore innocently circulated in newspapers. Publishers would do well to note this provision of the law before they are brought up some fine morning for violating it. Suppose a thousand small bills are thus circulated, the smallest fine imposed would be \$10,000 and if the highest, the modest sum of \$40,000; sufficient, we fancy, to ruin ninety-nine out of every hundred publishers on the continent. It will behoove publishers, therefore, to look well to this.

A penalty of \$40 is imposed upon any person sending postage stamps other than those duly authorized by the Postmaster General.

In addition to the regular terms of the postal service, provision is made in this Bill for Post Office Savings Banks, a synopsis of which we shall give in a future number.

—Dr. Blanchet, it is said, is to be Speaker of the Legislature of Quebec.

—\$900 was stolen from the safe at the Grand Trunk Railway Station, London, on Sunday.

—Forney says he is the instrument with which the Radical party does its work. Prentice says the Radical party, like the heaver, works with its tail.

—The notorious General Sweeney has again been reinstated in the regular service. The United States must be hard up for material for Generals.

American Despatches.

NEW YORK, Dec. 25.—Christmas is generally observed. Business is entirely suspended.

The steamships "City of Antwerp" and "Chicago," from Liverpool, arrived to-day.

The *Tribune's* Washington special says:—Despatches from the Italian Government order the representatives of that Republic to England on an important diplomatic mission.

CHARLESTON, S. C., Dec. 25.—The steamship "Raleigh," from New York for New Orleans, was burned yesterday about twenty miles off the coast. Eighteen of the passengers and crew were brought here by a tug this morning. Thirteen lives are supposed to be lost, including Captain Marshall. Twenty-four persons are still missing. When last seen they were in the boat, or clinging to pieces of the wreck.

MONTGOMERY, Ala., Dec. 25.—The negroes were out in force to-day, contrary to municipal regulations and military orders, with guns, pistols, &c., and in full uniform. No effort was made to suppress the demonstration. Several thousand negroes were paraded in incertant language by Barber, Rainard and other prominent radicals. Late in the afternoon Barber and Rainard were arrested by the military authorities.

HAVANA, Dec. 25.—Jeff Davis and wife arrived here to-day, en route for New Orleans.

Arrival of the "City of Antwerp."

NEW YORK, Dec. 26.—The steamship "City of Antwerp," with European dates to the 12th, arrived last night.

The Paris correspondent of the *London Globe* says: The resolution of the Emperor to pronounce for the Pope must have been taken very suddenly. In the speeches delivered by the Minister of Foreign Affairs, M. de Montsur, there was nothing to indicate the likelihood of this.

The likelihood of Rome and Italy being the theatre of consolidation of Italy will of course become the fierce enemy of France, and the other powers whose good will her Government seeks, and of whose forbearance it has need—England, Prussia and Russia—will, to some extent at least, be estranged.

The London *Times*, speaking of Napoleon's policy towards Italy, says: His new resolution will be productive of evil. It will increase the unpopularity of the Emperor, as her Majesty is known to take a very active part in public affairs, and like most women of her nation, she is an ardent Papist. She will be held responsible for what has been done already in the Corps Legislatif. The new diplomacy of the Emperor has been characterized as Spanish, and as in truth it is more Spanish than French, it is not surprising that the people should ascribe it to the Espagnole who sits on the throne.

Telegraphic News.

BY ATLANTIC CABLE.

LONDON, Dec. 24.—At a banquet given at the Royal Polytechnic, on Saturday night last, in reply to the following sentiment from the Duke of Wellington, a felicitous telegram from the President of the United States was read amidst great enthusiasm. Not a little of the interest attaching to these despatches grows out of their rapid transmission. The message of the Duke of Wellington to the President of the United States:—

LONDON, Dec. 21, 1867.—The Duke of Wellington, the Directors and scientific guests now at the Royal Polytechnic, London, England, send their most respectful greetings to the President of the United States, their apology being that to the discoveries of science the intercourse between the two great nations is indebted.

WASHINGTON, Dec. 21, 1867.—To the Duke of Wellington, London:—I reciprocate the friendly salutations of the banqueting party at the Royal Polytechnic, and cordially agree with them in the sentiment that free and open communication between governments and nations is an important agent in preserving peace and good understanding throughout the world, and advancing all the interests of civilization. (Signed.) ANDREW JOHNSON.

The reply occupied twenty-nine minutes in actual transmission.

On the same evening a message of twenty-two words was started from the Polytechnic for Heart's Content at exactly nine p.m., and at nine minutes past nine the reply of twenty-four words was delivered:

LONDON, Dec. 24, noon.—Despatches from Naples mention that the eruption of Mount Vesuvius is continually increasing in power and splendour. Immense sheets of white, yellow and crimson smoke arise hundreds of feet above the crater, and all night the Bay of Naples is lighted up for miles. Lava is pouring down the mountain side in immense quantities, and large stones are occasionally thrown out from the mouth of the volcano. A deep rumbling, like reverberating thunder, is heard from time to time, as in the bowels of the earth, and many of the people in the vicinity have left their homes for fear of an earthquake or other calamity. No such eruption has probably occurred in Vesuvius for centuries, and the spectacle is regarded as one of the most magnificent and sublime ever witnessed in nature.

The accounts received at Massowah of the condition and progress of the British expedition in Abyssinia are all favorable. The army was steadily advancing into the interior. Up to date of the latest dispatch they had met with no opposition; but on the contrary they had been received in a friendly manner by the natives everywhere along the line of march.

Despatches from China state that owing to the recent remonstrances and formidable demonstrations made by the foreign powers, the Formosans have promised to treat shipwrecked sailors with humanity hereafter, and the Chinese government has guaranteed that the promise shall be kept.

Thursday as well as Wednesday will be observed as a holiday, and on both days business will be entirely suspended, and the exchange and markets here and at Liverpool will be closed.

PARIS, Dec. 24.—The debate on the Bill for the reorganization of the army was continued in the Corps Legislatif yesterday. Marshal Niel made a speech, in which he defended the Bill, on the ground that such a measure would have the tendency to prevent war, and was in effect a guarantee of peace. M. Jules Favre spoke for the second time against the Bill, denouncing it in strong terms as a dangerous instrument. M. Ollivier said the introduction of the Bill at this time proved that the government anticipated an early war. He thought France would be much stronger and better prepared for hostile contingencies should a constitutional system of government be granted to the nation. This he most earnestly wished the country would eventually have.

PARIS, December 24, evening.—The unsettled condition of affairs in Florence causes much anxiety here. The changes impending in the Italian government, it is feared, will place Italy in a menacing attitude towards France. The feeling on the bourse is uneasy, and rents have been flat and nominal all day.

FLORENCE, Dec. 24.—The existing Cabinet is not to be dissolved. Some changes in its composition will be made; but Gen. Menabrea will remain at the head of the Government, and under his direction the re-organization of the Ministry will proceed.

VIENNA, Dec. 24.—The Bill for the emancipation of the Jews has passed the Reichsrath.

Second Despatch.

QUEENSTOWN, Dec. 25.—The steamer "Etna," from New York, 14th inst., arrived to-day.

LONDON, Dec. 25.—The precautions of the government against the Fenians continue very extensive, and unusual preparations have been made to-day, which indicate that the authorities are in possession of information that a general attempt is to be made by the Fenians to rescue the prisoners confined in various parts of the United Kingdom, for complicity in the late outrages, both in England and Ireland. In addition to the regular police force, special constables are everywhere on duty, and other emergency measures have been adopted by the government, which it is hoped will result in preserving order.

The Times to-day in an editorial on the Abyssinian war, says it fears the war will be protracted until next year. It blames Sir Wm. Napier, the Commander of the British forces, for the delays which the expedition has encountered, and says nothing of consequence can be done during the present season.

The Russian government has addressed a note

to the government of France, protesting earnestly against the shifting policy of the latter upon the Eastern question.

Advices from China by the overland mail and telegraph, report that the rebels are meeting with success in their operations against the Imperial government.

LIVERPOOL, Dec. 26.—The steamer "France," from New York, has arrived.

LONDON, Dec. 26.—To-day is observed as a holiday, and there are no regular commercial or financial transactions. On the street 5-30s are 72½.

—The salaries of the local Ministers of Quebec are said to be fixed at \$5,000; the Premier's at \$4,000.

—On Tuesday a man named Charles Lalonde was drowned while crossing the ice from Wolfe Island to Kingston.

MARRIED.

On Christmas Day, at the residence of the bride's father, by the Rev. E. L. Foster, D.D., a Union, a Mr. Morrow, B. A., J. S. Loomis, M. D., of Malton, to Jennie, daughter of William Vandervoort, Esq., of Stirling.

SPECIAL NOTICES.

R. R. R. PILLS.

Composed of vegetable extracts (prepared in Vienna), they purify the blood, regulate the liver, and purge all corrupt and acrimonious humors from the system. One of Dr. R. R. R. Pills contains more of the active principle of cure, and will set quicker on the liver, bowels, stomach, kidneys, bladder, blood, etc., than four or six of the ordinary common Purgative or Cathartic Pills sold under various names, or after ten grains of True Mass. True comfort for the aged and others afflicted with Constipation and Pains of the Bowels. One Dose of R. R. R. Pills—taken once in 24 hours, will secure regular evacuations from the bowels. Persons who for 20 years have not enjoyed natural health, and have been compelled to use medicine, have been cured by a few boxes of R. R. R. Pills. Dr. R. R. R. PILLS CURE ALL DISEASES OF THE STOMACH, LIVER, BOWELS, KIDNEYS, BLADDER, NERVOUS DISORDERS, HEADACHE, CONSTIPATION, GOUT, INDIGESTION, DYSPEPSIA, BILIOUSNESS, RHEUMATISM, NEURALGIA, MIGRAINE, AND ALL AFFECTIONS OF THE INTERNAL VISCERA. One to six boxes warranted to effect a positive Cure. Purify your system. R. R. R. PILLS are sold by all Druggists and Country Merchants. Price 25¢ per box. The disease cured by Dr. R. R. R. Pills sold by all Druggists and Country Merchants. Price 25¢ per box. See Dr. R. R. R. Pills Almanac for 1868. 44c

Dr. P. Meredith, Dentist, Office No. 123 West Sixth Street, St. Paul, Minn. CINCINNATI, October 1, 1868.

Messrs. J. S. Harris & Co.—Dear Sir:—About one year ago I took cold which settled on my lungs. A violent cough was the consequence, which increased with severity. I experienced no relief from any medicine I used. During the last winter I became so much reduced that I was confined to my bed. The disease continued with cold chills and night sweats. A doctor set me, my friends thought I was in the last stages of Consumption, and could not possibly get well. I was recom-

ALLEN'S EYE BALSAM.
The formula was shown to me, which induced me to give a trial, and I will only add that my cure is entirely cured, and I will not do so without my thanks as usual. Yours respectfully, P. MEREDITH.
Sold by all Family Medicine dealers.

PROSPECTUS
OF THE
BAY STATE MINING COMPANY,
(LIMITED.)
Capital Stock \$120,000, divided into 1,200 Shares of \$100 each.
WORKING CAPITAL, - - - \$24,000.

THIS COMPANY is duly incorporated under Chap. 23 Cons. Statutes of Canada, and is
formed for the particular purpose of developing the mineral resources of part of Lot
84 acres of land secured to the Township of Madoc, containing the Bay State Mine and
operations as may from time to time be determined upon.

A shaft has already been sunk to the depth of 37 feet, each successive foot
disclosing rich and new materials. The lode is fully five feet wide, and, in the opinion of
Dr. Otway, one of the best defined lodes yet discovered in the district. Indeed, he believes
it to be a continuation of the same lode as that at the Richardson Mine, and that it may
probably equal it in ultimate results.

Various assays have been made from rocks taken from the mine at different depths. One
by Mr. Wyckoff, from 4 1/2 lbs. ore, taken from a depth of 30 feet, yielded:
Gold, 44 grains—value per ton. \$80 00
Silver. 4 17

Total value per ton. \$84 17
Another by Dr. Otway, made with ore from a depth of 35 feet, yielded \$30 to the ton,
including \$30 of silver. Another still from a depth of 27 feet, gave a yield of \$327 to the ton.
The average result of three other assays at depths varying from 30 to 33 feet—two of
them by Dr. Otway and one by Mr. J. McFarlane—was \$514 to the ton.

An offer has been received from a highly respectable firm of machinists to erect a crushing
mill and take half their pay in the Company's stock, their agent having been to erect a crushing
and satisfied himself of the character of the mine. Negotiations are now in progress for
the erection of a mill, which is hoped will be in operation within three months; so that
dividends may be looked for at an early date.

There can be no doubt now of the probable success of most of our Mining Companies, if
managed with tolerable prudence. It is well known that in Australia immense profits are
realized from their mines, though their average yield of gold per ton of ore is only \$7, while
in Nova Scotia it is only \$9 to \$10, and in California nearly the same. The return of \$19 to the
ton from the Bay State mine in Turkey & Gilbert's mill is therefore a sound basis to work upon,
and will undoubtedly yield large returns; and yet, as it was taken from near the surface,
it may be regarded as a mere indication of the richer deposits below. As a sample of what
the Port Phillip Gold Mining Company, in Australia, obtained from their mine—which gives
an average of only 10 1/2 lbs. of gold per ton (equal to \$9.25)—the very large amount of
\$350,000 for the first nine months of the present year. Again, the Empire Mine, in Nevada,
which has only a claim 20 ft. in length upon the Comstock lode, and whose quartz yielded
only \$34.50 to the ton, realized last year the enormous sum of \$486,000. Other examples
might be given from Nova Scotia and other gold countries; but every intelligent man can
make these inquiries for himself.

This Company propose to issue at present only a very limited amount of stock, just
as much as is needful to proceed vigorously in the development of the mine, as they feel
confident that the stock must speedily rise in value; and if more funds should afterwards
be needed, an advanced price can be obtained.

The following are the Directors for the first year:

E. H. HOLTON, Belleville.
F. H. ROUS, Belleville.
JOHN MCFEE, Belleville.
R. E. LUND, Manager and Overseer of the Mine.
L. MCQUARRIE, Eldorado.
J. B. LAZIER, Eldorado.
A. HURD, Port Perry.
E. W. HOLTON, President.
F. H. ROUS, Secretary and Treasurer.
Applications for shares may be made to the Secretary, to JOHN MCFEE, Front Street,
Belleville, or to WILLIAM KIRSTEMAN, 62 Church Street, Toronto.

The Cheese Market.

[From the Utica Herald, December 17th.]

There were about 400 boxes of cheese from family dairies at Little Falls market on Monday, Dec. 9. Prices were no better than the week previous, and we noticed fewer dealers on the ground. This was to be expected, as the weather was extremely cold and near the close of the cheese making.

Sales were made at from 12c to 14c, only a few reaching the last figure. We have no report of factories this week. We think there can be but little, comparatively, of factory cheese now back, most of it being sold or sent forward to New York to be held for better times.

We have advices from abroad down to Nov. 23. R. Macdonald, of Liverpool, says, at that date, that the imports for the week have been only 7,446 boxes. He remarks that there is a good demand for fine factories at 52c to 54c, and some very extra quality has been sold at 54c to 56c; medium to good parcels sell but slowly at 45c to 50c.

Our London correspondent reports that two hundred tons of English cheese was put on the Salisbury market on the week ending Nov. 24, and one hundred and eighty tons sold at 40c to 46c. The supply of English cheese will carry the dealers along some two months, when a brisk demand for American is anticipated. We can scarcely hope, then, to have much better prices until about the middle of the year.

The fact that the English dairymen are putting their cheese into the market so early must show that the demand for American will be considerable in the spring and we shall hope that our stocks, which will not exceed 250,000 to 300,000 boxes, will go out at fair rates.

'There's our grandmother,' says a contemporary, 'a striking instance why women should vote. She's paid taxes for a dog the last ten years, and now declares she won't stand it any longer—she'll either vote or kill the dog!'

A Connecticut landlord, having been flooded out of a cow's head, followed his debtor some 30 miles, and seizing the value of the delinquent, returned home, telling the fellow he could have it when he paid up arrearages. Arriving home, and the great not appearing to pay charges and take it away, the landlord opened the value to examine his security, and found—his own overcoat!

GEO. D. WYCKOFF, A. L. MCLELLAN, JAS. J. CARL RITCHIE, E. E. KILVARY, ASA A. BURMAN, JR., J. E. O'REILLY, E. H. HALE, and HUGH FAIRBERIE, are the owners of the property hereinafter mentioned, and are desirous of forming a Stock Company with the capital of \$25,000, and to receive and take in payment for the said property \$1,250 in cash, and 2,250 shares of paid up Stock of the said company. The said parties are now taking proceedings for its incorporation, under cap. 23, 27-29 Vic., and have much pleasure in calling the attention of the public to the following Prospectus:

This Company is formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives this company peculiar advantages over many others, there being on the property a high ridge or mountain of rock, in which numerous veins of gold-bearing quartz crop out, and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of back to work upon, which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metals, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Another great advantage in this property is, that immediately the work is commenced ore can be taken out in quantities more than sufficient to pay the working expenses and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

PROSPECTUS OF THE EL DORADO MINING COMPANY OF MADOC. (LIMITED.)

CAPITAL STOCK - - - \$72,000.

Divided into 2,400 Shares of \$30 Each.

Deposit on Subscription, \$15 Per Share.

THIS COMPANY is formed, and proceedings taken for its incorporation, under Chapter 23-27, and 28 Vic., for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the Northeast quarter of Lot 17, in the 5th Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present, there are two shafts sunk on the property about 200 feet apart, one 40 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one ton of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$33.80 in Gold, which specimen can be seen at J. E. Ellis', on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore.

The projectors have determined only to sell sufficient stock to repay the advances, and to carry on the work until they have thereupon decided to sell only \$22 shares of the value of \$30 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 1st of January, 1898. Out of the above sales, \$10,000 is to be retained by the projectors for working expenses.

In presenting this company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings.
RICHARD SPARKING, Managing Director and Superintendent.
T. S. MCGILVER, of Madoc.
MARTIN BIRWELL, MCGREGOR, of Madoc.
A. D. MITCHELL, of Madoc.
ALDERMAN VICKERS, of Toronto.
J. E. ELLIS, of Toronto.

MCLELLAN & MCLELLAN, Solicitors. A. F. WOOD, President.
BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

Applications for Shares received by Alderman Vicker, Yonge Street, Toronto; J. E. Ellis, King Street, Toronto, and at the office of

WILLIAM KERSTEMAN,
62 Church Street, Toronto. 173-47

American Watches.

THE true value of Machinery applied to Watchmaking is that it is that by its use Watches are made rapidly, and that they are made correctly. Very few people know why a Waltham Watch should be superior to any other. In the first place, at Waltham the Watch is regarded as only a machine, to be constructed, like any other machine, on mechanical principles. The factory is indeed, little else than a machine shop, the principal work in which is not more upon watches than upon machinery to make watches with. If the watches are good, it is because the machinery is good. Of course, there must be no defect in the principle of plan or the movement, no mistake in the size or shape of the pieces of which it is composed, no error in their positions. These points once thoroughly settled in regard to each part of every variety of watch, it rests wholly with the machinery constructed with infinite diversity of form and function, expressly for the purpose, to produce the finished piece. The method established in every department is the reproduction of parts by mechanical means, and this is carried out on the system of the most thorough subdivision.

By means of multiplying gauges and microscopes, tests and inspection for the detection of wear in cut teeth, and for faults and flaws in steel or bronze, are made to accompany the work in every stage from beginning to end. As a necessary result, the Watch goes together a finished machine. Every part is found to fit properly in its place. Every pin will be pushed till it shudders, and every screw turned home—instead of slugging and feeling, as in the balance, even under the pressure of the lightest mainspring, vibrates with a wide and free motion, and the beat has the clear ringing sound always characteristic of the Waltham Watch. The machine is a time keeper from the start.

This system of watchmaking is unknown in foreign countries, and is entirely original with the Waltham Company. The Company claim that by it they produce Watches that cannot be equalled for every quality which makes a watch valuable. Simple in plan, and correct in principle, the movement is not only beautifully finished, substantial, accurate and cheap, but is uniform to the minutest details, not easily damaged, easily repaired, and when repaired always as good as new.

There are different grades of finish in the different varieties of Watches made by the Waltham Company, as there are different sizes and shapes to suit all tastes and means; but every Watch that bears the genuine trade mark of "WALTHAM" is guaranteed to be a good one, and nobody need be afraid to buy it.

EVERY WATCH FULLY WARRANTED.

For sale by all first-class dealers in the United States and Canada. Write for Circulars to ROBBINS & APPLETON, 102 Broadway, N.Y.

ROBERT WILKES, Toronto and Montreal Agents.
Toronto, Nov. 2, 1897. 168-3m 40-3m

The Daily Intelligencer

WILL appear about five o'clock every afternoon (Sundays excepted) and will be furnished by carriers at the rate of 4c a year if paid in advance, 6c otherwise. Mail subscribers \$3 a year. \$3.50 for 6 months; \$1.50 for 3 months.

It will contain the latest telegraphic news up to the hour of going to press, including Cable dispatches and the New York and Montreal Markets.

Arrangements have been made with RELIABLE CORRESPONDENTS in London, Montreal, Mexico and other cities, who will furnish us with early and full information respecting the Gold Regions.

Special attention will be paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c., &c., and in short, neither news nor advertisements will be omitted to make the DAILY INTELLIGENCER worthy of public patronage.

RATES OF ADVERTISING.
A liberal scale of prices for advertisements has been arranged as follows:

Cards, not exceeding six lines, 6 months, \$5.00
Half-page, 6 months, \$10.00
One Square, 6 months, \$20.00
One Square, 3 months, \$10.00
Four Squares, 6 months, \$50.00
Notices of Births, 50
Do of Deaths, 50
"BUSINESS NOTICES"—All matter under this heading, headed or solid, 30 cents per line, measured by a solid column of 10 lines.
Advertisers contracting for any space not less than half a square can have the privilege of changing their advertisements every two weeks. Transient advertisements inserted at 2 cents per line for first insertion, and 2 cents for each additional insertion.

The Weekly Intelligencer

Is published every Friday Morning at 4c per annum if mailed at the Office, or sent by mail; and 4c if delivered by the Carrier, payable in advance. When not paid until the close of the year, 50 cents will be added to each year's subscription. No paper discontinued until arrears are paid up, except at the option of the Publisher.

Within the past three months its circulation has rapidly increased, and the number now on our Subscribers' list is fully 1,400. With such a large and general circulation throughout this and adjoining Counties, the WEEKLY INTELLIGENCER presents unassailable advantages to advertisers.

RATES OF ADVERTISING.
Six lines and under, first insertion, 0.50
Each subsequent insertion, 0.25
Above six lines (per line) first insertion 0.50
Each subsequent insertion per line, 0.25
"BUSINESS NOTICES"—10 cents per line each insertion, measured as solid matter.
A liberal discount made to those who advertise by the year.

Advertisements for insertion must be delivered before 12 o'clock, noon, on Thursday to insure their appearance.

All advertisements without written directions inserted until forbid, and charged accordingly.

The Intelligencer Job Office

Is supplied with Power Presses, Hand Presses, and possesses every facility for the rapid and neat execution of all kinds of printing, and fancy printing, at prices as low as any other establishment in the city.

The DAILY INTELLIGENCER can be had at the Book Store in Belleville, at Wilson's Drug Store, and at El Dorado. All orders by mail promptly attended to.

FIRE and LIFE.

LIFE DEPARTMENT.

THE principles on which this Company is
founded contain all the elements required to
develop the benefits of Life Assurance, and
afford every facility to intending assureds.—
One of the advantages secured by those who
insure their lives with this Company is that the
outside expenditure for Management is
absolutely restricted by the Deed of Settlement
to Ten per Cent. of the Net Life
Income. This most important restriction
shows that the interests of participating policy
holders are closely watched and carefully at-
tended to by the Company. Attention is es-
pecially called to this point, as the proportion
of premiums expended for Management
Must Largely Influence Profits
and Bonuses.

The next division of profits takes place in
1893, and all those who wish to participate in
the profits should insure at once.

McKeown & Robertson,

MANUFACTURERS and Wholesale and
Retail dealers in Boots and Shoes, Front
Street, Belleville. Their stock is always large,
and they are prepared to make boots and shoes
at extremely low prices for cash. They are

defects. Look at the good things. Accept your lot as a man does a piece of rugged soil, and begin to get the rocks and stones, to deepen and mellow the soil, to enrich and plant it. There is something in the man who can do this, and in the soil which a man may develop an honest pride.—*Irish Evangelist.*

Forgiveness.

Imagine that you saw some mauler led along to the place of execution, wailing and weeping for his mispent time, for his bloody acts, for his heinous crimes; and that his wailings and weepings were so bitter that they were able to force tears from others, and to make all eyes shut and water that did not look upon him. But then, if this man, in this case, should suddenly see his king running and riding toward him with a pardon in his hand, what a sight would this be! Surely, none like it. Thus it was with man, sorrowing and repenting for sin, whilst he is weeping over the sadness of his condition, and confessing what a little step there is between him and damnation (if he were even dropping into hell). In amazement he looks up into "Christ," whom he sees with a spear in his side, with thorns in his head, with nails in his feet, and a pardon in his hands. This was a sight indeed—a most pleasant, ravishing, heavenly sight—such as not all the rich and luxurious splendours on earth, nor all the glittering sparkles in Heaven, could afford the like.—*Irish Evangelist.*

The Fenians.

(From the N. Y. World, Dec. 24.)

During the past six weeks there has been unusual activity in Fenian circles looking to be a union of the organizations presided over by Messrs. Roberts and Savage, under one tried and reliable chief. The committee appointed by the Senate to negotiate with Mr. Savage, brought his labours to a close in a most creditable manner, the utmost good feeling being manifested on both sides after the first "broadside" was fired and returned. Congress and Conventions were proposed, and rejected on the grounds of being too expensive. Finally it was decided that Col. Roberts should have the power to appoint seven gentlemen, and Mr. Savage the same number, to act as a council, the fourteen to appoint an additional number, after which they should at once proceed to elect a President of the United Brotherhood, provided the office was refused by John Mitchell, Messrs. Roberts and Savage, in accordance with the agreement for union, tendered the office of chief to Mr. Mitchell, who, after mature consideration, sent the following letter to those gentlemen:—

"IRISH CITIZENS' OFFICE, No. 31, Barley Street, New York, Dec. 19, 1887.
To COL. WILLIAM ROBERTS AND JOHN SAVAGE ESQs:—

GENTLEMEN—The tender you have made to me of the Presidency of the re-united Fenian Brotherhood, though it has embarrassed me, could not fail to be gratifying on three counts—first, that it proves confidence in me personally;—and next, that it marks the moment of a reconciliation between two bodies of patriotic Irishmen having the same object in view. On this reconciliation, brought about by your own efforts, gentlemen allow me to congratulate you.

But, after sufficient time taken for consideration; after reading the constitution, and holding some conversation with some of the leading members of those organizations, I must beg leave respectfully to decline the honor tendered, and the responsibility which they would pay me the complement of imposing upon me. And I have the less regret in coming to this conclusion as it cannot be said I had any obstacle in the way of a reunion of our countrymen. That reunion is already effected, with a provision for electing a president in case of my refusing.

It is useless to me to enter into account of the various reasons (some of a public, some of a private nature) which compel me to decline. My countrymen know very well that I have the fullest sympathy with the objects of Fenianism, and that the destruction of British dominion in Ireland; and, therefore, I expect they will give me credit for valid reasons without my entering into detail.

With thanks for your courtesy, gentlemen in the execution of your mission, and assurances of respect for you personally, I have the honor to be

Your obedient servant,

JOHN MITCHELL.

The Council will meet some time between now and the first of the new year for the election of a President. Colonel Roberts, it is understood, is not anxious for any further executive honors, and the probabilities are that Mr. Savage will be chosen chief of the reunited brotherhood. When he accepted the leadership of the almost defunct Stephens organization, he did so for the purpose of bringing about a union in spite of all opposition, and he has faithfully carried out his object.

—Steam power is successfully used in London in pulling down old houses, where the contractor cares little about preserving the material.

—One of the Illinois railroads carried more than 50,000 hogs during the month of November, besides nearly 12,000 head of other kinds of live stock.

—The skating costume of a Parisian consists of black velvet, lined with violet silk and trimmed with chinchilla. This is covered with an elegant polonaise, color Bismarck, also with violet silk.

—An American panther, or cougar, measuring three feet six inches in height and five feet in length, has been shot in Wisconsin. Twelve dollars bounty was paid for this, the largest animal of the kind ever seen in that region.

—The trip of Dickens to the country will, it is expected, make \$200,000 for him. He made \$200,000 at Boston. He is at present engaged upon three new stories, one of which is to be published in the Atlantic Monthly.

Daily Intelligencer.

BELLEVILLE, SATURDAY, DEC. 28.

QUEBEC LEGISLATURE.—The Quebec Legislature assembled yesterday afternoon, and elected M. J. G. Blanchet, member for Lewis, Speaker.

SUCIDE.—The Leader records the death by suicide of Mr. Greer, who was for a number of years manager of the Bank of Montreal in that city, and more lately cashier of the Bank of Commerce. Some time ago, through health, he was obliged to resign his situation. A short time ago his removal to a private asylum in New York was rendered necessary, and on Thursday night last he committed suicide.

PROHIBITORY LAW.—Our neighbors across the Bay are advancing. The *Pictou Times* says for several years the Township of Athol had a prohibitory liquor law known as the "Dunkin Act," and during the past year the Township of Hallowell has tried the experiment, and it has given such general satisfaction that the idea was conceived of extending the blessing to the whole County. At the meeting of the County Council on Friday a petition signed by 5,000 persons was presented, asking the Council to pass a By-Law prohibiting the issuing of licenses and sale of intoxicating liquors. The Council complied with the prayer of the petition, and the By-Law was passed and will be submitted to the people in about a month. The *Times* has no doubt the people will approve of it. Happy County! No debts, no toll-gates, bad roads and light taxes, and no whiskey!

Madoc Gold Mines.

The encouraging news daily received from the mining region should be a cause for profound satisfaction to our citizens, and more especially to those of Madoc and adjoining townships, from the fact that our mineral resources are now being tested in a manner worthy of their great importance and magnitude. Heretofore mining operations have been greatly retarded, owing to the necessary delays in erecting crushers for the practical reduction of the ores.—Meantime companies have been organizing and perfecting their arrangements for the rigorous prosecution of mining operations, prospectuses have been circulated throughout the country, soliciting the aid of capitalists. This appeal has not been made in vain—many of our most substantial business men are now in mining harness, each sanguine of success in the final issue of their investments, which have been made with a degree of caution and good judgment.

Of the numerous mining companies now at work, one, the Empire Mining Company of Madoc village is giving strong proofs of sincerity and practical wisdom; the promoters of the enterprise—few in number—have vigorously prosecuted the development of their mineral property in a manner deserving of praise for their energy and perseverance; and we are glad to learn that their labors have been rewarded with most gratifying results.—The first ton of ore from the Empire, crushed by Messrs. Daniels, Scott & Taylor, yielded \$34.76. A more thorough test was deemed advisable by the owners, and fourteen tons of ore, varying from the surface to a depth of eighteen feet, was reduced at the same crusher and yielded \$21.40 per ton. This practical result from the general average of the ore, places the "Empire" in the front rank of Madoc mines. The owners of this mine have entered into a contract with Messrs. Daniels, Scott & Taylor for the immediate construction of a crusher, with capacity for ten tons per day. An exception so marked among so many companies, is deserving of this special notice, and we trust the most sanguine expectations of the proprietors may be fully realized.

Ontario Legislature.

Yesterday afternoon the first meeting of the Legislature of Ontario took place at Toronto. Mr. Stevenson, of Napanee, was chosen unanimously Speaker of the Assembly. He was nominated by Hon. John S. Macdonald, and seconded by Hon. John Carling, who both briefly addressed the House on the occasion. Mr. McKellar, Sir Henry Smith, Mr. T. R. Ferguson, and Mr. J. Boyd made short speeches. Mr. McKellar, leader of the Opposition, was evidently chagrined at the nomination, although he accepted it because as he said Mr. Stevenson was a member of the same party as

himself. Sir Henry Smith for the very opposite reason assigned by Mr. McKellar, supported the nomination of the Government. Mr. Stevenson had opposed the extreme Grits, and because he had done so he should receive his support.

The only business done was the election of Speaker. From some observations which fell from Hon. John S. Macdonald, it is likely a short adjournment of the Assembly will take place if a majority of the members should decide it. This afternoon the Governor General will deliver the opening speech.

St. John's Day.

The Masonic celebration on St. John's Day, notwithstanding the unfavorable weather, was one of the most successful ever gotten up in Belleville. Had the weather been fine and sleighing good, a larger number of the Brethren from a distance would doubtless have been present. As it was, the turnout of the Masons in the afternoon was the largest seen in Belleville for many years, and the festival was one of the most successful ever held here.

At three o'clock the Brethren, headed by a portion of the Royal Canadian Rifle Band, marched from their Lodge Room to the Episcopal Methodist Church, where an impressive and eloquent discourse was preached by the Rev. Brother Wild.

In the evening there was a grand festival at Ontario Hall, which was very largely attended. The hall was tastefully decorated with banners, flags, evergreens, mottoes of various kinds, and devices and emblems of Masonry, the whole presenting a very pleasing effect, and reflecting credit upon the Committee to whom was entrusted the decoration of the room. The first part of the evening's entertainment consisted of a concert by the Philharmonic Society of Belleville, under the leadership of Mr. Crozier. The programme contained a number of excellent selections, which were admirably performed; indeed, some of the pieces were rendered in a manner which would have done credit to professionals. The concert ended about half-past ten o'clock, when the floor was cleared and dancing commenced, which continued until an early hour this morning. The music was furnished by a quadrille band from the Royal Canadian Rifle Regimental Band, and it need hardly be said was all that could be desired. The best of feeling prevailed, and under the able direction of R. W. Bz. L. H. Henderson, the whole entertainment passed off in the most satisfactory manner.

The supper was got up by Mr. Cronyn, of the Club House, who distinguished himself as one of the best caterers in the country.

Albert College.

Stock Market.

The following report of the stock market is from the Montreal *Gazette* of yesterday: As usual, at this season of the year, there has been almost a total absence of business during the past week, nor can any improvement be expected till after the first of January.

Bank of Montreal—Has advanced one per cent, and is in demand at 129 1/2 to 130.

Bank of British North America—Books closed for payment of a dividend of three per cent.

City Bank—Is rather heavier with no buyers over 98 1/2.

Molson's Bank—Is in good demand at 110, with sellers at 111.

Merchants' Bank—Is now quoted ex div. Merchants' Bank—Nominal at 97 1/2.

La Banque du Peuple—Buyers offer 107; no stock in market.

La Bank Jacques Cartier—Is offered at 106 1/2.

Quebec Bank—Small sale reported at 99 1/2.

La Banque Nationale—Sellers ask 107 1/2, with buyers at 106 1/2.

Union Bank of Lower Canada—Is offering 101 1/2, Ex Div, with buyers at 100 1/2.

Eastern Township Bank—No transactions ex-dividend.

Commercial Bank of Canada—Continues firm at quotations. Sales during the week at 29 to 30.

Ontario Bank—Has declined one per cent, closing dull at 99 1/2.

Bank of Toronto—No transactions ex-dividend.

Gore Bank—Is not asked for.

Royal Canadian Bank—There are buyers at 94 to 95 ex-dividend.

Canadian Bank of Commerce—Neither buyers nor sellers in dividend.

Montreal Telegraph Company—In demand at 133. No stock in market.

Canada Delimitation—Small sales of sterling Fives at 80 1/2, at which they are still procurable. No Sixes in market.

The only business done was the election of Speaker. From some observations which fell from Hon. John S. Macdonald, it is likely a short adjournment of the Assembly will take place if a majority of the members should decide it. This afternoon the Governor General will deliver the opening speech.

to buy land in Honduras, and export the products of these forests.

New York, Dec. 27.—The *Herald's* Charlotte County, Va., special, says along and throughout several counties, a reign of terror prevails. The freedmen have become desperate awaiting the distribution of the farms, and now seek revenge by house-burning, fire-raising, and other outrages. Murder and arson are of nightly occurrence, and a war of races seems inevitable. The civil authorities are powerless to protect, and military posts are so remote that the whites have determined to defend themselves in different ways, but their resolution is "death before negro supremacy." The forty acres and two mules promised the negroes at Christmas, not being forthcoming, has caused this terrible state of affairs.

Telegraphic News.

BY ATLANTIC CABLE.

LONDON, Dec. 27 (rebus).—Another of those fiendish outrages which have characterized the operations of the Fenian Brotherhood has just been perpetrated at Dublin. Telegrams received from there today give the following particulars:—An unusually large number of letters have been recently received at the post office at Dublin directed to prominent officials. Each of these letters was loaded with explosive materials designed to kill the person addressed. Several of them exploded before their real nature was ascertained, but up to this time no person has been killed. One of the policemen of the city who received one of these letters was horribly mangled by the explosion which occurred when he opened it. It is not known how many of these dangerous missiles have been dispatched. Considerable excitement prevails both in Dublin and elsewhere throughout the country on the discovery of this the latest Fenian outrage. The authorities are actively investigating and will no doubt probe the matter to the bottom.

The London *Times* this morning has an editorial notice on the Fenian question. It says that no less than 30,000 special constables have been sworn in and are now serving in London. The writer calls attention to the grave public danger, and calls on the provincial cities and towns to emulate the precautionary measures of the metropolis.

LONDON, Dec. 27.—The *Times* to-day praisers the Americans for their magnanimity in giving Mr. Dickens such a hearty reception.

A despatch from India announces the departure from Bombay of General Napier for Masowah, to take immediate command of the British expedition now advancing into the interior of Abyssinia.

It is reported that the Sublime Porte has offered to the Cretans an autonomous government, and has named Prince Christian as its head.

PARIS, Dec. 27.—The *Moniteur* to-day contains an official note to the effect that the coupons on the Italian bonds will be paid.

VIENNA, Dec. 27.—By the re-arrangement of the Austrian Cabinet, Baron Von Bues becomes president of the ministerial council, but retains the post of Minister of Foreign Affairs, which he has long held in connection with the former position.

BERLIN, Dec. 27, evening.—A general council of the Zollverein, in which all the states of North and South Germany are to be represented for the first time since the late war, will be held in this city next March.

Prussia to-day commenced withdrawing her troops from all parts of Saxony, except the fortress of Konigsstein.

FLORENCE, Dec. 27.—It is said that General Menabrea has decided on his intention to dissolve the national Parliament now in session on the 15th proximo, and make an appeal to the country should another vote unfavorable to the ministry be adopted before that time.

PARIS, Dec. 27, evening.—The Pope has enjoin the Rothschilds against paying the coupons on the Italian bonds in this city.

American Despatches.

CHICAGO, Dec. 27.—A locomotive belonging to the Chicago and Rock Island Railroad Company exploded this morning, killing one man instantly and wounding two others.

SPRINGFIELD, Mass., Dec. 27.—Erna C. White, of Williamsburg, in a quarrel this morning, shot Mrs. Maria L. French through the head, inflicting a fatal wound.

BOSTON, Dec. 27.—There was some excitement to-day in financial circles on account of a report that the cash of the Receiving Tellers of the Shawmut Bank, Mr. Bryant T. Henry, fell short to the amount of \$30,000.

HATANA, Dec. 27.—Santa Anna denies any intention of going to Mexico. The Imperialists here are reluctant over the news from St. Domingo. Many engagements have taken place, in which victories are claimed by the government, but the Baz party is nevertheless gaining adherents and strength. The only portion of the island which has proclaimed for Baz, is the north, where lies his principal strength.

Ten of the murderers of Col. Sanchez have been shot. Sanchez was President of the Court Martial that tried Maximilian.

Senor Rigat, President of the Cabinet of the Dominican government, has arrived here on his way to Washington to close negotiations in relation to Samana. The resignation of part of Cabral's Cabinet had been accepted, and Valverde, Curiel, and Perdomo appointed to fill the vacancies.

Advices from the capital of Mexico to the 15th, have been received.

The excitement among foreigners, consequent upon the withdrawal of British Legation, still continues. Correspondence from Europe states that it is impossible that any money could be raised in the old world for enterprises in Mexico.

There was a great deal of misery, and banks were quite active in all sections. The ex-imperialists in Campanche were fearing the aggressions of their republican neighbors for their actions of the late revolution at Merida. The tendency of the late revolution as far as proclaimed, is in favor of Santa Anna.

Advices from Magaguay of the 15th, state that shocks of earthquakes continue there.

Intelligence from Honduras state that Mr. McEae found the forests there so dense and the timber so valuable, that he intends to return at once to Jamaica for the means and elements

Editorial Summary.

—Wolverines are plentiful in the Township of Brock.

—A small boy was buried up in a vat of

SPECIAL NOTICES.

R. R. R. PILLS.

Composed of vegetable extracts (prepared in vacuo), they purify the blood, regulate the liver and purge all corrupt and acrimonious humors from the system.

One of Dr. Radway's Pills contains more of the active principle of cure, and will act quicker on the Liver, Bowels, Stomach, Kidneys, Bladder, Blood, &c., than four or six of the ordinary common Purgative or Cathartic Pills sold under various names, or than ten grains of Blue Mass.

True comfort for the aged and others afflicted with Constipation and Pains of the Bowels.

One to Three of Radway's Pills—once in 24 hours, will secure regular evacuations from the bowels. Persons who for 20 years have not enjoyed a natural stool, and have been compelled to use medicine, have been cured by a few doses of Radway's Pills.

Dr. Radway's PILLS CURE ALL DISEASES OF THE Stomach, Liver, Bowels, Kidneys, Bladder, Nervous System, Headache, Constipation, Costiveness, Indigestion, Dyspepsia, Biliousness, Bilious Fever, Inflammation of the Bowels, Piles, and Barrenness of the Internal Viscera. One to six boxes warranted to effect a positive cure. Purity vegetable, contains no mercury, minerals, or deleterious drugs.

Dr. Radway's Pills sold by all Druggists and Country Merchants. Price 25 cents.

See Dr. Radway's Almanac for 1868. 44-2w

Dr. P. Meredith, Dentist, office No. 132 West Sixth Street, states as follows:

October 1, 1868.

Messrs. J. N. Harris & Co.—Gentlemen:—About one year ago I took a cold which ended in a severe attack of Catarrh of the Bladder. A violent discharge of large quantities of Phlegm and mucus. During the last winter I became so much reduced that I was confined to my bed. The disease was attended with cold chills and rigors. A discharge of blood from the urine. I was in the last stage of Consumption, and could not possibly get well. I was recommended to use Dr. Radway's PILLS.

Dr. Radway's PILLS CURE ALL DISEASES OF THE Stomach, Liver, Bowels, Kidneys, Bladder, Nervous System, Headache, Constipation, Costiveness, Indigestion, Dyspepsia, Biliousness, Bilious Fever, Inflammation of the Bowels, Piles, and Barrenness of the Internal Viscera. PROSPECTUS

OF THE

BAY STATE MINING COMPANY,

(LIMITED.)

Capital Stock \$120,000, divided into 1,200 Shares of \$100 each.

WORKING CAPITAL - - - \$24,000.

THIS COMPANY is daily incorporated under Cap. 23 Cons. Statutes of Canada, and is formed for the particular purpose of developing the mineral resources of part of Lot 12 in the eighth concession of the Township of Madoc, containing the Bay State Mine and 84 acres of land secured to the Company, and generally for carrying on such other mining operations as may from time to time be determined upon.

A shaft has already been sunk to the depth of 37 feet, each successive foot disclosing rich and new materials. The lode is fully five feet wide, and in the opinion of Dr. Otway, one of the best defined lodes yet discovered in the district. Indeed, he believes it to be a continuation of the same lode as that at the Richardson Mine, and that it may probably equal it in ultimate value.

Various assays have been made from rocks taken from the mine at different depths. One by Mr. Wyckoff, from 44 lbs. ore, taken from a depth of 20 feet, yielded:

Gold, 44 grains—value per ton... \$80.00

Silver... 4.17

Total value per ton... \$84.17

Another by Dr. Otway, made with ore from a depth of 35 feet, yielded \$380 to the ton, including \$30 of silver. Another still from a chemist in Boston employed by A. P. Days of that city, made with rock from a depth of 27 feet, gave a yield of \$327 to the ton.

The average result of three other assays at depths varying from 30 to 35 feet—two of them by Dr. Otway and one by Mr. J. McFee—was \$514 to the ton.

An offer has been received from a highly respectable firm of machinists to erect a crushing mill and take their pay in the Company's stock, their agent having been to Eldorado and satisfied himself of the character of the mine. Negotiations are now in progress for the erection of a mill, which it is hoped will be in operation within three months; so that dividends may be looked for at an early date.

There can be no doubt now of the probable success of most of our Mining Companies, if managed with tolerable prudence. It is well known that in Australia immense profits are realized from their mines, though their average yield of gold per ton of ore is only \$7, while in Nova Scotia it is only \$9 to \$10, and in California nearly the same. The return of \$19 to the ton from the Bay State quartz in Turkey & Gilbert's mill is therefore a sound basis to work upon, and will undoubtedly yield large returns; and yet, as it was taken from near the surface, it may be regarded as a mere indication of the richer deposits below. As a sample of what may be looked for, even with a moderate amount of gold to the ton, it may be stated that the Port Philip Gold Mining Company, in Australia, obtained from their mine—which gives an average of only 9dw. 6 grs. of gold per ton (equal to \$9.25)—the very large amount of \$250,000 for the first half only of the present year. Again, the Empire Mine, in Nevada, which has only a claim 20 ft. in length upon the Comstock lode, and whose quartz yielded only \$24.50 to the ton, realized last year the enormous sum of \$480,000. Other examples might be given from Nova Scotia and other gold countries; but every intelligent man can make these inquiries for himself.

This Company proposes to issue at present only a very limited amount of stock, just so much as is needed to proceed vigorously in the development of the mine, as they feel confident that the stock must speedily rise in value; and if more funds should afterwards be needed, an advanced price can be obtained.

The following are the Directors for the first year:

E. H. HOLTON, Belleville.

F. H. ROUS, Belleville.

JOHN McFEE, Belleville.

R. E. LUND, Manager and Overseer of the Mine.

with very general regret throughout the island. Addresses have been presented to him from both houses of parliament of a character very far from being merely formal.

The association established at Hobart Town for the purpose of securing the abolition of state aid to religion, he decided to publish a small monthly newspaper and to circulate 10,000 copies throughout the colony.

The Cork correspondent of *Standard's* *New Letter* writes:—“We have promise of an unhappy winter in Ireland. The Fenians have within the past few days become more outspoken and daring than heretofore, and I am sorry to have to record, and meeting with encouragement from men holding Her Majesty's commission of the peace. Parties are going openly abroad levying subscriptions for Fenian objects, and this day the names of Deputies Laist, and Justices of the Peace were unnecessarily mentioned as throwing in their nites to the Fenian treasury.”

OPENING OF THE PROVINCIAL LEGISLATURE.

SPEECH OF THE LIEUT-GOVERNOR.

TORONTO, Dec. 28.—His Excellency the Lieutenant-Governor, at 3 o'clock, p.m., this day proceeded in state to the Chamber of the Legislative Assembly, and having taken his seat upon the throne, and the members of the Legislative Assembly being present, the Honourable John Stevenson then informed His Excellency that the choice of the Legislative Assembly had fallen upon him to be their Speaker, and he prayed for the members thereof the customary Parliamentary privileges. After which His Excellency was pleased to deliver the following

SPEECH.

Gentlemen of the Legislative Assembly:

In accordance with the provision of a statute of the Imperial Parliament for the federal union of the British North American Provinces, and for the erection of separate Local Governments in the Provinces of Ontario and Quebec, I have been deputed, in the name of Her Majesty the Queen, to open the first session of the Legislature of Ontario.

I rejoice at the opportunity which has been thus afforded to me of welcoming the representatives of the people in this city so long known as the capital of Upper Canada.

This day is the commencement of a new and important era in our political annals. We are met together under the authority of the British Crown to enter upon a more extended application than we have hitherto enjoyed of the principle of local self-government.

For years past it has been the aim and effort of Upper Canada to secure a more direct and unlimited control over its own local affairs than was attainable while in Legislative alliance with another province.

Sensible of the many advantages which have accrued to both sections from this Union since its accomplishment in the year 1841, the people of this Province have nevertheless desired a wider and more elastic government system, which while it should strengthen and consolidate British dominion on this continent, should also afford larger opportunities for their own particular growth and expansion.

This object we have now obtained through the beneficent interposition of the mother country.

The provision for the future government of the Province is in one respect peculiar and exceptional. It confers upon you, gentlemen, the exclusive privilege of framing laws in relation to matters within your jurisdiction unaided and unchecked by the supervisory control of another chamber. It remains for you to justify by your wisdom, moderation and forethought the confidence so freely reposed in you by the Imperial Government.

You begin your legislative labours with resources at your disposal large enough to justify the hope that they will prove adequate, not only for the actual requirements of Government but also to satisfy the wants of this rapidly improving country. It will devolve upon you to consider the best and most appropriate means of husbanding the resources and of augmenting as far as possible the public wealth.

I would earnestly press upon your attention to the expediency of encouraging immigration and the occupation of our public lands, by affording to the working classes of Europe and to the young men of our own province additional inducements to settle and remain amongst us.

The enactment of a liberal homestead law with a free grant of land to bona fide settlers would, I apprehend, prove of inestimable advantage in adding to the number and quality of our resident population.

I am authorized to inform you that arrangements are being pressed for speedy appointment of Arbitrators for the revision and the adjustment of the debts, credits, liabilities, properties and assets of the late Provinces of Upper and Lower Canada, under the 142nd section of the British North American Act. When these gentlemen shall have completed their labours, a copy of their report shall be laid before you.

The expenses hitherto attending the establishment of a local government in this Province have been necessarily incurred upon the sole responsibility of the several heads of Public Departments appointed therein, but I have directed detailed accounts of all such expenditure to be submitted to you for your approval and sanction.

I have also caused estimates of the anticipated Revenue and Expenditure for the ensuing year to be prepared, which I commend to your careful attention, relying upon your readiness to make suitable

provision for the exigencies of the Public service within that period.

In carrying out the special objects for which you have been constituted as a Legislative body, you will also be required to bestow your most serious consideration upon such applications as may be made to you for the incorporation of companies for Provincial purposes, or for the promotion of local works and undertakings.

And it must be your endeavor while affording due consideration to individual enterprise to protect the interests of the public at large from the consequences of rash or ill-advised speculations.

In the fulfilment of these anxious and responsible duties, I have the utmost confidence in your zeal and fidelity to the trust committed to you by the Constitution, and in your loyalty and attachment to the person and government of our gracious Sovereign; but I would also beseech you always to remember that whilst your immediate functions are limited to matters of local concern, you form the most prominent and populous portion of a new born Dominion, which, I venture to hope, will ere long extend from the Atlantic to the Pacific, and be the home of a vast multitude of thriving and contented subjects of the British Crown. Your own position in this new Confederacy, weighty and influential as it now is, will hereafter become relatively of increasing magnitude, according to the degree of prudence, sagacity and foresight which you may use in the management of the important interests intrusted to your care.

May the blessing of Almighty God accompany your deliberations, and make them conducive to the public welfare and to the lasting happiness of the people of Ontario.

The Condition of the South.

COTTON CULTURE—THE NEGROES.

The following extract is from a private letter from Madison Station, Mississippi:

MADISON STATION, Dec. 17, 1867.

Tell us how times are with you. Down this way money is very tight. Dullness reigns at New Orleans. Cotton is on the decline. The British have us foul on cotton. They have built up their own cotton fields and ruined ours.

They are no longer dependent on us for that staple and never will be again. They are smart, but what fools we, to be so hoodwinked by them. People through this region are broke generally.

The negroes are stealing cattle, sheep, hogs, and killing them to get something to eat. The planters are all broke, and the negroes can find no employment. When turned off, their rations stop, and, having nothing to buy provisions with, they take to stealing.

But as that can't last, the negroes break from the plantations to the towns and cities. Thousands of them are without adequate shelter from the weather, and don't know where their next meal will come from.

In the towns and cities they huddle together like pigs, where, of course, morals and shame are unknown. It is estimated that this district from 30,000 to 50,000 will perish from hunger, exposure and destitution this winter.

And next year, what of it! Tax or no tax, there will be little cotton raised. It will no longer pay to raise cotton. I doubt if even a bounty of two and a half cents a pound, instead of a tax of that amount, would stimulate production.

It is too late. The goose that laid the golden egg has been strangled by British cunning and the day of American cotton is past, never to return.

Many white families have left this State for Illinois and other North-western States, where there are no negroes to steal all the farm produce. Other families will follow.

A Ghastly Account.

It would appear that the full inquiry of the New Orleans massacre has not been fully disclosed. The following ghastly account has been found among the records in the office of ex-Mayor Monroe.

CITY OF NEW ORLEANS.

To T. E. Adams, Chief of Police, July 31, '66

Cash paid for hauling forty-four loads of dead and wounded from around Mechanics' Institute to the Station House at \$3 per load \$138 00

Cash paid for carrying dead from Station House to Work House Yard, eight loads at \$3 24 00

Cash paid for hauling fifteen loads of wounded from Station House to Freedmen's Hospital at \$4 60 00

Cash paid for carriage hire for self and aide during the riot 75 00

\$397 00

I certify that the above was made necessary by the unfortunate difficulty of the 30th of July at the Mechanics' Institute.

(Signed) THOMAS E. ADAMS, Chief of Police.

Anna-Maria Story was married to Bob Short—a very pleasant way of making a “story short.”

PATRICK AND PETER.—An English paper has this story:—“A very curious incident occurred yesterday in the House of Lords during the progress of the Breadalbane Peerage case. Mr. Anderson, Q. C., in alluding to one of the persons whose name had been mentioned, called him Captain Patrick Campbell. The Lord Chancellor and the Captain's name was not Patrick, but Peter. Mr. Anderson said they were convertible terms. The Lord Chancellor: ‘What are St. Patrick and St. Peter the same?’ M. Anderson: ‘Yes, the names are the same.’ Lord Colonsay informed the Lord Chancellor that the learned counsel was right—in Scotland Patrick was Peter, and Peter was Patrick. The Lord Chancellor said it certainly was information to him.”

BELLEVILLE, MONDAY, DEC. 30.

Ontario Legislature.

The House on Saturday, after the speech was delivered, at once proceeded to business. A Bill was introduced providing for administration of oaths of office to persons appointed thereto and to Justices of the Peace. Petitions to incorporate the Toronto, Grey and Bruce Railway Company, the Toronto and Nipissing Railway Company, and Ontario College, were read. Hon. J. S. Macdonald moved that the select Standing Committees of the House for the present session be for the following purposes: 1st, On Privileges and Elections; 2d, Railways; 3d, Miscellaneous Private Bills; 4th, Standing Orders. The omission of the Committee on Contingencies created considerable discussion. Mr. Macdonald said the Government had resolved to abolish that Committee. His experience led him to believe that that Committee had no responsibility whatever—that it only led to expense and embarrassment in the appointments—that the principle was to make the Speaker and the Government responsible for all the expenses of the Legislature. Mr. McKellar, Mr. Blake, Mr. T. Ferguson and Mr. McCormick supported the appointment of a Contingent Committee. After considerable discussion the motion of Hon. John S. Macdonald was put and carried. Some resolutions respecting bribery were adopted.

It was decided to consider the Address to-day. The rules of the House of Commons, so far as applicable, were made the rules of the Legislature. Respecting the franking privilege, Hon. John S. Macdonald said that members putting their names on the corners of their letters and sending them to the post office in the Parliament Building there got them stamped, and they went free. Letters and papers coming to members were also free. Some reference was made to the printing, and the House adjourned.

Quebec Legislature.

The speech of His Excellency Sir N. F. Belleau, Lieut-Governor of Quebec, was delivered to the Legislature on Saturday last. It commences by welcoming the members to the ancient city of Quebec, refers to the important interests and grave duties entrusted to them; such as the administration of justice, of public education, of the machinery of our civil and municipal system, of our public charities, of the encouragement of science, letters and arts, of the improvement of the public domain, the development generally of our resources, of immigration, colonization, police, &c. He recommends, until after the arbitration relative to the finances of the late Provinces of Upper and Lower Canada, that no measure involving considerable expenditure should be introduced. Measures for the organization of the departments of administration, interpretation of the Statutes, &c., would be submitted. Reference is made to the importance of developing colonization, to the improvement of agriculture, the more systematic and prudent management of public funds and monies, the advancement of public education, and the encouragement of science, letters and the arts. Reference is made to the geographical position, of the Province of Quebec, and the speech closes with the following paragraph:

“I denounce by words, having borne part in the deliberations and labours of former Legislatures of this Province, I do not need to say to you how entirely my high trust committed to you commands my respect and sympathy. I pray that Divine Providence may deign to bless your labors and to your upon you and yours all its favors for the new year which is about to open, and during which we are to lay the foundations of the greatness and prosperity of this our Province of Quebec, so dear to all of us.”

Got their Eyes Open.

The London *Times* has at length got its eyes open as to the true character of the Fenians. So long as these ruffians confined their operations to Canada it was a matter of small consequence. The affair at Ridgewood was but a Donnybrook row on a small scale, and in its estimation, Canadians were making fools of themselves by creating a fuss about such a trifling scrape. It was well enough to arrest a few of the leaders and confine them a few months in gaol, but we were solemnly admonished not to hurt

a hair of their head. “Treat them with the utmost leniency,” was the request of the British Government and the press of England. What mattered it if they did shoot down in cool blood twenty or thirty of Canada's noblest sons, it was simply a slight abatement of feeling, and was a matter of no great concern. Chickens sometimes come home to roost, and England is experiencing now something of the same trouble, annoyance, and outrage which Canada suffered in the year 1866. How would it look if the Canadian Parliament were to send a request to the Imperial Government to “deal leniently with those misguided men.” What would the London *Times* say? And yet it would only be doing what the British Government and press did to Canada when her soil was invaded, and her young men murdered in cool blood. However, it is well that the people of Great Britain have at length got their eyes open, and it is to be hoped they will treat the leaders of the recent outrages in the same manner the Manchester murderers were served. The London *Times* of the 14th, in an editorial on the Clerkenwell outrage says:

“The time is past for clemency and forbearance. The Fenians have filled to the full the cup of wrath. In dealing with them public opinion will need rather to be restrained than incited. Ireland has suffered much at the hands of her self-constituted representatives, and never more than when she is made to appear before the world as a mother of assassins. It may be that this great crime will cure many who have taken the infection of Fenianism. At least, let England show that, whatever may have to be done, she will allow neither fear nor anger to sway the balance of justice.”

The *Telegraph* observes that “even before the outrage of last night, there could not be two opinions as to the propriety of the step taken by the Irish Government, of prohibiting the Fenian processions.” The papers generally concur in this view.

SHOOTING MATCH.—An elegant prize has been procured by the officers of the Grand Trunk and the Belleville Rifle Companies, which will be given to the best shot in the three Companies. The match will take place on New Year's Day. The prize is on exhibition at Mr. McFee's jewelry shop.

DENTRICAL.—It will be observed by an advertisement that Mr. Relyea is determined to keep pace with every improvement in his profession. One of the latest methods of extracting teeth is by using nitrous oxide gas, under the influence of which the operation is performed without pain, and there is no danger attending its application. The machinery for generating and administering the gas is in the operating room, and is very conveniently arranged. The testimonials of our medical gentlemen show that it is perfectly harmless. Dr. Relyea has opened a Dispensary in connection with his profession, where every article used in Dentistry is kept on hand. His laboratory is fitted up with suitable machinery, his rooms are elegantly furnished, and everything conveniently arranged for prosecuting his profession.

Telegraphic News.

BY ATLANTIC CABLE.

LONDON, Dec. 28, noon.—The Fenians seem to be unusually active all over the country. Nearly every hour in the day despatches are received by the authorities announcing either a contemplated movement by the brotherhood, or a telegraphic occurrence.

Telegrams of quite a serious nature have been received to-day from Cork, giving the details of another Fenian *coup-de-main*. Last night, about midnight, a large body of men with blackened faces, stormed the Martello tower near Cork. The guard of the tower was overcome and scattered, and the victors hastily collected together a considerable quantity of arms and ammunition and escaped with it without molestation.

The late operations of the Fenians have had the effect of rekindling the public excitement, which had nearly died out. Many improbable rumors are afloat, including one that a Fenian cruiser had been seen off the Irish coast, and was chased away by British war vessels.

A man was arrested in this city last evening on the charge of having fired the fuse which caused the recent explosion at Clerkenwell. From information in the hands of the authorities it is believed that the true culprit has at last been captured.

Commercial advices from Shanghai relative to the tea trade give the total exports of the new crop up to the 1st December at ninety millions of pounds. Green tea at Shanghai was active and firmer.

MADRID, Dec. 28.—The steamer in command of Admiral Tegethoff of the Austrian navy, having on board the remains of the late Archduke Maximilian, arrived at Cadix yesterday p.m.

The Session of the Cortes commenced yesterday. In the usual speech from the Throne, Queen Isabella pledged the support of the nation to his Holiness the Pope, for the preservation of the temporal power.

PARIS, Dec. 28, evening.—In the Corps Legislatif to-day, the Bill for the re-organization of the army was passed after several amendments. M. Rouher proposed nine years' service instead of eight, which after a sharp contest was carried. There was eighty-one opposing votes.

In his speech on the proposed amendment, he called attention to the armament of the neighboring powers, and supported his plan as the only one now practicable.

The Paris *Constitutionnel* to-day denounces the repudiation of Italy.

LONDON, Dec. 28, evening.—Another Fenian outrage was perpetrated to-day at Dublin. An effort was made to fire the General Post Office by means of Greek fire. The attempt was happily frustrated. Beyond the destruction of a few letters no great damage was done.

A large powder mill at Faversham, about fifty miles from here, was blown up and utterly destroyed this afternoon. Ten persons were killed outright and a large number injured.—Cause of explosion unknown.

Second Despatch.

SOUTHAMPTON, Dec. 29, eve.—The steamship “Borussia,” from New York on the 14th, has arrived.

LONDON, Dec. 29.—The steamship “Antwerp,” from New York on the 14th, has arrived.

PARIS, Dec. 29.—Bourse heavy. Investments of all kinds weak, and Rentes declining.

The Papal Government offers to pay the interest of those Italian bonds which represent the old debt of the Pontifical States annexed to the Kingdom of Italy. The Italian Parliament recently refused by a decisive vote to pay the coupons on those bonds.

ANTWERP, Dec. 29.—Petroleum weak; standard and white 44 francs 50 centimes.

LONDON, Dec. 29.—The London *Observer* says no new or extraordinary power will now be asked of Parliament by the Government for the repression of Fenian plots or disturbances. It is expected that, owing to the prostration of commerce and trade during the last part of the year, the January returns will show a serious decrease in the amount of the receipts from revenue in the United Kingdom.

A number of Russian statesmen and diplomats have met in St. Petersburg, and are holding a conference on the Eastern question.

Despatches from Italy represent that there is much political agitation in northern and southern Italy. In Naples and in the cities of Piedmont the excitement is dangerous, and fears are entertained that it may culminate in risings against the authority of the Government.

LONDON, Dec. 30, 11:15 a.m.—Consols 92½; 92½ for money; 91½ to 92 for account; Bonds 72 to 73½; Ill C 88½; Erie 45½.

LIVERPOOL, Dec. 30, 11:15 a.m.—Cotton quiet; sales 10,000 bales; middling Uplands 7½d; Orleans 7½d; shipments from Bombay since August 1st, 78,000 bales; total stock at sea designed for this port estimated at 184,000 bales, of which 70,000 bales are American.

LONDON, Dec. 30, 1:30 p.m.—Consols, Bonds and Erie unchanged; Ill C 89; markets unchanged.

LIVERPOOL, Dec. 30, 1:30 p.m.—Cotton unchanged. Corn 4½; White California Wheat 15s 2d; prices of other articles unchanged. Sugar quiet.

American Despatches.

HARTFORD, Dec. 29.—The Russian Government has made a contract with the Colt Patent Firearms Company of this city for the manufacture of thirty thousand Berdan rifles, the contract to be filled in eighteen months. One hundred revolving cannon have also been ordered by the Russian Government, to be built by the Colt Company, and the Russians also are to have some bombs.

NEW YORK, Dec. 30.—The *Herald's* special telegrams by the Cuba Cable state that the Legislatures of Trinidad and Antigua were in session.

Four hundred coolies had arrived at Demerara. Seven died on the voyage.

Lord Lyttelton had been given a warm welcome by the people of Jamaica.

A tidal wave and volcanic eruption had visited Grenada, destroying several houses.

The term of Governor Walker, of Barbados, had expired.

ALBANY, Dec. 29.—Last night the ice in the Hudson River between Albany and Troy broke up and commenced moving down, but its progress was arrested by the piers of the railroad bridge at this point. Large masses of ice were driven into the basin, and serious damage was threatened to the canal boats and other craft, but they were finally made fast and without much loss.

NEW YORK, Dec. 30, 1867.—The *Tribune's* Washington special says: Notwithstanding the abrupt termination of the correspondence between Secretary Seward and Lord Stanley on the “Alabama” claims, it is understood that Mr. Thornton, the new British Minister comes empowered with full authority to resume the question, with a view of effecting, if possible, an easy and amicable adjustment of the difficulty.

NEW HAVEN, Conn., Dec. 29.—John R. Goss, senior, who committed a murderous assault on Joseph Colton, committed suicide to-day by hanging himself to the door of his cell.

BOSTON, Dec. 29.—Some half-dozen prominent Republicans in the town of Waltham have had a verdict rendered against them for riding two men on a rail day after the assassination of President Lincoln. They sought to defend their course on the ground that one said he was glad that the President was dead, and the other burned him in effigy. Several women were engaged in rail riding the parties, but no action has been brought against them.

The accounts of John T. Henry, the defaulting teller of the First National Bank, Boston, are found to be short \$80,000.

S. A. FRANCISCO, Dec. 28.—The severest storm for years has prevailed for two days, doing much damage to the shipping and the city. Disastrous effects have been suffered in the interior also.

The mining news from British Columbia is encouraging.

The Victoria schools have been closed for want of funds.

NEW YORK, Dec. 30.—The steamer “Deutschland,” from Southampton, has arrived.

Miscellaneous Items.

A BRAVE DEEDMAN.—One of our Indiana regiments was fiercely attacked by a whole brigade in one of the late battles in Mississippi. The Indians, unable to withstand such great odds, were compelled to fall back about thirty or forty yards, leaving to the victors the utter mortification of the officers and men, their flag, which remained in the hands of the enemy. The color bearer, a private in the 10th Indiana, who had possession of the captured flag, with his musket, fell several to the ground, and returned safely back to his regiment. The bold fellow was of course immediately surrounded by his jubilant comrades, and surrounded by the gallantry. His captain appointed him to a sergeantcy on the spot; but he cut everything short by saying: "Oh, never mind, captain!—say no more about it. I dropped my whiskey-bag among the rebels and fetched that back, and I thought I might just as well bring the flag along!"

GOT WHAT I WANTED AFTER.—A young gent is discovered surrounded by his friends who are jesting with him regarding his attention to a certain young lady. Young Gent.—"Boys, I'll tell you how it is. I see I care nothing for the girl; I see the old man's pocket book that I am after." Chorus of friends.—"Ha! ha!" Second scene.—A parlor. Time, 11 p. m. Young lady laments. Young gent rises to depart, hesitates as if of doubtful mind, slowly remarks: "Miss Madam, excuse me, but you must be aware that my frequent visits, my attentions cannot be without an object." Young lady.—"Ah yes, so I have heard, and shall only be too happy to grant what you desire." (Takes from the table a paper parcel, and unfolding it, displays a large, old fashioned and empty money pocket book.) "This, I have been informed, is that object. Permit me to present it to you and consider it granted; you that you will have no further occasion to renew those visits and attentions."

A correspondent, writing from St. Paul, says: "Veneration plenty. Wagon loads of slaughtered deer stand in the streets waiting for purchasers at four cents a pound. Cranberries, large and luscious, are sold at one cent. Potatoes of enormous size and wonderful farinaceous richness are a drug in the market."

PROSPECTUS OF THE ROSE MINING COMPANY OF MADOC.

Capital Stock, - - - \$25,000.
Divided into - - 5,000 Shares.
5,000 Shares - - - \$5.00 Each.

Deposit on Subscription Twenty-five per cent.

GEO. D. WYCKOFF, A. L. McLELLAN, J. A. BURHAM, JR., J. E. O'NEILL, E. H. HALE, and HUGH PATRICK, are the owners of the property hereafter mentioned, and are desirous of forming a Stock Company, with the capital of \$25,000, and are to receive and take in payment for the said property \$1,250 in cash, and 2,250 shares of paid up Stock of the company. The said parties are now taking proceedings for its incorporation, under cap. 23, 27-28 Vic., and have much pleasure in calling the attention of the public to the following Prospectus.

This Company is being formed for the purpose of developing the Mineral Resources of five acres of land, being part of Lot No. 10 in the 8th concession of the Township of Madoc, in the County of Hastings, situated on the main road, between three and four miles from the village of Madoc, upon which Gold and Silver have been found in paying quantities, several assays having been made by Professor Wyckoff, who selected with great care this locality as being not only rich in minerals, but possessing facilities for mining which gives this company peculiar advantages over many others; there being on the property a high ridge or mountain of quartz, in which numerous veins of gold-bearing quartz crop out; and instead of sinking shafts, (a most expensive and tedious operation), drifts can be run from the base of the ridge, cross-cutting the different veins, and giving eighty feet of back to work on which will furnish as much ore as could be taken out for the next twenty years, and at a cost comparatively small, no machinery being required to free the mine from water.

This Company intend, as soon as a charter is granted, to erect a mill house, with suitable machinery for reducing and separating the precious metal, thereby saving the cost of cartage to other mills, and the great expense and inconvenience incurred in having the ore reduced and the metal extracted by custom mills.

Adjoining this property is a lake from which an abundant supply of water can be obtained for all purposes.

Another great advantage in this property is, that immediately the work is commenced ore can be taken out in quantities more than sufficient to pay the working expenses, and in that respect alone it will equal if not surpass any of the mines in that district, taking into consideration the richness and abundance of the ore, and the many advantages described above, it cannot but prove remunerative to those who may become interested in this Company.

DIRECTORS, PRO TEM.
GEO. D. WYCKOFF, ASA A. BURHAM, JR., F. E. KILBERT, A. L. McLELLAN, JAS. CARL RITCHIE, E. H. HALE.
PROV. PRESIDENT—GEO. D. WYCKOFF.
SOLICITORS—THOMSON & KILBERT.
Stock Book opened at J. W. Murton's Exchange Office, Hamilton. Application for Book and other communications may be addressed to any of the Directors, or to JAMES C. RITCHIE, Prov. Sec. & Treas., Hamilton, December 30, 1897. 1897-4

Hurrah for the First CHRISTMAS OF THE DOMINION.

R. H. JONES

BOARDING.

MRS. MCKENZIE can accommodate a few permanent boarders; also some daily boarders.
RESIDENCE—Pinnacle Street, opposite the market.
Belleville, Nov. 18, 1897. 170-4f

PROSPECTUS OF THE BAY STATE MINING COMPANY, (LIMITED). Capital Stock \$120,000, divided into 1,200 Shares of \$100 each. WORKING CAPITAL, - - - \$24,000.

THIS COMPANY is duly incorporated under Cap. 23 Cons. Statutes of Canada, and is formed for the particular purpose of developing the mineral resources of part of Lot 12 in the eighth concession of the Township of Madoc, containing the Bay State Mine and 83 acres of land secured to the Company, and generally for carrying on such other mining operations as may from time to time be determined upon.

A shaft, has already been sunk to the depth of 37 feet, each successive foot disclosing rich and new veins of silver. The lode is fully five feet wide, and, in the opinion of Dr. Otway, one of the best defined lodes yet discovered in the district. Indeed, he believes it to be a continuation of the same lode as that at the Richardson Mine, and that it may probably equal it in ultimate results.

Various assays have been made from rocks taken from the mine at different depths. One by Mr. Wyckoff, from 44 lbs. ore, taken from a depth of 20 feet, yielded:

Gold, 44 grains—value per ton. \$80 00
Silver, 4 1/2 lbs.—value per ton. \$4 17

Another by Dr. Otway, made with ore from a depth of 35 feet, yielded \$330 to the ton, including \$30 of silver. Another still from a chemist in Boston employed by A. P. Dyer of that city, made with rock from a depth of 27 feet, gave a yield of \$327 to the ton.

The average yield of silver from the Township of Madoc, varying from 30 to 35 feet—two of them by Dr. Otway and one by Mr. J. McFee—was \$514 to the ton.

An offer has been received from a highly respectable firm of machinists to erect a crushing mill and take half their pay in the Company's stock, their agent, having been to Eldorado and satisfied himself of the mine. Negotiations are now in progress for the erection of a mill, which it is hoped will be in operation within three months; so that dividends may be looked for at an early date.

There can be no doubt now of the probable success of most of our Mining Companies, if managed with tolerable prudence. It is well known that in Australia immense profits are realized from their mines, though their average yield of gold per ton of ore is only \$7, while in Nova Scotia it is only \$10, and in California nearly the same. The return of \$19 to the ton from the Bay State Mine in Turkey & Gilbert's Mill is therefore a sound basis to work upon, and will undoubtedly yield large returns; and yet, as it was taken from near the surface, it may be regarded as a mere indication of the richer deposits below. As a sample of what may be looked for, even with a moderate amount of gold to the ton, it may be stated that the Port Phillip Gold Mining Company, in Australia, obtained from their mine—which gives an average yield of only \$10 to the ton (equal to \$9.25)—the very large amount of \$230,000, for the first half only of the present year. Again, the Empire Mine, in Nevada, which has only a claim 30 ft. in length upon the Comstock lode, and whose quartz yielded only \$24.50 to the ton, realized last year the enormous sum of \$486,000. Other examples might be given from Nova Scotia and other gold countries; but every intelligent man can make these inquiries for himself.

This Company propose to issue at present only a very limited amount of stock, just so much as is needed to proceed vigorously in the development of the mine, as they feel confident that the stock must speedily rise in value; and if more funds should afterwards be needed, an advanced price can be obtained.

The following are the Directors for the first year:

E. H. HOLTON, Belleville.
F. H. ROUS, Belleville.
JOHN McFEE, Belleville.
R. E. LUND, Manager and Overseer of the Mine.
L. McQUARRIE, Eldorado.
J. B. LAZIER, Eldorado.
A. HURD, Port Perry.
DIAMOND & DICKSON, Solicitors.
BANK OF MONTREAL, Bankers.
E. W. HOLTON, President.
F. H. ROUS, Secretary and Treasurer.
Applications for shares may be made to the Secretary, JOHN McFEE, Front Street, Belleville, or to WILLIAM KERSTEMAN, 63 Church Street, Toronto.
BELLEVILLE, December 31, 1897. 109-3m

DEPOSIT ON SUBSCRIPTION, \$15 PER SHARE.

THIS COMPANY is formed, and proceedings taken for its incorporation, under Chapter 23, 27, and 28 Vic., for the purpose of developing the mineral resources of three acres of land, being part of the Moore Farm, and a portion of the North-east quarter of Lot 17, in the fifth Concession of Madoc. It is situated about forty rods from the celebrated Richardson Mine. At present there are two shafts sunk on the property about 200 feet apart, one 40 feet deep, and the other 35 feet deep. There is at the present time about 500 tons of ore already mined. The owners of the property have had one of this quartz crushed and amalgamated by Scott & Taylor's Mill, which returned \$55.80 in gold, which specimen can be seen at J. E. Ellis, on King Street.

There is no question whatever but that there is also a large quantity of Silver in the same rock, but as Scott & Taylor's Mill was not prepared to extract the Silver, it is not known how much Silver there is in the ore.

The projectors have determined only to sell sufficient stock to repay the advance, and to carry on the work satisfactorily. They have thereupon decided to sell only 833 shares of the value of \$80 each, payable one-half, or \$15, as above, on subscription, and the remaining \$15 on the 31st of January, 1898. Out of the above sales, \$10,000 is to be retained by the Secretary for working expenses.

In presenting this Company to the public, the Directors do so with confidence, inasmuch as there is no doubt (judging from the above test), that the returns on so small a capital will be excessively remunerative.

The Provisional Directors are as follows:

A. F. WOOD, late Warden of the County of Hastings.
RICHARD ARRLING, Managing Director and Superintendent.
T. S. McGLASHAN, of Madoc.
MAILOR BURWELL McGREGOR, of Madoc.
T. A. MITCHELL, of Madoc.
ALDERMAN VICKERS, of Toronto.
J. E. ELLIS, of Toronto.

McLELLAN & McLELLAN, Solicitors. A. F. WOOD, President.
BANK OF MONTREAL, Bankers. T. A. MITCHELL, Secretary and Treasurer.

Applications for Shares received by Alderman Vicker, Yonge Street, Toronto; J. E. Ellis, King Street, Toronto, and at the office of

WILLIAM KERSTEMAN,
63 Church Street, Toronto.
Toronto, November 20th, 1897. 173-1f

CAUTION.

THE perfection and cheapness of the AMERICAN WATCHES have given them a wide sale, and many of the inferior watches years ago were sold at a low price. It is now found that upon the popularity of the American watches, a large number of cheap watches are being made in imitation of the genuine, and by selling at a low price, are deceiving the public. The American watches are made in the United States, and are of the highest quality, and are guaranteed to be accurate. The American watches are made in the United States, and are of the highest quality, and are guaranteed to be accurate. The American watches are made in the United States, and are of the highest quality, and are guaranteed to be accurate.

The following are the trade marks on the several grades of our manufacture:

AMERICAN WATCH CO.
APPLETON, TRACY & CO.
WALTHAM WATCH CO.
P. S. BARTLETT.
W. M. ELLERY.
HOME WATCH CO.

PENNSYLVANIA RAILROAD COMPANY
Office of the General Superintendent,
Altoona, Pa., 18th Dec. 1896.

GENTLEMEN—The watches manufactured by us have been in use on the Railroad for several years, and our engineers, to whom we have given as per our equipment. There are now some three hundred of them carried on our line, and we consider them good and reliable time-keepers. Indeed, I have great satisfaction in saying your watches give us less trouble and have worn out more than any other watches we have used. As you are aware, the watches of English manufacture, never keep time as correctly, nor have they done as good service as yours.

In these instances I am sustained by my predecessor, Mr. Lewis, whose experience extended over a series of years.

Respectfully,
EDWARD H. WILLIAMS,
General Superintendent,
American Watch Co., Waltham.

NEW YORK CENTRAL RAILROAD,
Locomotive Dept. & Western Division.

GENTLEMEN—I have no hesitation in saying that I believe the great majority of locomotive engines have found by experience that Waltham watches are the most satisfactory of any for their use. They run with the greatest regularity and accuracy, and are not subject to the rough riding of an engine, and as I have never known one to wear out, they must be durable. I hope to see the time when every locomotive will be furnished with your watches, and furnish them to all engineers and conductors. In my view, it would greatly improve the regularity and safety.

Yours respectfully,
CHARLES WILSON,
Brotherhood of Locomotive Engineers,
American Watch Co., Waltham.

For sale by all first-class dealers in the United States and British Provinces.

ROBBINS & APPLETON,
New York.

Nov. 2, 1897.

The Daily Intelligencer

Will appear about five o'clock every afternoon (Sundays excepted) and will be furnished by Carriers at the rate of \$5 a year if paid in advance. \$6 otherwise. Single copies 5 cents. \$2.50 for 6 months; \$1.50 for 3 months.

It will contain the latest telegraphic news up to the hour of going to press, including Cable dispatches and the New York and Montreal Markets.

Arrangements have been made with RELIABLE CORRESPONDENTS in Madoc, Bridgewater, Namur and other points, who will furnish us with early and full information respecting the Gold Regions, and matters of general interest.

Special attention will be paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c., and in short, nothing pains nor expense will be spared to make the Daily Intelligencer worthy of public patronage.

RATES OF ADVERTISING.

A liberal scale of prices for advertisements has been arranged as follows:

Cards, not exceeding six lines, 60 cents per month.
Half square, 100 lines, \$1.00 per month.
One square, 6 months, \$2.00 per month.
Two squares, 6 months, \$3.00 per month.
Four squares, 6 months, \$4.00 per month.
Notices of Births, 50 cents.
Do of Marriages, 50 cents.
Do of Deaths, 50 cents.

"BUSINESS NOTICES"—All matter under this heading, headed or solid, 10 cents per line, measured by a scale of solid type.

Advertisements will be paid to reporting the proceedings of Courts of Law, Corporations, Public Meetings, &c., and in short, nothing pains nor expense will be spared to make the Daily Intelligencer worthy of public patronage.

Transient advertisements inserted at 7 cents per line for first insertion, and 5 cents for each additional insertion.

The Weekly Intelligencer

Is published every Friday Morning at \$2 per annum in full for the year, or sent by mail, and \$2 1/2 delivered by the Carrier, per annum in all cases in advance. When not paid until the close of the year, 50 cents will be added to each year's subscription. No paper discontinued until arrears are paid up, except at the option of the Publisher.

Within the past three months its circulation has rapidly increased, and the number now on our Subscription Books is over 1,400. With such a large and general circulation throughout this and adjoining Counties, the WEEKLY INTELLIGENCER presents unsurpassed advantages to advertisers.

RATES OF ADVERTISING:

Six lines and under, first insertion, 0.50
Each subsequent insertion, 0.15
Above (per line) first insertion 0.07
Each subsequent insertion per line, 0.05

"BUSINESS NOTICES"—10 cents per line each insertion, measured by solid matter.

A liberal discount made to those who advertise by the year.

Advertisements for insertion must be delivered before 12 o'clock, on Thursday to insure their appearance.

All advertisements without written directions inserted as forwarded, and charged accordingly.

The Intelligencer Job Office
Is supplied with Power Presses, Hand Presses, and possesses every facility for the rapid and perfect execution of every description of plain and fancy printing, at the lowest prices, and with the most promptness in the country.
